ABOUT ACDELCO brake shoes

ACDelco brake shoe's core characteristic is a highly stable coefficient of friction. This ensures consistent braking performance, at high and low speed and severe temperature fluctuations.

The components of a drum brake

- 1** Drum brake shoes
- 2** Wheel-brake cylinders
- 3** Handbrake lever
- 4** Adjusting unit
- 5** Brake cable
- 6** Springs
- 7** Brake drum

ABOUT ACDELCO

brake shoes (continued)

Features & Benefits

- **Non-Asbestos Organic formula**
ACDelco Brake Shoes are suitable for most vehicle segments and are especially recommended for traditional drum braking systems, providing quiet and clean performance due to environmentally friendly friction material
- **Optimal friction coefficient (average μ : 0.38)**
Reliable braking in most conditions
- **Optimal friction stability**
Ensures consistent braking performance, at high and low speed and severe temperature fluctuations
- **Special dried-friction bonding technique**
Prevents the brake liner from separating from rim

- **Coated**

Longer service life of shoe due to increased rust protection

- **Radius-ground**

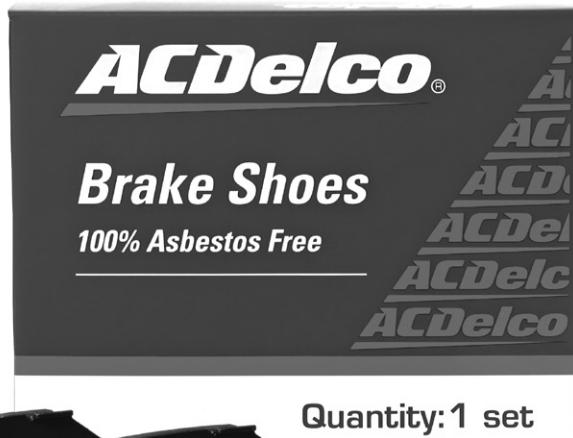

Optimum braking action with reduced running-in time

- **Friction Material that is specially matched for brake shoe**

Prevents wear of drum and shoe because of compatible match

Longer service life of brake shoe due to high durability

Performance in both handbrake and service brake

DRUM BRAKES

workshop repair guide

DISCLAIMER

- The following descriptions are intentionally general and cannot apply to all vehicles and/or drum brake designs.
- This information does not claim to be exhaustive. Always make use of the corresponding service documentation when performing testing and repair work. No liability.

1. Preparatory measures

- Lift the vehicle and dismantle the wheels
- Loosen the parking brake cables as far as possible using the adjustment unit

2. Disassembly

- Pull the brake drum out of the wheel hub by lightly tapping on the brake drum to loosen (in some vehicles you may need to loosen bolts located on brake back plate to release the brake drum)
- Remove the brake drum

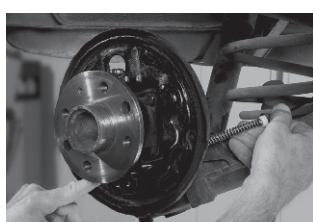

Important: It is possible sometimes that the brake shoes are pushing against the brake drum making it hard to pull out. Hence in such situations you may have to collapse auto adjuster lever using a suitable screwdriver through the opening provided on the back plate. You can access this opening by removing the rubber plug provided on the back plate.

- Detach the brake shoe from the lower shoe pin brushing and remove from the above
- Disassemble hydraulic pipe and bleeding value from the back plate
- Remove wheel cylinder
- Dismantle parking brake cable

3. Preparing for assembly

- Clean the back plate, check the reusability
- Clean the hub surface using the special brush

4. Parking brake cable assembly

- Correctly route and secure the new parking brake cable to the vehicle floor (Replace with new only if the old parking cable is damaged or cannot be used)
- Insert the parking brake cable into the back plate hole and secure

Important: Parking brake cables are wearing parts. It is recommend that you replace them when the drum brakes are repaired.
Depending on vehicle type, the parking brake cables must be secured using a retaining ring according to DIN 6799 (Circlip). A new retaining ring must be used during assembly.

DRUM BRAKES

workshop repair guide (continued)

5. Wheel Cylinder

- Fit the new wheel brake cylinder to the back plate and secure
- After assembly, fit the piston clips on the wheel brake cylinder

Important: Use the piston clip to prevent wheel cylinder piston from inadvertently falling out of the wheel brake cylinder.

Depending on vehicle type, it may be necessary to first fit the brake shoes, before fitting the wheel brake cylinder.

6. Brake Hose and Brake Hydraulic Pipe Assembly

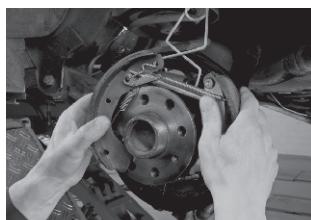

- Fit the new brake hose and brake pipe in the correct position
- Use new retaining clamp for brake hose

Important: The brake hose is subjected to extreme pressure due to environmental influences, water, salts, etc. Hence it is recommended to replace when the drum brake is repaired.

7. Brake Shoe Assembly

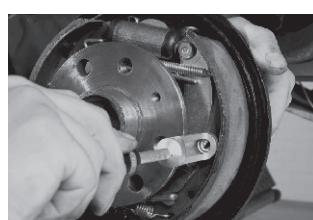

- Lubricate all support points of the brake shoe
- Use new retaining clamp for brake hose

Important: The brake hose is subjected to extreme pressure due to environmental influences, water, salts, etc. Hence it is recommended to replace when the drum brake is repaired.

8. Assembly of the new Brake Shoes

- Fit the parking brake lever to the parking brake cable
- Insert the brake shoe set and position it on the wheel cylinder
- Fit one brake shoe with the parking brake lever in the lower shoe pin
- Fit the pull off spring in the correct position
- Insert other brake shoe against the spring force in the lower shoe pin
- Pliers may be required depending on design
- Remove the piston clip from the wheel cylinder

9. Brake Shoes Assembly

- Install the brake shoe holding spring using special tool
- Hold both the brake shoes and position it in centre of back plate
- Clean assembly traces from the brake shoes
- Fit the brake drum

10. Brake Bleeding

- Fill the brake fluid inside the brake fluid reservoir
- Bleed the system till brake pedal spongy feel is eliminated

Important: Ensure bleeding is first performed at farthest brake bleeding valve.

11. Basic Adjustment of the Drum Brake

Carry out basic adjustment of the brake shoes by pushing brake pedal several times in succession until clicking sound is not longer heard.

Important: The basic adjustment of the brake shoes is carried out using the automatic device. This is only possible if the parking brake cables are fully tensioned.

BRAKE SHOE application list

Information in this application listing section has been compiled from data published from Original Equipment Manufacturers and other parties. This data may change from time to time and ACDelco is unable to warrant the accuracy of this data and does not accept responsibility for loss or damage of any kind caused as a result of such data being inaccurate.

ABOUT ACDELCO

brake pads

ACDelco Disc Brake Pads are an ideal choice when it comes to quiet, confident braking.

ACDelco Disc Brake Pads provide drivers with confident braking over a wide range of operating temperatures and conditions. The ACDelco Disc Brake Pad range covers a wide range of vehicle applications and offers a longer wearing, low dust formulation with excellent stopping performance.

Features & Benefits

- Every ACDelco Disc Brake Pad has been formulated to the vehicle's requirements to ensure safe and consistent stopping ability.

- ACDelco Disc Brake Pads provide optimum noise suppression and performance using unique formulations and combined with shims, slots and chamfers where needed.
- Each disc brake pad backing plate is protected by a premium powder coated finish, ensuring professional protection and appearance.
- The ACDelco Brake Pad compounds are selected to suit specific vehicle applications and the materials utilised are 100% asbestos free.
- ACDelco Disc Brake Pads friction levels are very stable across a broad range of operating temperatures.
- All ACDelco Brake Pads are designed to provide you optimum performance, durability and to create low levels of dust.

ABOUT ACDELCO

disc rotors

ACDelco Disc Rotors are engineered to Original Equipment design criteria and manufactured to the demanding TS 16949 quality standard in a QS9001/QS9000 rated facility.

A focus on high quality casting materials, tight machining tolerances and key design features, ensure that ACDelco Disc Rotors deliver consistent levels of performance and reliability.

All ACDelco Disc Rotors are balanced during the machining process to ensure optimum performance on initial fitment, and are engineered to minimise brake shudder, improve thermal efficiency and reduce brake noise.

Features & Benefits

HIGH CARBON, GREY IRON COMPOSITION

- Low noise propensity.
- High thermal conductivity for fade and cracking resistance.
- Excellent high and low temperature mechanical strength.
- Wear resistance.

OPTIMISED ROTOR DESIGN

- Reduced rotor coning under high temperature.
- Improves thermal efficiency.

ADVANCED VENTILATION

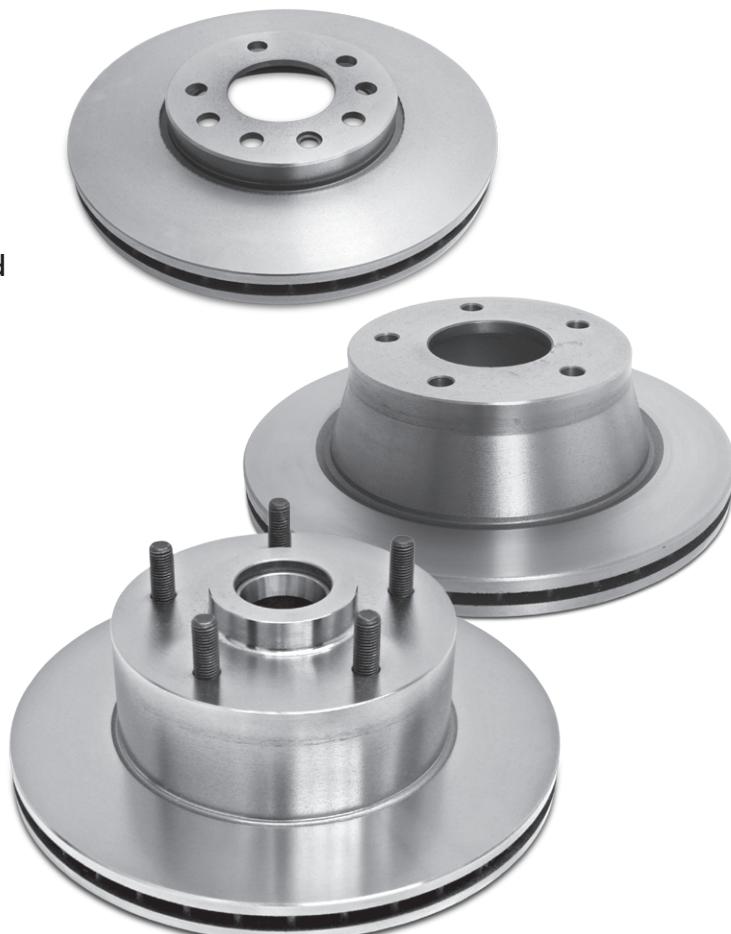

- Optimal cooling behaviour without increased mass.
- Resistance to thermal judder.
- Low transient and permanent deformation.

PRECISE MACHINING TOLERANCES

- Minimises brake shudder.
- Extremely low DTV (Disc Thickness Variation).
- Very low levels of LRO (Lateral Runout).

MINIMUM THICKNESS DIMENSION'S

- Minimum Thickness dimension marked on outer edge.

BRAKE CONSUMABLES

brake fluid & brake parts cleaner

ACDelco BRAKE FLUID GLOBAL DOT 4 - 500ml 92286932

Brake fluid for hydraulic brake and clutch systems with a boiling point of at least 265°C and a wet boiling point of at least 175°C. Due to the low deep temperature viscosity this brake fluid is especially recommended for brake systems combined with ABS, TCS and ESP/DSC. ACDelco Global DOT 4 contains effective corrosion inhibitors and antioxidants.

Benefits

- Has high thermal stability.
- Features excellent corrosion protection for various metals.
- Leads to an appropriate swelling within the specification limits of natural rubber (NR), styrene-butadiene rubber (SBR) and EPDM rubber.

ACDelco BRAKE FLUID GLOBAL DOT 4 - 20 Litres 92286931

Brake fluid for hydraulic brake and clutch systems with a boiling point of at least 265°C and a wet boiling point of at least 175°C. Due to the low deep temperature viscosity this brake fluid is especially recommended for brake systems combined with ABS, TCS and ESP/DSC. ACDelco Global DOT 4 contains effective corrosion inhibitors and antioxidants.

Benefits

- Has high thermal stability.
- Features excellent corrosion protection for various metals.
- Leads to an appropriate swelling within the specification limits of natural rubber (NR), styrene-butadiene rubber (SBR) and EPDM rubber.

ACDelco BRAKE PARTS CLEANER 88900163

Oil, grease, grime, and brake fluid build up on brake component can cause improper operation.

Benefits:

- Removes soil, grease, grime and dust.
- Cleans disassembled brake parts.
- Also can be used for cleaning some electrical contacts, carburetor linkages, starters, alternators, electric motors.
- Dries without leaving residue.

A word about this catalogue. We have tried to make this catalogue as comprehensive and factual as possible. However, since the time of printing some of the information you'll find here may have been updated. Also, some of the equipment shown or described through this catalogue may have been changed. Further, GM Holden Ltd ABN 84 006 893 232, reserves the right to make changes at any time without notice. No Holden Dealer or other person is authorised or permitted to give or make any statement, assertion or undertaking in relation to the quality, performance characteristics, descriptions or fitness for any purpose of any ACDelco product which is at variance with any written statement, assertion or undertaking on any of these subjects given or made by Holden in its published sales literature, and Holden does not accept any liability for any such unauthorised action.

Holden has authorised Dealers in many parts of Australia for the sale of service parts and the provision of service to owners of Holden's products. Every endeavour is made to ensure that such Dealers carry adequate stocks of service parts, but Holden doesn't make any promise other than that contained in the New Vehicle Warranty given by Holden that such parts or service facilities will be available at any specific location or at any particular time.

Express warranties offered for ACDelco products are subject to the conditions set out in all vehicle handbooks. Details also available from Holden on request. Copyright Holden.
