CAR STEREO RECEIVER
WITH WIRELESS APP CONTROL

INSTRUCTIONS FOR UPDATING FIRMWARE

1. Download & unzip the firmware from scosche.com

2. Create a folder named UPG on a clean empty USB flash drive.

3. Copy the firmware file to that UPG folder and change the file name into: **T835_CAR.upg**

4. Copy one MP3 song (Any MP3 will work) into the UPG folder.

5. Insert the USB flash drive into the head unit USB port. During the USB MP3 playback, press the following buttons in the below sequence. The updating process will begin automatically.

DO NOT DISCONNECT POWER DURING THIS PROCESS.

A. Press "DIAL" (phone) button for 3 seconds

B. Press "AS/PS" button for 3 seconds

C. Press "SELECT" (Rotary Knob) for 3 seconds

Once complete the unit will restart. The firmware update is now complete.
