ABOUT INNOVATIVE CREATIONS INC

Innovative Creations Inc. (ICI) has a 30 year track record of manufacturing high-quality automotive aftermarket accessories. When you purchase an ICI product, not only are you getting the best product money can buy, you're also getting the service and support you need and expect from a leader in the automotive industry. ICI is located in sunny Peoria, Arizona. Everything from product design, prototyping, testing, manufacturing, sales, marketing, and operations happens in this facility.

ICI's global manufacturing capabilities keep us on the leading edge of manufacturing technology and give us the ability to maintain a competitive edge in product cost, which means more value for our customers. We search the globe for the best raw materials which we purchase in volume, allowing us to buy at the best prices. All of this results the best products at very competitive prices! This means more value for you, the customer.

ABOUT MAGNUM TRUCK GEAR

Designed, Engineered and Manufactured by Innovative Creations Inc.

Magnum Truck Gear by ICI is a premium line of stylish aftermarket products for major truck brands. Each Magnum Truck Gear part has been designed to compliment one another from front to back. Our design patented RT Bumper has become one of the most popular aftermarket truck bumpers on the market. Designed to handle anything off-road and look good while on the street, Magnum Bumpers are an excellent addition to the front or rear of your truck.

Magnum RT Steps have quickly become one of the best-selling steps on the market. Our distinct angular drop down step offers a look that no one else can offer. Magnum RT Steps also provide the ultimate function featuring a diamond plate, non-slip step pad and a new LED light option which enables you to see your step in any situation.

Is your truck tough enough for the best aftermarket truck parts on the planet? If so, step up to a Magnum!

A close-up photograph of the front bumper of a Jeep Wrangler. The bumper is black and features a red winch with a steel cable. There are several round light pods integrated into the bumper's design. The background shows a gravel surface.

The Magnum RT Front Bumper for the Wrangler has been designed by ICI engineers to function flawlessly while off-road. No detail has been missed. The stylish stubby-style front bumper will hold your hi-lift jack, up to a 12.k winch and has enough light options to dramatically increase off-road visibility. Comes with round light pockets to match the look of the Wrangler and heavy-duty shackle mounts.

A photograph of the rear of a Jeep Wrangler. The focus is on the rear bumper, which is black and has a spare tire mounted on it. The bumper features a red third brake light and a silver shackle mount. The text 'RBM13JPN' is overlaid on the right side of the image.
