# ***WARNING***

Suspension systems will enhance the off-road performance of your vehicle. It will handle differently; both on and off-road, from a factory equipped passenger car or truck. Failure to drive this vehicle safely may result in serious injury or death to the driver and passengers. **ALWAYS WEAR** your seat belts, **REDUCE** your speed, and **AVOID** sharp turns and other abrupt maneuvers.

Rancho Suspension recommends that if you put on larger than OE wheels & tires and it causes a significant error in the speed registered by the speedometer and mileage on the odometer, that the Speedometer be re-calibrated by a Car Dealer, Speedometer repair shop, or by purchasing an aftermarket speedometer recalibration device.

## FOOTNOTES

<sup>1</sup> Designates when the OEM wheel is compatible with the applicable Rancho® suspension. The development or optional tire may not be compatible with the OEM wheel.

<sup>2</sup> Use of optional wheel and tire will require trimming or modification. Actual tire size varies between manufacturers.

<sup>3</sup> RS6545, RS6547 – vehicles with OEM 17" wheels cannot use 16" wheels or smaller.

<sup>4</sup> RS6558B requires 4.5" of backspacing on 16", 17" and 18" wheels.

\* Stock wheels and tires only.

**If your kit is not listed, please refer to the instruction sheet for fitment information. All measurements are in inches.  
Trimming or modification may be required to provide proper tire clearance. Actual tire size varies between manufacturers.**

# Add-A-Leaf/Lev-A-Load

Installation of a Rancho® Suspension System can increase the risk of vehicle rollover in abrupt maneuvers.

Many states have laws governing modification of original equipment suspension systems. Such laws may prohibit any modification which adversely affects safety or any modification altering the suspension more than a specific number of inches. Rancho® Suspension recommends that you contact local law enforcement in your area before modifying your suspension.

## Rancho®

does not recommend or endorse the use of its products in conjunction with those of other aftermarket suspension or lift kit manufacturers.

Do not use on vehicles with a mechanical Link Rear Proportioning Valve. Height may vary due to condition of Stock Springs. Check U-bolt length prior to installation, to see if there is enough threaded length to accommodate the new Add-A-Leaf. Approx. ½" to ¾".

[G4] Unit supplied with black plastic dirt shield. [G5] Unit supplied with welded metal dirt shield. [G6] No dust protection supplied. Dust protection incorporated in OE top mount. [G7] Check rebound travel at the wheel, 40mm of rebound travel must be maintained to ensure suspension is not in contact with rebound stops as this can result in reduced handling performance. Do not use coil spacers / trim packers that reduce rebound travel to less than 40mm. [G8] To maintain 2/3 of OE rebound travel, long travel shock absorbers must be fitted. [G15] To avoid contact or inversion of sway bar at full hang when using long travel shock absorbers, extended sway bar links must be fitted.
