VISION X LIGHTING

DESIGN, MANUFACTURE AND DELIVER
THE ULTIMATE LIGHTING SOLUTION

Vision Motor Sports was established in 1997 with the mission to revolutionize the lighting industry. Today, we are doing just that. The Engineering, Product Development and Marketing is conducted from the Vision X USA office located in Auburn, Washington. Vision X Asia is home to the Manufacturing, Testing, and Inventory Logistics departments of Vision X Global Lighting. Today, Vision X has the mission of developing partners around the world to continue developing and marketing the most advanced lighting products in the world.

The key to Vision X's ongoing success, unmatched quality, and performance is our team of world class engineers who have taken outlandish concepts from conception to production. Our engineers are never afraid of reexamining products to find ways to better serve customers. Since its conception, Vision X has listened to the end user and put their ideas into action to further the quality, performance, and functionality of all Vision X products. At Vision X, we are constantly striving to live up to our company motto of "Lighting Evolved."

HIGH LEVEL CERTIFICATIONS

E-MARK
European Regulatory certification for on highway use.

CE
CE is a mandatory conformity mark for products in the European Economic Area.

DOT
US Department of Transportation certified for on road use.

SAE
SAE standard compliant for transport and automotive regulations.

ADR
Products which are in compliance with the Australian Design Rules (ADR).

PROP 65
California Regulation compliant for hazardous materials.

RoHS
Ensures no use of restricted hazardous materials in products such as lead, mercury, cadmium, PBB, PBDE, and Phthalate.

EMC
EMC and EMI certifies that a product does not interfere with other electrical products. This includes CISPR 25 Certifications

QUALITY AS A PRIORITY

INGRESS PROTECTION

Products are sprayed from close distances with 80~100 BAR water pressure to verify the ingress protection rating, ensuring they are sealed properly.

SUBMERSION & AGING

Once products are assembled every product is run through a submersion (water dunk test), then placed onto an aging rack and powered up for 30 minutes.

THERMAL IMPACT

Products are placed in a -40°C chamber for 30 minutes, and then placed in a 80°C chamber for an additional 30 minutes. Products are then left on for 72 hours.

LONG TERM DURABILITY

Products are then switched on and off 20,000 times repeatedly to ensure that they remain functional after all testing.

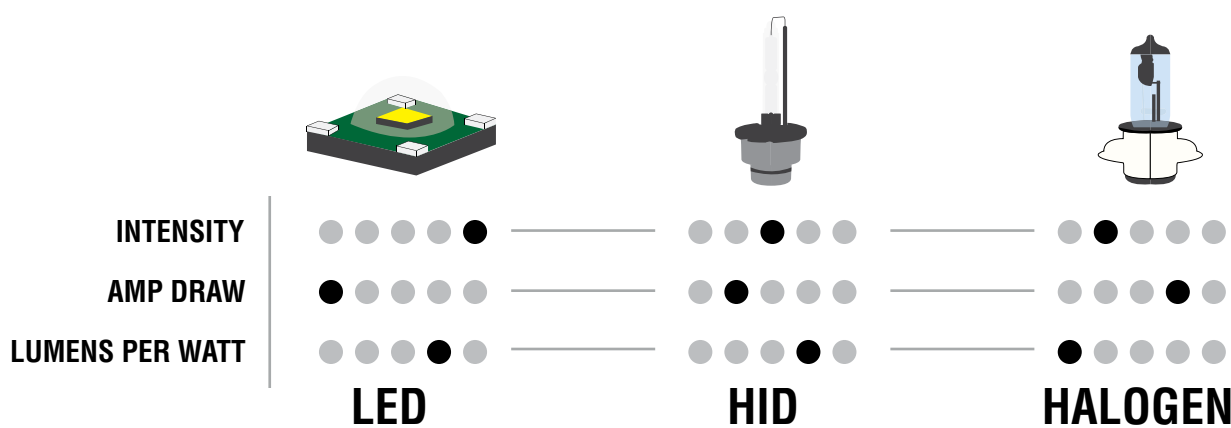

CONSUMPTION & INPUT RANGE

All products are put on a digital power meter to test that it is consuming the correct amount of power, checking for any electrical faults.

LIGHTING TECHNOLOGY EXPLAINED

KNOW THE DIFFERENCE

Vision X LED Lighting runs at a 6000K temperature for intense, bright white light for maximum visibility and safety. LED Lights do not use a bulb, making them much more durable than other options.

Vision X HID Lighting runs at a 5000k temperature for a super white beam color. HID lights require a bulb, starter and ballast to operate. They have a higher output per wattage than Halogen bulbs.

Vision X offers a number of different Halogen Lighting options. The Tungsten-Halogen series uses an oversized globe and specially engineered filament to enhance light output. Vision X offers many headlight replacements.

THE VISION X DIFFERENCE

Top Binning

Not all LEDs are created equal. Each run of LEDs by the manufacturer is binned to classify the quality within that batch. Vision X uses only top binned LEDs to ensure the highest quality.

High Efficacy

Vision X products are engineered for the highest possible luminous efficacy - the ratio of lumens per watt. Each light is specifically designed to take full advantage of the LED inside it.

Pulse Width Modulation

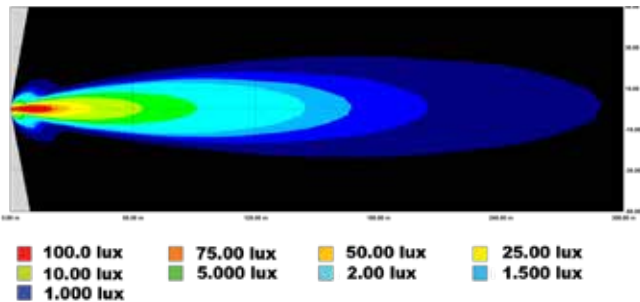

When enabled, Pulse Width Modulation integrated circuitry flashes the LED faster than the human eye can see for reduced heat, prolonged LED life and dimming capabilities.

Electronic Thermal Management

Integrated Electronic Thermal Management automatically regulates heat levels by engaging ETM to prolong each LEDs lifespan to 50,000 hours.

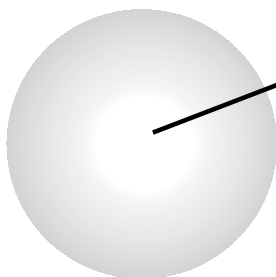

MEASURING LIGHT OUTPUT

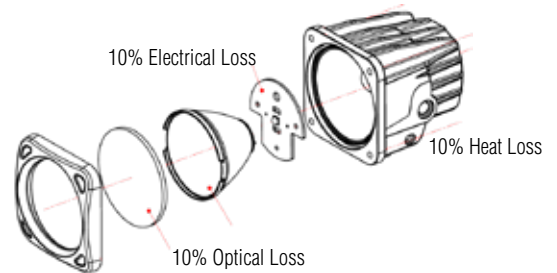

USABLE LIGHT = DISTANCE

Usable light is defined as the light that is actually converted for use in forward projection lighting. Vision X measures this by accounting for effective, rather than raw lumens in our distance calculations. The measurement of distance at which a light achieves one lux is the level of light needed to read a newspaper also known as Usable Light

TOTAL LIGHT OUTPUT = LUMENS

Light source placed into lumen sphere to measure the complete output of a source

RAW LUMENS | VS | EFFECTIVE LUMENS

Lumens are a common standard for measuring light output at the source. It is important to know that the lighting source manufacturer rating is only for the light source and does not account for losses due to optical inefficiencies, electrical inefficiencies or heat.

The sheer output of the light source is not enough to capture the whole story. When rating the effective output of a light source, the light lost as heat, in optical light spray and electrical inefficiency must also be accounted for, as each of these reduce the total usable lumens. Through the use of top binned LEDs, pulse width modulation and electronic thermal management, Vision X Lights effectively produce the highest lumens per watt.

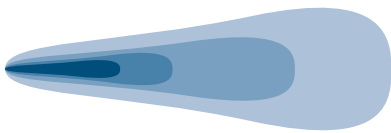

CHOOSING **THE RIGHT BEAM**

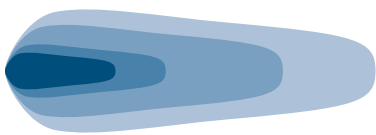

EXTREME SPOT BEAM

Longest distance beam with the smallest spread that is ideal at high speeds. Vision X lights with a spot beam will be equipped with our Iris Reflector Technology or use a focused 10° optic.

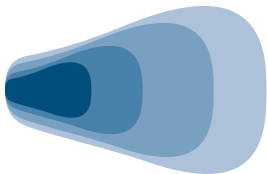

BROAD SPOT BEAM

Great distance beam with a moderate amount of spread. Broad spot beam pattern Vision X lights use multiple 10° optics or Iris Reflectors that are specifically arranged to still provide a large amount of distance with the added benefit of spread.

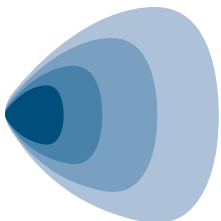

COMBO / MIXED BEAM

Added peripheral illumination with the benefit of distance and spread. Similar to the broad spot beam, Vision X lights that produce a combo/mixed beam are equipped with multiple optics with varying degrees that angle light outward towards the side of your vehicle but still maintain distance and spread.

DRIVING / ELLIPTICAL BEAM

Flat forward spread that keeps low to the ground. This unique pattern is only found in Vision X Lights and is projected using a special optic type that is specifically engineered to keep the light low the ground as to not blind oncoming vehicles.

FLOOD / WIDE FLOOD BEAM

Largest spread with the shortest distance. Vision X Lights with a flood beam will use multiple wide angle optics (40°, 60°, 90°) to produce a wide spread beam that is ideal for work area and scene lighting.

INCLUDED **WITH EACH LIGHT**

LIFETIME LIMITED WARRANTY

1. Proof of purchase is required to validate warranty and is valid from the original date of purchase. All products must be bought through a Vision X Authorized Dealer or one of their dealers/resellers.
2. Improper installation, accident, physical damage, neglect and normal wear are not covered under warranty.
3. Cutting the deutsch connector automatically voids warranty.
4. Lights operated in environments over 150° Fahrenheit are not covered under warranty.
5. Warrantied items will be repaired to working condition and returned without cosmetic alterations.
6. Warranties should be handled through the dealer/reseller the product was purchased from; customer is responsible for delivery to Vision X Returns in Washington.
7. If product is not under warranty, customers will be responsible for shipping return shipping charges.
8. Additionally, non-warranted items can be repaired at the customer's expense of parts and labor, at the discretion of Vision X Lighting, who will provide an estimated repair cost before proceeding with the repair.

CG2 LIGHT CANNON

- S E R I E S -

THE
2ND
GENERATION
IS HERE

The most powerful and versatile off-road LED lighting system. From 3.0" Square to 8.7" Round sizes, each is available in a Long Distance or Multi-LED Full Beam version to shine the light exactly where you need it. The Day-White lighting color allows you to comfortably see the terrain over unmatched distances. The 25-Lights-In-One Cover system (round only) allows you to change light pattern and color to fit your driving environments. Lifetime Limited Warranty.

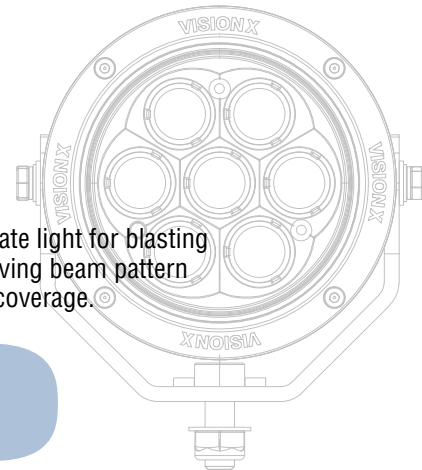

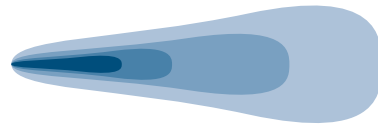

Beam/Color Changing
Polycarbonate Covers (See p.80)

MULTI LED FOR MAXIMUM LIGHT OUTPUT

Multi-LED CG2 Light Cannons are the ultimate light for blasting through the night with a powerful broad driving beam pattern and outstanding medium distance lighting coverage.

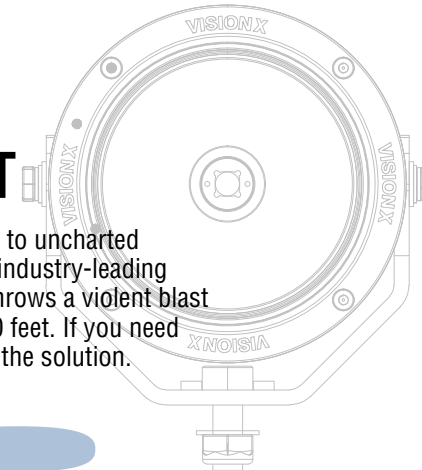

**BROAD
SPOT
BEAM**

SINGLE LED FOR FOCUSED DISTANCE OUTPUT

Single LED CG2 Light Cannons take lighting to uncharted territory with incomparable distances. The industry-leading Luminous Big Chip LED and Iris Reflector throws a violent blast of light that penetrates the night up to 3,500 feet. If you need superior distance from your lighting, this is the solution.

**EXTREME
SPOT
BEAM**

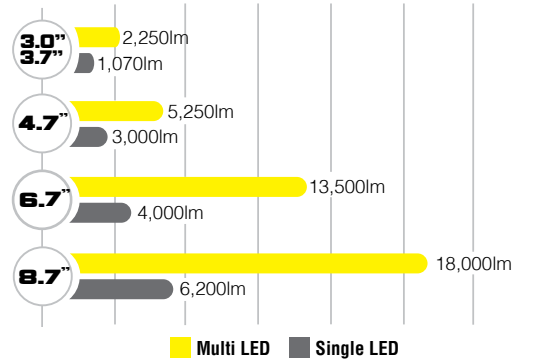

PERFORMANCE LED LIGHT

ULTRA EFFICIENT MULTI LED
Top binned 7W Cree LED provides the greatest light output from a multi source LED light of its size.

ADVANCED OPTIC TECHNOLOGY
Each led is focused using a 10° optic that allows for the flood pattern to achieve full beam spread.

LUMEN OUTPUT COMPARISON

Different Output, Same Series

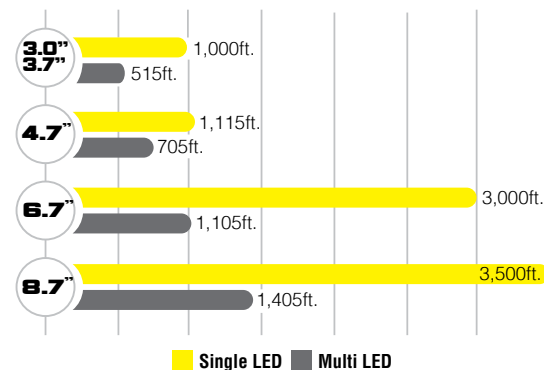

LUMENS | VS | DISTANCE

HIGHEST QUALITY SINGLE LED
Industry leading Luminus Big Chip Technology allows the Single Source Cannon to reach unheard of distances.

IRIS REFLECTOR TECHNOLOGY
Focusing the power of the single source LED, the advanced IRIS Reflector shoots out a long distance spot beam.

TAKE CONTROL OF YOUR LIGHT

BROAD SPOT BEAM

Harnessing the power of reflector technology arranged in a honeycomb pattern, the VL-Series Driving Light emits a powerful long distance spot beam capable of reaching distances up to 2,265ft (8.7in kit).

INCLUDES SNAP-ON WIDE FLOOD COVER

Included with every VL-Series Driving Light Kit is a Snap-On Clear Cover that is designed the change the spot beam into a wide flood light pattern as well as add protection from debris.

*Covers Only Included with Kits

OPTIMUS

UNIVERSAL LED DRIVING LIGHT

COMPACT HOUSING MEETS DISTANCE OUTPUT

By combining Single-Source LEDs with Vision X's Iris Reflector technology, the Optimus Series is capable of reaching a staggering 883' of usable light at just 10W.

The Optimus is available in four different beam patterns, allowing users to choose between distance or spread.

Vehicle Specific Kits Available for :
Fog Light Kits for Trucks and Jeeps (See p.64-67)
Headlight Kits for RZR (See p.68)

Beam/Color Changing
Polycarbonate Covers (See p.80)

HALO OPTION

SOLO POD LED LIGHT SERIES

ULTRA COMPACT FOR UNIVERSAL APPLICATIONS

Compact yet powerful, the Solo Pod Series from Vision X provides intense light output from a small housing.

The Solstice Solo excels at multiple applications thanks to the wide selection of different beam patterns. Perfect for dirt bikes, reverse lights, marine lights, or rock lights - the applications are endless.

SHOCKER

DUAL ACTION LED LIGHT BAR

DUAL ACTION PERFORMANCE

The Shocker Dual Action LED Light bar brings versatility and lighting power to the forefront by allowing you to adjust your vision to the ever-changing driving conditions with the flick of a switch. Experience the all new VRT (Vector Reflector Technology) at high speeds to shine long distance with a wide driving beam that also fans across the trail. When dust and fog tries to slow you down, engage the Amber PLC (Photon Light Core Technology) to penetrate the night by reducing shadows and white-out by using the proper Amber lighting color and wide-elliptical shaped beam.

DUAL FUNCTION LIGHTING TECHNOLOGY

New Vector Reflector and Photon Light Core technology for dual function lighting.

RACE-INSPIRED SIDE MOUNTS

The Shocker come with heavy duty Race-Ready side mounts that are built to outlive any abuse.

HIGH OUTPUT CREE LEDS

Utilizing top binned XP-L-HI and XP-E2 Cree chips, the Shocker was made to outshine the competition.

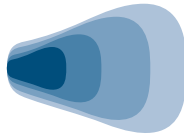

| BOTTOM HALF |

PHOTON LIGHT CORE FOR WIDE ELLIPTICAL BEAM

The new Photon Light Core technology is the first of its kind. Our engineers designed the bottom half of the Shocker to produce a unique wide spread elliptical beam that keeps the light low to the ground.

ELLIPTICAL
BEAM

| TOP HALF |

VECTOR REFLECTOR FOR BROAD SPOT BEAM

With the flip of a switch, the Shocker bar transforms your light into a driving spot beam that utilizes our newly designed Vector Reflector Technology to boost the beam pattern out to 1,314ft.

BROAD

XPL

LO-PRO LIGHT BAR SERIES

SLIM STYLE & PERFORMANCE

The XPL Halo Series LED Light Bar builds upon the XPR Series by combining the distance power of Iris Reflector Technology with an ultra slim housing design. Utilizing a powerful 5W Cree LED, the XPL series is able to produce up to 19,260 lumens and over 2,000 ft. of usable light.

SIZES : 6" | 10" | 13" | 20" | 32" | 40" | 51"

EXTREME
SPOT
BEAM

HIGH INTENSITY CREE LED

The 5W XP-L-HI LED from Cree is what allows the XPL to project light up to 2,067 ft.

DUAL MOUNTING STANDARD

Each XPL Light Bar includes side wing mounts and our newly designed mounting feet.

SMOOTH BACKLIT

The XPL comes equipped with a back-lit halo that can be used as a daytime running light. (SAE Compliant for 20" and under)

SAE SAE J3098 compliant
for street legal use

XPL CURVED

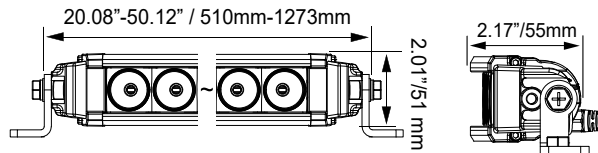

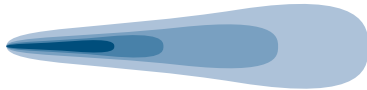

RADIUSED STYLE & PERFORMANCE

The XPL Curved Halo Series LED Light Bar is our solution to growing demand for high performance curved light bars. We did it better and we are the first to do it featuring an ultra slim 2" housing with high intensity single row 5W LEDs. Utilizing our Iris Reflector Technology coupled with the unique curve of the bar, the XPL Curved Series produces a broad spot beam pattern that reaches over 1,800ft with up 23,005 raw lumens.

SIZES : 20" | 30" | 40" | 50" | 54"

CHASER REAR LED SYSTEM

MODEL | 28" |

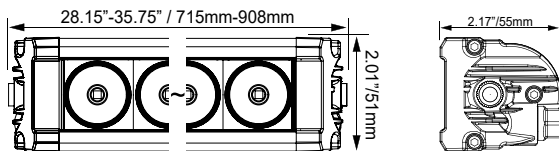

MODEL | 35" |

CHASER BAR FOR XTREME ENTHUSIAST

The Vision X Chaser Bar provides high output color LEDs in a sleek, low profile housing with a bright flood beam pattern. This rear mounted light bar can be configured as your running and brake lights using standard Red, Amber and White LED's.

The Chaser Bar comes in two sizes to accommodate stock UTV (28") and after-market UTV (35") roll cages.

HIGH OUTPUT COLOR LED
Combination of 5W (White) and 3W (Color) LEDs allows the XPL Chaser Bar to outshine the competition.

LOW PROFILE WATERPROOF HOUSING
The 2" slim IP-67/69K rated housing ensures a water tight seal even under the toughest conditions.

DUAL MOUNTING

The XPL Chaser comes standard with wing mounts with the option of just using the end cap bolt for side stud mounting.

56 Duralux

58 UMX

VL-SERIES

LIGHT DUTY COMMERCIAL

VERSATILITY MEETS LIGHT OUTPUT

The VL-Series LED Light Duty offers outstanding light output in a functional design which can be easily adjusted with the single bolt bracket. High quality construction and components enable VL-Series LED Light Duty to withstand vibration up to 15.6 Grms. Built-in reverse polarity protection helps prevent accidental damage caused by incorrect installation. VL-Series LED Light Duty work lighting is a high value, versatile range designed for many light duty commercial applications.

- 3 DIFFERENT HOUSING OPTIONS
- 2 LED AND WATTAGE OPTIONS
- 6 VERSATILE LED LIGHTS

VL-SERIES LED LIGHTS FEATURES:

ULTRA BRIGHT CREE LEDS

Utilizing 5W Cree LEDs, the VL-Series Lights pump out 106 Lumens per watt.

FLOOD OPTICS

Each LED has a 40° flood optic that allows for each light to produce a wide spread beam.

UNIVERSAL MOUNTING

The single bolt mounting system allows for simple and easy placement.

DURALUX

VERSATILITY MEETS LIGHT OUTPUT

The Duralux Series was designed with vehicles in mind. The sleek and compact housing coupled with either 4 or 6 high output LEDs makes it the perfect light for any automotive application. From fog lights to roof rack and reverse lighting, the Duralux Series combines versatility with affordability to create the ultimate lighting solution for any vehicle.

LED HEADLIGHTS

Take your desire for high powered LEDs to the streets with the DOT Approved VX Series LED Headlight. The VX Series boasts a daytime running halo, low and high beam modes, and a robust aluminum polycarbonate hybrid housing. E-Mark and ADR approved models also available.

VX SERIES

LED HEADLIGHT TECHNOLOGY

LED HEADLIGHTS MEETS STYLE & PERFORMANCE

The DOT Approved VX Series LED Headlight leads the LED Headlight industry in both style and performance. With an integrated LED Halo Ring, the VX Headlight is sure to turn heads while also delivering a dramatically improved night driving experience over factory headlights. The VX Series is currently available in 7" & 5.75" Round as well as 4x6" Rectangle with a Polished Chrome finish or a Black Chrome finish.

ADR and E-MARK Approved models are available for those who live in Australia and Europe.

Multiple direct plug-and-play accessories are available that help give you the most out of your VX Series LED Headlight. (See p.74)

*Also Available in **AMBER HALO**

BRIGHT DAYTIME RUNNING HALO

Every VX Series Model Headlight features an ultra smooth LED Halo Ring that can be ran independently.

WIDE SPREAD LOW BEAM

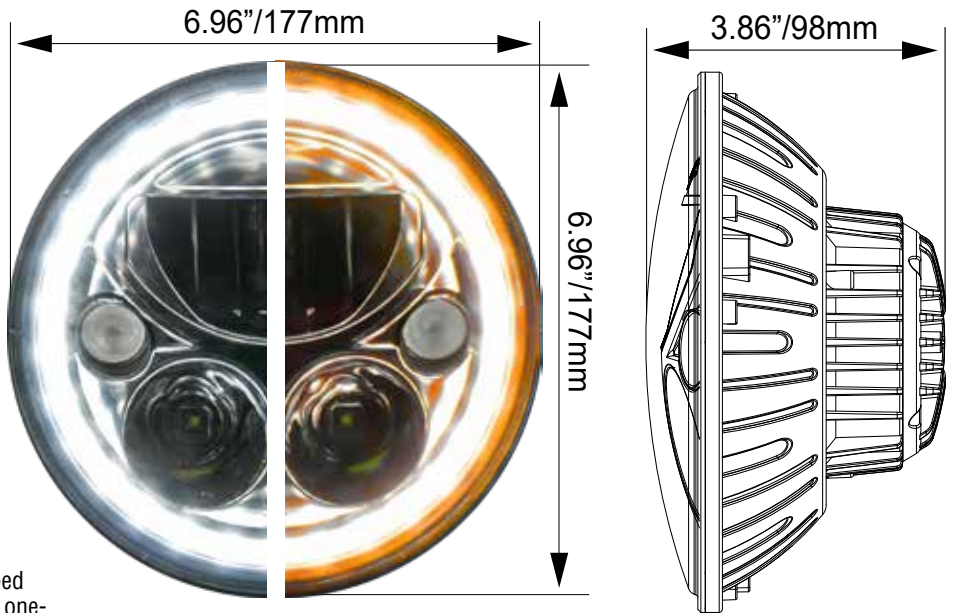

One main 12W LED produces the wide spread low beam with the help of 5W LEDs on the sides to fill in the roadway directly in front of your vehicle.

HIGH OUTPUT HIGH BEAM

Two 10W LEDs located under the low beam utilize Iris Reflectors to produce a long range high beam.

WATERTIGHT HOUSING

The IP-68 watertight housing comes equipped with a ultra rugged Polycarbonate Lens and one-way Gortex Valve to block moisture build up.

LED TECHNOLOGY MEETS PASSING LAMP

Vision X Lighting's XMC 4.5" LED HALO Passing Lamp Kit grants extra visibility and enhances your safety on the road. These powerful 10W lights each pack five times more output than the stock passing lamps, and draw six times less amperage. Dramatically improve your performance while increasing visibility and safety. The MSR Style Reflectors give the XMC Passing Lights a powerful beam pattern than combines distance with full spread coverage.

VX GRILLE | SERIES

BY ROYALTY CORE

GRILLE | FEATURES

FACTORY LOCATION MOUNTING

OEM replacement grille mounts to factory locations.

DURABLE CONSTRUCTION

Satin black powder coating over stainless steel grille.

STAINLESS STUDS

Triple chrome plated t304 stainless studs with black studs available.

LIGHT CANNON | OPTION

FEATURING CG2 4.7" LIGHT CANNONS

The CG2 Light Cannons is Vision X's latest and greatest of the Light Cannon series. This configuration combines the distance of the big chip single source CG2 Cannon with the massive light output of the multi-LED version. The pairing of these two lights creates an unheard of amount of brightness and distance ideal for any situation.

Beam/Color Changing
Polycarbonate Covers (See p.80)

LIGHT BAR | OPTION

FEATURING XPR-9M LIGHT BAR

Utilizing top-binned 10-Watt LEDs and large proprietary 1.5" diameter IRIS Reflectors, the XPR-9M Light Bar is capable of reaching a staggering 1,365 feet of usable light. This unmatched long-distance projection is also accompanied by precisely tilted IRIS Reflectors that create a unique combination beam pattern to provide even more visibility at the road's edge.

COVER OPTION
Blackout Cover (See p.82)

SPORT | MARINE

MARINE GRADE COATING SAME LED TECHNOLOGY

Submersible up to 100 feet, the Subaqua offers a powerful LED light module for underwater applications. The 6 LED model offers double the effective light output of the previous 4 LED generation Subaqua. Designed for transom lighting, dock lighting and any underwater application.

Additionally, the Subaqua is outfitted with a 4 foot marine-grade cable that will not only ensure durability, but also make installation a breeze.

LED Color Options :     

FLOOD OPTICS

Utilizing a medium beam 25 degree optic the Subaqua has optimum underwater operation.

COMPACT SIZE

In a compact 4.13" diameter the 6 LED Subaqua fits anywhere.

LOW POWER DRAW

With an extremely low power draw of 1.5 amps, the Subaqua will not put a large strain on your boat battery.

HID LIGHT SERIES

PERFORMANCE HID FOR LONG RANGE OUTPUT

The Xtreme Performance HID was engineered with input from Baja 1000 winning racers to further enhance the race proven Vision X HID series. Each light includes a weatherproof Deutsch Connector with Plug-and-Play Harness and features a durable, lightweight polycarbonate blackout cover.

The HID XP Series is currently trusted by professional off-road rally teams in the United States and Canada.

Internal Ballast & Starter

The ballast takes the standard 12V input power and increases this to the 32,000V that the bulb operates at and the starter is used to ignite the bulb. Vision X uses all internal components for an all-in-one package

8.7"

SNAP-ON | LIGHT COVERS

25 LIGHTS IN 1 WITH POLYCARBONATE COVERS

Each Light Cannon is 25 Lights In One with the help of the unbreakable polycarbonate snap-on covers that can alter the beam pattern and change the color of the Cannon. Tackle any weather condition with the proper color cover, or quickly change your spot cover to a flood cover for a wider beam when necessary.

COLOR OPTIONS

BLACKOUT | PROTECTIVE
Covers the fixture with a solid black protective cover with a high contrast "X" logo. Required in select states for on-road use.

CLEAR | PROTECTIVE
Protects light from dust, debris and particulates without changing light color or performance.

AMBER | FOG
Battles fog conditions by reducing the amount of blue light. Mimics classic Halogen color temperature. Great for driving in fog at high speeds.

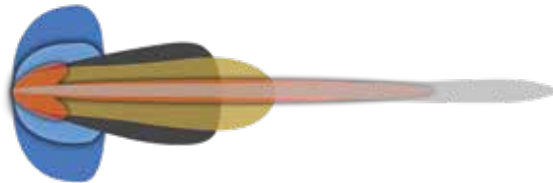

BLUE | SNOW
Increases lighting distance when used in snow conditions by reflecting the blue light off the snow. Recommended for vehicles in heavy winter conditions.

RED | DUST
Reduces light temperature and glare back in order to enhance penetration in dust and air particulate. Ideal for vehicles in extreme dust conditions.

BEAM OPTIONS

SPOT
Spot covers maintain original lighting beam pattern while protecting the lens from harmful debris.

COMBO
Combo covers combine the distance of a spot cover with the added peripheral illumination of an elliptical cover.

EURO
Illuminate some peripherals while maintaining effective distance.

ELLIPTICAL
Reduces peripheral illumination while losing minor distance.

WIDE FLOOD
Maximum wide field of view illumination in exchange for distance.

TRAIL FLOOD
Maximum vertical field of view illumination in exchange for distance.

*Glows in the Dark

LIGHTING | ACCESSORIES

BORG CONTROL | MODULE

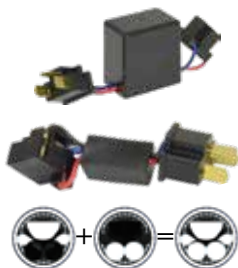

Unlock the full potential of your Vision X LED by equipping it with Borg. Everything from strobing intervals to light intensity can be controlled by your smart phone via bluetooth connection. Additionally, you'll have the power to see valuable data relayed from your LED Light such as humidity, temperature, voltage, RSSI, and elevation. Even further, you can track your g-force level and acceleration with only a few taps.

ITEM#	PART#	WORKS WITH
XIL-BORGPC	9893273	Optimus, Xmitter Prime Xtreme, Xmitter Lo Pro, Solstice Prime, 3.7" Mini Cannon
