

SP1989

2009 Nissan 370Z 3.7L V6, Dual Cold Air Intake
w/MR Technology and Air Fusion

injen[®]

TECHNOLOGY

+Gains of up to

15 hp - 11ft.lbs torque

contact your local dealer for best pricing.

Features and Benefits:

- **MegaRam Technology**- The only patented step-down process that controls air/fuel ratios
- **Air Fusion** - Controls short term, long term fuel trim levels to factory specs
- **Ea nano-fiber performance dry filters (no oil required)**
- **Tuned billet sensor adapter**
- **Calibrated mass air flow sensor housing**
- **Replacement windshield fluid reservoir bottle with brackets**
- **Polished, mandrel-bent aerospace aluminum intake**
- **Installation does not require cutting of the factory cross member unlike the competition**

“BEST OF THE BEST”

Injen technology continues to lead the way, delivering “WORLD CLASS PERFORMANCE INTAKES”. Injen’s patented MR step-down process and Air Fusion come together to give you the first pre-tuned, twin, cold air intakes engineered for your 370z. The all-new SP1989 keeps raising the bar as the only “Tuned Cold Air Intake System” on the market capable of producing up to 15 h/p and 11ft./ lbs. of torque. “The Best of the Best” just got better with the release of the Injen/AMSOIL Ea nano-fiber performance dry filters. **NO OIL REQUIRED!** No more contaminated sensors! Buy from the company that invented and patented the MR step-down process, buy Injen Technology!
