HOW TO DETERMINE THE CORRECT SHOCK FOR YOUR TRUCK

Part Number: The catalog number for the individual shock absorber.

Extended Length*: The length of the shock absorber when it is fully extended. See "How to Measure" instructions.

Collapsed Length*: The length of the shock absorber when it is fully collapsed. See "How to Measure" instructions

Stroke: This is the approximate length of the stroke of the individual shock absorber being described.

Mounting Codes: Indicates the type of mounting ends for the upper and lower end of each shock absorber.

They are listed as follows:

- Stud type mounts ("S" & "DS")
- Eye ring and bushing mounts ("EB")
- Eye ring and bushing with sleeve mounts ("ES")
- Eye ring and bushing with bar pin mounts ("BP")
- Special mounting codes ("SP")

HOW TO DETERMINE THE CORRECT SHOCK FOR YOUR TRUCK

STEP 1: Measure the diameter of the dust tube and cylinder to determine the series.

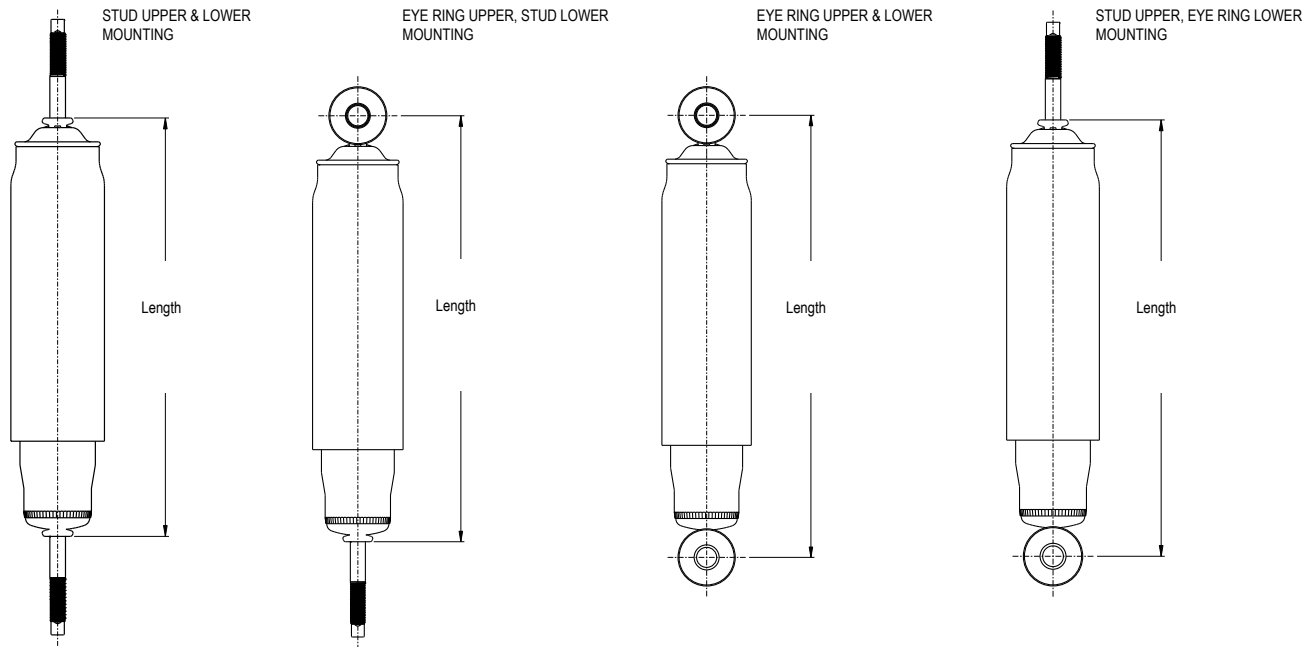

EXTERNAL DIMENSIONS

HOW TO DETERMINE THE CORRECT SHOCK FOR YOUR TRUCK

STEP 2: Identify the mounting style. Measure fully extended and fully collapsed lengths at the locations indicated for mounting style.

HOW TO MEASURE EXTENDED & COLLAPSED LENGTHS OF SHOCK ABSORBERS

INSTRUCTIONS:

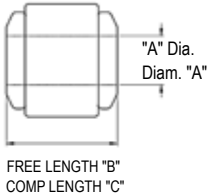

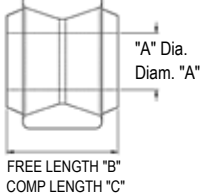

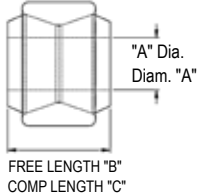

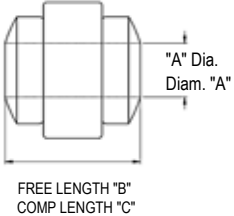

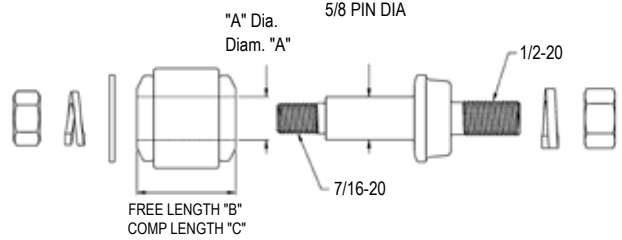

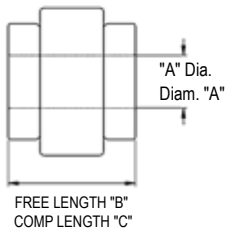

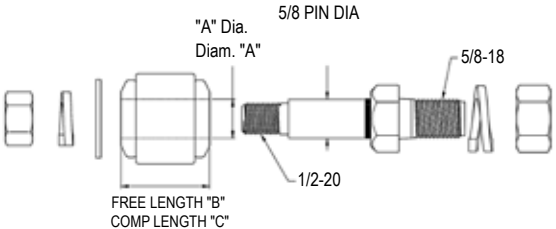

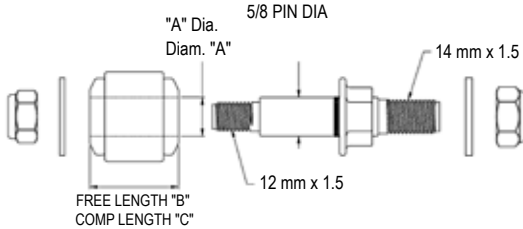

1. Using the proper measuring points as shown above find the nearest replacement shock absorber from the listing by increments of extended length
2. Identify the proper mounting from the mounting codes and match these requirements by carefully measuring the mounting dimensions (top and bottom) of the shock absorber to be replaced.
3. Carefully take note of the following requirements:
 - a. **Dust tubes** - This requirement should be noted in comparison with the shock absorber to be replaced. Shock absorber environment in its application makes this requirement necessary for piston rod protection and extended shock absorber life.
 - b. **Recoil Cutoff and Compression Bumper** - Carefully note these specifications - deviation of length requirements should not exceed $\pm 1/4$ ". These shock absorber designs are footnoted for easy identification.

Note: Shock absorbers used for installations other than those recommended in our catalog are **not subject to warranty**.

HOW TO DETERMINE THE CORRECT SHOCK FOR YOUR TRUCK

STEP 3: Measure end mount diameters, widths, and lengths. Refer to the following end mount tables to determine the appropriate or matching mounting code.

MOUNTING CODE "EB" EYE RING AND BUSHING

HOW TO DETERMINE THE CORRECT SHOCK FOR YOUR TRUCK

EXPLANATION OF COLUMN HEADINGS

SHOCK ABSORBER PART NUMBER: The catalog number for the individual shock absorber.
EXTENDED LENGTH:* The length of the shock absorber when it is fully extended. See "How to Measure" instructions.
COLLAPSED LENGTH:* The length of the shock absorber when it is fully compressed. See "How to Measure" instructions.
STROKE: This is the approximate length of the stroke of the individual shock absorber being described.
MOUNTING CODES: Indicates the type of mounting ends for the upper and lower end of each shock absorber. They are listed as follows: Stud Type Mounts ("S" & "DS") Eye Ring and Bushing Mounts ("EB") Eye Ring and Bushing with Sleeve Mounts ("ES") Eye Ring and Bushing with Bar Pin Mounts ("BP") Special Mounting Codes ("SP")
DUST TUBE: Indicates whether the shock absorber is supplied with a dust tube.
MOUNTING ACCESSORY PACKAGE NUMBER: The part number of the Mount Accessory Package supplied with the shock absorber.
*NOTE: All dimensions shown are in inches

STEP 4: Refer to shock absorber specifications by end mount. Start first by finding the appropriate series. Next, match the extended/collapsed length and find the correct mounting codes. Refer to the far left column of the chart for the correct Gabriel shock absorber part number.
