DODGE RAM CUMMINS L6 6.7L (TD)

Bolt-on the all-new Torque Master and experience the neck snapping torque generated from this dyno-tuned air intake system with heat shield. The massive 4" tube and dry filter will deliver an astonishing 19 h/p and 37 ft/lbs of torque for that extra uphill pull. As an added value, your engine will benefit from the cleaning efficiency of the first "surface loading" web nano-fiber dry filter: the media that catches contaminants on the surface while accelerating airflow for more POWER! If it's good enough for the US Army's Abraham M1 tanks then its good enough for you!
