for Automotive Technicians**

Remanufactured in the U.S.A.

165 SKUs

Rear Drive Axle Assemblies

Save time & money with **COMPLETE BOLT-ON READY** Axles

Bolt-on Ready

No need for a repair specialist or a lengthy, complicated rebuild. CARDONE's full assemblies are available in open or limited slip differentials and various ratios. All units are 100% pressure and load tested and come pre-filled with oil.

No-Hassle Delivery & Core Return Process

We will handle all delivery and core pick up logistics to and from your shop – **FREE OF CHARGE!**

100% New U-Bolt Kits

Each kit contains two U-bolts with nuts and washers and has a rust-resistant coating for longevity.

WE BUILD IT BETTER

Average axle rebuild time: **6 - 10 hours**
CARDONE axle installation time: **2 hours!**

Troubleshooting Electronic Throttle Bodies

The Electronic Throttle Body (ETB) is part of the Throttle-By-Wire System. It is important to check the whole system prior to any repairs.

The ETB Controls the amount of air flow that enters the intake manifold of the engine.

Symptoms of a failed/failing ETB are:

Hesitation, Sag, Stumble

There is a momentary lack of response as the accelerator is pushed down. This condition can occur at any vehicle speed. This condition is usually more pronounced when first trying to make the vehicle move, as from a stop. This condition may cause the engine to stall in severe conditions.

Lack of Power, Sluggishness, or Sponginess

The engine delivers less than expected power. There is little or no increase in speed when the accelerator pedal is pushed down part way.

Surges/Chuggles

Engine power varies under steady throttle or cruise. It feels like the vehicle speeds up and slows down with no change in the accelerator pedal position.

Note: After cleaning or replacing a heavily coked throttle body, a Throttle Body Relearn procedure will need to be performed. (Follow O.E. procedure).

Comment: Ensure weather seal on ETB Connector is not missing or damaged. If so, water entry can damage the internal components of the unit.

After replacing the ETB, always follow proper relearn procedures as required by the manufacturer.
