Picture #2:

The GrillCraft Custom Grille Kit has all the hardware included.

Picture #3:

Here is our project Toyota Tacoma in need of a GrillCraft Custom BG-Series Billet Grille.

Picture #4:

Remove the grille shell screws located in the right & left corners.

Picture #5:

Unclip the grille shell clip as shown.

Picture #6:

Note the grille shell clip.

Picture #7:

Unplug corner lamp socket.

Picture #8:

Remove grille shell from vehicle.

Picture #9:

A view of the back side of the factory grille shell.

Picture #10:

Using a saw cut the center bars out of the factory grille shell.

Picture #11:

Make sure not to cut the mounting bases of the grille shell shown here.

Picture #12:

This is what the grille should look like with the center cut out. Note mounting bases are all still in place.

Picture #13:

This is what the grille should look like with the center cut out. Note mounting bases are all still in place.

Picture #14:

Place grille insert into grille shell opening and drill mounting bracket center hole location.

Picture #15:

Fasten the grille insert into the grille shell using supplied hardware.

Picture #16:

Place the hood latch extension bracket onto the hood release latch as shown and mark extension center hole.

Picture #17:

Drill hole for latch extension into factory latch.

Picture #18:

Mount extension latch with supplied nut and bolt.
