1. Clean the rear hatch and apply a protective covering to the rear bumper and around the areas where the deck straps will mount to protect the paint finish.
2. Peel off a small section of double faced tape backing from each deck strap and align the deck straps into place, making sure they are perfectly aligned using the dimensions shown in the illustration. Make sure that the deck straps are flush with the bottom edge of the rear hatch. Do not let the bottom of the deck strap protrude beyond the edge of the rear hatch or it may damage the bumper.
3. While holding the deck straps firmly in place, carefully remove all tape backing and press firmly into place.
4. Install the stainless Steel buckles using the supplied double faced tape (where shown) to finish.
