Protecting Your Adventure Lifestyle

Products for your Truck or SUV

About Warrior Products

Q & A with Founder & President of Warrior Products, Tom Richardson

Q: How did you get involved with the aftermarket industry?

I got my start in the off road industry by opening a repair shop that focused on off-road vehicles. Soon after opening, it became clear that our customers wanted more than just repairs. They wanted accessories for their Jeeps, trucks and SUVs. In 1992 we started building our own line of shackles, hitches and other hard parts which eventually lead to Jeep accessories. Warrior Products was born.

Q: You started out drag racing and then owned several Four Wheel Drive shops, did you think you would end up building and selling your own parts full time?

While working in the industry, building my race cars, there was always a need to fabricate parts for truck users. As Jeeps became increasingly popular, it was a natural transition to start the Warrior Products brand and building heavy-duty shackles, hitches and Jeep accessories.

Q: What do you think is the most exciting thing happening in the aftermarket industry right now?

Despite the economic difficulties faced by many, the market continues to grow. People still want to customize their vehicles, whether an import, muscle car, Jeep or truck. The demand from global markets is particularly exciting for Warrior and the industry as a whole. Global customers are pushing hard for Made in the USA products and really recognize the quality and the value associated with Made in the USA companies like Warrior. This pressure from global markets will help to elevate industry standards, drive innovation and stimulate growth into the future; that, to me, is the most exciting part of the industry.

Q: What do you think makes the Warrior, Inc. brands (Warrior Products, Flex Armor by Warrior, HoodLift by Warrior and Black-Knight) stand out from all the rest?

Our commitment to quality, integrity, innovation and service drives everything that we do at Warrior Products. We manufacture our parts in the US to ensure they are of the highest quality possible, and then back them up with the best customer service in the industry. The Warrior sales staff has extensive retail experience in the industry, giving us an advantage when working with customers directly. As part of our commitment to quality, our engineering team over-engineers our parts, which helps to eliminate potential problems before they arise. We know what it takes to serve our customers quickly and effectively.

Manufacturing in the US affords us the opportunity to respond to issues quickly and modify parts to meet the customer's needs. We also have the ability to take customer feedback and continually improve our products and processes.

Q: You recently purchased a company called HoodLift that makes hood lift strut systems and tailgate systems, what drew you to this company and this market?

Adding the HoodLift product line to the Warrior family is a very logical step. The Warrior Products brand has become synonymous with Jeep, and HoodLift was established as a product to assist Jeep owners who struggle with the heavy, steel hoods and flimsy hood props on their Jeep. Additionally, Warrior's ability to rapidly design, and manufacture new HoodLift kits gives Warrior the opportunity to expand into other segments of the market. Warrior Products will continue to look for companies to add the Warrior family, where we can use our manufacturing expertise and facilities to bring pride in manufacturing back to the US.

Warrior Products is proudly made in the USA.

Toyota FJ Cruiser - Trail Adventures Series

Warrior is pleased to announce the availability of our new, full line of aftermarket accessories for the Toyota FJ Cruiser. The TRAIL ADVENTURES series offers items like our Tube Fender Flares and Adventure Tube Doors as well as utilitarian accessories such as our Cargo Drop-In Basket, Shovel & Axe Mounts, and Hi-Lift Jack Mounts. We are also offering Body Armor protection suitable for any and all adventuring uses with Suspension Lift Kits, Rock Bars, and Front & Rear Bumpers to round out this great, new product line. Turn to pages 10-12 for more details.

FINISHES

Warrior Products offers the broadest selection of base materials and surface finishes in its line of Body Armor Exterior Protection accessories available on the market today. Including our signature aluminum diamond plate material, we offer the following five finishes:

Diamond Plate – Constructed of #3003 aluminum treadbrite and highly polished to a bright luster, these accessories have the look of chrome, yet perform better under adverse conditions. (Chrome may flake and peel, and plastic may break.)

Black Diamond Plate – Available for all aluminum parts, the powder-coat finish is electro-statically painted to provide scratch and corrosion resistance plus lasting protection from the elements.

Polished Aluminum – Constructed of #5052 aluminum and polished to a bright luster, these accessories have similar performance characteristics to our diamond plate product, but without the treadbrite texture.

Smooth Black Steel - Available for most parts made of aluminum, the added strength and durability of steel is a good alternative. Products constructed of 12-gauge HRPO steel are black powder-coated to prevent rust and corrosion.

Brushed Aluminum – Constructed of #5052 aluminum, these accessories have similar performance characteristics to our diamond plate and polished product, but with a brushed exterior finish. This finish is only available for a limited number of products.

Hammertone Gray - MIG-welded, jig-built spring shackles and greaseable leaf spring shackle kits come in a hammertone gray finish.

Gold Zinc - MIG-welded, jig-built spring shackles and greaseable leaf spring shackle kits come in a gold zinc finish.

UNIVERSAL - What does it mean?

Many Warrior Products brand items are marked with a fitment titled "Universal". Universal fitment products are designed with no specific fitment in mind meaning that they do not fit anything. These parts are of a custom nature, designed to be sold to the customer willing to "make it fit".

REAR CORNERS

Rear corners provide structural support to the corner area and enhance the appearance of the vehicle as well. For the FJ40 there are two versions of the rear corner available: a normal corner that wraps around the side about a third of the way into the wheel well, and a full side version that wraps the entire side up to the door jamb area. For the FJ Cruiser, corners are available for fitment with OEM fender flares and fitment with Warrior's Steel Tube Fender Flares.

SIDEPLATES

Sideplates protect the rocker panel area below the door and enhance the appearance of the vehicle. Sideplates are sold in pairs. There are two versions of the Landcruiser sideplate available: a short version that spans from the rear wheel well to the large body lip and to the front of the door jamb; a full-length version extends to the front fender. Modifications may be necessary to fit the full Sideplate.

BACKPLATES

Backplates cover the body beneath the tailgate, between the rear corners. Backplates are cut out to fit around hinges for ease of tailgate operation.

TAILGATE COVERS

Tailgate Covers conceal the entire surface area of the tailgate and have cutouts around the door handle for ease of tailgate opening and operation.

ENTRY GUARDS

Entry Guards protect the paint and finish of door jambs under the door seals when closed. The treadbrite, also available in powder-coated black, provides an excellent non-skid surface for safety. Sold in pairs.

NOTE: All Polished Aluminum (PA Series part #s) are considered a special order. This means that they are not an inventoried part number and will be subject to an estimated 4 week waiting period. Special orders cannot be cancelled or returned. Special order items will still carry the standard Warrior Products warranty.

◆ **ADVENTURE TUBE DOOR MESH KITS & PADDING KITS**

Our Mesh and Padding Kits attach to the Adventure Doors and not only provide functionality, but stylish good looks too. The Mesh Kit helps deter debris and wind from entering the vehicle. They also allow the driver to see obstacles through the door. The Padding Kits feature a zippered pocket and are available in three colors to complement any vehicle.

◆ **ADVENTURE TUBE DOORS**

Designed to replace the vehicle's full or half doors, Adventure Tube Doors provide additional protection to front seat occupants while off-roading. Adventure Tube Doors mount into existing door hinges and come with our deluxe paddle handle systems. Black powder-coated to provide a durable finish, these heavy-duty doors are ready for the trails or the street. Mesh Kits, Padding Kits, and Mirror Mounts with mirrors are all sold separately.

◆ **ADVENTURE TUBE DOOR MIRROR MOUNTS**

Adventure Tube Door Mirror Mounts are designed to bolt onto our Adventure Tube Doors to allow the doors to have a permanently mounted mirror. These brackets eliminate the need to swap mirrors when the tube doors are installed or removed.

◆ **HALF DOORS**

To complement the balance of the Warrior Products body armor accessories, our Half Doors are a complete replacement door assembly. Each door comes with the proper paddle handle and mounting hardware for complete closure, except the FJ40. (The Bestop Paddle Handle #245-46 will need to be purchased. Follow their instruction for its installation.) Weather stripping is included to help prevent rattling. Sold in pairs.

◆ **ALUMI-ROLLERS**

Designed to replace the steel rollers in your winch's existing roller fairlead, Alumi-Rollers are CNC-machined from solid aluminum to a smooth finish. This smooth roller is ideal for use with a synthetic winch line upgrade. Rollers are available in clear, red or black anodized finishes.

◆ **DOUBLE TUBE BUMPERS**

For adding style and durability, these Double Tube Bumpers are manufactured using high quality 3" steel tubing.

◆ **BRUSH GUARDS**

The Warrior Products Universal Brush Guards are designed to attach to any flat surface front bumper with a wide enough top surface. Manufactured using high quality steel, these one-piece welded guards is formed from 1 1/2" round steel tubing, and provides protection from shrubbery for the front grill and headlights when off-roading. These guards are available in several configurations including 3 main styles; classic, pre-runner and stinger.

◆ **KNIGHT GUARD™ NERF BAR STEPS**

The Knight Guard™ Step is a U-shaped tubular design with a flat area step pad. Diamond plate treadbrite provides a non-skid entry surface. Specially designed 'hook tabs' can mount to the Knight Guard™ Nerf Bars for a complete entry system or the steps can be used with any 3" round tube by drilling mounting slots into the existing nerf bar. This conversion procedure is listed within the installation instructions. Nerf bar sold separately.

◆ **ROCK BARS**

Rock Bars are constructed of heavy-duty 2" x 4" rectangular steel tube and are designed to protect the entire length of the rocker panel. These bars can be ordered with or without a diamond plate step insert which is available in polished or black finish. Polyurethane end caps keep the tube free of debris. Rock Bars are powder-coated black for durability and sold in pairs.

Bumpers

Sidesteps

Bumpers & Sidesteps

◆ OUTBACK ROOF RACKS & MOUNTING KITS

Outback Roof Racks are a universal cargo basket intended to be roof mounted and are sold in a variety of dimensions. These baskets feature integrated mounting buckets which give the installer easy to use pre-drilled mounting locations. The Outback Rack Mount Kits offer a direct fit to Outback Roof Racks and offer a simple way to mount the rack directly to the roof. Drilling into the roof is required to install these mounts. All Outback Racks are one-piece and mounting kits are sold separately.

Please Note: Outback Racks are a special order item and once ordered cannot be cancelled or returned.

◆ AIR DAMS

For a quieter, more aerodynamic ride, the Air Dam is designed to redirect wind over and above any of our popular rack series, e.g. Safari or Outback. It is constructed of 12-gauge steel and powder-coated black for durability and good looks.

◆ SAFARI ROOF RACKS

The original Safari Roof Rack is the perfect year-round roof-top carrier for all of your gear with a weight capacity of 400 lbs highway and 150 lbs off-road. Although it is a permanent mount design, it still allows the removal of a soft or hardtop without removing the rack. It is built of steel and powder-coated black for lasting durability. Bracket accessories sold separately.

◆ CARGO HITCH RACKS

The Cargo Hitch Rack provides another option to pile on extra gear. It can be easily mounted to and removed from any 2" receiver hitch. Two sizes are available to meet your needs. These applications are also available in an 8" lift to provide extra ground clearance. The Cargo Hitch Rack provides added capacity to a vehicle with limited space and is a great complement to our Adventure and Safari Rack systems.

Note: Its weight capacity equals the specified tongue capacity of the 2" receiver.

◆ HI-LIFT JACK MOUNTS

These brackets allow the popular Hi-Lift Jack product to be mounted to the side of our Safari Rack's cargo basket, or to any flat surface 3" or taller. Manufactured in steel, these products are powder-coated black for a durable finish.

◆ SHOVEL & AXE MOUNTS

The Shovel & Axe Mount brackets are designed to fit our Safari & Outback Rack baskets. They carry a standard shovel and/or axe atop the vehicle. Constructed of steel and powder-coated black, they are durable and match our basket's finish.

◆ SPARE TIRE MOUNTS

Our Universal Spare Tire Bracket can be installed on the Safari Rack baskets or any stout surface, i.e. the floor of the vehicle's rear tub when the back seat is removed. The bracket and handle are constructed of steel. The removable handle is zinc-plated while its base is powder-coated black for good looks and lasting durability.

◆ SHOVEL & AXE MOUNT

The Shovel & Axe Mount brackets are designed to fit any OEM FJ Cruiser roof rack and to carry a standard shovel and/or axe atop the vehicle. They are constructed of steel and powder-coated black for good looks and lasting durability.

◆ PRE-RUNNER LIGHT BARS

The Warrior Pre-Runner Light Bar hosts five 6 3/4" round lights and easily folds back when not in use. With the simple twist of a few knobs, the support struts on the light bar can be slid rearward allowing the light bar to fold down out of harm's way. This light bar features a steel construction and a textured black powder-coat. Lights and wiring are not included.

◆ DROP-IN CARGO BASKET

Designed to install onto the OE rack, this cargo basket is a great solution to carrying smaller items atop your FJ Cruiser. This rack replaces your factory rack's cross-ribs and carries a 300 lbs highway load capacity. This cargo basket is constructed from 1 1/4" round steel tube and is powder-coated in a tough, textured black finish. Basket and mounting system included.

◆ HI-LIFT JACK MOUNT

These brackets allow the popular Hi-Lift Jack product to be mounted to the side of any OEM FJ Cruiser roof rack. Manufactured in steel, these products are powder-coated in a durable black finish.

◆ ROCK BARS

Our Rock Bars are constructed of heavy-duty 2" x 4" rectangular steel and designed to protect the entire length of the rocker panel. Polyurethane end caps keep the tube free of debris and are easy to install. Rock Bars are black powder-coated for durability and can be ordered with an optional inset entry step in polished or black diamond plate. FJ Cruiser Rock Bars have three legs per bar and attach to 10 existing mounting locations on each side of the vehicle.

◆ STEEL TUBE FENDER FLARES

Designed to replace the original flares, our Tube Fender Flares mount into existing fender wells with minimal drilling. Constructed of 1 1/2" tubing, these beefy frames are a perfect complement to our Adventure Doors.

◆ TAILGATE COVERS

Tailgate Covers conceal the entire surface area of the tailgate, and have cutouts around the door handle for ease of tailgate opening and operation.

◆ SIDEPLATES

Sideplates protect the rocker panel area below the door as well as enhance the appearance of the vehicle. Sold in pairs.

◆ REAR CORNERS

Rear corners provide structural support to the corner area and enhance the appearance of the vehicle too. These corners are available for fitment with OEM fender flares and fitment with Warrior's Steel Tube Fender Flares. Sold in pairs.

◆ FRONT BUMPER & OPTIONAL SKID PLATE

The Front Bumper provides rugged construction and a rounded underside for greater entry & exit clearance. The optional Brush Guard is formed from 1 1/2" round steel tubing and can accommodate an optional light bracket (#59003). Models come with or without built-in Winch Mounts and/or D-ring Mounts. Bumpers are constructed of high quality steel and black powder-coated for lasting durability.

The Warrior FJ Front Bumper Skid Plate complements the design of the front bumper and features an easy bolt-on installation. This Skid Plate is built from 1/8" steel and powder-coated for durability.

Please note that D-Rings / Clevis Shackles are sold separately.

◆ REAR BUMPER

The FJ Cruiser Rear Bumper is designed to complement your existing Warrior Products Front Bumper. The two bumpers are designed with similar contours and work together to create an aggressive look while improving approach and departure angles. Some features of this bumper include optional D-ring Mounts, cut-outs to accept tow packages and compatibility with vehicle back-up warning sensors. This bumper is also compatible with the Man-a-Fre brand extended fuel tank. Finally, the bumper is finished in a durable powder-coated finish.

Please note that D-Rings / Clevis Shackles are sold separately.

◆ FJ CRUISER 3" LIFT KIT

Warrior Products' high performance suspension systems are built to stringent standards for strength, performance and durability. Every system comes with H60.5mm shocks, featuring a nine-stage valve system and a self-lubricating polished chrome piston. FJ Cruiser suspension lift kits utilize spring spacers to lift the vehicle 3" in the front and 2" in the rear. In addition to what is shown, each kit comes with the necessary hardware required for installation.

◆ SPARE TIRE SPACER

Designed to mount directly to the factory spare tire carrier, the spacer allows an extra 2" of clearance for mounting over size tires. This bracket has multiple location holes to allow it to be mounted in several different positions.

◆ ADVENTURE TUBE DOORS & ACCESSORIES

Designed to replace the vehicle's full or half doors, Adventure Tube Doors provide additional protection to front seat occupants while off-roading. Adventure Tube Doors mount into existing door hinges and come with our deluxe paddle handle systems. Black powder-coated to provide a durable finish, these heavy-duty doors are ready for the trail or the street. Accessories such as mesh kits, padding kits, and mirror mount kits are available for Adventure Tube Doors. All Accessories sold separately. See page 6 for chart details.

◆ REMOVABLE SPARE TIRE CARRIERS

This carrier has a quick release on/off head in which to load and/or remove the tire. There's an additional quick release head at its base that allows the entire unit to be removed in seconds. Constructed of 12-gauge steel, the carrier mounts to any flat sheet metal surface, and adjusts to hold up to a 44" tire.

◆ AUXILIARY LIGHT BRACKETS

Our Auxiliary Light Brackets allow custom placement of lights on any round tubing, from 1" to 2" in diameter. These brackets are powder-coated in a durable black finish and are manufactured in steel.

◆ LICENSE PLATE MOUNTS

A perfect way to relocate your license plate while adding a custom look, these License Plate Brackets are constructed of HRPO steel plate and come complete with all of the mounting hardware for an easy installation. The 3" Tube Bumper Brackets allow the license plate to be relocated from the vehicle to the bumper and is designed specifically for Warrior Double Tube Bumpers.

◆ SPARE TIRE LICENSE PLATE MOUNT

A perfect solution for those wanting to move their license plate away from the outside corners of the body of their vehicle, our Spare Tire License Plate Mount will create a mounting point inside the center of your tailgate-mounted spare tire. The mount features a quick-disconnect pin for easy removal and adjustable settings to fit many applications. Model featuring optional LED powered 3rd brake light pictured on the right.

Universal	Spare Tire License Plate Mount	2370
Universal	Spare Tire License Plate Mount w/ 3rd Brake Light	2380

◆ GREASEABLE LEAF SPRING SHACKLES

This unique suspension system comes complete with lock nuts, polyurethane bushings, drilled sleeves (where needed) and hardened bolts with greaseable fittings. Similar to our leaf spring shackle kits, these kits contain all of the hardware needed for easy installation and an immediate lift to clear oversized tires. Our Shackles allow a lift from 1/2" to 2 1/2", depending on the application. Kits come in pairs and are available in hammertone gray or gold zinc finishes.

◆ LEAF SPRING SHACKLES

These MIG-welded, jig-built spring shackles come complete with all the mounting hardware required for an easy installation. Shackle kits lift one end of the vehicle from 1/2" up to 2 1/2", depending on the application. Kits come in pairs and are available in hammertone gray or gold zinc finishes.

◆ SPRING OVER CONVERSION KITS

Our Spring-Over Conversion Kits comes complete with spring perches, spring U-bolt plates, shock mounts, shock bolts and coupling nuts. This kit has it all and works on most axle applications.

◆ UNIVERSAL TRACTION BARS

For small cars and trucks that have leaf springs under the axle, the Traction Bars help reduce wheel hop. The kit comes complete with four U-bolts, a polyurethane bump stop, and all hardware for an easy installation. Bars available in three finishes.

◆ LEAF SPRING SHIMS

Correct the pinion and/or caster angles in your leaf-sprung truck using our heavy-duty Leaf Spring Shims. These shims are designed to be permanently attached to the leaf spring pack using the leaf's cross pin. The cross holes are counter-bored against the angled surface to ensure the cross pin gets even clamping force across the spread of the pin's top surface. Steel construction helps to keep the shims from breaking under heavy load conditions. Together, these features create a superior shim that will resist spinning out of place, falling out or breaking.

◆ LEAF SPRING PERCHES

These weld-on leaf Spring Perches are a must have for converting springs to an over-axle tube application or for replacing perches that have collapsed. They work well for installing wide springs or relocating them altogether on your rig. All spring perches are cut to fit 3" axle tubes and will fit other size tubes, but would require fill welding gaps. Sold in pairs.

◆ SHACKLE REVERSE SYSTEMS

Our SR-180 Shackle Reverse Systems are designed to eliminate poor handling characteristics and help create a safer vehicle for all driving conditions. Simply by moving the front leaf spring shackle to the rear of the same spring creates an amazing improvement in driveability. The SR-180 systems comes complete with urethane bushings for your front leaf springs and frame brackets. (Bushings further enhance the handling and ride quality of your vehicle.) All brackets are manufactured from HRPO steel for increased strength and are jig-welded for ease of installation.

◆ UNIVERSAL SHOCK BRACKETS

These versatile brackets allow maximum flexibility when rebuilding your suspension system. Precision-formed and manufactured from 1/4" steel plate, brackets are sold two in a set to fit a single shock.

◆ ROCK CRAWLER DIFFERENTIAL GUARDS

A must have for protecting your differential, this guard fits over the factory differential plate to provide maximum protection from rocks, stumps, or anything else encountered on the trail. Powder-coated in a protective hammertone gray finish, models fit a variety of axles.

◆ FRAME BRACES

For '73 - '91 two & four-wheel drive GMC, Chevrolet & Blazer trucks, these Frame Braces are designed to provide additional support to and/or repair cracked frames behind the steering box. Requires welding.

Undercarriage

◆ UNIVERSAL MUD FLAPS

Available with or without the rubber flap, these Universal Mud Flaps help minimize road debris from plastering the driver behind you, and keep material from the tires directed to the road. The stand-alone Mud Flap Bracket is fully adjustable to accept different sizes of flaps.

◆ LED LIGHT KITS

Our LED tail and reverse light kits come complete with lights, mounting grommets and wiring pigtails. Kits are sold in pairs and are also available as a complete combo kit. Combine with our LED Cutout Rear Corners for a great new look for your vehicle. Our LED lights carry a lifetime warranty against manufacturing defects.

◆ LOAD RESISTORS

To correct potential light operational problems, Warrior offers a load resistor for its LED Corner and Tube Fender Flare marker lights. Due to its lower power consumption, LED bulbs may cause some vehicles to indicate a bulb is burnt out. This can be remedied with load resistors wired across the LED bulbs to simulate a filament bulb load.

Lights

◆ SPARE TIRE COVERS

Let Team Warrior protect your Adventure Lifestyle with a form-fitting polycotton-backed vinyl Tire Cover. Available in a wide variety of sizes to accommodate tires from 28" to 37".

◆ BREEZER TOPS

Breezer Tops are the best mesh-style roll bar tops on the market today. Custom fitted and constructed of a durable material that allows airflow, breezer tops offer a sun-protected, comfortable drive.

◆ HAND & COMBO GRIPS

Combo and individual Hand Grips fit 3" diameter tubing and have adjustable straps. The combo grip can hold a fire extinguisher and has one detachable hand grip. Both grips can be attached anywhere on the safety cage of the vehicle.

◆ UNIVERSAL PADDING KITS

Designed to fit 1" to 1 1/2" tubing, these padding kits are available in multiple lengths and colors to accommodate full or partial coverage.

◆ ADVENTURE TUBE DOOR MESH KITS & PADDING KITS

Our Mesh and Padding Kits attach to the Adventure Doors and not only provide functionality, but stylish good looks too. The Mesh Kit helps deter debris and wind from entering the vehicle. They also allow its driver to see obstacles through the door. The Padding Kits feature a zippered pocket and are available in three colors to complement the vehicle.
