Experience the Power of the new Torque Master by Injen Technology! These "injeniously" designed air intakes with MR Technology will grab you by the seat of your pants with massive power gains! These systems also come equipped with show-quality wrinkled black air boxes that enclose the dry ultra-Flo nano-fiber filters. As an added value, you'll benefit from the cleaning efficiency of the first "surface loading" dry web nano-fiber filter: a media that catches contaminants on the surface while accelerating airflow for more POWER! Developed for the US Army Abrahams M1 tanks, the dry Web nano-fiber filtration helps protect your engine from harsh and dirty environments, extending the life of your motor.
