

Grille Installation Process

Nissan 350Z '06-'08 MX-Series Lower Grille Kit (NIS-3501)

Part # NIS-3501S

Part # NIS-3501B

Picture #1:

Here is the GrillCraft MX Series Custom Mesh Grille kit for the Nissan 350Z Part# NIS-3501 available in silver or black powder coat finishes.

Picture #2:

Our project Nissan 350Z in need of a custom grille for some added styling and radiator protection.

Picture #3:

Remove the grille center trim.

Picture #4:

With the center trim removed you can access the screws to the right & left trim pieces.

Picture #5:

Removing upper right & left trim pieces.

Picture #6:

Getting access to the underside will be needed in order to remove lower trim screws.

Picture #7:

Removing lower grill trim cover.

Picture #8:

The vehicle with the upper & lower plastic trim covers removed.

Picture #9:

Place the GrillCraft Grille into the lower bumper opening and using a scribe mark the mounting tab center hole locations.

Picture #10:

Place the GrillCraft Grille into the lower bumper opening and using a scribe mark the mounting tab center hole locations.

Picture #11:

Drill 3/16 hole for the mounting screws.

Picture #12:

Remove the plastic clips that secure the right & left plastic baffles in the corner of the bumper opening.

Picture #13:

These are the clips that hold the plastic baffle in place.

Picture #14:

Remove the bolts on the lower front section of the bumper cover.

Picture #15:

With the bolts removed you now have access to the under side of the bumper in order to remove the plastic baffles.

Picture #16:

The plastic baffle removed from vehicle.

Picture #17:

Drill a clearance hole in the plastic baffle. This hole is needed in order to gain access to the grille screw when fastening the screw.

Picture #18:

Attach the supplied "U" nuts to the grille tabs as shown.

Picture #19:

Place the GrillCraft Grille into the lower bumper opening and fasten from the underside.
