HORIZON GLOBAL

Horizon Global is the #1 designer, manufacturer and distributor of a wide variety of high-quality, custom engineered towing, trailering, cargo management and other related accessory products in North America, Australia and Europe.

Bargman

Bargman is the brand of choice in the **light-duty trailer and recreational vehicle markets.** With specialization in assemblies with multiple connections, varying wire lengths and mixed technologies, Bargman has become the RV industry's most widely known lights.

BULLDOG®

The BULLDOG line is characterized by unmatched strength, reliability, safety and value; count on BULLDOG to be Tough and Tested™. Gooseneck hitches, gooseneck couplers, jacks, trailer couplers and Wedge-Latch™ elements feature a high-strength, heavy-duty design that makes them the **toughest trailer components** available today.

Draw-Tite®

Draw-Tite was born out of a passion for outstanding performance and has come to represent **one of the best custom-fit vehicle products** available today. Each hitch designed must pass rigorous tests to become Tested Tough™. Draw-Tite is the brand of choice for years of dependable service.

FULTON®

Fulton performs best when the weather is at its worst. When innovative design is combined with quality and value, the result is a brand that is the obvious choice for recreational and marine applications everywhere. The Fulton line of trailer jacks, winches, and couplers has become the **industry standard for light and medium-duty trailering**.

REESE®

REESE brand has become a household name in the **heavy-duty towing** industry. From heavy duty fifth wheels and pin boxes to weight distribution systems to control sway, REESE's proven designs exceed industry standards, making it the brand of choice when performance is the expectation.

ROLA

ROLA has been Australia's premier vehicle outfitter of **roof racks and cargo management** products. Born of necessity, the first ROLA roof rack was the invention of an avid Aussie windsurfer who wanted something quiet, durable, stylish and vehicle-friendly. From there ROLA grew, and its superior designs gained popularity quickly. Now available around the world, ROLA products are highly innovative and outback ready.

TEKONSHA®

Tekonsha has evolved to become **a trusted name in towing safety**. The core product line consists of brake controllers, electrical wiring, trailer brakes, ModuLite® Modules and T-One® T-Connectors. Smooth, predictable stopping at all speeds has made the Tekonsha Prodigy®, Primus® and Voyager® trailer brake controls the best in class and most popular on the market.

Wesbar

Wesbar family of vehicle lighting and electrical products offers both incandescent and LED lighting for vehicles and trailers, plus an extensive line of 12 volt electrical connection products, Wesbar has continued to provide an **all-encompassing selection of options for agricultural, industrial, marine, recreation and utility manufacturers**.

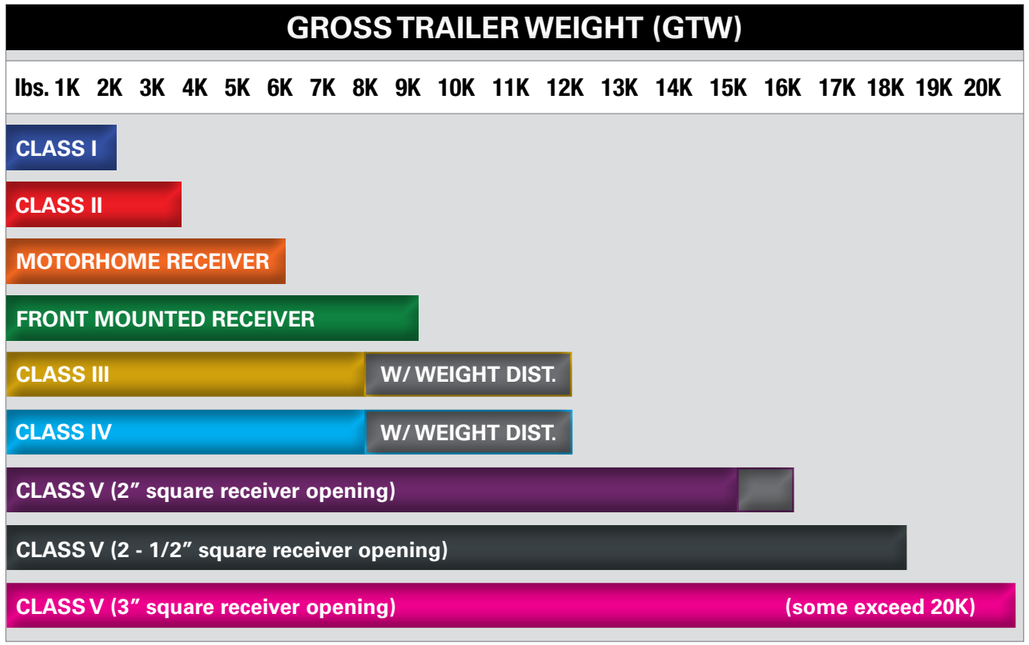
CUSTOM BUILT TRAILER HITCHES

- Top quality in every hitch and receiver we make
- Solid all-welded construction for maximum strength and safety
- Custom built according to manufacturer vehicle weight specifications and model year to ensure perfect fit and top towing performance
- All Draw-Tite hitches meet and exceed V-5 and SAE J684 standards and are inspected for quality and workmanship
- Computer-aided design and fatigue stress testing ensure a strong design that will withstand road abuse within specified capacities
- Finish is black powder coat over E-coat (industry leading corrosion resistance)
- Backed by nationwide Lifetime Limited Warranty

SELECTING THE RIGHT HITCH

- Determine the Gross Trailer Weight and Gross Tongue Weight of the trailer that you would like to tow. Check with the trailer manufacturer or if you are not sure, have it towed to a government inspection scale. Remember that the GTW should reflect a fully loaded trailer
- Consult your vehicle's owner's manual to determine if your vehicle is rated to safely tow your trailer
- Use the chart below to figure out the minimum "Class" of hitch that is required
- Consult a Draw-Tite dealer to find out which hitches are available for your vehicle.



QUICK DEFINITIONS

- GTW = Gross Trailer Weight ... Weight of the trailer fully loaded
- TW = Tongue Weight ... Weight exerted by the trailer coupler on the hitch ball
- WC = Weight Carrying ... Tow rating capacity of a hitch without a weight distributing system
- WD = Weight Distributing ... Tow rating capacity of a hitch when using a weight distributing system

DRAWBAR PROGRAM

- Draw-Tite is proud to present the Drawbar Program. Over the years, customers have requested the option of purchasing the Class I and Class II hitch and drawbar separately. Now you can. Life the Receiver Plus Program, the Drawbar Program offers specially priced drawbars with each Class I or Class II hitch sold. Please note: Discounted pricing is only available on one drawbar kit per hitch, and only when the two are purchased together.
- How to take part:
  1. Choose the correct Class I or Class II hitch part number for the vehicle application
  2. Determine if you need a drawbar (Yes/No)
     - If yes, order as follows: Hitch (24824) + Drawbar (3594) = 248240 part number. adding a "zero" to the end of the number will show that the two parts are being ordered together
     - If no drawbar is need, order the standard part number (24824)

CLASS I/II INVISI-HITCH™

- 1-1/4" square receiver tube opening
- One piece construction for a stronger hitch and easier installation
- Direct attachment allows hitch to be affixed well under vehicle for minimum visibility when drawbar is removed

EP	Fascia trimming may be required.
FE	Fascia trimming may be required. Allow additional installation time.
GP	Hitch crosstube concealed behind bumper.
HB	Slight fascia deformation may occur on some models.
HM	Hitch crosstube is visible beneath bumper.
JT	2WD models only.
JU	License plate relocation required to install hitch see 5443. (Sold separately)
JV	Rubber air deflector/fascia must be removed or trimmed to install hitch.
JW	4WD models only.
JX	Requires factory tow hooks for installation on 2WD models.
JY	Extensive fascia cutting required on models w/fog lamp option.
KB	Diesel engine models only.
KC	Does not fit 2500/3500 2WD (C-Series) models w/8 lug wheels.
KD	Fits 2500/3500 2WD (C-Series) models w/8 lug wheels only.
KE	Does not fit 1988-91 4 Dr. Crew Cab models.
KG	Skid shield must be removed or modified if present.
KI	Optional OEM Fog Lights must be removed for receiver installation.
Ø	Uses all existing holes. No drilling required.
RB	Hitch installation can be made easier with a "cutter" type drill bit.
RZ	License plate holder relocation and/or modification required to install hitch (see #49802 or #5443 Sold separately).
SV	Trimming or removal of under body appearance panel may be required.
TY	Requires factory tow hooks for installation.
X	Minor fascia trimming required.

RECEIVER HITCH APPLICATION GUIDE

- Draw-Tite hitch application look-up enables you to find the right towing system components each and every time. These pages have been developed to simplify the look-up of the proper hitch, drawbar, electrical connectors and wiring locations for your customer's vehicle by make, model and year

1). VEHICLE MODEL/STYLE & YEAR RANGE

Applications are separated first by make, and subsequently by model and yearly divisions.

2). HITCH FOOTNOTES

Footnotes reference additional information pertinent to the installation and availability of a particular hitch. Common footnotes such as "GP" (hitch crosstube concealed behind bumper) are listed at the bottom of each left hand page.

3). DRAW-TITE HITCH PART NUMBERS

Class I, II, III, IV and V receiver hitches are specific for each individual vehicle. This listing indicates the correct hitch by application.

4). DRAWBAR PART NUMBERS

Class I and Class II drawbars are specific for each individual vehicle. This listing indicates the correct drawbar (sold separately) by application.

5). PRICE CODES

Price codes reference specific prices found on Hitch and Accessory Price List.

6). RECEIVER TYPE

Receiver "Type" codes are referenced in a "Receiver Type" footnote box at the bottom of each right hand page.

7). NO DRILL

"ø" - No drilling requires.

8). RECEIVER WEIGHT RATINGS

WC or Weight Carrying, refers to the total load the hitch is capable of pulling, without the use of a weight distributing system. WD or Weight Distributing, is the total load capacity of the hitch when a weight distribution system is properly utilized.

9). RECEIVER SIZE

Receiver sizes range from 1-1/4" to 3".

10). INSTALLATION TIME

Average installation times (IN) are listed in minutes and are published for all hitches and T-One® wiring connectors. Times are based on common mechanical practices and should be used as an estimate as actual installation times may vary in each individual situation.

11). ELECTRICAL TYPE

Referenced in the footnotes at the bottom of each right hand page, electrical type codes assist in determining the proper electrical wiring products for the towing vehicle.

12). ELECTRICAL POSITIONS

Determining the location of tow vehicle's wiring is becoming increasingly difficult on today's modern vehicles. Note: See Electrical Reference Guide.

13). T-ONE® PART NUMBERS

T-One® part numbers are for vehicle specific applications.

14). TOW HARNESS PART NUMBERS

OEM replacement harness part numbers are for vehicle specific applications with factory tow packages.

15). ELECTRICAL FOOTNOTES

Footnotes reference additional information pertinent to the installation and availability of a particular electrical harness. Footnotes are listed at the bottom of each right hand page.

16). AMPERAGE RATING

Amp Rating references the maximum number of amps the Electrical Product will hold for the tow vehicle.
Stop-Turn Lights - 2 Amps Each
Taillights - 1 Amp Each
Clearance and Marker Lights - 1/4 to 1/2 Amp Each

17). CIRCUIT PROTECTION

Tekonsha recommends circuit protection on vehicles with 3 wire systems for extra safety.

18). OEM CONNECTOR TYPE

Tow Harness Connector type references the type of connector. Example: 4-Flat.

19). HARDWIRE CHOICE 1

The ModuLite® with short circuit protector, adds integrated short circuit protection that safeguards itself and the tow vehicle against harmful electrical shorts and mis-wire situations.

20). HARDWIRE CHOICE 2

Easy do-it-yourself tow vehicle wiring kits.

21). 6-WAY ADAPTERS

Used to convert any trailer wiring component, T-One® or taillight converter with a 4-Flat car end connector to a 6-Way round connector.

22). 7-WAY ADAPTERS

Used to convert any trailer wiring component, T-One® or taillight converter with a 4-Flat car end connector to a 7-Way round connector.

23). 7-WAY HARDWIRE

Easy do-it-yourself tow vehicle 7-Way connector wiring kit.

24). BRAKE CONTROL HARNESSES

Brake control harnesses are vehicle specific and designed for quick, easy installation.

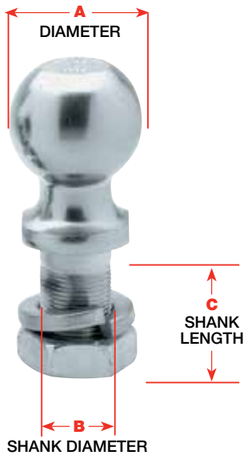
SELECTING THE RIGHT HITCH BALL



Selecting the right hitch ball is a must for trouble-free towing. Always use the properly rated hitch ball for your towing system.

- Your towing system's maximum weight rating is always equal to the lowest rated item in the system
- Your hitching system cannot be upgraded to a rating higher than the maximum rating of your hitch

For example, a 3,500 lbs. ball on a 2,000 lbs. max trailer weight-rated hitch does not increase your towing capacity to 3,500 lbs. Your hitching system is still rated at 2,000 lbs.

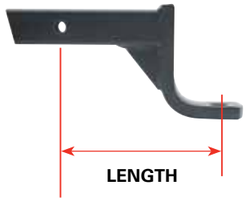
Conversely, a 2,000 lbs. ball on a 3,500 lbs. max trailer weight-rated hitch decreases your maximum towing capacity to 2,000 lbs.

- The hitch ball diameter (**A**) must be the same diameter as the trailer coupler (1-7/8", 2", or 2-5/16")
- The shank diameter (**B**) of the hitch ball should be the same as the hole diameter in the (correct) ball mount you selected
- The shank length (**C**) should be long enough to allow at least two threads to be visible when the hitch ball is installed and the nut completely tightened

SELECTING THE RIGHT BALL MOUNT

LENGTH

Distance from the center of the ball hole to the center of the pin hole



RISE

Distance from the top of the shank to the top of the ball platform

DROP

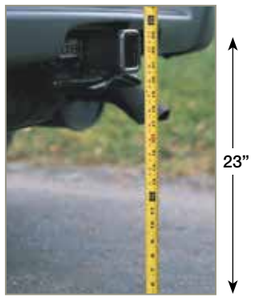
Distance from the top of the shank to the top of the ball platform

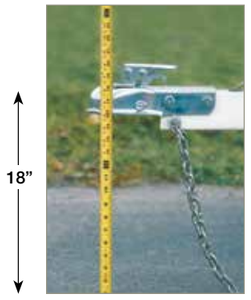
Tow vehicle and trailer level

For safe, comfortable towing, the trailer should always be set up to tow on a level plane.

Trailer not level

Sometimes a trailer's tongue is higher or lower than the ball mount on the vehicle, and a ball mount with a "rise" or a "drop" is required to level the trailer.





MEASURING FOR THE PROPER BALL MOUNT

1. Measure from the ground to the top of the hitch.
2. Measure from the ground to the (inside) top of the trailer coupler, when level.
3. Subtract the height of the hitch ball (most are 2-1/2" - 3" high) from coupler measurement.
4. An 8" drop is needed to make the trailer level.

THE DIFFERENCE IN THE TWO MEASUREMENTS IS THE AMOUNT OF BALL MOUNT "RISE" OR "DROP" REQUIRED.

HITCH BALLS

- Solid steel hitch balls engineered to meet all safety requirements of VESC regulation V-5
- Forged for superior strength
- When installing hitch balls, torque all 3/4" shank dia. (**B**) balls to 160 ft. lbs., 1" shank dia. (**B**) balls to 250 ft. lbs., and 1-1/4" shank dia. (**B**) balls to 450 ft. lbs.

7-WAY
COMPLETE KITS

The only product DESIGNED to deliver everything needed for a fully functional 7-Way INCLUDING a brake control plug. Custom made to reduce the time of installing fully functional 7-Ways. Available for Vehicle Specific Applications as well as Universal:

22551, Universal

- 4.2 amp reverse / 4.2 amp Stop, Turn / 16 amp Tail
- WORKS with Multiplexed vehicles
- Overload and short circuit protection on Turn/Brake, Tail and Reverse
- 25' of JACKETED cable, running up to brake control harness
- Robust Hardware Kit including more and longer cable ties, fuses AND circuit breakers

T-ONE® & MODULITE® IMPROVEMENTS:

- *4-Flats now have black wiring with color trace*

- *Improved Hardware Kits (includes longer cable ties)*

MODULITE® ZCI™
ZERO CONTACT INTERFACE

ZCI is the only product in the industry that has ZERO contact with the vehicle's electrical system. Using sensors that easily snap around wires for no direct contact, when electrical current is detected lights are engaged.

- Snap, Don't Snip™ – No cutting or splicing vehicle wiring!
  - Isolates trailer light operation from the tow vehicle's electrical system
  - Eliminates all Interference and Electrical draw on vehicle's lighting system
- Our ZCI sensors easily snap over wires to detect an electrical current and engage trailer lights -- crucial for high-end vehicles with complex wiring in which snipping, cutting, or splicing voids the vehicle's electrical system warranty.

- *New packaging! Colorful boxes provide a neater, more professional appearance while keeping the product more secure.*

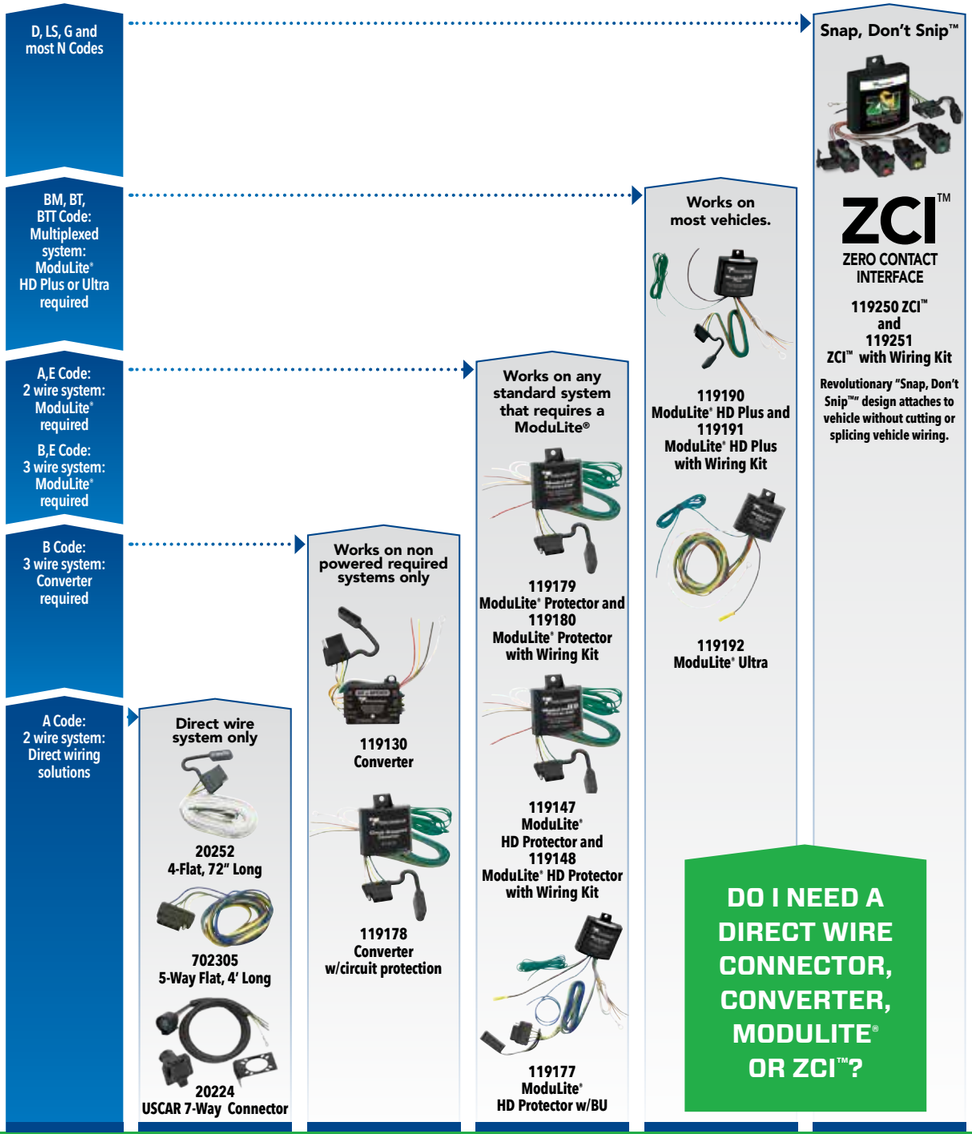
SELECTING THE CORRECT ELECTRICAL PRODUCT



TEKONSHA®
LIFE'S A JOURNEY. STOP OFTEN.

SELECTING THE CORRECT ELECTRICAL PRODUCT

A Code: 2 wire system.

Vehicles are listed as A when the vehicle's system matches the trailer's 2 wire system. You will know it is a 2 wire system if the vehicle's turn and brake functions are combined on one wire and the tail light function is on a separate wire. It is also important to make sure the vehicle's system is able to handle a normal load expected from one set of trailer lights. Directly wiring into the vehicle's system does not protect the vehicle from shorts or overloads. To ensure maximum vehicle protection and maximum trailer light brightness, a ModuLite® should be used.

B Code: 3 wire system. Converter required.

Vehicles are listed as B when the vehicle's system is different than the trailer's 2 wire system. This is when each function - turn, brake, and tail light - are on separate wires (3 wire system) and it has been determined that the vehicle's system is able to handle a normal load expected from one set of trailer lights. To ensure maximum vehicle protection and maximum trailer light brightness, a ModuLite® should be used.

A,E Code: 2 wire system. ModuLite® required.

Vehicles are listed as A,E when the vehicle's system matches the trailer's 2 wire system, meaning the vehicle's turn and brake functions are combined on one wire and the tail light function is on a separate wire. It has been determined that the vehicle's system is NOT able to handle a normal load expected from one set of trailer lights. When installing the ModuLite®, the brake input (red wire) will not be used.

B,E Code: 3 wire system. ModuLite® required.

Vehicles are listed as B,E when the vehicle's system is different than the trailer's 2 wire system, meaning the vehicle's functions are shared on one wire, the vehicle uses different voltages and frequencies to activate the rear combinations lamps, and the vehicle systems are NOT able to handle a normal load expected from one set of trailer lights. When installing the ModuLite® all input wires are used.

BM Code: Multiplexed wiring system. ModuLite® HD Plus, Ultra or ZCI required.

Vehicles are listed as BM when the vehicle's system is different than the trailer's 2 wire system, meaning the vehicle's functions are shared on one wire, the vehicle uses different voltages and frequencies to activate the rear combinations lamps, and the vehicle systems are NOT able to handle a normal load expected from one set of trailer lights. Either the ModuLite® HD Plus, Ultra or ZCI is required.

At time of installation, determine the type of the vehicle's shared system. For vehicles that share a tail and brake circuit, the tail input (brown wire) is not used. For vehicles that share a tail, brake and turn circuit the tail input (brown wire) and brake input (red wire) are not used.

BT Code: Brake/Tail multiplexed wiring system. ModuLite® HD Plus, Ultra or ZCI required.

Vehicles are listed as BT when the vehicle's system is different than the trailer's 2 wire system. This means the vehicle's brake and tail functions are combined on one wire, the turn function is on a separate wire (known as multiplexed share brake and tail), and it has been determined that the vehicle's system is NOT able to handle a normal load expected from one set of trailer lights. When installing the ModuLite HD Plus, Ultra or ZCI, the tail input (brown wire) is not used.

BTT Code: Brake/Tail/Turn multiplexed wiring system. ModuLite® HD Plus, Ultra or ZCI required.

Vehicles are listed as BTT when the vehicle's system is different than the trailer's 2 wire system, meaning the vehicle's brake, tail, and turn functions are combined on one wire (known as multiplexed shared brake, tail, & turn), and it has been determined that the vehicle's system is NOT able to handle a normal load expected from one set of trailer lights. When installing the ModuLite HD Plus, Ultra or ZCI, the tail input (brown wire) and brake input (red wire) are not used.

T-ONE® CONNECTORS - SIMPLE PLUG & PLAY

- Vehicle to trailer harness, vehicle specific
- If your vehicle does not have a trailer towing option installed, you'll need our T-One Connector. A simple plug & play option for your trailers electrical connections
- Benefits of our Tekonsha T-Ones include:
  - "Factory" appearance
  - Quick and easy installation
  - Solid construction, built with our surface mount technology
  - Weatherproof connection when needed
  - No cutting, splicing or taping of vehicle wires
  - Includes ModuLite or converter where needed
  - 16 gauge bonded wire with 4-Flat plug and integrated cap
  - Just plug in the T-One Connector and you're ready to tow
  - Limited 1 year warranty
  - See application guide for vehicle specific applications

ELECTRICAL WIRING

MODULITE® POWER MODULES

ModuLite® - ULTIMATE VEHICLE PROTECTION

TRAILER LIGHT POWER MODULES

- Virtually eliminates additional electrical draw on the vehicle's taillight circuits
- Ensures maximum trailer light brightness
- Powers the trailer's stop, turn, tail and running lights without overloading vehicle electrical systems
- Compatible with:
  - 2 & 3 wire systems
  - PWM
  - Multiplex
  - LED tail lights

IDENTIFYING THE NEED FOR MODULITE

- Today's vehicles have light gauge wire
- Computerized vehicle sensors monitor electrical current draw
- Without ModuLite the sensors may give false readings
- Adding additional towing lights w/o ModuLite may overload the system
- System problems and failure may occur without ModuLite

HOW IT WORKS

- ModuLite connects directly to vehicle's battery & powers the towing lights
- ModuLite provides from 2.1 to 16 amps of power per circuit to the trailer lights, depending on the unit

INSTALLATION

ModuLite power modules typically install in 30 to 45 minutes depending on the ease of routing the power supply wire from the battery to the rear of the vehicle.

WHEN YOU NEED MODULITE

- Trailer has more than one light assembly per side and is equipped with multiple clearance or running lights
- If the tow vehicle may tow a variety of different trailers
- Vehicle is equipped with lamp out sensors or other electronic devices that could be damaged by voltage fluctuations
- Owners manuals caution against adding additional loads to electrical circuits

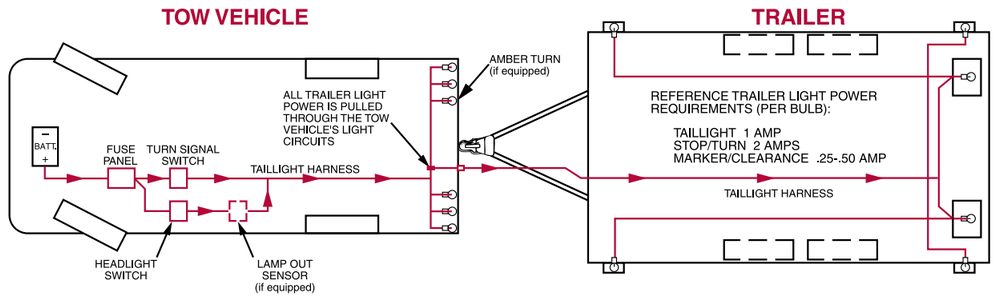
MODULITE® POWER MODULES

ModuLite® - ULTIMATE VEHICLE PROTECTION

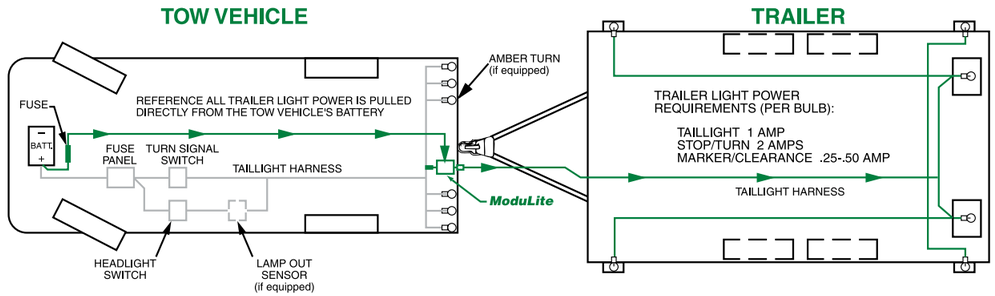
WITHOUT MODULITE

- All the additional power required to supple the trailer lights (represented by the red line) pass through the vehicle's electrical system including the fuse panel, turn signal switch, taillight harness and lamp out sensor if so equipped.



WITH MODULITE

- All the additional power required to supple the trailer lights (represented by the green line) is supplied directly from the battery. Only a small amount of power is required from the fuse panel, turn signal switch, taillight harness and lamp out sensor if so equipped, to signal when to illuminate the trailer lights.



MODULITE® ZCI™ - (ZERO CONTACT INTERFACE)

- ZCI is the only product in the industry that has ZERO contact with the vehicle's electrical system. Using sensors that easily snap around wires for no direct contact, when electrical current is detected lights are engaged.
- Snap, Don't Snip™ – No cutting or splicing vehicle wiring!
  - Isolates trailer light operation from the tow vehicle's electrical system
  - Eliminates all Interference and Electrical draw on vehicle's lighting system
  - Works with 2 or 3 wire systems
  - Works with PWM, Multiplexed systems with 2 or 3 wire hookup and Low side switched vehicles
  - Works with all known vehicle wiring systems including D, LS, G and most N codes
  - Rated for 4.2 amps for turn/stop & 7.5 amps for taillight trailer circuits
  - Robust design allows for interior or exterior mounting
- Don't take the chance of damaging your vehicle. Snipping, cutting, or splicing your wires can lead to:
  - Shorts and damaged wiring
  - Blown fuses
  - Corrosion
  - Warning lights and diagnostic codes
  - Costly and time consuming repairs
  - Expensive dealership code resets
- Our ZCI sensors easily snap over wires to detect an electrical current and engage trailer lights -- crucial for high-end vehicles with complex wiring in which snipping, cutting, or splicing voids the vehicle's electrical system warranty.
- Have a leased vehicle? The ZCI is easy to remove without leaving any permanent damage. Take to your next vehicle with the same easy installation.

MODULITE® HD PLUS

- The unit is rated for up to 5.0 amps for Turns/Stops circuits and 7.5 amps for the Taillight circuit
- Works on all vehicle types including Standard, PWM and/or Multiplex systems
- Has integrated, re-settable Short Circuit and Overload protection. Safeguards itself and the tow vehicle from shorts and installation wiring mishaps.
- Draws power directly from the vehicle battery. Uses less than 5mA of the vehicle circuit for sensing to turn the trailer functions on and off.
- Works with either LED and/or Incandescent bulbs (vehicle & trailer)
- The trailer brakes will override the hazard lamps when the brake is activated
- Will not work with vehicles with low-side switch
- All solid-state components in a potted encapsulation. Includes integrated protective cover

MODULITE® HD PROTECTOR

- The unit is rated for up to 5.0 amps for Turns/Stops circuits and 7.5 amps for the Taillight circuit
- Has integrated, re-settable Short Circuit and Overload protection. Safeguards itself and the tow vehicle from shorts and installation wiring mishaps.
- The taillight circuit has been upgraded to work with vehicles that use a pulse width modulation (PWM). This ensures full brightness of the trailer lights during operation.
- Draws power directly from the vehicle battery. Uses less than 5mA of the vehicle circuit for sensing to turn the trailer functions on and off.
- Works with either LED and/or Incandescent bulbs (vehicle & trailer)
- The trailer brakes will override the hazard lamps when the brake is activated
- Will not work with vehicles with low-side switch or multiplex systems
- Can be used on a 2-wire or 3-wire system

MODULITE® HD PROTECTOR WITH BACKUP

- The unit is rated for up to 4.2 amps for Turns/Stops circuits and 7.5 amps for the Taillight circuit and 4.2 amps for Back-Up circuit
- Integrated 5-flat electrical wiring connector. Fifth circuit added for surge brake lockout or backup light circuit on trailers
- Has integrated, re-settable Short Circuit and Overload protection, to safeguard itself and the tow vehicle from sorts and installation wiring mishaps
- The taillight circuit has been upgraded to work with vehicles that use a pulse width modulation (PWM); this will allow the converter to turn on fully and gives the trailer lights full brightness during activation
- Draws power directly from the vehicle battery and uses less than 5mA of the vehicle circuit for sensing to turn the trailer functions on and off
- Will work with either LED and/or Incandescent bulbs (vehicle & trailer)
- The trailer brakes will override the hazard lamps when the brake is activated

NOTE: Most Bargman 7-way cable products meet UL standards and are appropriately marked. If a non-UL listed cable will be used to connect tow vehicles to trailers capable of housing or transporting live occupants, Horizon Global recommends the use of a wiring Junction Box. This will provide a simplified method of connecting wire leads from the trailer connector to the UL listed trailer wiring.

- A dielectric compound used with electrical connections
- Prevent voltage loss from arcing and protect contacts from corrosion
- Suppresses radio frequency interference, dissipates heat, insulates trailer wiring connectors and seals out moisture
- Effective for automotive, RV and marine electrical applications
- Non-water soluble

ELECTRICAL TESTERS

- Plug these testers into any car connector and you will have an instant test of running light circuits
- Features LED display to show completed circuit for the running lights, left turn signal and right turn signal
- Auxiliary and electric brake circuit are included on the 6-way tester and auxiliary, electric brake and battery charge are included with the 7-way tester
- One piece units with internal ground
- Proper installation and set-up of a brake control, when a trailer is not readily available, is possible with the 7-way tester
- Current Monitor testing device is designed to assist in determining whether a tow vehicle's 7-way blade car end connector has been wired properly. (Current Monitor is an excellent diagnostic tool for installation, setup and troubleshooting of electric trailer brake controls)
- The Trailer Tester is designed to help you quickly identify problems in the wiring of the trailer. This is done by testing the Left Turn, Right Turn, Tail/Marker, Brake and Back Up circuits on the trailer. The tester indicates approximate amount of current in each circuit. It will also test the voltage of the external battery connected to the trailer charge circuit (i.e. trailer battery)
- Brake Control Bench Tester is a test device designed to determine if a brake control is working properly. Checks brake control output, independent of vehicle wiring. Simulates many fault conditions including open ground, short circuit, open load and more

PRODIGY® RF

The perfect shared-trailer solution. If you take to the road with multiple vehicles, there's really only one solution: Prodigy RF

- Benefits of the Prodigy RF:
  - User does not need a dash mounted, hard wired brake control
  - True proportional trailer braking, forward or reverse
  - Trailer braking power supplied via 7-way connector from the vehicle
  - Suitable for use on any trailer with up to 3 braking axles
- In the tow vehicle (hand held unit):
  - Wireless communication between the remote hand unit and trailer mounted power module eliminates the need for under dash wiring
  - Easy to see LED display for trailer brake voltage, power output and diagnostics
  - Easy to use remote hand control; includes the Prodigy "Boost" system to allow for different levels of customized braking
  - Unit provides continual diagnostic scanning with a visual warning display
  - Hand held unit plugs into any standard 12 volt power accessory adapter
  - Hand held unit has a limited 5 year warranty
- On the trailer (power module unit):
  - Power module uses standard RV blade style (Bargman) 7-way truck and trailer connectors
  - Trailer power module is watertight and is powered through 7-way cable from the tow vehicle
  - Multiple mounting options on the tongue or front of the trailer
  - Trailer mounted power module has a limited 15 year warranty (limited 1 year warranty on cord)

P3®

Taking innovation to a whole new level. P3; the industry's most advanced electric trailer brake control.

- A true proportional braking system, P3 has several added features, making it the new standard for electric trailer brake controls
  - 5 storable setting options for pulling different trailers or preferences of multiple drivers
  - A distinct, easy-to-read LCD display with multiple screen color options
  - "Up-Front" controls provide easy access to all P3 features
  - Easy to understand diagnostics show output current, battery/brake/output voltage
  - A "flashing red" warning system alerts user to "No Trailer Brake" situations
  - Select Electric over Hydraulic or Electric trailer brake mode
  - Numerous mounting options - including 360 degree vertical rotation
  - Screen information display in English, French or Spanish
  - "The Original Boost" feature allows for different levels of customized braking
  - Compact, dash-hugging design
  - Integrated Plug & Play port for 2-plug adapters
  - Snap-in mounting clip allows user to remove and store the control when not in use
  - Electric trailer brake control for up to 4 braking axles

Advanced Intelligence

- **NEW** auto dim feature allows for better viewing, day or night
- Reverse battery protection for both vehicle and breakaway
- Designed to work with electric over hydraulic brake systems
- Numerous mounting options – including 360 degree vertical rotation
- Digital display depicts voltage delivery to trailer during braking
- No level adjustment necessary – it adjusts itself to varying terrain as you drive
- Great for backing into tough spots! Works proportionally in reverse - with the ability to disable when not needed
- Produces stops that are in proportion to vehicle's deceleration rate
- "Boost" feature gives users the ability to apply more initial trailer braking power when towing heavier trailers
- Continual diagnostics check for proper connection, shorted magnet conditions and much more
- Integrated Plug & Play port for 2-plug adapters
- Pocket-mount allows user to remove and store the control when not in use
- Electric trailer brake control for up to 4 braking axles

PRIMUS® IQ

The smarter braking solution. Primus IQ is a totally proportional electric trailer brake control.

- This easy-to-set system allows the driver maximum flexibility when determining how the trailer should respond to a braking event. Snap-in dash mounting clip and removable electrical connector allow the unit to be quickly stored (or moved to another vehicle) when not in use.
  - Works proportionally in reverse
  - No level adjustment necessary, adjusts to varying terrain as you drive
  - Digital display shows voltage to trailer during braking
  - "The Original Boost" feature allows for customized braking
  - Integrated Plug & Play port for 2-plug adapters
  - Diagnostic features incorporated in LED display
  - Electric trailer brake control for up to 3 braking axles
  - Snap-in mounting clip allows user to remove and store the control when not in use

VOYAGER®

The Voyager incorporates Tekonsha's patented braking sensor and is the best value you'll find for smooth and secure trailer braking.

- Broad control range makes setting quick and easy
- As braking power is applied, the LED changes color gradually from green (completed circuit) to red, to indicate relative braking power
- Advanced electronics minimize false braking for smoother ride
- Electric trailer brake control for up to 4 braking axles
- Plug & Play feature allows quick and easy connection

I-STOP™ IQ

A totally proportional electric trailer brake control, the Draw-Tite I-Stop IQ is self-leveling so no level adjustment is necessary.

- Integrated Plug & Play port for 2-plug adapters
- Self-diagnostics features will illuminate LED readout when issues occur
- Includes a "Boost" feature
- Works proportionally in reverse
- Snap-in dash mounting clip and hardware included
- Digital LED readout
- Electric trailer brake for 1-3 axles

PILOT®

The Pilot has just made owning and operating a digital brake control easier than ever.

- Because of the flexible mounting options, you are able to mount the Pilot in any direction. Our microprocessor allows you the ability to read the display even when the Pilot is mounted upside down. The Pilot's digital display shows voltage output to the brakes with additional protection against short circuit or loss of ground. Capable of handling up to 3 axle trailers.
  - Large easy to read dual digital display
  - Dark smoke lens ideal for direct light applications; performs better than red lens
  - Microprocessor allows control to be mounted upside down and still have a readable display
  - Protection against short circuit and loss of ground
  - Standard mounting bracket included, optional pivot mount available (P/N 5298)
  - For use on any 12 volt negative ground system
  - Plug & Play feature allows quick and easy connection

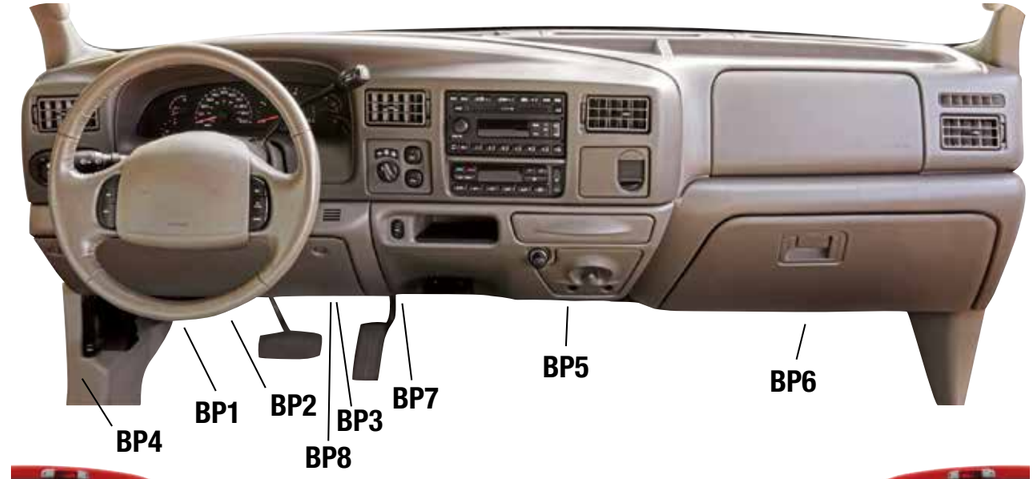
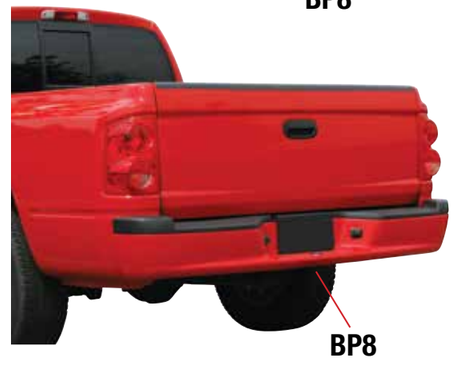
BP6 - Under or behind dash on the passenger side, near glove box.

BP7 - Centered behind dash between the steering column and the radio.

BP8 - Under or behind dash to the right of the steering column and brake pedal. Also includes 7-Way adapter kit located at the rear center behind the bumper. This unit complies with all applicable California Regulations.

BP9 - Includes 7-Way adapter kit located at the rear center behind the bumper. This unit complies with all applicable California Regulations.





BRAKE CONTROL WIRING HARNESSES

- All vehicle specific brake control wiring harnesses are available in 1-Plug or 2-Plug styles
- 1-Plug units are designed for brake controls manufactured with electrical wiring mounted on the back of the unit, otherwise known as a pigtail. Wiring harnesses must be spliced into the existing pigtail to allow the vehicle specific plug to be installed.
- 2-Plug units are designed for brake controls that have a wiring port built into the back of the unit. Simply plug the brake control end of the wiring harness into the back of the brake control and the vehicle end into the automobile's port. Brake controls that utilize the 2-plug style of wiring harness will be identified with the Plug & Play logo.
- See application guide for vehicle specific harnesses

STEADi-FLEX®

STEADI-FLEX® HEAVY DUTY WEIGHT DISTRIBUTING KIT

This weight distributing system is designed with tapered spring bars for a softer ride. Friction material, used for sway control, provides a quiet ride. Wide spring bars, with a simple pin and clip assembly, reduce wear in the head and on the friction pads.

- No drill installation
- Hitch bar included
- Will fit 7-in frames w/bottom mount couplers
- Integrated sway control
- Limited lifetime warranty

STRAIT-LINE® WEIGHT DISTRIBUTION HITCH

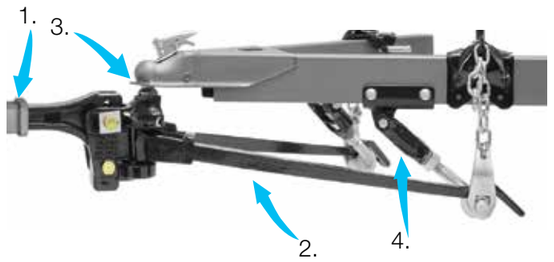
Get the control of Reese's patented Dual Cam High-Performance Sway Control and the performance of Reese's Weight Distributing System in one easy-to-install package. The Strait-Line Hitch's pro-active design literally forces the trailer to stay in a straight line behind the tow vehicle.

- Simple installation and adjustment
- Fully automatic and self-centering
- Hooking up spring bars automatically hooks up sway control
- Specific attachment reference points provided
- No U-bolts to conflict with bottle racks or other A-frame mounted items
- Reduced noise

REESE®

WEIGHT DISTRIBUTING SYSTEMS

- Add a weight distributing system to provide a more level ride, greater steering and brake control.
- The differences are in construction materials, welding, manufacturing processes and hook-up
- Adjustment is simple because of the easy-to-operate snap-up brackets that allow spring bar tension to be adjusted by changing links in the support chains.
- Rather than merely supporting the trailer tongue weight (TW), weight-distributing hitches apply leverage between the towing vehicle and trailer causing the TW to be carried by all axles of the tow vehicle and trailer.
- A Weight Distributing Hitch System is composed of *four major elements:
    1. The hitch receiver
    2. The weight distribution kit
    3. The hitch ball
    4. The sway control (see below)



They work in unison to provide complete towing system compatibility.

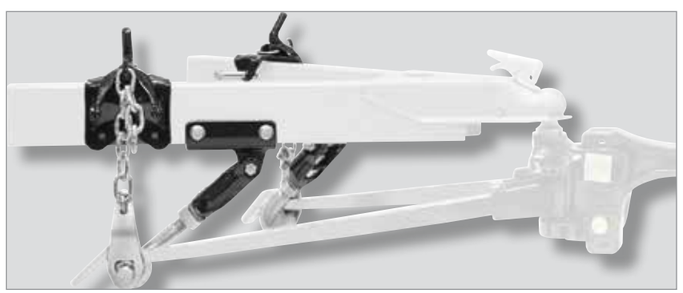
DUAL CAM HP

- Premier Sway Control – Unlike the friction sway control, the Dual Cam HP has the ability to forestall sway from the start in addition to resisting sway once it's begun.
- Works only when needed and allows free and easy vehicle/trailer interaction
- Installs on the trailer and therefore doesn't require adjustment every time the tow vehicle and trailer are hooked up, unless ball mount height angle or the number of working chain links are changed
- Integrated cams in the spring bars reduce noise
- No U-bolts to conflict with bottle racks or other A-Frame mounted items
- Specific attachment reference points provided
- Simple, easy adjustment of centerline
- Fits more applications
- Improved installation times
- Years of extensive field testing

Dual Cam HP



WHY CHOOSE OUR WEIGHT DISTRIBUTION SYSTEMS?

- We have been the leader in weight distributing systems for more than 60 years
- Over those years, much has changed within the industries we serve
    - Tow vehicles and their frames have been made lighter while the trailers have become heavier
    - The technology utilized yesterday can no longer be used in today's world

• QUALITY RAW MATERIALS

- Metal purchased from high quality steel mills with history of performance
- Metal routinely audited by third party labs for chemistry

• QUALITY MANUFACTURING PROCESS

- Inducting heating and forming allows for tapering bars to improve comfort and performance
- Bars are produced for high strength and excellent durability
- Special processes are employed to remove scale and compression-set high stress surfaces

• QUALITY TESTING

- Spring bars are physically tested for spring rate, maximum strength and fatigue life
- Hardness testing and microscope analysis ensure a quality heat treat result

SELECTING THE RIGHT WEIGHT DISTRIBUTING SYSTEM

- **TO DETERMINE THE CORRECT WEIGHT DISTRIBUTING HITCH:**
  1. Determine the tongue weight of your trailer
  2. Estimate the vehicle cargo load
  3. Match the sum of these weights to the proper Reese weight distributing hitch

- **HITCH WEIGHT = TONGUE WEIGHT + VEHICLE CARGO LOAD BEHIND REAR AXLE**
  - Tongue weight includes the trailer tongue weight with full gas, water and waste systems and everything packed inside the trailer. Vehicle cargo includes all materials carried in your tow vehicle, such as boat motors, gas cans, tools, etc.

TONGUE WEIGHT IN USE																	
RATING	200	300	400	500	600	700	800	900	1000	1100	1200	1300	1400	1500	1600	1700

- **EXAMPLE:**

Tongue Weight - 500 lbs.

Vehicle Load Weight - + 200 lbs.

Total Hitch Weight - = 700 lbs.

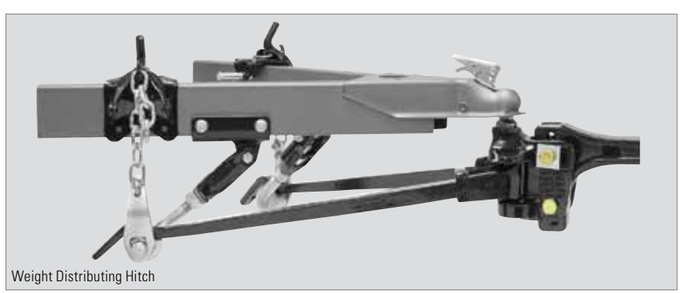
*Using the selector shown above, an 800 lb. tongue weight distributing hitch is adequate.

- **600 LB. WEIGHT DISTRIBUTING HITCH**
  - Specially suited for use on medium boat trailers, light travel trailers, single horse trailers, heavy fold-down campers, heavy luggage or utility trailers, etc.

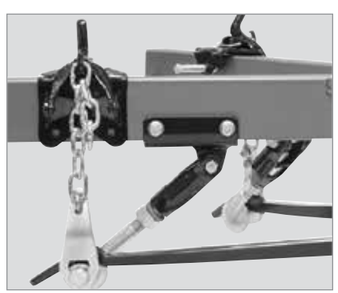
- **800 LB. WEIGHT DISTRIBUTING HITCH**
  - Ideal for medium travel trailers, heavy boat trailers, heavy horse trailers.

- **1,200 LB. WEIGHT DISTRIBUTING HITCH**
  - Excellent with heavy travel trailers, marine and horse trailers.

- **1,500 LB. AND 1,700 LB. WEIGHT DISTRIBUTING HITCHES**
  - Great for agricultural, marine and heavy recreational use.



Weight Distributing Hitch



STRAIT-LINE® SYSTEM

- This is the ultimate hitch in detail and design. No other hitch gives the driver the control this one does at a reasonable price. The Strait-Line Hitch consists of our patented Dual Cam High-Performance Sway Control and our High-Performance Weight Distributing System in one easy-to-install package.
- The Strait-Line Hitch was given this name as its pro-active design literally forces the trailer to stay in a straight line behind the tow vehicle. Sway is controlled by the Dual Cam High-Performance System. The stronger the sway force, the more the Dual Cam System works to stop it.
- The Strait-Line Hitch combines weight distributing with the best proven pro-active sway control system available in a newly-designed, easy-to-install kit.
  - Simple installation and adjustment
  - Fully automatic and self-centering
  - Hooking up spring bars automatically hooks up sway control
  - Reduced noise
  - No U-bolts to interfere with bottle racks or other A-Frame mounted items
  - Specific attachment reference points provided
  - Easy adjustment of centerline
  - No need to relocate items on top of A-Frame to install Dual Cam High-Performance Sway Control
  - Limited lifetime warranty

STEADI-FLEX® HEAVY DUTY SYSTEM

- This weight distributing system is designed with tapered spring bars for a softer ride. Friction material, used for sway control, provides a quiet ride. Wide spring bars, with a simple pin and clip assembly, reduce wear in the head and on the friction pads.
  - No drill installation
  - Will fit 7" frames with bottom mount couplers*
  - 2" deeper drop on drawbar
  - Integrated sway control

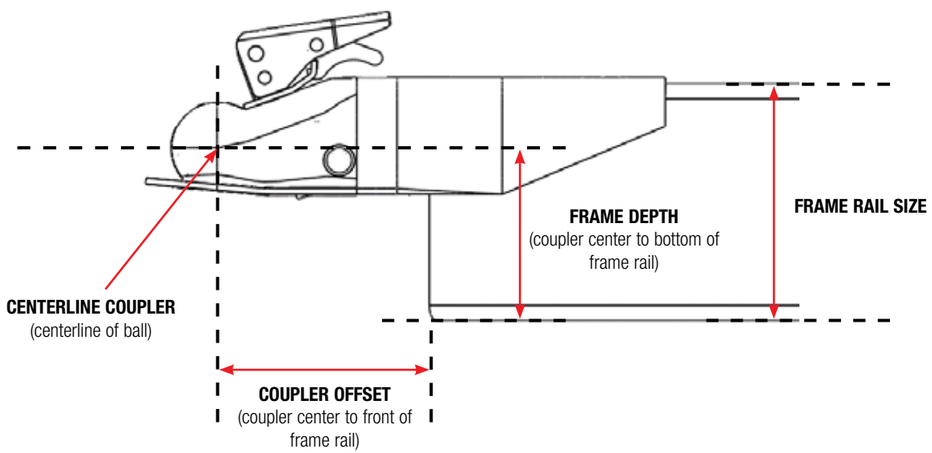
STEADI-FLEX® HEAVY DUTY SYSTEM COUPLER CHART

- Trailers with top mounted couplers:
  - Clearance between the Steadi-Flex ball mount and trailer frame is needed to eliminate potential contact shown at red arrows below



- Notes:
  - This pertains to top mount couplers only. Any bottom mount coupler with a 4" - 7" frame will work without issue.
  - These values are general guidelines for frame sizes and coupler heights assuming straight level installation. Chain loops and other brackets or accessories are included in the Coupler Offset dimension and must be clear of the Coupler Offset area or modified.
  - For intermediate measurement conditions between green and red, ensure at least 3/4" clearance between ball mount and trailer frame rail/accessories. For frame rail depth over 5", this includes during steering on flat ground.

TRUNNION STYLE SYSTEM

- Reese has combined the best of the features from all of our weight distributing kits to create the High-Performance Trunnion Kit. It includes a head design with superior strength and easy adjustment.
- The head includes a forged raised ball platform and forged Trunnion mounts. The channel of the head utilizes our “serrated washer” design. The serrated washers make it easier to dial in the set up of the High-Performance Weight Distributing Kit.
- In addition to the changes in the head, the High-Performance Weight Distributing Kit includes the highest rated spring bars per class in the industry. They also feature an integrated cam for easy set up with the optional Dual Cam High-Performance Sway Control. Other features include 9-link chains for easier set up on larger trailer frames and innovative snap-up brackets designed for superior strength and durability.
  - Raised hitch ball platform eliminates the need for raised hitch balls
  - Easy-to-use serrated washers for head adjustment
  - Forged ball platform and spring bar mounts
  - Rated up to 17,000 lbs. GTW and 1,700 lbs. TW
  - Limited lifetime warranty

DUAL CAM HIGH-PERFORMANCE SWAY CONTROL

- This patented product is Reese products main technique for controlling trailer sway. Unlike Friction Sway Control, this approach works to control sway from the start rather than just resisting sway once it's begun. And it works only when needed. The advantage of the Dual Cam System is its ability to forestall sway in addition to sway resistance. It works to hold down the start of swaying activity while at the same time allowing free and easy vehicle and trailer interaction. Another advantage of the Dual Cam System is that it is installed on the trailer and therefore does not require adjustment every time the towing vehicle and trailer are hooked up, unless hitch weight or tow vehicle loading are changed.
  - Integrated cams into the spring bars reduce noise
  - No U-bolts to interfere with bottle racks or other A-Frame mounted items
  - Specific attachment reference points provided
  - Fits most applications
  - Improved installation times
  - Years of extensive field testing
  - Limited lifetime warranty

GOOSE BOX™ GOOSENECK COUPLER FOR RVS

- Take the heavy equipment out of the truck bed! The Goose Box gooseneck coupler is specifically designed for RV trailer owners who wish to tow with their gooseneck hitch. The Reese Goose Box replaces a traditional pin box so the RV works with the truck gooseneck hitch. Includes 5th Airborne technology for a superb ride.
- Step up to RV comfort and keep you gooseneck hitch
- World's first OE approved gooseneck adapter, Endorsed by Lippert Components, Inc. for their frame systems
- Fits Lippert #1621 and #1716 wing sets
- 5th Airborne expertise reduces stress transferred to the RV frame
- Independent lab tested & proven to provide a better ride than king pin "bolt-on" adapter solutions (Bosch Automotive Proving Grounds)
- BULLDOG® gooseneck coupler technology with traditional king pin styling
- Air bag, dual shocks and hollow rubber springs provide multi-directional shock absorption for a smoother driving experience
- Air pressure relief valve prevents overfilling of air bag
- Available in bulk or individual packaging
- Rated for 16K & 20K lbs. capacity utilizing both CSA & SAE J2638 test standards
- Limited lifetime warranty

GOOSENECK HITCH SYSTEMS

- Gooseneck Hitch Systems conveniently allow unrestricted use of the pickup bed. In-truck platforms support 2-5/16" and 3" hitch balls. All framework for Gooseneck Trailer Hitches reside under the bed of the truck with only the ball exposed above the bed of the truck. Stronger, and able to utilize the full suspension of the truck, Gooseneck Hitch Systems are rated up to full towing capacity of the vehicle as determined by the manufacturer. Draw-Tite Gooseneck Hitch Systems utilize a unique set of mounting rails, specific to each vehicle, that will accommodate any of the hitch heads.

HOW LARGE OF A TRAILER CAN I TOW?

- Each truck has a published Gross Combined Weight Rating GCWR. This is the maximum allowable tow rating in terms of the combined vehicle and trailer weight. When the Gross Vehicle Weight GVW is subtracted, the maximum Gross Trailer Weight is revealed.
- In this example, the maximum allowable trailer towing weight is 12,800 lbs. GTW. The rail kit for this vehicle has been tested to meet maximum vehicle tow capacity.

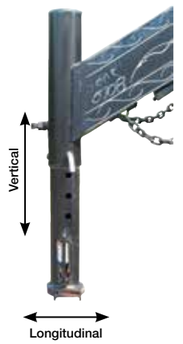
GCWR - GVW = MAX. GTW

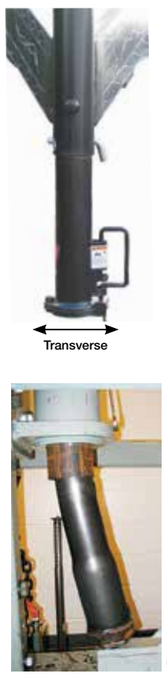
2001 GMC Heavy Duty 2500, 4 Wheel Drive Extended Cab
Engine: Duramax 6600
Horsepower: 300 hp @ 3100 rpm
Torque: 520 ft. lbs. @ 1800 rpm
Transmission: Allison 5-speed Automatic
Axle Ratio: 3.73 to 1
GVW: 9,200 lbs.
GCWR: 22,000 lbs.
22,000 lbs. GCWR – 9,200 lbs. GVW = 12,800 lbs. GTW

COMMON TERMINOLOGY

- **Base Curb Weight** - The nominal weight of a vehicle with standard equipment and a full tank of fuel. It does not include passengers, cargo or optional equipment.
- **Commercial Towing** - Any vehicle/trailer combination exceeding 26,000 lbs. Gross Combined Weight GCW.
- **Commercial Vehicle** - Any vehicle that exceeds 10,000 lbs. GVW.
- **Gross Vehicle Weight (GVW)** - The actual weight of the vehicle when fully loaded. It is the base curb weight plus the cargo weight.
- **Gross Vehicle Weight Rating (GVWR)** - The maximum allowable weight of the fully loaded vehicle.
- **Gross Combined Weight (GCW)** - The actual weight of the vehicle and trailer combined. This weight should always be obtained by weighing the vehicle and trailer together on a scale.
- **Gross Combined Weight Rating (GCWR)** - The maximum weight of the towing vehicle and the loaded trailer - including cargo and passengers.
- **Gross Axle Weight (GAW)** - The total weight supported by each axle (front or rear). To compute this weight for your vehicle and trailer combined, take the loaded vehicle and trailer to a scale. With the trailer attached, place the front wheels of the vehicle on the scale to obtain the front GAW. To obtain the rear GAW, weigh the towing vehicle with the trailer attached, but with just the four wheels of the vehicle on the scale. The rear GAW is determined by subtracting the front GAW from that amount.
- **Gross Axle Weight Rating (GAWR)** - The total weight each axle is capable of carrying. The total load on each axle must not exceed its GAWR.
- **Gross Trailer Weight (GTW)** – The weight of a trailer fully loaded.
- **Maximum Loaded Trailer Weight** - The maximum allowable fully loaded weight of the trailer. This weight is obtained by subtracting the towing vehicle's GVW from its GCWR.
- **Payload** - The combined maximum allowable weight of cargo, occupants and optional equipment that the vehicle is designed to carry. (Gross Vehicle Weight Rating minus the base curb weight.)
- **Rail Kit** - The components and hardware that mount the gooseneck hitch to the vehicle frame.

THE SAE INTERNATIONAL J2638 STANDARD FOR GOOSENECK AND FIFTH WHEEL TRAILERS UNDER 30,000 LBS.





Competitor's 25K gooseneck fails longitudinal test at 11,500 lbs.

The Society of Automotive Engineers (SAE) is a non-profit educational and scientific organization dedicated to advancing mobility technology to better serve humanity. SAE has developed many standards, testing methods and procedures to measure the performance of vehicles and vehicle related products, including trailers. SAE J2638 addresses both gooseneck and 5th wheel trailers under 30,000 lbs. The testing methods for gooseneck are as follows:

- Static Testing is a one time maximum load requirement for the three test conditions. The test is to be maintained for 5 Seconds.
  - Vertical - tests the goosenecks ability with upward and downward pressure
    - 85% of GVW Pull Out (25K lb Gooseneck = 21,250 lbs)
    - 50% of GVW Down (25K lb Gooseneck = 12,500 lbs)
  - Longitudinal - tests the goosenecks ability with front and back pressure
    - 75% of GVW Front and Back (25K lb Gooseneck = 18,750 lbs)
  - Transverse - tests the goosenecks ability with side to side pressure
    - 30% of GVW Each Side (25K lb Gooseneck = 7,500 lbs)

- Dynamic Testing defines requirements for repetitive testing in the three test conditions.
  - 300,000 Cycles in each test condition.
    - (Vertical, Longitudinal and Transverse)
  - The same unit is used for all three tests.
    - (900,000 Cycles all together)
  - The range of load requirements are based on GVW and Rated Coupler Load.

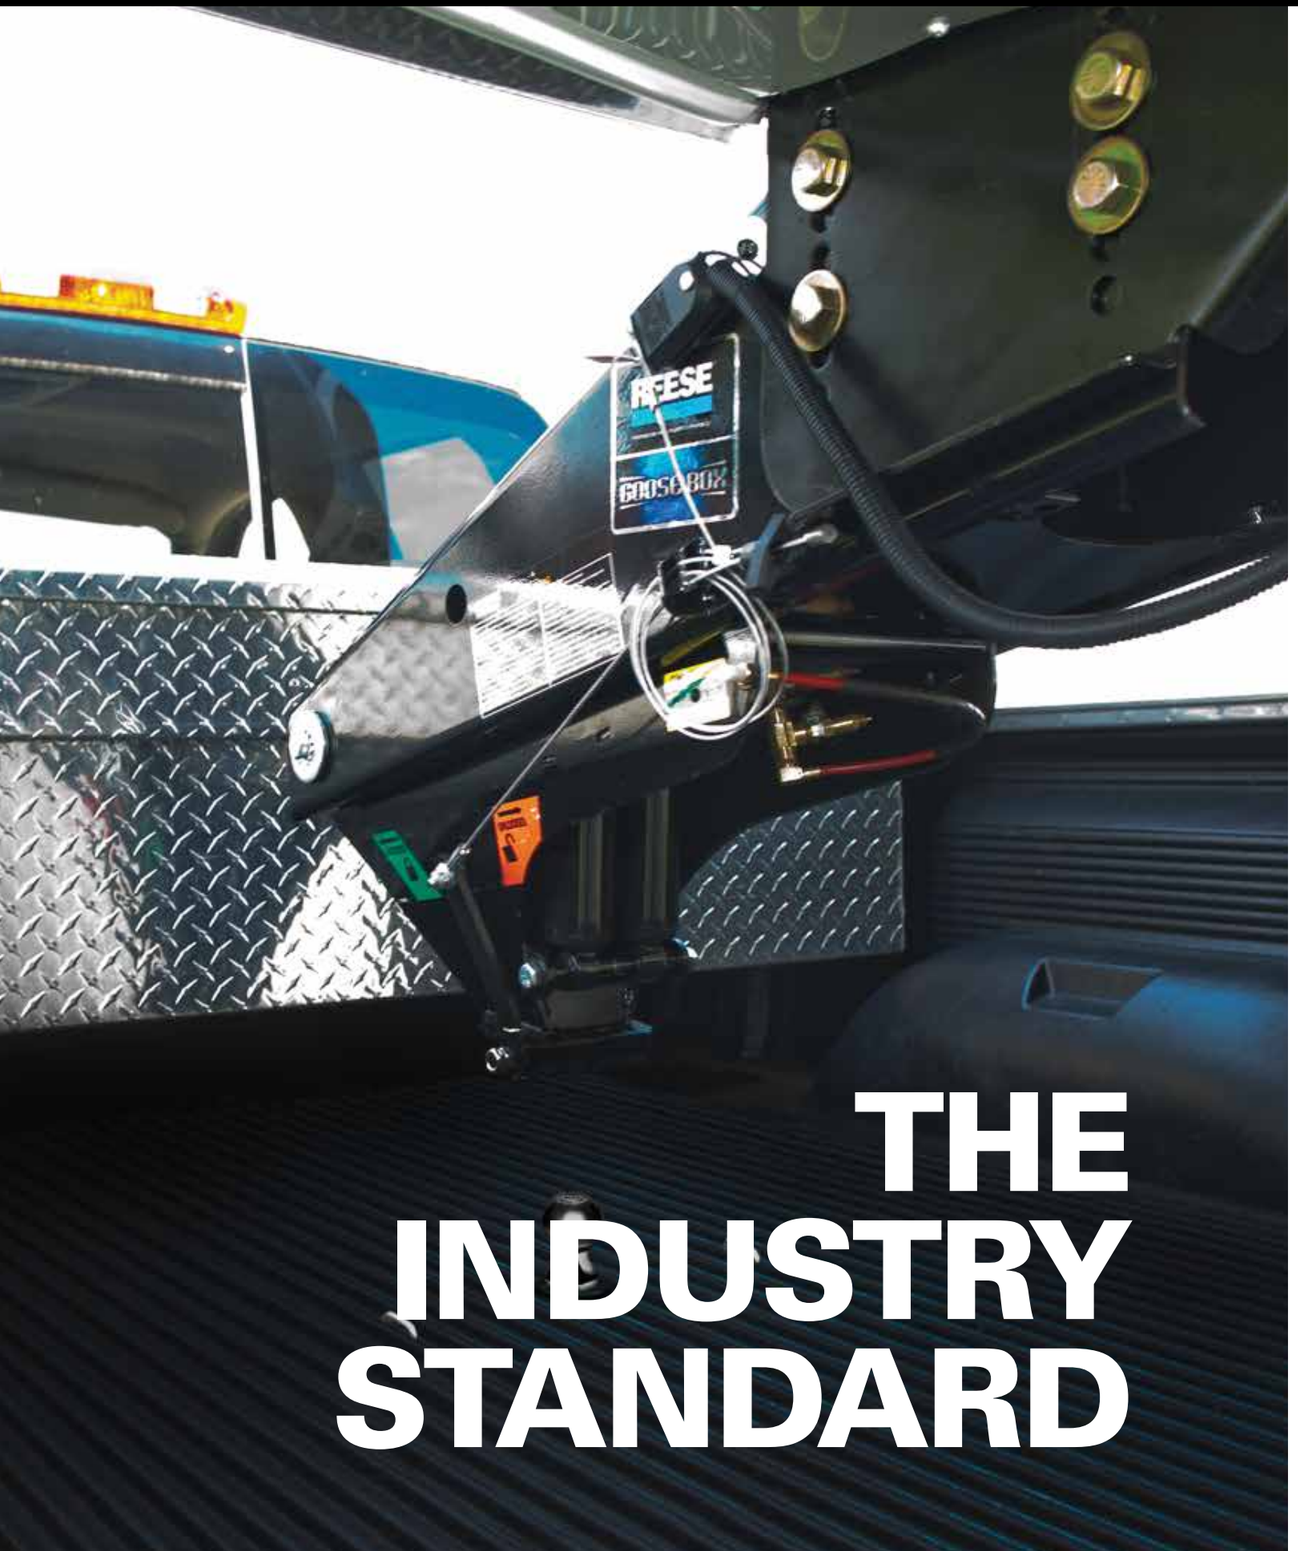
- In order to assure safety and accountability for the products produced, SAE J2638 also requires:
  - Product Identification
    - Manufacturer's Name
    - Maximum Trailer GVW
    - Rated Vertical Coupler Load
    - Ball Size
  - Testing
    - Products are to be fixtured at the maximum stress conditions
    - There should be no loss of attachment during testing
    - When testing is completed, the coupler will be capable of being uncoupled and coupled

HORIZON GLOBAL COMMITMENT

As the leading manufacturer of gooseneck couplers, Horizon Global understands the importance of the new SAE standard for Goosenecks and 5th Wheels. We are committed to providing products that meet or exceed these recommendations and our commitment is evident by our investment in people and facilities dedicated to testing our products.

In addition to being one of the only manufacturers with dedicated testing facilities, Horizon Global also has over 90 years of manufacturing experience to insure our products are of the highest quality and reliability.

Because of the size of our organization we can provide the added benefits of high quality, unmatched reliability and proven strength, at a competitive price.



THE INDUSTRY STANDARD

Reese pin boxes provide the smoothest ride of best air-ride pin boxes on the market and automatically eliminates turning and clearance headaches. Engineered and developed by long-time veterans of the towing industry.

SIDEWINDER

- Nimble, quick, worry-free turning
- 90º turns* without leaving the truck
- Designed for short bed pickups
- No switches, no buttons
- Slim, but built for strength
- Exceeds SAE/CSA Standards

61410, **61420**, **61450**, **ST400-SW16K** - 16K RATED Sidewinders

61411, **61421**, **ST400-SW19K** - 19K RATED Sidewinders

Sidewinder's king pin locking mechanism moves the pivot position 22-in rear of the pin box's attachment point. By moving the pivot rearward while keeping the load centered over the axles, the trailer tracks more closely to the truck. This reduces the need for extra-wide turns and allows short bed pickups to jackknife with no fear of contact. And it's all done automatically. Sidewinder also offers faster steering wheel response. Hook up at any angle. Make full use of the truck bed space, giving you extra storage space for fuel tanks, toolboxes and cargo.

SAY YES, TO GOOSE BOX™!

Tests were conducted on a traditional pin box, existing gooseneck extension adapters, and the Goose Box™. The results were conclusive!

"The Goose Box is a great solution for fifth-wheel RV users who prefer to use gooseneck hitches," said Jason Lippert, CEO of Lippert Components. "We are very pleased with the results of the thorough testing of the Goose Box, which demonstrates that it is compatible with our RV frame. As a result, the proper installation of a Goose Box pin box will be acceptable under our RV frame warranty." – *Lippert Press Release*

After reviewing the Bosch Test reports for the Reese Goose Box™, Lippert Components (the world's largest manufacturer of RV frames) accepts the Goose Box for the towing of RVs with gooseneck hitches. "Proper installation of a Goose Box in its intended application will not void the chassis warranty when installed on a coach either by the OEM or in the aftermarket." – *Jarod Lippert, Director of Marketing*

16K SIDEWINDER™

- Nimble and quick, worry-free turning
- Reese Sidewinder, with a limited lifetime warranty, is the premium pin box designed specifically for short bed pickups. The nimble and quick design automatically eliminates turning and clearance headaches. Now you can make up to 90-degree plus* turns without exiting the truck. Without throwing a switch. Without pushing a button.
- Sidewinder's king pin locking mechanism moves the pivot position 22" rear of the pin box's attachment point. This enables Sidewinder to handle up to a 90-degree plus turn effortlessly. By moving the pivot rearward while keeping the load centered over the axles, the trailer tracks more closely to the truck. This reduces the need for extra-wide turns and allows short bed pickups to jackknife with no fear of contact. And it's all done automatically. Sidewinder also offers faster steering wheel response, making backing up easier than ever before. The pivoting pin box makes hook up possible at any angle. And since the towing position of the pin box arm is locked in line with the truck, you can make full use of the truck bed space, giving you extra storage space for fuel tanks, toolboxes and cargo.
- Don't let the slim looks fool you. Sidewinder has been built for strength. The C-channel design gives it more stability and strength than the standard pin box design. It also allows better load capacity and the ability to support heavier loads. Tested for real world conditions, Sidewinder has cleared rigorous testing by BOSCH automotive proving grounds and exceeds all SAE/CSA Standard 16K ratings requirements for RVs.

16K AND 21K 5TH AIRBORNE™

- Make your next getaway a breeze
- Your fifth wheel takes a lot of abuse from turbulence caused by potholes, section dividers, bridge decks and heavily worn interstate highways. The 5th Airborne premium fifth wheel air-ride pin box acts as a buffer between the tow vehicle and the trailer, minimizing the challenges in the road. This significantly reduces the negative impact of vertical shock and longitudinal chucking. The 5th Airborne does more than improve your ride; it protects your investments by relieving stress on your coach's frame, cabinets, mechanical, and support mechanisms. Furniture, appliances, TVs, computers, dishes, glassware and other fragile items stay in their places. Drivers and passengers also benefit from reduced fatigue and the improved safety provided by the 5th Airborne's smooth ride.
- The 5th Airborne premium fifth wheel air-ride pin box was engineered and developed by long-time veterans of the towing industry.

Because getting you to your next adventure is key, ROLA introduces our new, innovative modular bike carrier.

The ROLA Convoy™ is designed to have single modular units added as you have need. It's multi-tiered "add a rack" design improves ground clearance with each rack addition. The Convoy™ bike carrier is a unique modular bike rack that can easily grow with you.

KEY FEATURES

- Holds up to 4 bikes. This new modular design allows you to determine how many bikes you want to carry (1, 2, 3 or 4 bikes). Simply add on to carry more than 1 bike, up to 4.
- Securely holds a wide variety of bike styles and sizes with a ratcheting arm that can be positioned to hold bikes by the frame or the wheel.
- Accommodates tire widths up to 5 in.
- User-friendly design allows the carrier to fold up when not in use or drop down for access to the rear of the vehicle.
- Patent pending.

SPECIFICATIONS

- Fits 20 in. to 29 in. wheels
- Fits wheel base up to 48 in.
- Fits tires up to 5 in.
- 1-1/4 in. base unit accommodates 1 or 2 bikes (1 add-on unit required for 2 bikes)
- 2 in. base unit accommodates 1, 2, 3 or 4 bikes (3 add-on units required for 4 bikes)
- 2 in. base will hold 1 or 2 e-bikes (1 add-on unit required for 2 bikes)

PRODUCT DETAILS

- Base unit – 57 in. L x 31 in. W x 17 in. H • 40 lbs.
- Add-on unit – 57 in. L x 16 in. W x 10 in. H • 20 lbs.

CARGO MANAGEMENT

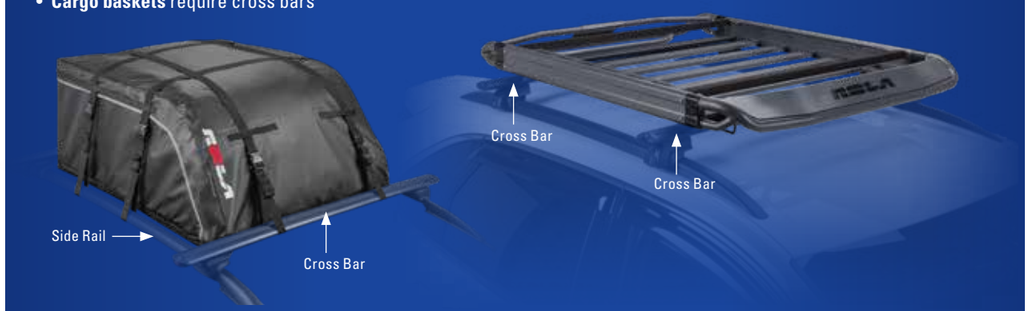
HELPFUL TIPS FOR TRANSPORTING GEAR ON YOUR ROOF

KNOW YOUR VEHICLE'S ROOF

- **Cargo bags** mount to raised side rails and/or cross bars, or to rooftop basket
- **Cargo baskets** require cross bars



CHOOSE THE PROPER CARGO BAG

- **Stormproof Construction** – for driving rain, snow, dust and sun
- **Weather-Resistant** – for rain, snow, wind, dust and sun

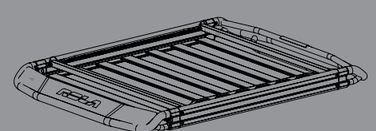
TRY YOUR BAG BEFORE YOU TRAVEL

- Adjust strap length and placement on side rails and/or cross bars
- Make sure contents fit into bag without overstuffing

HOW TO LOAD YOUR BAG

- Attach cargo bag to rooftop first–then load
- Keep all valuables inside the vehicle
- Do not exceed your vehicle's rated roof capacity

HOW TO CALCULATE YOUR VEHICLE'S MAXIMUM LOAD LIMIT



Basket Weight

+ **Weight of Cargo** =

Max. Load Limit
Check to be sure this is less than your vehicle's rated roof capacity and the capacity of your cross bars. Consult the owner's manual for your vehicle.

HELPFUL HINTS WHEN USING RECOVERY STRAPS:

1. Never attach a recovery strap to vehicle's bumper, axles, suspension, steering rods, or trailer hitch ball.
2. Before using the strap, make sure it is in good condition (no cuts, frays, or broken stitching).
3. When freeing a stuck vehicle, drive very slowly. Sudden tugs may damage the vehicle or strap.
4. Choose reflective straps for improved safety in low-light emergency situations.

MARINE AND RECREATIONAL JACKS

- Designed for use with marine and utility trailers, Fulton brand tongue jacks are time- tested and application-proven. Our bolt-on versions include all necessary mounting hardware. For weld-on applications, we offer two styles of mounts for both 1/2" and 3/8" pull pin models.
- The Fulton brand bolt-thru swivel mounts (U.S. PAT. 6,302,381) use 3-D formed heavy-gauge steel stampings and a proprietary bushing material for a mount with minimal deflection and maximum support. All mounts fit up to a 3" x 5" trailer frame.
- Extensive choice of popular models, Sidewind Crank with Round or Square Tubes
- Strong proprietary bushing materials
- Stable formed heavy-gauge steel construction
- Dependable design
- Lift capacity from 400 lbs. to 5,000 lbs.
- 5 year limited warranty

FOLD-AWAY™ HINGE KITS

- Fulton High Performance Series Fold-Away hinge kits are ideal for boat trailers that can be just a little too long to fit inside smaller garages. These high quality, precision engineered products provide options for solving this common problem.
- Choose the Fold-Away product that fits your needs from among several varieties made to fit standard trailer tongue dimensions.
  - Bolt-on models feature Z-Max 600 hour clear zinc finish.
  - Weld-on kits with raw finish are ideal for painting or galvanizing.
- 5 year limited warranty

INDUSTRY LEADING CORROSION PROTECTION

* 600 hour salt spray rating per ASTM B117

FOLD-AWAY™ BOLT-ON HINGE KITS

- Converts standard trailer tongues into fold-away configurations while preserving the existing coupler
- Delivers strength at the pivot point with precisely machined heavy duty hinges made from die cast steel
- Easy to install bolt-on application with complete instruction manual
- Includes all mounting hardware
- Only recommended for trailers with steel tongues

SELECTING A PULLING WINCH

- To Select Winch Capacity:
  - Minimum Winch Capacity = Maximum Weight of Boat, Including Motor, Fuel, Gear ÷ 2
    -Example:
    -Boat, Motor, Fuel, Gear Weight = 2,800 lbs.
    -2,800 ÷ 2 = 1,400 lbs.
    -Select 142200 Winch, rated at 1,500 lbs.
  - If shallow water or steep inclined launches are expected to be used ÷ Maximum Weight by 1.5
    -Example:
    -Boat, Motor, Fuel, Gear Weight = 3,100 lbs.
    -3,100 ÷ 1.5 = 2,067 lbs.
    -Select 142410 Winch, rated at 2,600 lbs.

TWO SPEED TRAILER WINCHES

- Make light work of heavy loads with Fulton brand two-speed winches. One fast speed for quick pull-in, a second low speed for increased mechanical advantage.
- Our shift lock design allows changing gears without moving the crank handle from shaft to shaft. Just lift the shift lock and slide the shaft into the desired gear position. Shift lock holds the shaft in gear.
- Neutral, free-wheel position allows quick line pay out without spinning the handle.
- Optional handbrake kit no. 501201 purchased separately and available for all two-speed winches and can be installed after the winch is mounted.
- Our XLT Series include stylized thermoplastic covers and come standard with the strap and hook included.
- 5 year limited warranty

NOTES:

1. *Winch mounting hardware sold separately. Refer to instruction sheet for recommended bolt size and grade.*
2. *Fulton brand two-speed winches are designed for boat trailer and other pulling applications, which require the freewheeling feature of ratchet type winches. If moving loads requiring vertical lifting, or positive load control in both directions, choose a Fulton brake winch.*
3. *All Fulton brand winches are rated on the first layer of recommended rope, strap, or cable. The winch load capacity must be derated as additional layers are used. Derate the capacity 10% per additional layer of rope, strap, or cable.*
4. *Fulton brand winches are NOT designed to be human hoists and should never be operated when there are persons on, around, or under the load being moved.*

BRAKE WINCHES

- Fulton self-activating automatic brake winches hold the load securely when the crank handle is released.
- Popular applications include construction light towers, grain augers, manual fork lifts, and boat lifts.
- Drum hubs are 10 times the recommended cable size to maximize cable life.
- For especially demanding applications select models feature covered drums and gear trains, along with a dual ratchet system.
- 5 year limited warranty

HYDRAULIC WINCHES

LIMITED LIFETIME* WARRANTY

- BULLDOG Hydraulic Winches are cost effective, extremely powerful, reliable, lightweight, and flexible winches designed for professional and commercial use. They're hard-working winches ready for rescue and recovery operations in tough situations.
- 8,000 lb. - 15,000 lb. capacities
- Fast and variable recovery speeds save time
- Efficient, high-torque motor provides consistent power
- 2-stage planetary gear train delivers greater pulling force
- Ergonomic pull-and-turn T-handle clutch lever for easy transition between gear engagement and free spooling
- Dual brakes include both drag brake and over-center valve for sure, confident control
- EN 14492-1 supported: 10:1 D/d ratio and 2:1 wire rope strength for high-demand use
- Meets SAE J706 (revised 8/2003), CE Machinery Directive 2006/42/EC, and EN 14492-1:2006 Power Driven Winches

5K SQUARE JACKS

- Compared to round jacks of similar capacities, BULLDOG's 5,000 lbs. support capacity square jack dramatically improves side load strength while maintaining the economical benefits of lower capacity jacks. The extra side load capacity you need without the costs of increasing overall capacity.
- 12-gauge square tube is 70% stronger than 12-gauge round tube for more side load and support strength with the same lift capacity
- 4.62" outer tube overlap at full extension for additional side load strength
- Weather-resistant materials and coatings. Painted outer tubes, clear zinc inner tubes
- Proven, reliable mechanical elements provide dependable strength and long-lasting, durable performance
- Mounts included in this series of jacks

8K SQUARE JACKS

- BULLDOG's 8,000 lbs. support capacity square jack serves the agricultural, industrial, construction, horse/livestock trailer, and utility/cargo trailer markets. The compact design of these jacks makes them ideal for tight-fitting applications where 3" and 4" square tube jacks are too big!
- Use the painted outer tube as the final finish or primer
- Zinc-plated inner tube and drop leg
- 4.7" Outer / inner tube overlap - results in optimal side load performance
- 5/8" screw stem - provides insurance against screw stem twisting off
- Patented screw nut stop - prevents screw and/or nut damage when jack is fully extended
- Topwind models - bushing in top cap, eagle claw grip
- Sidewind models - 1/4" cross pin connects gear train to screw stem - guards against
- shearing jack pin Sidewind models - 1:1.33 gear ratio

10K SQUARE JACKS

- BULLDOG's 10,000 lbs. support capacity square jacks "fills the gap" between 8,000 lbs. and 12,000 lbs. square jack product offerings
- If the existing 8,000 lbs. support capacity square jacks are too small or the 12,000 lbs. support capacity square jacks are too big, look no further – your application and pricing requirements have been met!
- This is the highest quality and best performing jack available in the marketplace today, a total balance between capacity, speed, and effort
- Heavy-gauge 3" square tubing allows for direct weld mounting wherever the application allows – no burn through
- Use the painted outer tube as the final finish or primer
- Zinc-plated inner tube and drop leg
- Heavy-duty base, with reinforcement ribs, zero water retention
- Precision manufactured for long term reliability and smooth, easy cranking
- Grease zerk for easy lubrication as needed
- Oil-impregnated bushing for improved bearing and gear life
- Direct weld to outer tube is standard
- Sidewind models - 1:1.86 gear ratio

12K HEAVY DUTY SQUARE JACKS

- Strong, durable, and sturdy, the BULLDOG 12,000 lbs. support capacity square jack is the BIG reason why BULLDOG has carried the load in agricultural, construction, heavy-duty utility, and horse/livestock trailer industries since 1923. All BULLDOG 4" square jacks are rated for 12,000 lbs. support capacity and 10,000 lbs. lift capacity. The strength of the product, plus the wide variety of styles, makes this jack the best choice in its product class.
- 4" square tubing, 7-gauge superior alloy steel
- Painted outer tube, inner tube, and drop leg
- Drop leg option with 5 positioning holes
- Easy-access gear box with grease fitting for routine maintenance
- Spring return drop leg or non-spring return drop leg
- 12.5" screw travel, 13.5" of additional adjustment with drop leg
- Front facing drop leg plunger pin or side facing drop leg plunger pin
- Painted (with or without labels) or powder paint optional
- Sidewind models - 1:1.5 gear ratio

TWIN CAM™ DROP LEG JACKS

- The industry's strongest drop leg jack
- The BULLDOG Twin Cam features a convenient, enclosed pin mechanism with "twin cam" action that will quickly make this heavy duty, drop leg jack the industry standard.
- Twin Cam Drop Leg Mechanism:
  - The BULLDOG Twin Cam Drop Leg mechanism allows an increase in the vertical static capacity by using two ¾" pins to transfer forces between the drop leg and inner tube of the jack.
  - The unique Twin Cam drop leg mechanism actuates the drop leg pins in both directions, giving the operator full control over engagement and disengagement of the drop leg pins. The design does not rely on spring pressure alone to keep the pins in the locked position. Patent pending.
  - The enclosed Twin Cam drop leg mechanism keeps dirt and debris from interfering with the engagement of the drop leg pins.
  - The Twin Cam drop leg mechanism maintains tighter alignment between the drop leg tube and inner tube by having engagement on both sides of the drop leg tube.
- Two-Speed Model (also includes):
  - Convenient cranking ratios allow for fast operation under a wide range of loading conditions. Drop leg provides quick adjustment.
  - High speed cranking ratio of 9 turns per inch is convenient for loads up to 12,500 lbs.
  - Low speed ratio of 29.5 turns per inch allows lifting loads up to 25,000 lbs.
- Features:
  - Easy access grease fittings allow for lubrication of internal jack gears and jack screw/nut.
  - Patented screw stop prevents screw and/or nut damage when the jack is fully extended, keeping the screw in good condition for maximum screw/nut cycle life.
  - Patented assembly design makes the gears, jack screw/nut, and other internal components easily serviceable. 12.5" of screw travel.
  - Drop Leg features 5 positions with 13.5" of adjustment.
  - 10" X 10" heavy gauge steel foot plate.
  - Heavy duty 1" diameter steel input shaft.
  - Spring return and non-spring return drop legs available.
  - 10" X 10" heavy gauge steel foot plate.
  - Heavy duty 1" diameter steel input shaft.
  - Spring return and non-spring return drop legs available.
- Optional Accessory:
  - Compatible with BULLDOG Powered Drive electric motor system (reduces lift capacity to 7,500 lbs).

2-SPEED SQUARE JACKS

- The First 2-Speed Gearbox Designed with a Drop Leg Jack in Mind.
- BULLDOG's 2-speed 12,000 lbs. support capacity square jack makes cranking easier when fully loaded and faster when unloaded. In low gear, the ratio delivers full lifting power at a super-smooth, easy-lifting 27 turns per 1" (planetary) and 29 turns per 1" (traditional) of travel. In high gear, the cranking ratio is a speedy 9 turns per 1" of travel, the fastest in its weight class.
- State of the art 2 speed gearbox with power and speed for the most effective and efficient jack at all loads
- Designed for today's standard agricultural, construction and industrial trailer applications.
- User friendly design makes operation smooth and easy
- Engineered alloys for enhanced strength, stability and side load capability
- Planetary gearbox fits within the width profile of the jack's outer tube, eliminating the need for spacers

BX1® GOOSENECK COUPLERS

- The BULLDOG BX1 coupler is the result of generations of design expertise and field experience. It incorporates innovative features that revolutionize the benefits available from a gooseneck coupler.
  - Offers flexible mounting options with Next Generation locking plate coupler locking mechanism
  - Makes hooking up, adjusting vertical height, and disconnecting easy
  - Maintains smooth operation over time with grease fittings for every important operating part
  - Operates easily with one hand thanks to new locking handle design
  - Continuous tight ball fit - ever-increasing cam tightening mechanism
  - Protects against wear with enclosed locking pin mechanism
  - Resists theft with integrated feature to allow pad-locking the coupler to the ball (lock not included)
  - Guides ball into socket more easily—letting you miss by more than an inch—with bottom locking plate 50% larger than competitors
  - Lengthens life of locking mechanism with oil-impregnated bushings
  - Allows shorter retracted length and less wasted length for trucks with high bed height via low-profile locking mechanism
  - Fits ball better and reduces jarring through contour-formed edge on bottom locking plate
  - Delivers unmatched strength through heavy-duty construction
  - Innovations that improve security, service life, and functionality
  - New ball pocket design provides contact on both sides of the ball for substantially improved pull out strength - the only sliding-plate design that transfers part of the load to the top locking plate rather than only the bottom locking plate
  - In compliance with SAE standard J2638

HEAVY DUTY CAST COUPLERS

- Designed for utility, horse/livestock, cargo, and construction trailer applications, BULLDOG couplers are the strongest in the industry. The patented cast head "Wedge-Latch®" coupler design is offered in heavy-duty, A-frame, and convenient adjustable height models. Adjustable couplers assure level operation for trailers when pulled by a variety of different vehicles. The replaceable latching hardware allows for longer service life.
  - Quick and easy to engage
  - Strong and secure on the road
  - Patented Wedge-Latch ball clamp design
  - Quick to hook up and disconnect
  - In compliance with SAE standard J684

⚠WARNING
Failure to close coupler securely before towing or failure to use with specified ball size may result in serious injury or death.

BARGMAN #84/85/86 LED LIGHTS

LED Taillights and Module Kit for the most popular RV Tail Light in the World! Purchase as fully-assembled complete taillights for installation or purchase a LED Upgrade Module. The Module Kit will allow you to quickly and easily field upgrade your installed Bargman Model #84/85/86 Taillights or Model #86 Wrap-Around Marker/Clearance lights from Incandescent to LED.

HOW TO ORDER

Fully assembled units:

Fully assembled LED versions of the Bargman #84/85/86 tail-lights and #86
wrap-around clearance/side marker lights are listed. For convenience and consistency, we have listed them in the same manner that we list the incandescent models. Please note that the part numbers for all LED versions begin with 42/47/48.

Module Kits:

These kits are designed to allow RV and Trailer owners to upgrade their Bargman #84/ 85/86 Taillights or #86 Wrap-Around Marker/Clearance lights from Incandescent to
LED - quickly and safely. Due to the many configurations of these Bargman light models, upgrade modules are sold to upgrade only one module at a time.

WARNING: All Bargman #84/85/86 Taillights and #86 Wrap-Around Marker/
Clearance lights meet FMVSS/CMVSS 108 requirements. WHEN UPGRADING EXISTING LIGHTS FROM INCANDESCENT TO LED, TO RETAIN FMVSS/ CMVSS 108 REQUIREMENTS, SPECIAL CARE MUST BE GIVEN TO REPLACE EXISTING LENS (OR TO ASSEMBLE MODULE) WITH A LED MODULE THAT WILL PERFORM THE EXACT SAME FUNCTION.

NOTE: For regulatory purposes, installation of any competitive LED Upgrade Module designed for the Bargman #84/85/86 Taillights will immediately void all warranty on the entire Bargman tail light.

#84 Series Taillights LED Upgrade Modules

The end-user will simply count the number of red stop/tail/turn lights, amber turn lights or backup lights on the vehicle and order the appropriate number of the desired LED upgrade modules. The end user will simply remove the incandescent lens and bulb and plug the LED module (LED circuit board with connector and lens) into the existing bulb socket and mount, with the existing screws, to the holes in the existing light base.

#86 Series Marker Light LED Upgrade Module

The end-user will simply count the number of wrap-around clearance/side marker lights on the vehicle and order the appropriate number of the desired LED upgrade kits. The end user will simply remove the lens and bulb and plug the LED module (LED circuit board) into the existing bulb socket and re-install the existing lens.

LIGHTING TERMINOLOGY

"Over 80" Combination Tail Lights
These units meet seven or eight DOT-108 lighting requirements when properly mounted. Seven function units meet tail light, stop light, rear turn signal light, rear reflex reflector, rear side marker light, rear side reflex reflector and rear clearance light. The eighth function met is license plate light. Trailers over 80 inches wide require the addition of front Clearance Lights and Rear Identification (ID) Lights. Consult Title 49 – Code of Federal Regulations-Section 571.108 (USA) or Section 108 of the Motor Vehicle Safety
Regulations (Canada) for additional compliance requirements.

"Under 80" Combination Tail Lights
These units meet six or seven DOT-108 lighting requirements when properly mounted. Six function units meet tail light, stop light, rear turn signal light, rear reflex reflector, rear side marker light and rear side reflex reflector. The seventh function met is license plate light. Consult Title 49 – Code of Federal Regulations-Section 571.108 (USA) or Section 108 of the Motor Vehicle Safety Regulations (Canada) for additional
compliance requirements.

"PC" Rated Clearance/Side Marker Lights
A single unit meets DOT-108 lighting requirements and has been photometrically certified at a specific installation angle to provide both clearance light and side marker light. In most cases, the light will have to be mounted on a 45° angle, Consult Title 49 – Code of Federal Regulations-Section 571.108 (USA) or Section 108 of the Motor Vehicle Safety Regulations (Canada) for additional compliance requirements to meet both functions' requirements with just one unit.

LIGHTING TIPS AND FAQS

Do I have to use a light or can I use a reflector instead?
Lighting and conspicuity requirements are governed by FMVSS & CMVSS 108. Their use is determined by safety and identification requirements.

Why use LED and not Incandescent? The key difference is the way both technologies operate. While both technologies are an acceptable means for vehicle lighting, LED is the stronger technology in Energy Efficiency, Light Output, Reliability, Safety and Life Expectancy.

Do LED lights have to be mounted differently than Incandescent? No, the FMVSS/CMVSS 108 mounting requirements are the same.

When retrofitting a Bargman 59 or 84/85/86 Series Incandescent light with LED can the old lenses be reused? No, Bargman 59 & 84/85/86 Series LED module kits come with pre-assembled lenses and a simple "plug & play" replacement design.

What does stop/tail/turn mean? How many lights do I need to use to achieve it? Are they the same as "Taillights"?
Stop/Tail/Turn is a combination rating meaning a spe-cific light or grouping of lights in an assembly meet the requirements for this named combination. This rating can be achieved using 1 light alone as long as the light source meets the requirements for the specific application.

Why does Horizon Global offer so many different types & styles of lights for a vehicle? Horizon Global is never satisfied with the status quo and is continually striving to design lights that will meet the designated federal requirements and fit our customer's specific application needs.

When using a Multi-Function Stop/Tail/Turn Light, is a Backup Light function required and does it matter where the Backup Light is located? The requirement for and location of the Backup Light is determined by vehicle type **and FMVSS/CMVSS 108 requirements.**

Why are some Turn Signal Lights Red and others Amber, does it matter which color I use? Yes, the color does matter. While both colors are acceptable for turn signals, the color use is primarily driven by the "Stop" Function. When using a multi-function Stop/Turn light, the color must be Red as required by FMVSS/ CMVSS 108 requirements.

What does "Over" or "Under" 80 refer to? This is a reference to a vehicles width in inches. There are differing FMVSS/CMVSS 108 requirements covering this dimensional reference point.

What are "Over 80" Combination Taillights?
These units meet seven or eight lighting requirements as defined by FMVSS/CMVSS 108.

What are "Under 80" Combination Taillights? These units meet six or seven lighting requirements as defined by FMVSS/CMVSS 108.

What is the difference between Side Marker & Clearance Lights? Side Marker Lights are mounted on the side of a vehicle and are used to define its length. Clearance Lights are mounted on the front and rear of a vehicle and are used to define its width.

What are "PC" Side Marker/Clearance Lights?
These lights meet the FMVSS/CMVSS 108 requirements for photometric certification as both Clearance and Side Marker Lights when properly mounted.

The symbol is for Wet Location Lights. What does it mean? Wet Location Lighting products in this catalog are either: "Waterproof/Sealed" or "Submersible" and are safe to use on marine and other trailers that will be in and around the water or UL listed as suitable for wet location use.

What are Submersible Lights? Submersible lights purposely allow water to enter the light assembly, however a cushion of air forms when water enters the light and will protect the bulbs and electrical connectivity from damage. This natural phenomenon is known as the "Bell Jar Principle". These lights are ideal for boat trailers and utility trailers that will be submersed in water.

What are Waterproof/Sealed Lights? "Waterproof" and "sealed" mean exactly the same - these lights are completely sealed and will not allow water to enter the inside of the light assembly. Many of our new LED Side/ Marker and Taillights are completely sealed as to prevent water from damaging the circuit board and components associated with LED Technology.

Why are vehicle lights grounded? Vehicle lights are grounded in order to complete the electrical circuit. There are differing ways to ground them to meet various applications.

What is an ID Bar, and can one be used as a multi-function Stop/Tail/Turn as well? An ID Bar is an identification Bar. It consists of 3 lights and is required in order to identify the rear center location on over 80" vehicles. They May Not be used as Multi-Function Lights.

7-WAY MOLDED TRAILER CONNECTORS WITH CABLE - TRAILER CLOCKING

- 7-way plastic connector molded to heavy duty 7-way insulated cable using trailer clocking*
- Provides 7-way connector contact color coding more conducive to horse and livestock trailers verses RV trailers
- Made with self-cleaning contacts and molded to encapsulate terminals and wires to form one weather resistant, non-corrosive assembly
- Permits the trailer to have the clean appearance and environmental advantages of a sealed, molded 7-way cord
- Primary wire gauges within the insulated cable are: Black and White-10 gauge, Blue-12 gauge, Brown-Red-Green-Yellow-14 gauge

BX1® GOOSENECK COUPLERS

- The BULLDOG BX1 coupler is the result of generations of design expertise and field experience. It incorporates innovative features that revolutionize the benefits available from a gooseneck coupler.
  - Offers flexible mounting options with Next Generation locking plate coupler locking mechanism
  - Makes hooking up, adjusting vertical height, and disconnecting easy
  - Maintains smooth operation over time with grease fittings for every important operating part
  - Operates easily with one hand thanks to new locking handle design
  - Continuous tight ball fit - ever-increasing cam tightening mechanism
  - Protects against wear with enclosed locking pin mechanism
  - Resists theft with integrated feature to allow pad-locking the coupler to the ball (lock not included)
  - Guides ball into socket more easily—letting you miss by more than an inch—with bottom locking plate 50% larger than competitors
  - Lengthens life of locking mechanism with oil-impregnated bushings
  - Allows shorter retracted length and less wasted length for trucks with high bed height via low-profile locking mechanism
  - Fits ball better and reduces jarring through contour-formed edge on bottom locking plate
  - Delivers unmatched strength through heavy-duty construction
  - Innovations that improve security, service life, and functionality
  - New ball pocket design provides contact on both sides of the ball for substantially improved pull out strength - the only sliding-plate design that transfers part of the load to the top locking plate rather than only the bottom locking plate
  - In compliance with SAE standard J2638

ROUND GOOSENECK COUPLERS

- BULLDOG gooseneck couplers are quick and easy to engage and strong and secure on the road. Our unique, patented, extruded locking plate design and high-strength steel components make BULLDOG gooseneck couplers 65% stronger than similar products.
  - Easy-grip locking handle is accessible from any position, even with a glove on
  - Self-centering locking plate lets you miss the ball by more than an inch
  - Tight ball fit reduces jarring when changing speeds or on rough roads
  - Heavy-duty construction provides unmatched strength
  - User-friendly design is simple to use
  - Quick to hook up and disconnect
  - Easy vertical adjustment
  - In compliance with SAE standard J2638

⚠WARNING
Failure to close coupler securely before towing or failure to use with specified ball size may result in serious injury or death.

SQUARE GOOSENECK COUPLERS

- You won't find a coupler that's faster or easier to use than the square gooseneck from BULLDOG. Its user-friendly design makes hookup and release swift and secure.
  - Easy-grip locking handle is accessible from any position
  - Self-centering locking plate lets you miss the ball by more than an inch
  - Tight ball fit reduces jarring when changing speeds or on rough roads
  - Heavy-duty high-strength fabricated steel components are as strong as heavy cast iron but lighter and less brittle
  - User-friendly design enables quick, easy hookup and release
  - Locking handle cover protects working parts
  - Cam locking pin affords easy vertical adjustment
  - Pinch bolt design
  - In compliance with SAE standard J2638

⚠WARNING
Failure to close coupler securely before towing or failure to use with specified ball size may result in serious injury or death.

5K SQUARE JACKS

- Compared to round jacks of similar capacities, BULLDOG's 5,000 lbs. support capacity square jack dramatically improves side load strength while maintaining the economical benefits of lower capacity jacks. The extra side load capacity you need without the costs of increasing overall capacity.
- 12-gauge square tube is 70% stronger than 12-gauge round tube for more side load and support strength with the same lift capacity
- 4.62" outer tube overlap at full extension for additional side load strength
- Weather-resistant materials and coatings. Painted outer tubes, clear zinc inner tubes
- Proven, reliable mechanical elements provide dependable strength and long-lasting, durable performance
- Mounts included in this series of jacks

8K SQUARE JACKS

- BULLDOG's 8,000 lbs. support capacity square jack serves the agricultural, industrial, construction, horse/livestock trailer, and utility/cargo trailer markets. The compact design of these jacks makes them ideal for tight-fitting applications where 3" and 4" square tube jacks are too big!
- Use the painted outer tube as the final finish or primer
- Zinc-plated inner tube and drop leg
- 4.7" Outer / inner tube overlap - results in optimal side load performance
- 5/8" screw stem - provides insurance against screw stem twisting off
- Patented screw nut stop - prevents screw and/or nut damage when jack is fully extended
- Topwind models - bushing in top cap, eagle claw grip
- Sidewind models - 1/4" cross pin connects gear train to screw stem - guards against
- shearing jack pin Sidewind models - 1:1.33 gear ratio

10K SQUARE JACKS

- BULLDOG's 10,000 lbs. support capacity square jacks "fills the gap" between 8,000 lbs. and 12,000 lbs. square jack product offerings
- If the existing 8,000 lbs. support capacity square jacks are too small or the 12,000 lbs. support capacity square jacks are too big, look no further – your application and pricing requirements have been met!
- This is the highest quality and best performing jack available in the marketplace today, a total balance between capacity, speed, and effort
- Heavy-gauge 3" square tubing allows for direct weld mounting wherever the application allows – no burn through
- Use the painted outer tube as the final finish or primer
- Zinc-plated inner tube and drop leg
- Heavy-duty base, with reinforcement ribs, zero water retention
- Precision manufactured for long term reliability and smooth, easy cranking
- Grease zerk for easy lubrication as needed
- Oil-impregnated bushing for improved bearing and gear life
- Direct weld to outer tube is standard
- Sidewind models - 1:1.86 gear ratio

12K HEAVY DUTY SQUARE JACKS

- Strong, durable, and sturdy, the BULLDOG 12,000 lbs. support capacity square jack is the BIG reason why BULLDOG has carried the load in agricultural, construction, heavy-duty utility, and horse/livestock trailer industries since 1923. All BULLDOG 4" square jacks are rated for 12,000 lbs. support capacity and 10,000 lbs. lift capacity. The strength of the product, plus the wide variety of styles, makes this jack the best choice in its product class.
- 4" square tubing, 7-gauge superior alloy steel
- Painted outer tube, inner tube, and drop leg
- Drop leg option with 5 positioning holes
- Easy-access gear box with grease fitting for routine maintenance
- Spring return drop leg or non-spring return drop leg
- 12.5" screw travel, 13.5" of additional adjustment with drop leg
- Front facing drop leg plunger pin or side facing drop leg plunger pin
- Painted (with or without labels) or powder paint optional
- Sidewind models - 1:1.5 gear ratio

TWIN CAM™ DROP LEG JACK

- The industry's strongest drop leg jack
- The BULLDOG Twin Cam features a convenient, enclosed pin mechanism with "twin cam" action that will quickly make this heavy duty, drop leg jack the industry standard.
- Twin Cam Drop Leg Mechanism:
  - The BULLDOG Twin Cam Drop Leg mechanism allows an increase in the vertical static capacity by using two ¾" pins to transfer forces between the drop leg and inner tube of the jack.
  - The unique Twin Cam drop leg mechanism actuates the drop leg pins in both directions, giving the operator full control over engagement and disengagement of the drop leg pins. The design does not rely on spring pressure alone to keep the pins in the locked position. Patent pending.
  - The enclosed Twin Cam drop leg mechanism keeps dirt and debris from interfering with the engagement of the drop leg pins.
  - The Twin Cam drop leg mechanism maintains tighter alignment between the drop leg tube and inner tube by having engagement on both sides of the drop leg tube.
- Two-Speed Model (also includes):
  - Convenient cranking ratios allow for fast operation under a wide range of loading conditions. Drop leg provides quick adjustment.
  - High speed cranking ratio of 9 turns per inch is convenient for loads up to 12,500 lbs.
  - Low speed ratio of 29.5 turns per inch allows lifting loads up to 25,000 lbs.
- Features:
  - Easy access grease fittings allow for lubrication of internal jack gears and jack screw/nut.
  - Patented screw stop prevents screw and/or nut damage when the jack is fully extended, keeping the screw in good condition for maximum screw/nut cycle life.
  - Patented assembly design makes the gears, jack screw/nut, and other internal components easily serviceable. 12.5" of screw travel.
  - Drop Leg features 5 positions with 13.5" of adjustment.
  - 10" X 10" heavy gauge steel foot plate.
  - Heavy duty 1" diameter steel input shaft.
  - Spring return and non-spring return drop legs available.
  - 10" X 10" heavy gauge steel foot plate.
  - Heavy duty 1" diameter steel input shaft.
  - Spring return and non-spring return drop legs available.
- Optional Accessory:
  - Compatible with BULLDOG Powered Drive electric motor system (reduces lift capacity to 7,500 lbs).

2-SPEED SQUARE JACKS

- The First 2-Speed Gearbox Designed with a Drop Leg Jack in Mind.
- BULLDOG's 2-speed 12,000 lbs. support capacity square jack makes cranking easier when fully loaded and faster when unloaded. In low gear, the ratio delivers full lifting power at a super-smooth, easy-lifting 27 turns per 1" (planetary) and 29 turns per 1" (traditional) of travel. In high gear, the cranking ratio is a speedy 9 turns per 1" of travel, the fastest in its weight class.
- State of the art 2 speed gearbox with power and speed for the most effective and efficient jack at all loads
- Designed for today's standard agricultural, construction and industrial trailer applications.
- User friendly design makes operation smooth and easy
- Engineered alloys for enhanced strength, stability and side load capability
- Planetary gearbox fits within the width profile of the jack's outer tube, eliminating the need for spacers

RACK / GEAR JACKS

- 750 lbs. A-Frame and Bolt-On
  - BULLDOG experience and engineering know-how have produced a line of rack and gear jacks that are tough and trusted, the most preferred jacks used by trailer manufacturers in a variety of industries.
  - Smooth-cranking 4 turns per inch of travel
  - All-welded steel gear box with proven reliability for long term use at rated load
  - Gray primer-painted steel wheel and gear box with weather-resistant clear zinc-plated rack post
  - Custom designs available
- 1,200 lbs. Heavy-Duty
  - These heavy-duty rack jacks exemplify BULLDOG's reputation for strength, providing additional lift capacity to a full 1,200 pounds. Specially designed and manufactured to BULLDOG's unparalleled standards, they are ideal for heavier trailers and greater tongue weights.
  - Powerful heavy-duty gear box with special steel alloy helical gear for extra lift capacity
  - Extra heavy-duty gauge post for maximum side load strength
  - Specially designed gusseted caster bracket for increased stability
  - Superior extension capabilities (up to 26.5" on the HD165WX model
  - Red oxide primer-painted steel wheel and gear box with weather-resistant yellow zinc-plated rack post

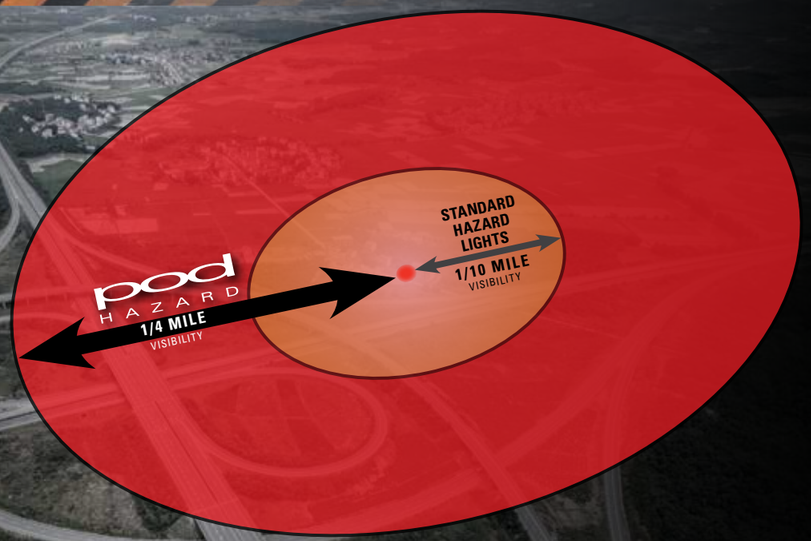
POD HAZARD MULTI-USE LED ROADSIDE WARNING DEVICE

Whether it's a flat tire, a warning light, or an overheated engine, vehicle trouble can occur at any time, and you'll want to do everything possible to keep yourself, and the ones you love as safe as possible.

Be prepared. Be seen with the POD Hazard.

HAZARD LIGHTING

Many hazard lights on today's vehicles can only be seen up to 1/10 of a mile away in daylight conditions. With the POD Hazard, motorists can see a vehicle on the side of the road from more than 1/4 of a mile away – that's more than double the time to react.



LIGHT WHERE YOU NEED IT

When you need extra light at home, in the garage, at a camp site or simply in the yard, POD Hazard's ultra-bright utility light is ready when you are. Simply hang it, prop it up, or aim it, and it's ready to provide you with more than 350 lumens of light.

PUSH TO TEST BREAKAWAY SYSTEM

- Push to Test: LED's indicate fully charged, charging or recharge
- Multi-Stage Integrated Charger provides a fast recharge up to 12.8 volts. Once battery is fully charged, the automatic float mode is designed to provide a continuous charge without overcharging.
- Activates trailer brakes upon separation of trailer and tow vehicle
- For use on 1, 2 or 3 axle trailers equipped with electric brakes
- Weather/corrosion resistant, heavy-duty polymer case to protect battery and charger
- Tekonsha Breakaway Switch with 48" lead wires or 7.5" lead wires
- 5 Amp/hr battery, battery box dimensions – 4.25" x 6.25" x 4.125"
- 2 or 3 mounting options
- Note: Make sure battery is fully charged prior to towing

BREAKAWAY SYSTEMS

- For use on 1, 2, 3 and 4 axle trailers equipped with electric brakes
- These complete systems incorporate the highest quality components in trailer breakaway systems
- Meet or exceed Department of Transportation (DOT) specifications regarding trailer breakaway and holding requirements
- If a breakaway occurs between your tow vehicle and your trailer, the breakaway systems will automatically apply consistent braking power to your trailer brakes
- Quick and easy to install, the systems comes with a weather/corrosion resistant, heavy-duty polymer case to protect the battery and charger

Part Number	Description	Packaging
For 1 and 2 Axle Trailers with Electric Brakes		
1026	Includes 2018 Polymer Battery Case w/A-Frame or Post Mounting Bracket; 2023 Rechargeable Sealed 12v 5 Amp-hr Lead Acid Battery & Terminals; 2005-P Breakaway Switch.	Display Box
For 1, 2, 3 and 4 Axle Trailers with Electric Brakes

20005 / 20015

20010 / 20020

NOTE: 3 and 4 axle trailers require minimum 5 Amp-hr battery.
For optimal performance, replacement of breakaway electrical components is rec0mmended every 3 to 5 years.

BREAKAWAY SWITCHES

- Completely sealed breakaway switches to automatically set trailer brakes in case of accidental trailer breakaway
- Required by law in some states
- Emergency use only, not to be used to lock brakes when parked or stored
- 2010, 50-85-007 and 2005 have reinforced nylon case, weldable metal tab, nylon pin assembly and are rust and corrosion free. 2009 has all metal parts and a brass pin assembly

BATTERY CHARGERS

- For all 12v battery systems with a 4 Amp-hr minimum output
- 2024-07 is designed to fit securely into the Breakaway Battery Cases
- Temperature compensated design provides continuous recharge with automatic float mode feature to prevent overcharging
- 1024/50-85-104 will return trailer breakaway system batteries to their maximum potential
- Patent pending
- 2025-09 features an automatic float mode to prevent overcharging
- Ideal for seasonal storage and maintenance of recreational vehicles, motorcycles, snowmobiles, lawn tractors, and more

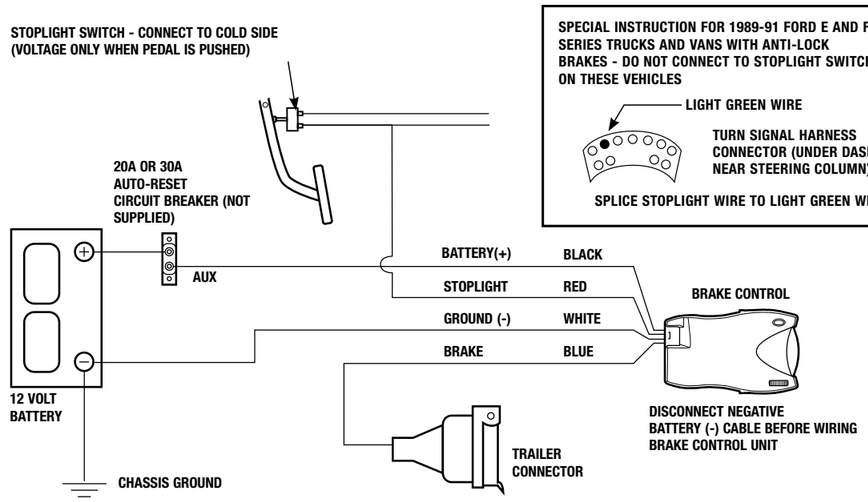
WIRE INSTRUCTIONS FOR ELECTRONIC BRAKE CONTROLS

Generic Wiring Diagram



READ THIS FIRST:
Read and follow all instructions carefully before wiring brake control. Keep these instructions with the brake control for future reference.

Important Facts to Remember

1. The brake control must be installed with a 12 volt negative ground system. (To install with a positive ground system use Tekonsha® P/N 3191.)
2. ⚠ WARNING Reversing BLACK and WHITE wires or improper wiring will damage or destroy brake control.
3. ⚠ WARNING Be sure to solidly connect all four wires or brake control will not function properly.
4. Soldering is recommended or crimp-on butt connectors are a suitable substitution.
5. Route all wires as far from the radio antenna as possible to reduce AM interference.
6. ⚠ CAUTION Use of proper gauge wire when installing the brake control is CRITICAL; smaller gauge wire may result in less than efficient braking. Minimum wire gauges are as follows:
   - 1-2 axle applications – 14 GA.
   - 3-4 axle applications – 12 GA.
7. Collection of water inside the trailer connector mounted on the tow vehicle will reduce the life of the connector.

Wiring Legend

BLACK Wire (Positive Battery)

WHITE Wire (Negative Battery)

RED Wire (cold side of stoplight switch)

BLUE Wire (brake output to trailer)

1. The WHITE (-) wire must be connected to a known ground.
2. ⚠ CAUTION Inadequate grounding may cause intermittent braking or lack of sufficient voltage to trailer brakes. The WHITE wire must be connected to a suitable ground location. The negative terminal of the battery is a suitable ground location in the absence of a Trailer Tow Package connection.
3. Connect BLACK (+) wire through an automatic reset circuit breaker (20 amp for 1-2 axles, 30 amp for 3-4 axles) to the POSITIVE (+) terminal of the battery. The BLACK wire is the power supply line to the brake control.
4. The RED (stoplight) wire must be connected to the cold side of the brake pedal stoplight switch. Splice down line from the switch; DO NOT disturb the position of the switch.
5. The BLUE (brake output) wire must be connected to the trailer connector's brake wire.

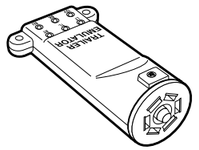
TRAILER EMULATOR REFERENCE GUIDE

Trailer Emulator



LT – Left turn signal, Red Light
TL – Tail / running lights, Red Light
RT – Right turn signal, Red Light
12V – 12 volt battery supply line, Red Light
BK – Electric trailer brakes, Red Light
BU – Backup lights, Red Light

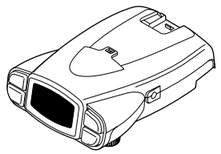
User's Guide

The Trailer Emulator requires the ground and 12 volt battery line to be properly connected in order to check the electric brake circuit.

- **12 volt** light on the emulator will be lit as soon as the emulator is connected to the tow vehicle's plug. If this does not happen see Troubleshooting Chart.
- The **RT, LT, TL** and **BU** lights will light on the emulator as those functions are activated on the tow vehicle. If this does not happen see Troubleshooting Chart.
- The **BK** light on the emulator should be off until the brake control is activated. (May see a flicker but not on steady) **NOTE:** The trailer emulator is not an exact trailer load so the light displays on various brake controls will respond differently.

BRAKE CONTROLS WITH LCD DISPLAY

90195 – P3®

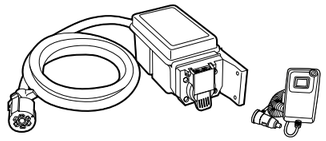


Brake Control's display should show:

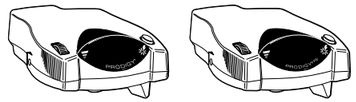
- With trailer emulator connected and no manual slide activation.
- Varying voltage displayed from 0-13 as manual is activated with the power knob full on.

BRAKE CONTROLS WITH DIGITAL DISPLAY

90250 – Prodigy RF®

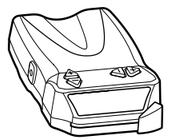


90185 – Prodigy® / 90885 – Prodigy® P2



90160 – Primus™ IQ

5535 – I-Command™



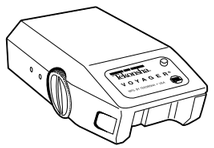
80550 – Pilot®

Brake Control's display should show:

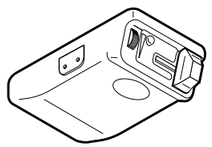
- .c - With trailer emulator connected and no manual slide activation ("c" indicates connection to the trailer).
- Varying voltage displayed from 0-13 as manual is activated with the power knob full on.

BRAKE CONTROLS WITH LED DISPLAY

9030 – Voyager®



90160 – POD™



Brake Control's display should show:

- GREEN - with trailer emulator connected with no manual slide activation.
- GREEN to varying colors of RED - trailer emulator connected and manual slide activated.

TRAILER EMULATOR REFERENCE GUIDE

TECHNICAL

TRAILER EMULATOR REFERENCE GUIDE

Troubleshooting Chart

Condition	Probable Cause
Trailer Emulator connected to tow vehicle:	
- 12V LED is NOT lit on Trailer Emulator.	1) Bad ground or incorrect wiring in tow vehicle connector. 2) No 12 volt battery power supplied to connector.
- LT LED is NOT lit on Trailer Emulator NOTE: Applies for LT, RT, TL and BU LEDs.	1) Bad ground or incorrect wiring in tow vehicle connector. 2) Loose or poor connection in circuit under test.
- BK is NOT lit on Trailer Emulator when manual slide / touch pad is activated, but 12V LED is lit.	1) Bad ground or incorrect wiring in tow vehicle connector. 2) Poor ground on Brake Control. Brake Control goes into a limit mode. 3) Gain adjustment on Brake Control is set to minimum, adjust gain to maximum and retest using manual.
- BK is NOT lit on Trailer Emulator when Brake Pedal is depressed, but 12V LED is lit.	1) If using brake pedal, Tekonsha's inertia activated controls require vehicle movement to activate sensor. Apply the manual switch and see if BK LED lights. (SEE NOTE)

Note:

The following two methods are available to test the Automatic response of the Tekonsha brake control with the Trailer Emulator.

1. Vehicle in Motion Method
   - Connect Trailer Emulator to vehicle.
   - Properly adjust the Level of the brake control.
   - Drive vehicle and apply brake pedal, the brake control's light should indicate a braking event.
2. Aggressive Level Method
   - Connect Trailer Emulator to vehicle.
   - Properly adjust the Level of the brake control.
   - Adjust Level setting toward Aggressive.
   - The brake control's light should indicate a braking event.
   - When finished with test remember to adjust the brake control's level back to desired tow setting.

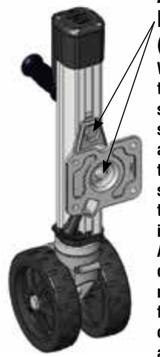
ADJUSTING THE SWIVEL MOUNT HEIGHT FOR F2 JACKS

Required Tools:
3/4 Socket, Ratchet Wrench, Torque wrench.

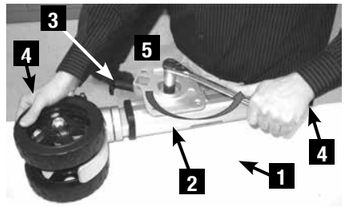


Adjusting Swivel Mount Height (If Necessary):

With jack removed from trailer, loosen the two swivel fasteners until the slide block moves freely along outer tube. To access the upper bolt be sure the swivel bracket is rotated in the horizontal (3" mounting) position as shown. Adjust swivel mount to desired location and re-torque to 60-70 ft-lbs. After adjustment, check for proper swivel and pin engagement.

Loosening factory torqued nuts and bolts on your swivel mount:

1. Cover your work area with a piece of cardboard or a towel to protect the finish on your jack.
2. Position the jack firmly on a bench at waist level.
3. Turn mounting bracket so that the pull pin is toward the caster(s).
4. Brace the gearbox against your hip and firmly grip the caster.
5. Loosen the half inch nut inside the swivel mount by pulling toward your body.



6. Remove the nut from the back of the swivel mount.

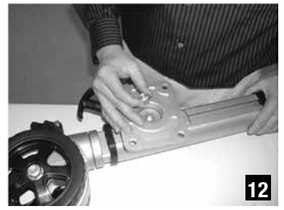
7. Pull the pull pin and remove the swivel mount.

8. Loosen the standard hex bolt with the 5/16 hex wrench.
9. Adjust the mount height.
10. Re-torque the nut on the slide block to 60 ft-lbs.

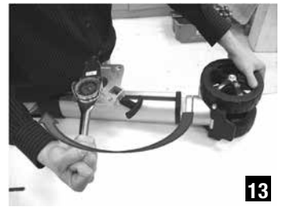
Final Steps:

11. Replace the swivel mount making sure that the washer is still in place.

12. Replace the nut on the back of the swivel mount.



13. Re-torque the nut on the back of the swivel mount to 60 ft-lbs.



14. You are now ready to enjoy your Fulton F2 Jack.

JACK REPLACEMENT QUICK REFERENCE GUIDE

NOTES: This Quick Reference Guide is not intended to supplement your original jack instruction sheet. This guide is only intended to help identify your jack for purposes of service and part replacement.

While servicing your jack, make sure it is not under load.

Replacement parts are intended for worn jack parts. If your jack has been damaged, replace it to prevent unsafe conditions.

Help us help you!
To ensure you receive the most accurate, prompt service possible, collect as much of the following information as possible before calling. If more than one item in a group seems to fit your jack, note all that apply and what about your jack that makes it fit that category. Some helpful pictures are shown at the bottom of the next page.

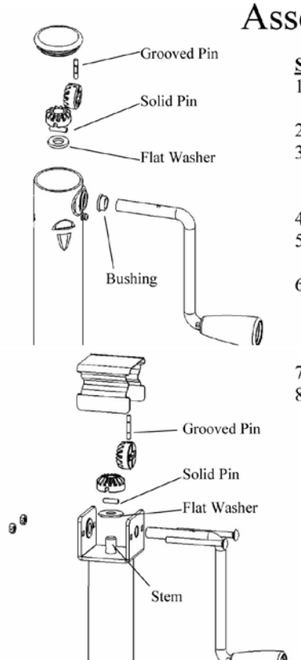
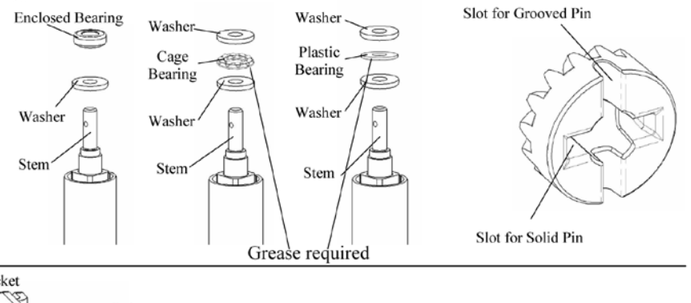
JACK ASSEMBLY QUICK REFERENCE GUIDE

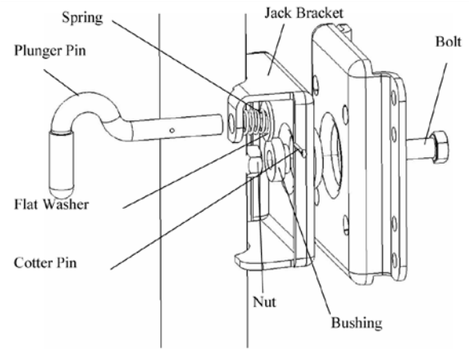
Assembly Quick-Reference Guide



Side-Wind Jack Assembly:

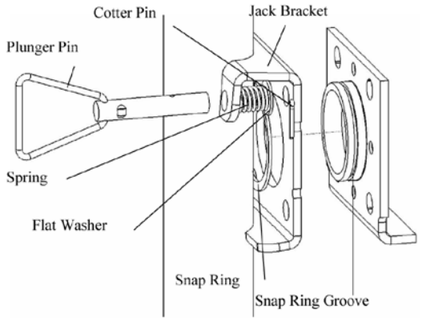
1) Carefully remove all parts from the gearbox. The grooved pin is very secure in place and you may need to rotate the jack handle to reveal and remove it.
2) Place the flat washer over stem at the bottom of the gearbox.
3) Place the solid pin through the hole in the stem and place the gear over the solid pin so that the solid pin rests in the slot on the gear that does NOT go across the entire gear. The lower gear should be the larger of the two gears if the gears are a different size.
4) If you have an internal gearbox, install the bushing from inside the jack tube.
5) Insert the handle through the bushing and the second gear. Be sure the gear teeth are fully engaged and the handle is sticking out the far side of the jack after this step.
6) The grooved pin must now by inserted through the second gear and the handle. It may be necessary to rotate the handle 1/4 turn to expose the hole in the handle. The groove pin will fit very tightly and should be installed carefully to avoid damage to the jack body. Make sure the pin in centered in the handle to ensure smooth cranking.
7) Re-install the cap with even pressure, or with the bolts and nuts as it was removed.
8) Be sure the jack is assembled properly and functions as new before using it to support a load.





Bolt-Thru Assembly:
Place the jack bracket into the recessed opening of the mount. Place the small end of the bushing into the jack bracket and onto the bolt. Tighten until there is little movement in the bushing.

Snap Ring Assembly:
Place the jack bracket over the mount so that the snap ring groove is reachable on the inside of the jack bracket. Insert the snap ring into the groove. Be sure the snap ring is fully seated in the groove.



Plunger Pin Assembly:
First select the appropriate hole for the plunger pin. When viewing the jack from the crank side, 3/8" pins fit into the left hole, 1/2" plunger pins fit into the right hole. Also check that the mating bracket has the correct size holes in it.

1) Start the plunger pin through the jack bracket and place the spring and washer on the plunger pin before fully inserting the plunger pin through the jack bracket.
2) The spring and washer must be compressed to allow the cotter pin to be properly inserted into the plunger pin.
3) Be sure the jack is assembled properly and functions as new before bending the cotter pin to secure the plunger pin assembly and before using it to support a load.

Technical information is current as of the printing of this catalog. Contact technical service for periodic updates.

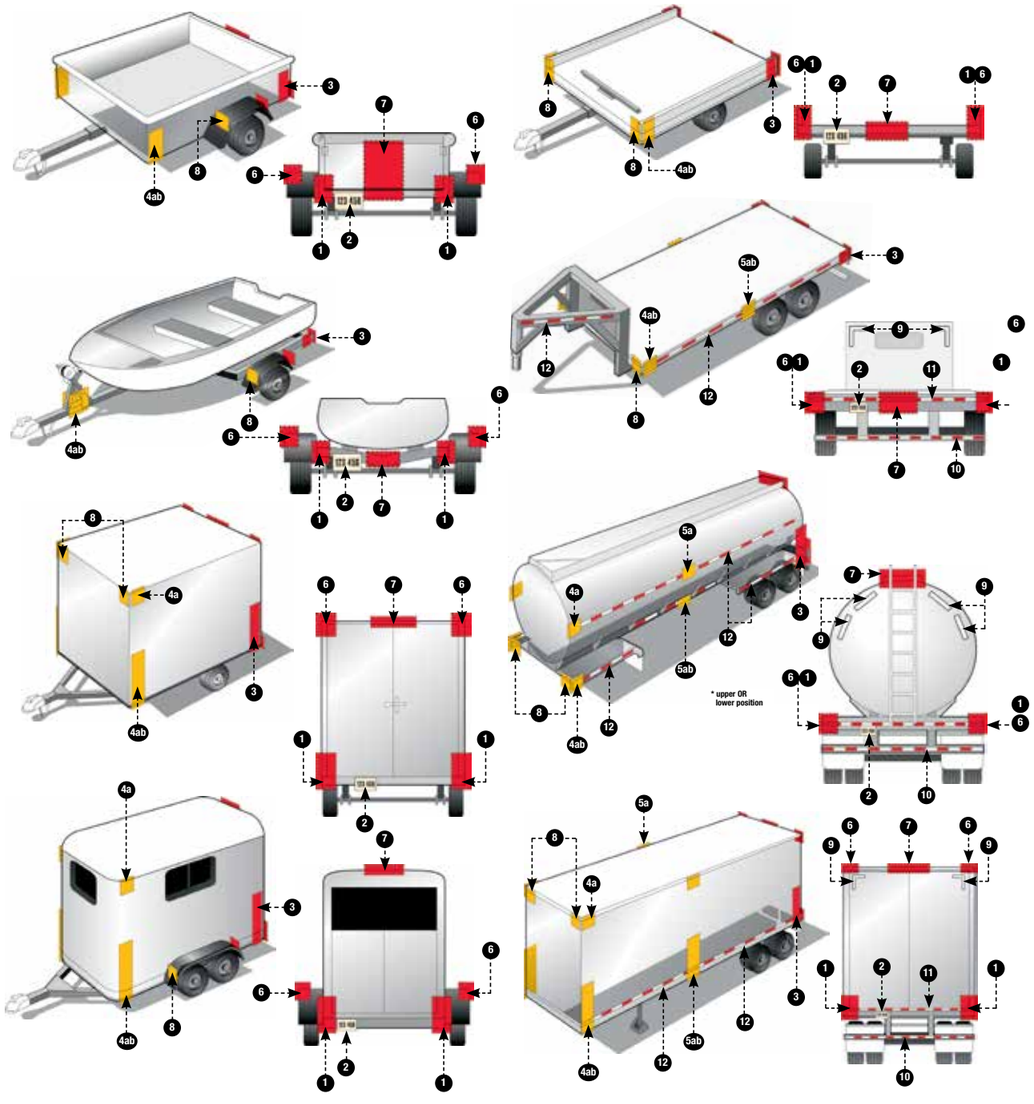
TRAILER FEDERAL LIGHTING EQUIPMENT LOCATION REQUIREMENTS

IMPORTANT NOTE: Every lamp, reflex reflector, and conspicuity treatment must be permanently attached in the location specified below and must comply with all applicable requirements prescribed for it by FMVSS/CMVSS 108. The face of any device on the front/rear and sides should be, respectively perpendicular and parallel to the vehicle's centerline, unless it is photometrically certified at installation angle. No part of the vehicle shall prevent any device from meeting its prescribed requirements unless an auxiliary device meeting all prescribed requirements is installed. In Canada: Manufacturers and importers of vehicles must have the proper certification test records demonstrating compliance of lighting components with all prescribed requirements.



This table summarizes lighting equipment requirements contained in Federal/Canada Motor Vehicle Safety Standard 108. While Horizon Global believes this to be an accurate summary of the latest printed information, the actual standard should be consulted for design or other such purposes. For complete compliance requirements consult Title 49 - Code of Federal Regulations-Section 571.108 (USA) or Section 108 of the Motor Vehicle Safety Regulations (Canada). State or Provincial regulations, where they may apply, have not been included.

STANDARD AG IMPLEMENT ENHANCED LIGHTING SCHEME

Under both the standard and enhanced lighting schemes, when traveling straight forward, the amber (outside) lights flash in unison with the tractor's amber lights on the high intensity at approximately 100 pulses per minute, and the low intensity of the red (inside) lights are on constantly.

With the standard wire harness in place, when a turn is being signaled, the amber light signaling the turn will increase flashing to approximately 120 pulses per minute with the amber light on the opposite side changing to a constant high intensity light. This mirrors the amber light on the tractor. Both red lights, however, remain on a constant low intensity.

To meet the enhanced lighting standard, introduce Electronic AG Light Enhanced Module to the implement's wire harness, and simply add red lights that have an active high intensity along with an additional RH and LH wire to these red lights. With this enhanced AG lighting system, during a turn the red light next to the amber turn side light will rapidly flash on the high intensity in unison with the amber light, and the red light on the opposite side will remain constant on the high intensity. This is a dramatic safety feature to better signal (to everyone) turns by tractors and implements.

7	YELLOW	OUTPUT FROM MODULE LEFT TURN AND FLASHER
8	RED	OUTPUT FROM MODULE RIGHT TURN ENHANCED
9	BLACK	OUTPUT FROM MODULE LEFT TURN ENHANCED
10	WHITE	OUTPUT FROM MODULE GROUND

Normal Driving Mode
1. Red tail lights (low filament) steady burn if turned on.
2. Amber warning lights flashing in unison with tractor at 60 to 85 flashes per minute.

Turning Mode
1. Amber flashing warning light and red light opposite the direction of turn shall become steady burning. The red light is on high filament.
2. Amber flashing warning light in direction of turn shall increase in flashing a minimum of 20 flashes per minute. In addition the red light in the direction of turning shall change from steady burn to flash in unison with the amber turn light and will flash from high red to low red filament.

8	YELLOW	OUTPUT FROM MODULE LEFT TURN AND FLASHER
9	RED	OUTPUT FROM MODULE RIGHT TURN ENHANCED & BRAKE SIGNAL
10	BLACK	OUTPUT FROM MODULE LEFT TURN ENHANCED & BRAKE SIGNAL
11	WHITE	OUTPUT FROM MODULE GROUND

Normal Driving Mode
1. Red tail lights (low filament) steady burn if turned on.
2. Amber warning lights flashing in unison with tractor at 60 to 85 flashes per minute, controlled by flasher in tractor.
3. Red stop lights (High Filament) steady burn if the brake is applied.

Turning Mode
1. Amber flashing warning light and red light opposite the direction of turn shall become steady burning. The red light is on high filament.
2. Amber flashing warning light in direction of turn shall increase in flashing a minimum of 20 flashes per minute. In addition the red lamp in the direction of turning shall change from steady burn to flash in unison with the amber turn light and will flash from high red to low red filament.
3. If brake is applied during turning mode there will be no change in the state of the light; hence turning mode overrides brake signal.

AGRICULTURAL LIGHTING INFORMATION

AG LIGHTS

Meet lighting standards for agricultural field equipment and improve highway operating safety easily and cost effectively with AG Lights by Horizon Global. No other lighting package offers you the quality and dependability of AG Lights by Horizon Global. Designed specifically for the agricultural industry, AG Lights by Horizon Global withstand the most rigorous field and environmental conditions for long life and wear without repair. A variety of mounts enable easy and quick placement on all towable field equipment – harvesters, field cultivators, tillage equipment, forage boxes, and more.

SAFETY IS KEY

Meet ASAE lighting recommendations for agricultural equipment and improve safety, while operating on highways easily and cost effectively, with AG Lights by Horizon Global. No other lighting package offers you the quality, durability, and reliability of AG Lights by Horizon Global. Designed specifically for the agricultural industry, these Heavy-Duty AG Lights, when combined with Horizon Global's AG Wiring, withstand the most rigorous field and environmental conditions for long life and wear.

DURABLE, DEPENDABLE CONSTRUCTION OF HEAVY-DUTY AG LIGHTS

- High-impact, glass-filled thermoplastic housings deflect objects away from the lens area and prevent them from damaging or dislodging the lights assembly.
- Acrylic lenses.
- All fasteners provided are coated to resist rust.
- Bulb replacement, if ever needed, is simple – uses readily available standard automotive #1157 bulbs.

USER-FRIENDLY DESIGN

- AG Harnesses are designed with a full-length ground circuit, from tractor to AG Lamp, assuring reliable and continuous operation.
- Each light's wiring is routed through a center port area, helping facilitate a variety of light placement.
- AG Lights by Horizon Global are available with a variety of connector options.
- Choose from mounting screws, bolts, or heavy-duty magnets to meet your mounting needs.
- All lighting units are designed for easy customer repairs... right in the field. Pry out lenses with flat screwdriver for easy access to, and replacement of, the #1157 bulb.
- Five distinctly different light styles to meet your performance and styling requirements.

ELECTRONIC ENHANCED AG LIGHTING MODULE

Horizon Global, known for innovation and product reliability, presents an electronic module to deliver the ASAE recommended "enhanced turn signal lighting" with conventional AG lights and a standard wiring scheme. This unit may be hard-wired into the AG lighting harness or coupled-in by use of a variety of plug assemblies.

Use of Horizon Global's electronic enhanced AG lighting module helps to meet the new ASAE standard cost effectively. It eliminates the need for special wedge-based bulbs and non-standard wire schemes to deliver the enhanced turn signal lighting called for by this ASAE standard.

Refer to the Standard AG Implement Enhanced Lighting Guide.

MULTIPLE MOUNTING OPTIONS

A variety of mounts enable suitable placement on tractors and all towable field equipment – harvesters, cultivators, tillage equipment, fertilizers, forage boxes, and more. Heavy-Duty AG Lights by Horizon Global have a patented design incorporating multiple mounting options and lighting combinations. Dual AG Light models provide amber flashing and turn indicators plus red tail light functions. Amber or red single lights provide maximum mount flexibility (vertically or horizontally) to meet applicable lighting requirements. All AG Lights by Horizon Global, except the grommeted series, are equipped with an exclusive molded weather-resistant low profile tri-plug. Custom plug configurations are also available.

Additionally, an optional brake light function is available for dual light or single red-lensed models. This optional function is also needed on lights used with enhanced turn light systems. The brake light option is recommended when implements are to be towed by non-farm vehicles or tractors with brakes (brake lights).

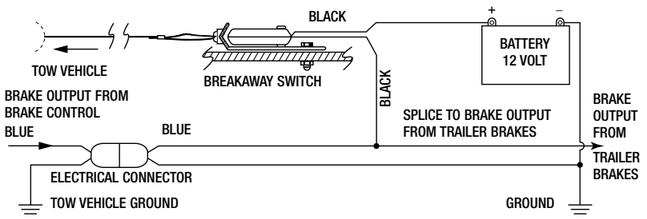
BREAKAWAY SWITCH INSTALLATION INSTRUCTIONS

READ THIS FIRST:
Read and follow all instructions carefully before installing or operating the breakaway Switch. Keep these instructions for future reference.



Important Facts to Remember

1. ATTENTION INSTALLER: Please give this sheet to consumer upon completion of installation.
2. SAFETY ITEM: Solder all wire connections.
3. Check condition of battery prior to each trip.
4. ⚠ WARNING Disconnect trailer plug before testing breakaway unit. Failure to do so will result in severe damage to electronic brake control.
5. ⚠ WARNING Check your breakaway system periodically to insure that wiring and connections are secure. A short or an open circuit can result in a no-brake condition.
6. For optimal performance, it is recommended that breakaway devices be replaced every 3-5 years.

Installation Guide

1. Mount Battery Case securely to frame, jack post or other suitable location on trailer with Breakaway Switch Cable towards tow vehicle.
2. ⚠ WARNING Switch location should be selected to ensure unobstructed line of pull in event of vehicle separation.
3. Bolt breakaway switch bracket to frame of trailer or battery case bracket using 1/4" bolt and lock nut or (2) 1/4" jam nuts. (Bolt and nuts not included in kit.)
4. ⚠ WARNING Do not over tighten bolt. Switch must be able to pivot.
5. Disconnect trailer from tow vehicle. Check and install battery.
6. Wire per schematic. Properly insulate all connections.
7. Attaching to tow vehicle: Attach Breakaway Switch Cable to tow vehicle frame being certain the cable does not drag on the ground and no strain or restriction is placed on the cable.
8. ⚠ WARNING Do not hook cable to safety chain loop or hitch ball.

Technical information is current as of the printing of this catalog. Contact technical service for periodic updates.

ABCD / TOW CHARGER / 12 VOLT LEAD-ACID BATTERY INSTRUCTIONS AND INSTALLATION

READ THIS FIRST:
Check condition of battery prior to installation and prior to each trip.

1. Remove Charger and Battery from the battery case.
2. Mount battery case securely to frame, jack post or other suitable location on trailer.
3. Bolt Breakaway Switch\ to frame of trailer or battery case bracket.
4. Disconnect trailer from tow vehicle. Install battery and charger into the battery case. Feed wires out the back, then close the top.
5. Wire per schematic diagram. Properly insulate all connections.
6. Provide adequate air circulation when charging battery. Do not charge battery in any other container besides the supplied battery box.
7. ⚠ CAUTION Do not place batteries in close proximity to objects which can produce sparks or flames.
8. Do not expose battery case to organic solvents or adhesives.
9. ⚠ CAUTION Do not attempt to disassemble batteries. Contact with sulfuric acid may cause harm.
10. ⚠ CAUTION Fasten batteries tightly and make provisions for shock absorption if exposure to shock or vibration is likely.
11. ⚠ WARNING Do not throw batteries into fire; batteries so disposed may rupture or explode.

Battery Data Chart

- 12 VOLT
- Maximum charge current must be limited to 1.2 amps
- Length = 3.54" Width = 2.76" Height = 4.13" Terminals: Fasten Tab .187" x .032"
- Service Life: Under normal operating conditions, 4-5 years in standby applications or 200-1000 charge/discharge cycles depending upon depth of discharge and rate of charge.

Important Facts to Remember

1. ⚠ CAUTION Improper installation of the breakaway battery will destroy the brake control. The negative (-) terminal must attach to ground and positive (+) terminal must attach to the breakaway switch.
2. ⚠ WARNING Check your Breakaway System\ periodically to insure that wiring and connections are secure. A short or an open circuit can result in a no-brake condition.
3. If excessive discharging of the breakaway battery occurs, check battery and recharge using a Heavy Duty Multi Stage/Maintenance Charger. Tekonsha charger 2024-07 is recommended for proper charging.
4. If the secondary battery needs charging, current will be drawn from the tow vehicle's battery at anytime the tow vehicle is connected to the trailer. Tekonsha charger 2024-07 is recommended for proper charging.
5. To only charge the breakaway battery when vehicle is running, a battery isolator may be installed in the 12 volt supply line (RED wire for tow charger).

12 Volt Sealed Lead-Acid Battery

To maximize the life of the battery the following conditions should be met:

1. Avoid over or undercharge. This is the single worst enemy of lead-acid batteries.
2. Batteries should not be stored in a discharged state or at elevated ambient temperatures.
3. Avoid exposing batteries to heat! Service life is shortened considerably at ambient above 30°C (86°F).
4. Due to the characteristics of this battery, after six to nine months of storage, the battery should be recharged.
5. Charge the battery at the proper rate. Current should be limited to 1.2 amps or less.

HEAVY DUTY QUICK/MAINTENANCE MULTI STAGE CHARGER

* Refer to Breakaway Switch Installation Instructions for complete operating instructions and cautionary statements.

TRAILER BRAKE TROUBLESHOOTING

NO BRAKES
- Check for defective circuit breaker.
- Check for open or shorted circuit.
- Check for properly wired system, including a good ground between towing vehicle and trailer, not through trailer hitch.
- Check for defective controller or loose wiring at controller.
- Check brake adjustment.
- Check for defective resistor or loose wiring at resistor (hydraulic units only).
- Check for defective or worn magnet(s).
- Check for damaged or worn connector between towing vehicle and trailer.
- Ensure correct controller is installed.

INTERMITTENT OR SURGING BRAKES
- Check for defective circuit breaker.
- Check for out-of-round brake drums.
- Check for properly wired system, including a good ground between towing vehicle and trailer, not through trailer hitch.
- Check for defective magnets or magnet wiring.
- Check for loose or worn wheel bearings.

INEFFECTIVE OR WEAK BRAKES
- Insure trailer is not overloaded.
- Check for loose or corroded connections.
- Check for properly wired system, including a good ground between towing vehicle and trailer, not through trailer hitch.
- Check for shorted circuit.
- Check for proper variable resistor resistance (external resistor or controller) to trailer (for hydraulic units only).
- Worn or defective magnet.
- Check brake adjustment. Check for bent backing plate flange.
- Check for contaminated brake linings.
- Check brake system wiring to ensure proper gauge wiring is used. Ensure wiring is not connected through the stop light circuit.
- Check for worn, damaged or improper brake linings.
- Check for weak or broken brake shoe return spring.
- Check for defective or worn brake drums.
- Check for loose axle.
- Check that correct controller is installed.
- Improper controller installed or settings (level or gain).

GRABBING OR LOCKING BRAKES
- Check for improperly installed flanges.
- Check for contaminated brake linings (grease on linings).
- Check for weak or broken brake shoe return spring.
- Check for out-of-round brake drums.
- Ensure a variable resistor is installed (if necessary) (hydraulic units only).
- Check for variable resistor for proper resistance (hydraulic units only).

GRABBING OR LOCKING BRAKES (Continued)
- Check that correct controller is installed.
- Rust on armature plate or brake drum.
- Check for loose or worn wheel bearings.
- Improper controller installed position.
- Check for improper gain setting.
- Check for improper boost setting.

DRAGGING BRAKES
- Check brake adjustment.
- Check for defective controller.
- Check for improperly installed flange.
- Check for corroded brake assembly.
- Check for weak or broken brake shoe return spring.
- Check for worn or damaged lever arm between magnet and brake shoe.
- Improper controller installed position.

NOISY BRAKES
- Check brake adjustment.
- Check for worn brake shoes.
- Check for contaminated brake linings.
- Check for weak or broken shoe return springs.
- Check for bent backing plate.
- Check for improperly installed flange.
- Check wheel bearing adjustment.
- Check for worn or damaged wheel bearings.
- Check for worn or damaged magnets.

BRAKES LOCKED, BRAKE PEDAL NOT DEPRESSED
- Check stoplight switch adjustment.
- Check for short between stoplight switch circuit and power supply circuit.
- If brakes are locked when 4-way flashers are operated, check for Pulse Preventer installed in circuit.
- Check breakaway switch (pulled).

UNEVEN TIRE WEAR

Possibly due to: A bent or misaligned axle, Improper tire inflation. On tandem axle trailers, check voltage at front axle and rear axle with brakes applied. At times, the front axle will "lift" allowing front wheel to lock and slide. Correction can be made installing magnets with even resistance.

INOPERATIVE BREAKAWAY SWITCH
- Check for dead or weak 12-volt battery, on trailer.
- Check all wiring and connections.
- Check breakaway switch.
- If only one brake is operating, check other magnets.

TRAILER BRAKE ADJUSTMENT**

Brakes should be adjusted after the first 200 miles of operation when the brake shoes and drums have "seated" and at 3000 mile intervals, or as use and performance requires. The brakes should be adjusted in the following manner:

1. Jack up trailer and secure on adequate capacity jack stands. Follow trailer manufacturers recommendations for lifting and supporting the unit. Check that the wheel and drum rotate freely.

⚠ WARNING *Do not lift or support trailer on any part of the axle or the suspension system.*

2. Remove the adjusting hole cover from the adjusting slot on the bottom of the brake backing plate.
3. With a screwdriver or standard adjusting tool, rotate the starwheel of the adjuster assembly to expand the brake shoes. Adjust the brake shoes out until the pressure of the linings against the drum makes the wheel very difficult to turn.

Note: With drop spindle axles, a modified adjusting tool with about an 80 degree angle should be used.

4. Then rotate the starwheel in the opposite direction until the wheel turns freely with a slight lining drag.
5. Replace the adjusting hole cover and lower the wheel to the ground.
6. Repeat the above procedure on all brakes.

⚠ WARNING *Never crawl under your trailer unless it is resting on properly placed jack stands.*

Follow the trailer manufacturers recommendations for lifting and supporting the unit. Do not lift or place supports on any part of the suspension system.

**Note: Trailer Brake Adjustment procedures courtesy Dexter Axle.

ELECTRIC TRAILER BRAKE PART IDENTIFICATION

Manufacturer Identification

AL-KO	AL-KO levers are very flat. The brake shoes do not have anything unusual about them. AL-KO uses only one return spring at the top on both 10 and 12-inch units. With the drum off, you can tell what size the system is if the magnets have never been replaced. The 10-inch brake will have a magnet with light green wires and the 12-inch brake will have white wires.
Dexter	Dexter uses a stamp on the back of the backing plate that identifies the size of the brake. Looking on the back side you will see a triangle. Around the triangle you will see Dexter and the size (i.e. 10" X 2 1/2" or 12" X 2"). Dexter uses 2 return springs on all late model brakes; some early 12-inch brakes used a single return spring.
Hayes	Hayes brake shoe webs have a tooth that hangs down at the top and use a single return spring. Early 12-inch brakes used a dual return spring. Hayes axle is owned by AL-KO. AL-KO backing plates have been seen on some of the new Hayes axles. It looks as if they are still using the Hayes name and are starting to use AL-KO parts.
Fayette	Fayette axles are obsolete. If you find a Fayette axle tag and the trailer is worth keeping you should consider changing the axles to AL-KO or Dexter. At that time it is recommended that the spring hangers and bushings also be replaced.

Brake Size Identification

Axle Identification	Axles generally have an ID tag located on the axle crossbar that gives you the axle capacity. Check there first. This would give you a starting reference point.
Brake Drum / Shoe Size	Measuring is the same for all brands. Using a tape measure you can do a random measurement as to the diameter by measuring across the drum. If it is a 10-inch drum you will measure approximately 11 inches across for an outside measurement. The 12-inch brake will measure approximately 13 inches for an outside measurement. The drum would need to be removed to get the correct diameter and width.

Magnet Identification
Magnets can be identified by the color of the wire used

Dexter 7" X 1 1/4"	The magnets are round. Prior to April 1990 they had yellow wires, after 1990 the magnet has white wires. Replacement of magnets will need to be done in pairs and updated to the new magnet along with the lever. The early levers are weak and will bend and hang up as they wear.
Dexter 10" X 1 1/2"	The magnet wires for the early model round magnets are white and the late model oval magnets are yellow.
Hayes 10" X 1 5/8"	The magnet wires for the early model round magnets are red and the late model oval magnets are green.
AL-KO 10" X 2 1/4"	It will have light green wires.
Hayes 10" X 2 1/4"	The early model round will have red wires and the late model will have oval green wires.
Dexter 10" X 2 1/4"	It uses green wires.
Fayette 10" X 2 1/4"	The round magnets will have white wires (obsolete).
AL-KO 12" X 2"	It will have white wires.
Hayes 12" X 2"	The early model round magnet will have red wires, the late model will be an oval magnet with white wires.
Dexter 12" X 2"	It will have white wires.
Dexter Centerline 12" X 2"	The 4.5K axles will have red orange wires, the 6/7K axles will have red wires (obsolete for both sizes).

BENCH TESTER INSTRUCTIONS

Many apparent brake control "failures" are the result of either faulty wiring or improper setup. The Tekonsha® Bench Tester is a test device designed to assist in determining if a brake control is working properly. This unit allows you to check a brake control for output, independent of vehicle wiring. The Bench Tester can simulate many fault conditions including open ground, short circuit, open load, and more.

To Use Bench Tester:

1. Turn off the power of the Bench Tester.
2. Disconnect the brake control from the tow vehicle.
3. Strip the insulation from the brake control's wires to about 1/4 inch and clip the matching color/function alligator clip of its corresponding stripped wire. DO NOT REVERSE THE GROUND AND POWER WIRES AS YOU MAY PERMANENTLY DAMAGE THE BRAKE CONTROL
4. Turn on the power of the Bench Tester.

If the control being tested is manufactured by Tekonsha:

1. The brake control's LED should glow green if it has a bi-colored LED. The display should show a ".c" if it has a digital readout. If you have the P3 brake control, you will see the Tekonsha logo. These conditions indicate a normal load connection.
2. Now set the brake control's power setting to maximum and actuate the control's manual override lever. The output voltage on the Bench Tester's voltmeter should read about 12 volts and the brake control LED display should glow bright red or show either 12 or 13. Release the manual lever. Lay the control on a flat surface and follow the directions for leveling the sensor per manufacturer's instructions.
3. Depress and hold the Bench Tester's brake switch.
   A. If you are testing a proportional control, tilt the brake control by moving the front of the control up to about 30-45 degrees to fully activate the accelerometer. The voltage on the tester's meter should again read approximately 12V.
   B. If the control being tested is a time-actuated device, you will see the voltage progressively "ramp-up" to the control's maximum output.

NOTE: If the brake control works normally on the Bench Tester then the problem is likely in the vehicle wiring or the control setup. If you check the vehicle/trailer wiring and it appears to be normal you can refer to our product catalog or visit our web site for control setup and / or addition-al troubleshooting assistance.

⚠ CAUTION Tekonsha controls are built to withstand many electrical fault conditions without damage to their ultimate performance. Please be aware that some competitive products may not be capable of surviving the same punishment so care should be exercised when testing these units.

CURRENT MONITOR INSTRUCTIONS

The Current Monitor is a testing device designed to assist in determining whether a tow vehicle's trailer connector has been wired properly. This unit is also an excellent diagnostic tool for the installation, setup and troubleshooting of electric trailer brake controls and may be used to level and pre-set a brake control when a trailer is not available.

To Use Current Monitor:

1. Simply plug the tester into the vehicle's trailer connector.
2. Sitting in the driver's seat, position the switch (located between the amp meter & voltmeter gauges) to the "Trailer Brakes" position.
3. Then position the switch labeled "Number of Axles" to the appropriate position for the trailer that is expected to be towed.
4. Now, activate each function indicated by the four LED lights across the front of the test unit. Once it has been determined that all lighting connections are working properly, test the output of the vehicle's trailer brake control.

NOTE:
Be sure the brake control has been properly leveled per manufacturer's instructions.

5. Depress the vehicle's brake pedal and/or engage the brake control's manual override.

   Brake Voltage must register at least 10 Volts. Brake Control Current Output should register at least:
   12 Amps for two (2) axle trailers, or 18 Amps for three (3) axle trailers.

NOTE: If the brake control will not generate 18 or more amps when used with three or more axle trailers BE SURE that you are using a brake control designed to deliver this performance.

If you discover a performance or wiring problem, look for one or more of the following fault conditions:

1. Improper wiring of the brake control to the vehicle's power and/or battery ground. (As with any electronic device, Horizon Global™ Electrical Products recommends grounding all brake controls directly to the vehicle battery to ensure the proper performance of the control's advanced circuitry.)
2. Defective or improper wiring of the trailer connector.
3. Broken, dirty or corroded trailer connector pins.
4. Open brake magnets, or open, broken or shorted wiring.
5. Defective brake control.

⚠ WARNING This unit contains magnets, which may become hot if the unit is left connected to an energized brake control for more than a few minutes.

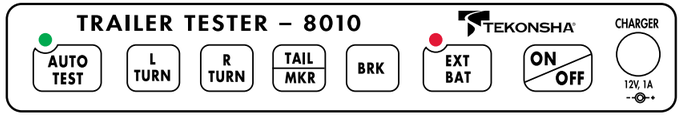
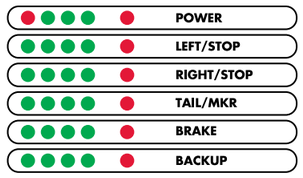
TRAILER TESTER INSTRUCTIONS



TRAILER TESTER (PART #8010) CONTROL PANEL

The Trailer Tester (Part #8010) is designed to help you quickly identify problems in the wiring of the trailer such as opens, shorts, incorrect wiring, etc. This is done by testing the Left Turn, Right Turn, Tail/Marker, Brake and Back Up circuits on the trailer, by indicating the approximate amount of current used in each circuit. It will also test the voltage of the external battery connected to the trailer charge circuit (i.e. trailer battery).



NOTE: The above LED light reference numbers are used in the following instructions for all rows.

READ THIS FIRST:

Read and follow all trailer warnings and installation instructions before continuing.

1. Check to see that the mating surfaces of the trailer wiring connector matches the Trailer Tester connector. All connector surfaces should be clean and free of dirt. For proper operation, make sure the trailer tester battery is fully charged. Plug the trailer connector firmly into the Trailer Tester. Be sure that the connector is fully inserted.
2. Turn the tester ON by pressing the ON button. All LEDs will cycle in order from top to bottom and left to right and will flash once. The tester is ready for use.
3. INDICATOR "LED" LIGHTS – POWER ROW ONLY (Measuring the internal battery of the tester – LED will remain lit after power has been turned on)
   - Green LEDs 2, 3 and 4 mean that the internal battery is OK to perform tests.
   - Red LED 1 flashing means that the internal battery needs to be charged (see "Charging the Internal Battery" instructions below) or may need to be replaced.
   - Red LED 5 indicates that the battery is faulty or overcharged. Battery may need to be replaced.
4. CHARGING THE INTERNAL BATTERY

   ⚠ CAUTION
   ONLY USE THE CHARGER (part no. 8008) PROVIDED WITH THE 8010 TESTER
   - When the charger is plugged into the charger socket, Red LED 5 on the Power Row flashes if the unit is ON.
   - If the unit is OFF, no LEDs will be lit, but the battery will still charge.
   - The LED on the charger is RED while charging.
   - The LED on the charger will turn GREEN when the battery is fully charged.

NOTE: The trailer tester will not function while the internal battery is being charged.

5. MANUAL AND AUTO TEST – LEFT/STOP, RIGHT/STOP, TAIL, BRAKE, BACKUP CHANNELS

   AUTO TESTING (measuring the amount of load on each channel):
   - Press the AUTO TEST button. When pressed, its indicator Green LED begins to flash.
   - Each channel will be tested from top to bottom
   - Red LED 5 will flash as its channel is tested
   - Green LED(s) will remain ON to indicate the amount of load. (See Step 6 for LED display load readouts)
   - See Step 7 for LED fault indication readouts.

   MANUAL TESTING (visual test of trailer lighting)
   - Depressing any manual button will cause that same channel to flash 11 times. This will allow you to walk around the trailer and confirm that lights are functioning properly.
   - The Trailer Tester will automatically shut down after three minutes to conserve the battery.
   - See Step 7 for LED fault indication readouts.

NOTE: To CLEAR THE DISPLAY or TURN OFF AUTO TEST, simply press the auto test button. Then you are ready to test again.

6. HOW TO READ THE LED DISPLAY (for approximate load readouts)

   LEFT/STOP, RIGHT/STOP and BACKUP Load Readouts:
   - Green LED 1 represents .25 amps
   - Green LED 2 represents 2 amps
   - Green LED 3 represents 3 amps
   - Green LED 4 represents 4 amps

   TAIL Load Readout:
   - Green LED 1 represents .25 amps
   - Green LED 2 represents 4 amps
   - Green LED 3 represents 6 amps
   - Green LED 4 represents 8 amps

   BRAKE Load Readout:
   - Green LED 1 represents 1 axle
   - Green LED 2 represents 2 axles
   - Green LED 3 represents 3 axles
   - Green LED 4 represents 4 axles

NOTE: All current measurements are standard to RV.

7. FAULT INDICATION (See graph below)
   - Red LED(s) 5 flashing on the affected channel represents: INTERCHANNEL SHORT OR REVERSED WIRES
   - Red LED 5 solid on the affected channel represents: NO LOAD/OPEN CIRCUIT
   - Green LEDs 1-4 and Red LED 5 all solid on the affected channel represents: OVERLOAD
   - Green LEDs 1-4 and Red LED 5 flashing on the affected channel represents: SHORT CIRCUIT TO GROUND
8. EXTERNAL BATTERY (Measures the trailer battery's (if present) open circuit voltage)
   - Press the EXT BAT button. When pressed, its indicator Red LED will light.
   - Voltage will be displayed by lit LEDs in the Power Row only.
   - Green LED's 2 and 3 mean that the external battery has normal voltage.
   - Red LED 1 flashing means that the external battery needs to be charged or may need replacement.
   - Red LED 5 indicates that the battery is faulty or overcharged. Battery may need replacement.

NOTE: This test will automatically stop after a few seconds and the red light will go out.

NOTE: This test does not indicate the amount of charge left in the trailer battery. (Excludes breakaway battery)

B: Retain the original signed towing safety form for your records.

DEALER SUPPORT

In the interest of safe towing, Draw-Tite® and Reese® offer this Dealer Installation Indemnification Program. We're committed to designing and building the industry's highest quality trailer hitches and towing accessories. We also back our equipment with an extraordinary level of support for our customers. Once enrolled in the Dealer Installation Indemnification Program, when you sell and properly install complete Draw-Tite® or Reese® applicable products according to written instructions and provide your customers with the required information for safe and proper towing, you are indemnified on any claim over USD $2,000 arising from your installation of Horizon Global branded products. *(For conditions and limitation see Dealer Agreement.)*

INDEPENDENT OF THIS AGREEMENT, THE HORIZON GLOBAL LIMITED LIFETIME WARRANTY REMAINS IN EFFECT WITH RESPECT TO PRODUCT CLAIMS.

To enroll in the program, contact your Sales Representative

DEALER BENEFITS

What you receive is the potential of significant cost savings by reducing your installation liability coverage for Horizon Global branded products. We design and build safety into everything we produce, so we have the confidence to back Horizon Global branded products with this comprehensive program. Therefore you'll be able to serve your customers with a new level of confidence, knowing Horizon Global backs your work. However, Horizon Global recommends you determine your base liability coverage requirements with your local insurance professional.

ELIGIBILITY

To qualify for the Dealer Installation Indemnification Program, you must be a qualified Draw-Tite® or Reese® Installer. If you install other manufacturers' products, you will need to maintain liability insurance to cover non Horizon Global branded products.

PROGRAM COST

There is no charge to the participating Dealer.

LIMITED LIFETIME WARRANTY

- 1. Limited Lifetime Warranty (“Warranty”). Horizon Global ("We" or “Us”) warrants to the original consumer purchaser only ("You") that the product will be free from material defects in both material and workmanship, ordinary wear and tear excepted; provided that installation and use of the product is in accordance with product instructions. There are no other warranties, express or implied, including the warranty of merchantability or fitness for a particular purpose. This warranty is not transferable.
- 2. Limitations on the Warranty. This Warranty does not cover: (a) normal wear and tear; (b) damage through abuse, neglect, misuse, or as a result of any accident or in any other manner; (c) damage from misapplication, overloading, or improper installation; (d) improper maintenance and repair; and (e) product alteration in any manner by anyone other than Us, with the sole exception of alterations made pursuant to product instructions and in a workmanlike manner.
- 3. Obligations of Purchaser. To make a Warranty claim, contact Us, identify the product by model number, and follow the claim instructions that will be provided. Any returned product that is replaced by Us becomes our property. You will be responsible for return shipping costs. Please retain your purchase receipt to verify date of purchase and that You are the original consumer purchaser. The product and the purchase receipt must be provided to Us in order to process Your Warranty claim.
- 4. Remedy Limits. Product replacement is Your sole remedy under this Warranty. We shall not be liable for service or labor charges incurred in removing or replacing a product or any incidental or consequential damages of any kind.
- 5. Assumption of Risk. You acknowledge and agree that any use of the product for any purpose other than the specified use(s) stated in the product instructions is at Your own risk.
- 6. Governing Law. This Warranty gives You specific legal rights, and You also may have other rights which vary from state to state. This Warranty is governed by the laws of the State of Michigan, without regard to rules pertaining to conflicts of law. The state courts located in Oakland County, Michigan shall have exclusive jurisdiction for any disputes relating to this Warranty.
