

SP1320

2009-10 Kia Forte 2.0L, 4 cyl.
5 speed cold air intake equipped
w/ the patented Air Fusion

injen[®]

TECHNOLOGY

**+Gains of up to
11 hp - 9.5 ft.lbs torque**

Features and Benefits:

- **MR Technology** (Tunes intakes to factory air/fuel ratios) 2 patents
- **Velocity air horns** (Controls short/long term fuel trim levels) patent pending
- **Web nano-fiber dry filter** (The nano-fiber webbing catches contaminants on the surface and accelerates air flow)
- **Mandrel-bent aluminum tubing**
- **Air box cover plate with louvers** (flat black only)

KIA steps up to the plate and hits a Grand Slam!

The unveiling of the Kia Forte gives new meaning to the words "Sports Compact." Its sleek and aerodynamic design has captured the attention of the young urban enthusiast. With a little help from Injen, the Korean performance Forte just got faster with the addition of the all new SP1320. Injen Technology combines the multi-patented MR step down process with the first velocity air intake horn to produce astonishing gains of up to 11 horse power and 9.5 ft/lbs of torque. In addition, Injen now uses a Web nano-fiber dry filter in all its applications, a surface loading filter that not only aids in producing horsepower but helps protect your engine from harsh and dirty environments. Injen Technology, Pioneers of Performance Tuned Air Intake Systems.
