

Addictive Desert Designs was born from an addiction to push the limits of design, plus a strong desire for the desert. This has driven us to pursue our goals of engineering the world's toughest and visually appealing products for trucks, SUV's and Jeeps.

Started in a garage outside of Phoenix, AZ in 2007 as R & H Longtravel, we are now occupying a 40,000 square foot production facility and corporate office. This new facility is a big leap from the days in the tiny garage, but we continue to lead the way with product development.

From our Industry leading Ford Raptor SVT bumpers and suspensions, to our ever growing product line-up for nearly every modern truck on the market, we are raising the bar on style, ruggedness and performance. All of our products are built out of American steel, 5052 aluminum, or a combo of both that are bolted together to create our durable, Baja proven products. All of our products are 100% bolt on, no cutting or welding required. All products are proudly made in the USA.

SNEAK PEAK OF WHATS COMING IN 2016

HONEYBADGER CHASE RACK

Super Duty Chase Rack's modular design allows you to add what you want where you need it with three key components: Base rack, tire carrier, and the roof rack. The entire rack bolts together and does not require drilling of the cab. The rack covers half the cab so you can utilize the sun roof. The base rack includes a cross member with lighting options for Rigid Industries SR-Q Flush Mounts. The in-bed tire carrier option allows for up to a 40" tire on an angle leaving room underneath for storage. The roof rack bolts onto the base rack and has options for 3 SR-Q Flush Mounts on driver and passenger side. Forward facing light mount options allow up for two 50" light bars. The rack is low profile and contours the roofline of the cab to diminish wind noise. The roof rack provides a flat mounting surface for bags, coolers, tires, etc. Facing rear is an integrated locking toolbox with two access doors. The entire roof rack is made out of lightweight 5052 aluminum, while the base rack and tire carrier are American steel. Patent Pending.

UNIVERSAL CHASE RACK

Universal Chase Rack is a great option for giving your truck an added edge while adding lighting options. This chase rack is width adjustable and comes in two heights: Low profile for quarter ton trucks, regular profile for half ton trucks or larger. The mounting options for lights gives you limitless possibilities for configuration. Side panels for the rack come in a honey comb pattern or dimple die pattern. Made from 5052 aluminum, total weight of the rack without lights is around 14lbs. Patent Pending.

NEW

JEEP JK VENOM

The Addictive Desert Designs NEW Jeep JK Venom line is designed with a sleek, subtle look that maintains the factory lines. This unique design sets the Venom Bumpers apart from other bumpers on the market. The Jeep JK Venom bumper is specifically designed to have a winch mount inside the bumper in an effort to not block air flow to the radiator. There is a top plate option to cover the winch compartment if you choose not to add a winch immediately. All Addictive Desert Designs products are proudly made in the USA. Call us today to order your Venom Bumper! Patent Pending.

NEW

The ADD Venom line for Jeep JK is designed with a sleek, subtle look that maintains factory lines. 100% bolt on.

- Winch mount inside the bumper in an effort to not block air flow to the radiator
 - One cube light cutout on each side of the winch
- There is a top plate option to cover the winch compartment for non-winch application
 - Non-winch application allows for a 20" light bar
- Made from .120 wall tubing and aluminum panels

JK Venom Side Steps are designed to be a step. 100% bolt on.

- Dimple die step pads
- Made from .120 wall tubing and plate steel
- Designed for JK 4Door Only
- Designed to be a step, not a rock slider

JK Venom Rear Bumper contours the rear of the Jeep and aids in departure angle with its "dove tail" corners. 100% bolt on.

- Cutout fits up to 40" tire
- Cutout for cube backup lights
- Made from .120 wall tubing and aluminum panels

NEW

UNIVERSAL ADD MAXRAX ROOF RACK SYSTEM

Addictive Desert Designs has taken innovation and ingenuity to the next level and is introducing our first ever ADD MaxRax roof rack system. What makes our roof rack system unique to others in the market is that it is universal and light weight, weighing on average 15lbs depending on the mounting hardware. The rack comes complete with our Universal Light Mount system that allows for cube lights, single row and dual row light bars to mount in multiple locations on all four sides of the roof rack. The bottom of the ADD MaxRax roof rack incorporates slats that are adjustable to your desired width to fit bags, coolers, etc. For Jeep JK there are two mounting options to choose from: Roll cage mount for when the top is off, and hard top mount for when the hard top is on; there is no soft top mount available at this time. Patent Pending.

The all-aluminum system built from 5052-0 and receives hammer black three-stage powder coat before it is shipped. Assembly is required, and is easily bolted together. Patent Pending.

Four options are available for the ADD MaxRax roof rack:

Width	Length	Height
55"	55"	5.25"
50.25"	55"	5.25"
55"	48"	5.25"
50.25"	48"	5.25"

NEW

FORD RAPTOR VENOM R

The Venom R has a tight to the body look with a desert style Pre-Runner type feel but has the same easy bolt on application that is always provided by ADD.

The Venom R bumper line is built using .120 wall steel tubing and 3/16" mild steel with aluminum skid plate and paneling. Bumpers are available with or without logos and side panels. The Venom R bumper is the second family at ADD to have a universal light mount option that allows the customer to create their own individual look. It comes set up for 10 small pods (Rigid Duallys recommended) in the center. For other lighting applications a Universal Light Mount Kit is required. Many light combinations are possible with the Kit, from full 40" bars to small radius bars and pod combos. The Universal Light Mount Kit is sold separately. Patent Pending.

NEW

2015 CHEVY COLORADO HONEYBADGER

The HoneyBadger front bumper comes with a multitude of lighting options: adjustable 20 inch light bar mount, a universal 30 inch radius or straight bar option, has mounts for one 6 inch single row led light bar behind the Stealth Panel. 100% bolt on. Patent Pending

- Multiple lighting options on top or within the bumper
- Winch ready
- Made from 3/16" and 1/8" American steel

HoneyBadger Side Steps boasts unique styling from a laser cut HoneyBadger logo, to an all welded body, to removable step plates that can be color matched for complete customization. 100% bolt on. Patent Pending.

- LED light strip illumination
- Dimple die aluminum step plates
- Made from 3/16" and 1/8" American steel

The Chevy Colorado Rear HoneyBadger bumper is just as burly as its front bumper counterpart. The bumper is available in hammer black powder coat with satin doors on the driver and passenger side locking tool boxes. 100% bolt on. Patent Pending.

- Locking Tool Box
- Cutouts for Cube Lights

NEW

ADD LITE FRONT BUMPER

The ADD Lite bumper is stout, yet easy on the wallet. This bumper features our brand new patent pending Universal Lighting System. This will allow you to put several different types of lights and configurations on your bumper. You can now mount radius bars, straight bars, and cubed lights. Mix, match, and make combo choices. The ADD Lite bumper contours the front of your truck, includes a low profile skid plate that does not attach to the truss, which allows for a suspension kit to be installed. Like all ADD products, this is 100% bolt on. Patent Pending.

- Universal Lighting System
- Skid plate allows for multiple lift kit options
- Optional top hoop

THE HONEYBADGER

The new HoneyBadger Front Bumper is just as durable as it is versatile. Its wrap-around design, laser cut finish, and 3/16" Mild Steel Construction offers precision built quality along with added strength. As with all of our products, you have plenty of options to choose from based on personal preference, location, and budget for a complete customized look.

This bumper comes in two configurations: Standard and Rancher. Each configuration comes in hammer black with satin black panels as well as the top, lower, and side mounts for your LED light bars.

FORCE

ADD
OFFROAD

The Race Series "R" Front Bumper has an aggressive design with Baja proven functionality. Designed with optional cooling vents to help with cooling in extreme environments. The skid plate design helps protect the radiator, steering, and lower engine components. Made with an option for 10 individual cube lights or the new 40" radius light bar on top and options for a 20" LED behind the lower plating or a winch, this bumper provides plenty of options for your adventures.

STEALTH FIGHTER

The Addictive Desert Designs Stealth Fighter Front Bumper makes your truck look fast, even while standing still. By combining the tubing of a traditional pre-runner style bumper and the encapsulating enclosed panel design, it has a very innovative style that leaves jaws dropping everywhere you go.

Built in America using High Strength American Steel, our products give you the same sense of pride ADD has about quality manufacturing allowing you to feel personal about your truck and proud to own products with the ADD name proudly displayed on them.

STEALTH

The Addictive Desert Designs Stealth Front Bumper is a hybrid design of our traditional Standard Pre-Runner Bumper, while incorporating the enclosure style of our Venom Bumper. When designing this bumper we wanted to keep the look of a Baja Truck, yet make the bumper clean and finished. Many hours were devoted to ensuring proper air flow and performance were kept intact, yet the unsightly core support and other components were hidden. The Stealth Bumper allows one of the broadest ranges of custom options in our product lineup.

RANCHER

The Addictive Desert Designs Rancher Front Bumper is one of our most protective and toughest bumper designs. It features a frame that wraps around the front of your truck protecting it from any off-road debris or elements you may encounter.

The Rancher Front Bumper is fully customizable from lighting accessories to winch mounts and is a direct bolt on bumper meaning a quick and easy installation allowing more time for you to enjoy your truck.

SVT

RACE SERIES

The Addictive Desert Designs Race Series Front Bumper is a Ford Raptor only product designed to not completely change the truck's stock appearance. Slim-line construction was used to mold the front of the truck while giving maximum approach angle. This bumper comes with multiple light mounts along with options for stealth panels to give the bumper a more enclosed look.

The Race Series Front Bumper is one of the strongest bumpers in the ADD line-up and will give your Ford Raptor a race inspired look while giving you added security and protection.

THE HONEYBADGER

The new Addictive Desert Designs HoneyBadger Rear Bumper is made for most of today's full-size trucks. The most unique feature of this bumper are the two lockable toolboxes located on both sides. This means no more reaching into the truck bed, fishing around for what you need. You can now keep the tools you use most close at hand, right in the HoneyBadger Rear Bumper.

This bumper comes with mounts for rear facing lights and can be ordered with or without back-up sensor mounts.

STEALTH

The Stealth Rear Bumper still remains one of the more popular rear bumpers that we currently sell. It combines extremely tough construction with the most aggressive look that you could ask for. In addition, the .120 wall steel tubing and hand welded steel plates will protect your investment, giving you peace of mind on your off-road adventures.

Venom

The Venom Rear Bumper features an extremely strong and durable construction and even comes with a corrosion-resistant Black Hammer Tone powder coat finish. The bumper has provisions for rear-facing LED lights and can be fitted with optional mounts for backup sensors. As with all ADD bumpers, everything is 100% bolt-on meaning no cutting or welding is required allowing you to re-install your stock bumper if needed.

THE HONEYBADGER

The HoneyBadger Side Steps are the latest truck product offered by Addictive Desert Designs. This step was designed to be the perfect addition to the innovative HoneyBadger Front and Rear Bumpers, yet be able to stand alone. The step itself boasts unique styling from a laser cut HoneyBadger Logo, to an all welded body, to removable step plates that can be color matched for complete customization. The step is also available with access lighting that helps to ensure you can always find the step in dark lit areas.

All Addictive Desert Designs side steps utilize factory mounting positions that allow for easy installation and come standard with a three stage powder coat finish that will ensure your steps will stand up to today's tough weather conditions.

Be a HERO

Born from the race track and brought to you by Addictive Desert Designs, the Race Series “R” Side Steps are a combination of fast and functional mixed into one. This step utilizes the best materials making it strong while the slim-line construction keeps it tucked into the truck so that it is not protruding out from the sides. Completing the steps are dimple holes to help with footing and an LED Strip that allows you to find your step any time of the day.

All Addictive Desert Designs side steps utilize factory mounting positions that allow for easy installation and come standard with a three stage powder coat finish that will ensure your steps will stand up to today’s tough weather conditions.

ROCK SLIDER

Finally brought to the full size truck market, the all new Rock Slider from Addictive Desert Designs is an infusion of Side Step mixed with Rock Guard. This Rock Slider is designed to be strong and sturdy for your off-roading adventures while doubling as an entry step for your truck. Built using all American .120 Wall Steel, this step is not only strong, it is capable of taking abuse while driving off-road from rocks and debris that might get kicked up into the rocker panel section of your truck. Infuse this even further with LED Lighting and you now have entry lighting to help you locate your footing in the darkest of times.

All Addictive Desert Designs side steps utilize factory mounting positions that allow for easy installation and come standard with a three stage powder coat finish that will ensure your steps will stand up to today's tough weather conditions.

BRAKES

The all new Alcon brake upgrade kit was built with performance in mind for the demanding driver. Using race quality parts for the best performance brake package available anywhere for the Ford F-150 and Ford Raptor trucks. This kit is a direct replacement kit that features a 6 opposing piston front caliper giving you about 30% more brake pad area in the front alone. Combine that with the rear 4 opposing piston caliper which also gives a much larger pad area for better grip and more controlled braking.

ADD FRONT AND REAR SUSPENSION

Thousands of hours in research and development have produced the best Baja Proven aftermarket suspension for Ford Raptor and Ford F-150 trucks. These ADD suspension kits will allow you to push your truck to the limit and keep your mind at ease by knowing it can withstand the abuse.

The ADD front suspension is a vast improvement over your stock suspension. The ADD stock replacement spindle is a boxed, fully welded spindle that is a huge upgrade to your stock cast-iron or cast aluminum part. ADD's replacement spindle is the only spindle on the market that integrates progressive turn stops into the spindle to aid in steering to prevent you from oversteering the throw of the steering rack. The ADD replacement spindle works with both stock tie rods or the even better ADD billet Tie Rod Kit, which is enhanced with double sheer at the heim to add strength to your steering system. The Tie Rod Kit from ADD is billet aluminum hard black anodized and laser engraved. Rounding out the front suspension is the upper and lower control arms. Both are stock bolt on replacements. The UCA is made from 1/8" steel plating and incorporates a 1.5" uniball that bolt to both the stock spindle or the stronger ADD replacement spindle. The LCA is designed to work with the stock shock or an aftermarket shock, and can work with the stock spindle, or the ADD spindle. Made from 3/16" plate steel, race quality bushings and steel spacers, this is the strongest LCA on the market.

ADD rear suspension increases travel while leveling the rear of the truck, depending on how extreme you want to make your Ford. Featuring Deaver leaf springs, ADD shackle hangers, Fox shocks, and ADD frame gussets, you can pick from Stage 1, 2 or 3 to outfit your truck to your needs with wheel travel as high as 18" in the rear. The incorporation of the ADD bump stop and frame gusset kit provides the ultimate handling and protection from the unexpected bumps that surprise you. All 3 of the ADD suspension kits include this unique frame support and bump stop technology.
