ELEVATE YOUR RIDE.

**ARNOTT® TRANSFORMS
GOOD RIDES INTO
GREAT RIDES****ELEVATE YOUR RIDE.**

For more than 25 years, Arnott has been an industry leader in manufacturing high quality aftermarket air suspension products. Arnott's team of passionate engineers, machinists and technicians operate out of a state-of-the-art 300,000 square foot facility on Florida's Space Coast which includes a dedicated 60,000 square foot Research and Development Center. Arnott is committed to engineering, developing, producing and supporting premium air suspension systems for motorcycles as well as luxury cars, trucks and SUVs.

Arnott's culture of quality and full commitment to customer satisfaction has enabled the company to expand as a globally recognized leader in high quality development and manufacturing. In addition, Arnott's comprehensive Limited Lifetime Warranty policy has earned the trust and confidence of our customers and dealers.

It's time to Elevate Your Ride! Upgrade to an Arnott Motorcycle Air Suspension system.

Arnott® designs and handcrafts air suspension systems specifically for your motorcycle. Each component is designed and developed by suspension engineers to ensure bikers have the best riding experience possible. By designing kits for specific applications, Arnott ensures your system exceeds the highest standards in quality, functionality and safety. If you want to enjoy your ride to the fullest, your bike needs an Arnott Motorcycle Air Suspension system.

THE ARNOTT® ADVANTAGE

YOU DESERVE A BETTER RIDE

Motorcycle air suspension is typically synonymous with ride height adjustability, but Arnott's air suspension also provides superior ride comfort, safety and luxury. Nothing will smooth out a chattering road, or eliminate painful bottoming like an Arnott Adjustable Air Suspension System. With Arnott's exclusive TruAIR Technology you can be sure you enjoy the smoothest ride available.

HAVING MORE FUN JUST GOT EASIER

Your fun shouldn't stop just because you have to stop. The ability to raise and lower your bike with an onboard compressor and switch ensures your size or mobility issues never limit you from taking your ride to new heights. With two kit options – the affordable Smooth Ride Series and top-of-the-line Ultimate Ride Series – Arnott offers you the flexibility to adjust your seat height and fine-tune the firmness of your air springs to match road conditions and load changes from passengers and gear.

LOWERING YOUR BIKE SHOULDN'T INCLUDE LOWERING YOUR STANDARDS

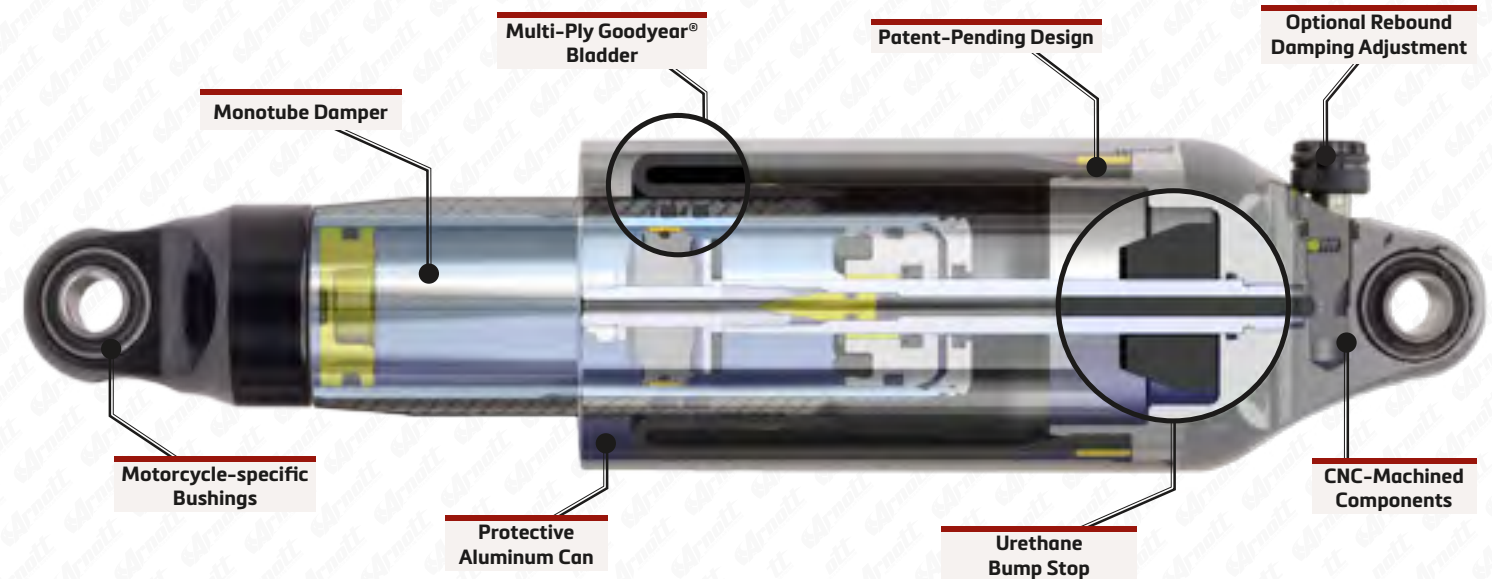

Arnott adjustable air suspension systems are designed and engineered for motorcycles by a team of motorcycle suspension experts who focus on developing the highest quality, application-specific air suspension systems. Arnott works with the finest components from brands including FOX®, Goodyear®, VIAIR® and other elite material suppliers to manufacture high quality, complete systems you can trust. Extensive research is conducted to ensure the Arnott system for your bike fits perfectly, and is tuned to provide you the very best experience.

ARNOTT® vs. THE COMPETITION

Arnott's TruAIR Technology is true adjustable air suspension, not simple air cylinders, 'air-assisted' shocks or automotive part castoffs. Arnott's TruAIR onboard adjustable air suspension technology provides superior comfort, adjustability and great looks. Arnott kits offer fast, on-the-fly adjustable air spring firmness using a powerful onboard compressor.

TruAIR TECHNOLOGY

AUTOMOTIVE-DESIGNED

- Designed & tuned for an automobile, NOT your bike!
- Low-tech twin-tube design provides inferior ride quality.
- Fender can rub on the rear tire when deflated.
- Kit uses parts bin castoffs – Not a tested kit!

OE AIR-ASSISTED

- Found on several Harley-Davidson®, Victory® & Indian® models.
- Can NOT be adjusted on-the-fly.
 - Uses special hand pump to change air pressure.
- High initial warranty rate due to early leaks.

AIR CANISTER/CYLINDER

- Bouncy ride is not comfortable.
- Dangerous during evasive maneuvers or hard riding.

PRODUCT OFFERINGS

ULTIMATE RIDE SERIES

Arnott's Ultimate Ride Series offers the finest in adjustability and ride quality for riders who demand the very best for their bike. Arnott's patent-pending design features a FOX® Monotube shock custom-tuned to provide an exceptionally luxurious ride. Arnott® adds a multi-ply Goodyear® air bladder to provide height adjustability and additional air spring firmness. Ultimate Ride

Series kits feature protective cans to protect the air bladder, powerful compressors with application-specific mounting hardware and a handlebar-mounted inflation control switch. Kits with optional rebound control enable the rider to adjust the internal damping of the shocks, providing additional fine-tuning of your ride quality.

SMOOTH RIDE SERIES

The Smooth Ride Series includes Monotube shocks engineered by Arnott specifically for motorcycles to provide a sporty, stock-like ride at an affordable price. Arnott adds a multi-ply Goodyear air bladder to provide height adjustability and additional air spring firmness. Arnott's Smooth Ride Kits provide an upgrade over OEM shocks and are far superior in quality and safety compared to other discount kits on the market. The Smooth Ride Series come standard with a micro compressor and inflation control toggle switch.

READY-TO-INSTALL COMPLETE KIT

All of Arnott's kits come with a weather-resistant, maintenance-free onboard air compressor plus make and model-specific mounting hardware. Arnott kits also feature premium components including a unique distribution valve with muffler, pre-wired relay and fuse, split loom for protecting wires and air lines, color-coordinated bolt covers and in-depth instructions for a simple yet ultra-clean installation. Arnott kits are handcrafted, tested and inspected before they leave our US factory and are backed by free technical support and a Limited Lifetime Warranty.

The entire Arnott Air Suspension system is completely integrated for a perfect fit with OEM touring model side bags and accessories.

The compact Arnott air compressor utilizes custom-designed mounting hardware for an easy and clean installation.

The Arnott handlebar-mounted dual button assembly makes adjusting the suspension setting easy.

**HARLEY-DAVIDSON®
SOFTAIL®**

Arnott's air suspension kits for Softail models provide maximum adjustability for better ride quality and lowering capabilities. At the core of this patent-pending system is a custom nitrogen-charged FOX® shock absorber paired with a separate Goodyear® air spring in a protective case. Lowering your Softail at the next stop light with the push of a button will make riding easier, more fun and is sure to catch the attention of all onlookers.

TRI GLIDE®**

**YOU'LL WONDER HOW
YOU ENJOYED
RIDING WITHOUT IT
ELEVATE YOUR RIDE.**

The three-wheel movement is providing riders of all ages, and their passengers, with a more stable ride and new opportunities to get out on the road. With Arnott's Ultimate Ride Series Tri Glide kits you can be confident knowing no matter how much weight you are riding with, you'll enjoy exceptional ride comfort and eliminate painful bottoming over any road surface. Plus, Arnott's extended shock length (14" vs. 13") increases the ground clearance for the exhaust tips. This helps prevent your pipes from scraping on the pavement as often happens with stock shocks.
