

Big News at Flowmaster!

All-New Flowmaster Catalytic Converters

The quality you know from the brand you trust!

For the first time in the 30-year history of the company, Flowmaster offers street legal replacement universal fit catalytic converters designed to meet 49-state EPA requirements. Best of all they carry the Flowmaster name so you know these quality components will perform, just like all Flowmaster products

Flowmaster 49-state Universal Catalytic Converters are designed to fit a wide variety of applications. The highest quality materials are used to manufacture these USA made catalytic converters. Stainless steel outer shell construction with noble metal loadings on OEM quality grade substrates meet or exceed USEPA standards. The OBD II universal converters have been engineered specifically for maximum efficiency to avoid "MIL" code issues that are frequently encountered when a low quality converter is used. Once it has been determined that a replacement converter is needed, the universal converter should be installed by a qualified technician familiar with fabrication and welding techniques. Note: These USEPA 49-state converters are not available for sale or use on vehicles licensed or operated in the State of California. See our Converter Catalog for specific application details.

- Available in a wide variety of Pre-OBD and OBD II EPA universal fit applications
- 25,000 mile internal components emissions warranty
- 50,000 mile/5-year warranty on exterior casings
- Exceeds all USEPA 49-state requirements
