

# UTV HAND HOLDS

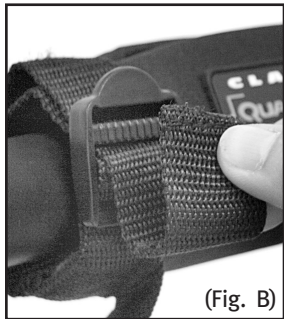

## HAND HOLDS INSTALLATION

Your UTV hand holds can be mounted either on the vertical support or overhead tubing on your roll cage.

1. Wrap the hand holds around the roll cage bar in the desired location and secure using the rip-and-grip tabs. (Fig. A)
2. Secure the web straps found at either end of the hand hold by using the ladder buckles, running the strap through the buckle threading path. (Fig. B)
3. Fasten the web strap ends using the rip-and-grip tabs. (Fig. C)
