THE AIRBAG CONTROL UNIT (ACU)

INFLATORS

## TECH-AIR™ AIRBAG SYSTEM

PERFORMANCE RIDING - SIZE: 44-60 EUR

Alpinestars' Tech-Air™ is the world's most technologically advanced electronic airbag system for street motorcycle riders. Following years of R&D, hundreds of thousands of miles of road testing and a multitude of full-scale crash tests, the Tech-Air™ system's innovative design and sensor positioning provides active safety performance in a wide variety of situations.

Tech-Air™ is the world's first fully self-contained airbag system to function independently of the motorcycle, with its sensors, electronic control unit and full upper body airbag system incorporated into an airbag vest worn with an outer jacket.

The Tech-Air™ system's sensors detect a rider's impending loss of control with the greatest of precision and, once fired, the airbag will fully inflate within 25 milliseconds. The system's sensors are not required to be fitted to the bike, meaning Tech-Air™ can be worn in a variety of riding situations, both on and off-road.

Interchangeable with a choice of Alpinestars' compatible riding jackets for all-weather and everyday use, the Tech-Air™ street airbag system offers you the highest levels of protection and versatility, combined with true convenience and usability.

Switching the system on before your ride is as simple as zipping up your jacket and regardless of motorcycle or scooter type, age or model – Alpinestars' Tech-Air™ is there to protect you all the time; whatever the bike, season or surface.

Designed to be used in conjunction with airbag-compatible outer jackets -- Comprehensive inflatable upper body protection for back, shoulders, kidney area, chest and upper abdomen. -- Electronic sensors are securely and unobtrusively incorporated within the system's chassis, meaning the vest is completely self-contained and allows it to be worn interchangeably between compatible jackets. -- Constructed from a strong and durable mesh main shell with stretch poly-fabric on shoulders and torso for a compact and secure fit that is close to the rider's body while allowing freedom of movement. -- Removable inner mesh and elastic **Hook and loop fastener** waistband to position airbag system to customize fit and improve adjustability. -- Full internal back lining constructed from 3D mesh for optimized levels of ventilation and breathability. -- The Airbag Control Unit (ACU) of Tech-Air™ is incorporated within strong, lightweight polymer back protector, which features an ergonomic plate construction for structural strength and a fit to follow the natural contours of the back. -- Tech-Air™ ACU is seal-protected within vest to ensure its all-weather performance. -- ACU has been homologated to ECE R10 04, which ensures the electromagnetic integrity and stability of the unit. -- Tech-Air™ uses an integrated,

certified lithium ion battery, with a battery life of 25 hours and a recharge time of approximately 6 hours. Micro USB charger allows convenient recharging of system, with one hour of charging time giving four hours of riding coverage.

### CERTIFICATIONS

Argon inflator cartridges are CE certified to ISO 14451 standard, meaning that they will only fire if commanded by the electronic unit. It also certifies that the cartridges can be safely handled, assembled and transported. -- System's firmware is upgradable and external service record will be managed by a custom-made data portal. -- Tech-Air™ is Category II CE Certified to the 686/89/EEC European PPE Directive, using a version of EN1621-4:2013, which guarantees impact protection performance from 25 milliseconds to 5 seconds. -- Certified to function at -10°C and +50°C to guarantee system's use in wide range of weather conditions. -- Tech-Air™ design and manufacture is CE certified to the 2007/23/EC pyrotechnic directive, guaranteeing it has been assembled following all pyrotechnic handling and safety regulations, which means the system can be transported by car, ship, train or airplane.

# VALPARAISO FOR TECH-AIR™ JACKET

ALL WEATHER RIDING / ADVENTURE TOURING - SIZE: S-4XL

Fully featured and highly versatile 4-in-1 all-weather jacket optimized for comfort and performance with airflow, thermal and waterproof configurations. -- Superior, multi-material main shell construction featuring an advanced poly-fabric main shell, which has been specially designed to accommodate larger volume mass in the event of airbag deployment. -- Features integrated sensors securely and subtly on the upper zip; electronic airbag system 'arms' automatically when jacket is closed, offering peace-of-mind security and safety. -- Intelligent LED panel on left sleeve indicates if airbag system is functioning correctly. -- Internal conduits for quick and convenient attachment of airbag vest. -- Leather panels on shoulder and sleeves for high levels of durability and abrasion and tear-resistance in critical areas. -- Removable and interchangeable waterproof and breathable DRYSTAR® full ensures long term all-weather performance. -- Long sleeve thermal liner (130g on body, 100g on sleeves) can

be fully removed and has zipper connection for easy identification with integrated stretch comfort edge. Thermal liner is 'sonic quilted' for improved insulation. -- Featuring Ventilation System (VS) large zippered air intakes on torso with large rear air exhaust window on back and on the arms for cooling performance on long rides. -- Removable CE-certified shoulder and elbow. -- Chest and back pad compartments with PE padding (Alpinestars Nucleon back protector available as accessory upgrade). -- Extended accordion stretch inserts on shoulders for improved fit and expansion to accommodate inflated airbag. -- Pre-curved, articulated sleeves with gusseted Hook and loop fastener cuffs enhance fit and comfort in the riding position. -- Waterproof external storage provided by two chest front water resistant zips and one internal waterproof wallet pocket. -- Convenient storage options with two front cargo style pockets and large rear utility pocket.

## HOW TO MEASURE

- A. Chest** - Measure around the fullest part, under the armpits, keeping the tape horizontal.
- B. Waist** - Measure around the natural waist line, inline with the navel, keeping the tape horizontal.
- C. Hip** - Measure around the fullest part of your hips, about 20cm below waist line, keeping the tape horizontal.
- D. Thigh** - Measure around the thigh just below the crotch, keeping the tape horizontal.
- E. Inseam** - Stand against a wall, ask someone else to measure from the crotch to the bottom of your leg.
- F. Arm Length** - Measure from shoulder (Humerus) to wrist.
- G. Height** - Stand against a wall, ask someone else to measure from the floor to the top of your head, keeping the tape vertical.

## HOW TO MEASURE HAND CIRCUMFERENCE WITHOUT THUMB

# GLOSSARY

**4-IN-1 SYSTEM** - Interchangeable system incorporating the removable, waterproof and breathable Drystar® liner and removable thermal liner. The 4-in-1 system enables the jacket to be used with the Drystar® and thermal liners together; the Drystar® or thermal liner by themselves; or without either liner, allowing the jacket to be configured in 4 different ways to suit any climatic condition.

**ARMACOR™ PRODUCT TECHNOLOGY** it's a patented lattice structure with an integrated Dupont™ Kevlar® fiber core. This technology offers extreme tear and abrasion resistance yet lighter weight. Incorporated into a GORE-TEX® Pro Shell motorcycling jacket, it will protect enthusiastic motorcyclists in the event of a fall. This means safety and enhanced comfort – in ALL-WEATHER conditions.

**CE CERTIFICATION** - Protection and protectors that are CE-certified have met the strict performance standards and requirements of the European Union.

**CLARINO®** - This highly durable material provides great feel for the palm. Machine washable, Clarino® remains soft and supple even after repeated exposure to water.

**CLIMATE CONTROL SYSTEM** - System of zippered air intakes and exhausts that allow precise control of airflow while riding for superior body temperature regulation.

**COOLMAX®** - This unique material “wicks” moisture away from the skin and quickly transfers it to the outer surface to speed up evaporation.

**CORDURA®** - This textured nylon is durable, lightweight and abrasion resistant

**DENIER** - Denier is a measurement which denotes the thickness and the diameter of a fiber material.

**DRYSTAR®** - Alpinestars' waterproof and breathable membrane for all-weather comfort and performance.

**DRYSTAR® PERFORMANCE** - Alpinestars' exclusive sealed triple layer construction technology which bonds all layers in glove, thereby affording a highly reduced material chassis to promote good levels of sensitivity of bike controls.

**E.V.A.** - This comfortable and lightweight material provides superior shock absorption and impact protection.

**GORE-TEX®** - This world renowned waterproof and breathable membrane features pores that are smaller than water to keep rain out, but larger than water vapor, allowing perspiration to escape.

**GORE-TEX® PRO SHELL** - It is the optimum solution for outdoor professionals and serious enthusiasts, who need to face extreme weather and tough conditions. Made with the most rugged, most breathable, durably waterproof and windproof fabrics.

**GORE-TEX® PACLITE® SHELL** - Combines extreme breathability and durable wind and waterproofness with minimum weight and pack volume.

**GORE-TEX® SOFT SHELL** - Constructed with soft and warm fabrics. GORE-TEX® Soft Shells are designed for reduced layering and improved freedom of movement in colder conditions.

**GORE-TEX® WITH GORE GRIP TECHNOLOGY** - Sealed triple layer material construction from GORE-TEX® for improved dexterity, grip and control sensitivity.

**PERFORMANCE SHELL** - Designed to provide comfort and durable waterproof protection.

**DUPONT™ KEVLAR®** - Used as a reinforcement, this high strength fiber is cut and tear resistant.

**NEOPRENE** - Comfortable and flexible, this water resistant material provides great insulation in cold and damp conditions and excellent wind stopping performance.

**PITTARDS® DIGITAL LEATHER** - Supple and quick drying leather which provides excellent grip in all-weather conditions.

**SCHOELLER® KEPROTEC®** - This stretchable and vented material features Dupont™ Kevlar® reinforced thread for maximum tear and abrasion resistance.

**SUBLIMATED GRAPHICS** - Utilizing a pressure and heat process, this system of design transfer produces fade free graphics even after extensive washing.

**SUPERFABRIC®** - Flexible, ceramic reinforced fabric that is extremely abrasion, puncture and cut resistant making it ideally suited for application on exposed areas such as knees and elbows.

**TAPED SEAMS** - Seam tape is applied along the stitch line of the garment, which prevents water intrusion at these small but critical areas.

**TASLAN** - Durable and water repelling nylon fabric.

**THINSULATE®** - Lightweight, breathable, moisture resistant and quick drying, Thinsulate® provides superior insulation for cold weather riding.

**PRIMALOFT®** - A lightweight, breathable insulation that repels moisture to offer superior performance for cold-weather riding.

**PU COATING** - A thin layer of film applied to the backside of the fabric to give strength, structural integrity and water resistance.

**PU** - Polyurethane. Polymer containing urethane used in plastics, rubber, foam, etc.

**PE** - Polyethylene. Thermoplastic material composed of polymers of ethylene. It is light, strong, water resistant and flexible at low temperatures.

**TPU** - Thermoplastic polyurethane. A hybrid material - a mixture between hard plastic and soft silicone. A very dense and smooth rubber.

**WINDSTOPPER®** - Laminated membrane offering total windproof performance and maximum breathability for complete comfort.
