

News Release

OMEGA brings RS firmware compatibility to UltiMate Vehicle Security.

Douglasville, Georgia – July 25, 2013 – Omega Research and Development Technologies, Inc. is now shipping their new UltiMate-10-EDP and UltiMate-30-EDP RF-kits. These “RF-KIT” systems pair with available “RS Firmwares” to turn our OL-MDB-ALL module into a complete stand-alone remote start system, with a much simplified installation.

If you service a car dealership with any of the listed vehicles, you can now offer them a “One-button” Remote Start or 4-button Keyless-Entry/Remote Start as a part of the expeditor oriented UltiMate Vehicle Systems package.

The UltiMate-10-EDP comes with two One-button remotes that offers the customer remote start & unlock features from up to 1000 feet away. The UltiMate-30-EDP comes with two 4-button remotes that offers the customer lock, unlock, trunk and remote start features from up to 1500 feet away.

These RF-Kit systems are also fully compatible with our BMW, Benz, Chrysler, GM, and Ford “OL-RS” T-Harnesses/Module kits that utilize factory connectors to offer nearly complete “Plug-n-Play” installation, saving install time and increasing the reliability of the installation.

About Omega:

Omega Research & Development Technologies has been an innovative leader in the vehicle security industry for over 40 years. Since its founding in 1971, Omega's product line has diversified to include remote start modules and other vehicle accessory products. Omega's most recent product offerings include the exciting new technologies of telematics, wireless and databus integration.

With the vision of the founder, Kenneth Flick, guiding the company, auto security systems remain the central focus of Omega Research & Development Technologies. In 1995, Omega became the only company in the keyless entry arena with a technology designed to prevent crime due to unauthorized transmitter access to vehicle systems. The patented technology, **Unauthorized Transmitter Alert**, promises to revolutionize the industry. Consumers can now have instant knowledge of any unauthorized access to their keyless entry systems. Most of the product lines manufactured by Omega are equipped with Unauthorized Transmitter Alert technology.

Omega's mission, as it was over four decades ago, is to provide reliable, leading-edge security and automotive accessory products at a competitive price.
