HOW TO USE THIS GUIDE

FINDING THE RIGHT GLOVES

We’ve arranged this guide to make it easy for you to find the glove perfectly matched to your application. This step-by-step guide will help you get started. It explains how to use the information in this guide to select the appropriate hand protection.

STEP 1 – WHAT TYPE OF PROTECTION DO YOU NEED?

Begin by determining which type of protection is required for your application. Our gloves are divided into three protection categories designed to meet specific demands.

- **Mechanical Protection (pages 8 – 43)**
  Protect workers from cuts, scrapes, punctures and hand fatigue

- **Chemical and Liquid Protection (pages 44 – 71)**
  Protect workers from hazardous chemicals and liquids

- **Product Protection (pages 72 – 97)**
  Protect hands and work from contamination – for regulated environments
  - Pharmaceutical labs and cleanrooms
  - Electronics labs and cleanrooms
  - Food processing and service markets

STEP 2 – WHAT PERFORMANCE ATTRIBUTES DO YOU REQUIRE?

Determine which protection segment and duty level is needed for your application. You will find gloves matched to a wide variety of safety needs and work environments.

<table>

STEP 3 – DETERMINE WHICH GLOVES BEST MEET YOUR NEEDS

We have provided a variety of resources to narrow your selection down to the perfect glove. Each resource is designed to help guide you to the glove that meets the safety, comfort and budget demands of your application.

Product Comparison and Selection Charts

Use these charts to easily view and compare the performance characteristics of all the gloves within an application segment or polymer type.

What to look for:
1. Product name and styles
2. Specifications such as construction, liner material, cuff style, thickness and length
3. ANSI and EN ratings
4. Duty levels
5. Page numbers for specific product details

Product Detail Pages

These provide in-depth information about each glove so you can make an informed and educated decision.

What to look for:
1. Specifications such as construction, liner material, cuff style, thickness, length, sizing and packaging
2. Detailed product descriptions
3. Industries where the product is applicable
4. Ideal applications within the industry
5. ANSI and EN ratings
6. Featured technologies such as DuPont™ Kevlar®, DSM Dyneema®, Foam Nitrile or KVSD

Understanding ANSI, EN and all the icons

To help you make the smartest decisions about hand protection and protective clothing, Ansell now includes both ANSI and EN ratings to provide more critical and relevant information. These ratings are thoroughly explained on the inside back cover of this guide along with a legend of icons and their meanings.
KNOW YOUR GLOVES

To ensure optimum performance in a given application, each Ansell glove is designed with unique characteristics. A wide range of yarns, liners, dips, cuff styles, textures and sizes ensure that you get the right glove for the job. Here you can quickly familiarize yourself with these characteristics in order to make the best PPE decisions for your workers.

LINERS AND YARNS

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>DuPont™ Kevlar</td>
<td>A cut-resistant aramid fiber from DuPont™ known for its strength and heat resistance</td>
</tr>
<tr>
<td>INTERCEPT technology</td>
<td>A unique yarn material exclusively developed by Ansell with DuPont™ to provide exceptional cut protection and dexterity</td>
</tr>
<tr>
<td>Dyneema®</td>
<td>A cut-resistant fiber from DSM that offers cut and superior abrasion resistance with enhanced softness and a cool, comfortable feel</td>
</tr>
<tr>
<td>Interlock Knit</td>
<td>A tightly woven knit fabric that’s cooler and more flexible (vs. jersey cotton) resembling two separate fabrics that are interknitted, similar to T-shirt material</td>
</tr>
<tr>
<td>Brushed Jersey Cotton</td>
<td>Cotton jersey is brushed to produce a napped surface, similar to a sweatshirt, which provides warmth and cushioning</td>
</tr>
<tr>
<td>Nylon</td>
<td>A synthetic fiber with good abrasion resistance and good strength versus cotton</td>
</tr>
<tr>
<td>Terry</td>
<td>A fabric that has raised, uncut loops of yarn on one or both sides, similar to a bath towel, to provide very good insulation against heat and also absorb oil to maintain grip</td>
</tr>
</tbody>
</table>

CUFF STYLES

<table>
<thead>
<tr>
<th>Cuff Style</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rolled Beaded</td>
<td>Provides increased protection from liquid droplets, as well as increased cuff strength</td>
</tr>
<tr>
<td>Straight</td>
<td>Provides additional length to protect forearm from liquid runoff</td>
</tr>
<tr>
<td>Slip-on</td>
<td>Supports easy donning and doffing</td>
</tr>
<tr>
<td>Pinked</td>
<td>Traditional cuff finish</td>
</tr>
<tr>
<td>Safety</td>
<td>Extends a piece of protective material over the wrist area (usually 2½” – 3” in length) for added protection and easy donning and doffing</td>
</tr>
<tr>
<td>Gauntlet</td>
<td>Provides added protection and length (usually 4” or longer), allowing maximum movement of the wrist</td>
</tr>
<tr>
<td>Knitwrist</td>
<td>Designed to hold gloves in place and prevent debris from entering the glove</td>
</tr>
</tbody>
</table>
MECHANICAL PROTECTION COATINGS

**Coated** – Dipped in a natural rubber or synthetic polymer, these gloves are for applications requiring enhanced grip, liquid repellency, tactile sensitivity or cut resistance

**Dotted** – Dotted gloves are knitted gloves that have been silk screened with PVC or nitrile dots for enhanced grip performance and durability

CHEMICAL & LIQUID PROTECTION GLOVES

**Supported** – Made by dipping a knitted or woven cloth liner into the glove compound—the liner “supports” the compound and adds strength

**Unsupported** – The hand forms are dipped directly in the glove compound with no supporting liner or fabric

**Lined** – Lined gloves have an internal knitted or woven liner that adds increased mechanical protection and improved sweat management

**Flocked** – Flock-lined gloves have an internal coating of short cotton fibers, which promotes easier donning and doffing of gloves, as well as improved comfort

**Unlined** – Unlined gloves do not have a knitted or woven internal liner. As a general rule, they have a higher degree of dexterity and tactility but provide lower resistance against mechanical hazards

OTHER CONSTRUCTION ELEMENTS

**Powdered** – Designed to assist with easier donning and doffing—ideal for those who frequently change gloves

**Powder-Free** – Ideal for environments where product contamination is a concern—an alternative for those whose skin is irritated by powder

**Ambidextrous** – Gloves that can be worn on the right or left hand for increased convenience and value

**Hand-Specific** – Gloves designed to be worn specifically on the right or left hand for improved fit and dexterity

GLOVE SIZING CHART

Ordering the right size is the best way to assure that gloves are comfortable. One way to determine the size needed is to use a dressmaker’s cloth tape to measure around the hand. Measure above the thumb and below the fingers. The circumference of the hand (rounded to the nearest half inch) is numerically equal to the worker’s average glove size.

Measuring the hands in this way will not account for all possible variations in hand size. Some workers, for example, may have long fingers, while others will have short fingers. Workers may find gloves that are one-half or even a full size larger or smaller than the measured hand size fit more comfortably.

<table>
<thead>
<tr>

<td>SIZE</td>
<td>XXS</td>
<td>XS</td>
<td>S</td>
<td>M</td>
<td>L</td>
<td>XL</td>
<td>XXL</td>
</tr>
</tbody>
</table>

All gloves with a cuff are color coded for size identification. Colors vary across brands.
THE IMPORTANCE OF HAND PROTECTION

More than 25 percent of all workplace accidents involve hand and finger injuries.

Ansell is focused on providing workers with the best hand protection products available. That’s why we offer such a wide range of products designed for a variety of industries, applications and hazards. We ensure that you can find a glove that’s perfectly matched to your needs.

Our gloves are divided into three main protection categories. Within each one, you’ll find gloves designed to meet the demands of that specific category, so finding the glove perfectly matched to your needs is simple.

MECHANICAL PROTECTION GLOVES

These gloves are engineered to provide protection against cuts, abrasions and punctures in addition to grip properties for handling materials in light oil or dry applications. They also deliver varying levels of liquid repellency and a variety of special properties, while offering dexterity and comfort.

PRIMARY INDUSTRIES:

- Construction
- Critical Environment
- Energy
- Food
- Manufacturing
- Other Occupations
- Raw Materials Processing

PERFORMANCE SERIES PRODUCTS

- HyFlex®
- PowerFlex®
- Vantage®

CHEMICAL & LIQUID PROTECTION GLOVES

Designed for superior protection against splash and/or full immersion exposure to a wide variety of chemicals and liquids. These gloves also deliver varying levels of cut and abrasion resistance for added protection in rugged environments.

PRIMARY INDUSTRIES:

- Construction
- Critical Environment
- Energy
- First Responder/Defense
- Food
- Manufacturing
- Other Occupations

PERFORMANCE SERIES PRODUCTS

- Sol-Vex®
- AlphaTec®
- Touch N Tuff®

PRODUCT PROTECTION GLOVES

These gloves are engineered to provide product and worker protection in environments with specific regulatory requirements. They have characteristics suited for applications including pharmaceutical labs, cleanrooms, electronics, food processing and service markets.

PRIMARY INDUSTRIES:

- Critical Environment
- Energy
- First Responder/Defense
- Food
- Other Occupations

PERFORMANCE SERIES PRODUCTS

- Sol-Vex®
- Touch N Tuff®
Whether a job requires handling sharp edges, manipulating small parts or working in oily conditions, there's an Ansell glove that provides the level of protection and product characteristics you need. Our mechanical protection gloves utilize innovative technologies and high-tech yarns to create unique combinations of cut protection, oil repellency and grip. Each glove is carefully crafted to provide the best ergonomic design for the highest level of comfort.*

Our multi-purpose gloves perform in applications that demand increased versatility. Cut-protection gloves deliver the highest levels of protection when handling parts with sharp edges. Choose oil-repellant gloves for safety in moderately oily conditions. And our special-purpose gloves offer unique properties—such as protection from hot or cold temperatures, and low lint.*

**PRIMARY INDUSTRIES:**
- Construction
- Critical Environment
- Energy
- Food
- Manufacturing
- Other Occupations
- Raw Materials Processing

**Performance Series:** These performance gloves feature the latest innovations, leading the industry in safety and functionality. When you need the right solution for the most challenging jobs and environments, these gloves deliver.

- **HyFlex® Gloves**
  Experience the optimum balance of protection, comfort and dexterity with HyFlex® gloves. Ergonomically designed, they blend quality performance with precision handling.

- **PowerFlex® Gloves**
  For comfort, safety and sure grip in rugged environments you can trust PowerFlex® gloves. They bring the performance advances of ergonomic gloves to more demanding job applications.

- **Vantage® Gloves**
  Vantage® gloves utilize advanced technology and engineered fibers to provide superior hand protection for a variety of risk exposures. Plus, they deliver excellent comfort and durability.

**Classic Products:** There's a reason that these gloves set the industry standard. Classic gloves from Ansell continue to provide the performance and reliability that's demanded across industries worldwide.
MECHANICAL PROTECTION
CATEGORY OVERVIEW & FEATURED PRODUCTS

Each job application and environment requires a different degree of mechanical protection, dexterity and grip. Use this chart to help determine which glove provides the right performance for your needs.

H HEAVY
Engineered to provide protection and comfort in tough, heavy-duty jobs that require enhanced levels of mechanical performance and ergonomic handling.

M MEDIUM
Specially created to deliver the right balance of mechanical protection, performance, ergonomic handling and comfort for medium-duty jobs.

L LIGHT
Designed to provide an ideal balance of comfort, protection and dexterity in light- to medium-duty jobs that include precision handling of smaller parts.

MULTI-PURPOSE
Offer a balance of grip, oil repellency and precision handling performance for varied applications that demand increased versatility.

STAYING ON PAGE 20
SAMPLE APPLICATIONS:
- Assembling, inspecting and packing small or delicate parts
- Small to medium scale metal stamping
- Truck driving, forklift and crane operation
- Assembly and handling of nuts, bolts and screws

PERFORMANCE SERIES
HyFlex®
CUT-PROTECTION

Provide high levels of cut protection for applications where users control, handle or assemble parts with sharp edges.

SAMPLE APPLICATIONS:
- Sheet metal handling and finishing
- Handling slitter blades and utility knives
- Handling of fabricated building materials such as concrete block, brick, tile and lumber

PERFORMANCE SERIES
Vantage® | PowerFlex®

OIL-REPELLENT

Designed for use in moderately oily environments, such as lubricated part handling, where protection from oil on the skin is essential.

SAMPLE APPLICATIONS:
- Refuse collection (high-visibility)
- Handling hot materials (thermal)
- Cold weather protection (thermal)

PERFORMANCE SERIES
PowerFlex®

SPECIAL-PURPOSE

Offer unique performance properties, including thermal resistance (heat & cold), high-visibility, anti-vibration, anti-static and low lint.

SAMPLE APPLICATIONS:
- Engine and transmission assembly
- General plant maintenance work
- Light metal fabrication
- Machine shops

PERFORMANCE SERIES
HyFlex®

PERFORMANCE SERIES
Vantage® | PowerFlex®

Sample application:
- Operating machinery and equipment
- Handling tools and air guns
- Operating chain saws and grinders

**PowerFlex® 80-100**

**Description**
A rugged, comfortable glove designed to handle more demanding jobs

- Advanced ergonomic design features a soft, seamless poly/cotton knit liner for unbelievable comfort
- Superior wet and dry grip
- Powerful combination of grip, abrasion and puncture resistance
- Fully-coated thumb provides added protection in this high risk area
- Uncoated back allows air to circulate, keeping hands cool and dry

**Industries**
- Automotive
- General Industry
- Forestry
- Janitorial/Sanitation
- Warehousing
- General Carpentry
- Plumbers
- Masonry/Tile

**Ideal Applications**
- General material handling
- Forestry, logging and lumber operations
- Refuse collection
- Janitorial and general plant maintenance work
- Shipping and receiving - handling cartons and packaging
- Carpentry, drywall, roofing
- Stone and tile installation
- Outdoor construction work

**Cut and Abrasion Resistance**
- Cut 1
- Abrasion 4

---

**Grab-It®**

**Description**
The comfortable way to handle smooth, slippery or abrasive objects

- Designed to replace heavy cotton and leather palm gloves
- Heavy-texture finish provides extra protection, longer wear and excellent wet or dry grip
- Soft jersey lining offers superior comfort
- Natural rubber latex coating and flock lining are long wearing and launderable

**Industries**
- Glass
- Metalworking
- Plastics
- General Carpentry
- HVAC/Sheet Metal
- Users/Window Glazers

**Ideal Applications**
- General maintenance
- Forestry, logging and lumber operations
- Refuse collection
- Shipping and receiving - handling cartons and packaging
- Handling smooth, slippery or sharp-edged materials like glass, sheet metal, tile and veneer
- Handling abrasive or sharp-edged building materials

**Cut and Abrasion Resistance**
- Cut 2
- Abrasion 3

The most cut resistant, comfortable and cost effective glove of its kind

**DESCRIPTION**
- Good abrasion and tear resistance*
- Rough finish for excellent wet or dry grip
- Soft jersey-knit lining for superior comfort and flexibility
- Premium coating with crinkle finish delivers long service life as well as cut protection
- Natural rubber latex glove made from FDA-compliant materials

**INDUSTRIES**
- General Industry
- Fishing
- Janitorial/Sanitation
- Warehousing
- Glass

**IDEAL APPLICATIONS**
- General material handling
- Handling smooth, slippery or sharp-edged materials like glass, sheet metal, tile and veneer
- Handling of fabricated building materials such as concrete block, brick, tile and lumber

CAUTION: This product contains natural rubber latex which may cause allergic reactions in some individuals.

**DESCRIPTION**

- Outwears standard heavy-duty leather palm gloves 3-to-1
- Soft jersey lining eliminates seams from working areas for greater comfort
- Heavy-duty nitrile coating provides excellent dry grip as well as superior performance when handling rough, abrasive materials
- Excellent resistance to snags, punctures, abrasions, cuts, greases and oils*

*Component materials comply with FDA regulations for food contact.

**INDUSTRIES**

- Public Utilities
- General Industry
- Metal Fabrication
- Forestry
- Janitorial/Sanitation
- Metalworking
- Masonry/Tile

**IDEAL APPLICATIONS**

- General maintenance
- General material handling
- Assembly application when handling small to medium abrasive parts
- Forestry, logging and lumber operations
- Refuse collection
- Heavy-duty handling of castings, cores and fabricated metals
- Working with and managing cables
- Handling of fabricated building materials such as concrete block, brick, tile and lumber

**Description**
- Knitted from a durable, heavyweight poly/cotton blend
- Good abrasion protection for a wide range of applications
- Launderable for an extended life

**Industries**
- Food Processing
- Automotive
- General Industry
- Machining
- Metal Fabrication

**Ideal Applications**
- Engine and transmission assembly
- General material handling
- Small to medium scale metal stamping
- Servicing and maintaining metalworking equipment
- Beef/poultry/pork processing

**CAUTION:** The elastic band on this product may contain natural rubber latex which may cause allergic reactions in some individuals.

**Description**
- General purpose glove knitted with heavyweight cotton
- Offers protection from intermittent contact with moderately hot or cold dry surfaces
- Good abrasion protection for a wide range of applications

**Industries**
- Food Processing
- Automotive
- Janitorial/Sanitation
- Paper
- Textiles

**Ideal Applications**
- Fruit and vegetable processing (sorting, cleaning, paring)
- Final assembly areas
- Janitorial and general plant maintenance work
- Cold storage and unheated warehouses
- Moderate heat applications up to 200°F
- Beef/poultry/pork processing

**CAUTION:** The elastic band on this product may contain natural rubber latex which may cause allergic reactions in some individuals.

</tr>
</tbody>
</table>

**DESCRIPTION**

- A great combination of durability, abrasion resistance and comfort

- Mediumweight glove knitted from a blend of poly/cotton fibers
- Poly blend offers better resistance from abrasion than ordinary cotton work gloves*
- Reversible, will not shrink when laundered
- Excellent replacement for canvas and jersey gloves

---

**Industries**

- Petrochemical
- Oil Refining
- Public Utilities
- General Industry
- Metal Fabrication
- Forestry
- Janitorial/Sanitation
- Warehousing
- Masonry/Tile

**Ideal Applications**

- General material handling
- As a liner under work gloves in industrial applications where extra protection is required
- Janitorial and general plant maintenance work
- Carpentry, drywall, roofing
- Plumbing and pipelitting

---

*CAUTION: The elastic band on this product may contain natural rubber latex which may cause allergic reactions in some individuals.*
### HyFlex® 11-600

**Style #** | **Construction** | **Liner Material** | **Coating Material** | **Coating Style/Pattern** | **Cuff Style** | **Sizes** | **Packaging** |
---|---|---|---|---|---|---|---|
11-600 | Coated | Black Nylon | Gray Polyurethane | Palm Coated | Knitwrist | 5-11 | 12 Pairs Per Bag 12 Bags Per Case |
11-600 | Coated | White Nylon | White Polyurethane | Palm Coated | Knitwrist | 5-10 | 12 Pairs Per Bag 12 Bags Per Case |

**Safety without sacrificing performance**

**Description**
- Polyurethane palm coating
  - Maximum tactile sensitivity in the finger area for exceptional feel
  - Excellent fit and performance to maintain high productivity
- Ultra-cool stretch nylon liner
  - Provides barehand dexterity
  - Breathable nylon liner increases worker acceptance and safety compliance
  - Available in white or black

**Features**
- Aerospace
- Automotive
- General Industry
- Appliance Mfg.
- Janitorial/Sanitation
- Warehousing
- General Carpentry

### Outstanding Grip with a Relaxed Fit

**DESCRIPTION**

- Patented Knitted Variable Stitch Design (KVSD)
- Advanced technology for relaxed fit in high stress areas
- Molds naturally to hand, helping prevent fatigue
- Black foam nitrile coating / Dark gray liner
- Channels oil away from glove surface for sure grip in light oil applications
- Industrial-friendly color hides dirt and grime, increasing time between laundry cycles
- Enables handling of small parts with precision, dexterity and flexibility

### Improved Ergonomic Design with Exceptional Comfort

**DESCRIPTION**

- Ansell’s Patented Zonz™ Knit Advanced Comfort Technology
- Provides improved fit and comfort by releasing tension in the high stress zones of the glove, decreasing worker hand fatigue
- Enhanced Cuff Overedging (ECO) allows for easier donning and doffing
- Increased comfort and fit drive product acceptance and compliance
- Extensive size range protects more workers
- New Metallic Nitrile Foam Coating
- Distinctive modern look for fast identification
- New foam coating compound provides increased wear life
- Provides sure grip in dry or light oil environments

### Featured Technology

- Aerospace
- Automotive
- General Industry
- Tier 1
- White Goods
- Warehousing

### Ideal Applications

- Final assembly areas
- General material handling
- Assembly applications when handling small to medium abrasive parts
- Assembling, inspecting and packing small or delicate parts
- Assembly and handling of nuts, bolts and screws
HyFlex® 11-900

**DESCRIPTION**
Nitrile coating
- Provides good snag, puncture and superior abrasion resistance
- Reduces oil penetration, which minimizes the risk of dermatitis
- Excellent grip in dry environments

Breathable stretch knit liner
- Glove molds naturally to the hand, decreasing fatigue
- Ergonomic, natural fit for increased comfort

**INDUSTRIES**
- Automotive
- Appliance Manufacturing
- Warehousing

**IDEAL APPLICATIONS**
- Final assembly areas
- General material handling
- Assembly applications when handling small to medium abrasive parts
- Assembly and handling of nuts, bolts and screws
- Shipping and receiving – handling cartons and packaging
- Carpentry, drywall, roofing

**KSR® 22-515**

**DESCRIPTION**
Vinyl coated glove is extremely comfortable for long-wearing light-duty work
- Interlock knit lining stretches to a comfortably snug, sensitive fit
- Outwears 8-ounce cotton gloves by at least 6-to-1
- Coating breathes for ventilation while providing superior grip and liquid repellency
- Launderable, won’t shrink, stiffen or lose grip

**INDUSTRIES**
- Automotive
- General Industry
- Appliance Manufacturing

**IDEAL APPLICATIONS**
- General plant use
- General material handling
- Assembly and handling of nuts, bolts and screws
- Shipping and receiving – handling cartons and packaging
- Door and wood framing
### Easy Flex® 47-200

**DESCRIPTION**
- Better resistance to snags, punctures, abrasions and cuts when compared to ordinary 8-ounce cotton and string-knit gloves
- Ergonomically designed to be extremely cool, comfortable, light and flexible
- Superior dry grip
- Lightweight nitrile coating repels oil and grease

**INDUSTRIES**
- Automotive
- General Industry
- Appliance Manufacturing

**IDEAL APPLICATIONS**
- General maintenance
- General material handling
- Assembling, inspecting and packing small or delicate parts
- Shipping and receiving - handling cartons and packaging

Revolutionary yarns for increased cut protection without the bulk*

**DESCRIPTION**
- Engineered yarns provide the highest cut protection-to-weight ratio available*
- Ten gauge, mediumweight cut protection yarn and a 100% Kevlar® reinforced thumb crotch
- Contains DuPont™ Kevlar® fibers and can be used in environments with intermittent heat contact up to 200ºF
- Exceptional dexterity and comfort

**FEATURED TECHNOLOGY**

DuPont™ Kevlar.

*CAUTION: The elastic band on this product may contain natural rubber latex which may cause allergic reactions in some individuals.*

**INDUSTRIES**
- Automotive
- General Industry
- Metal Fabrication
- Appliance Manufacturing
- Metalworking
- Paper
- Plastics
- General Carpentry
- HVAC/Sheet Metal Users/Window Glazers

**IDEAL APPLICATIONS**
- Engine and transmission assembly
- Final assembly areas
- Handling tools, air guns and small parts
- General material handling
- Small scale metal stamping and assembly

**Vantage® 70-765**

Advanced cut protection combined with premium leather for superior grip*

**DESCRIPTION**
- Durable leather pad double-stitched with DuPont™ Kevlar® fiber to ensure superior grip and protection against sharp snags and punctures*
- Engineered yarns provide high cut protection-to-weight ratio*
- Ten-gauge, mediumweight cut resistant yarn and reinforced thumb crotch
- Protection all the way to the fingertips
- Protects hands from intermittent heat contact up to 200ºF

**FEATURED TECHNOLOGY**

DuPont™ Kevlar.

*CAUTION: The elastic band on this product may contain natural rubber latex which may cause allergic reactions in some individuals.*

**INDUSTRIES**
- Mining

- Textiles
- General Carpentry
- Plumbers
- Masonry/Tile

**IDEAL APPLICATIONS**
- Sheet metal handling and finishing
- Small to medium scale metal stamping
- Handling slitter blades and utility knives
- Handling of fabricated building materials such as concrete block, brick, tile and lumber
- Handling door panels, hoods and other sharp-edged materials
PowerFlex® Plus 80-600

**DESCRIPTION**
- 100% DuPont™ Kevlar® liner and a thick palm coating of natural rubber latex provide exceptional cut, abrasion and puncture resistance
- Fully coated thumb for additional protection in this high-wear area
- Crinkle finish latex coating for superior wet and dry grip
- Ergonomically dipped for reduced hand fatigue, with no uncomfortable seams

**FEATURED TECHNOLOGY**
DuPont™ Kevlar®.

---

Nitrasafe®

**DESCRIPTION**
- Incorporates DuPont™ Kevlar® for greater cut, puncture and abrasion resistance than that offered by standard leather palm gloves
- Offers more than 2 times the cut resistance of heavy-duty nitrile-coated gloves while providing superior dry grip capabilities
- Five piece jersey lining incorporates DuPont™ Kevlar® panels in high stress areas
- Nitrile coating repels oil and grease

**FEATURED TECHNOLOGY**
DuPont™ Kevlar®.

**DuPont™ Kevlar®** reinforced hand protection with comfort and flexibility

**DESCRIPTION**
- Greater cut, puncture and abrasion resistance than that offered by standard leather palm gloves*
- Porous nitrile coating channels oil away from the surface for better grip while providing superior flexibility and dexterity
- Five piece jersey lining incorporates DuPont™ Kevlar® panels in high stress areas

**FEATURED TECHNOLOGY**

**INDUSTRIES**
- Automotive
- General Industry
- Machining
- Metal Fabrication
- Appliance Manufacturing

**IDEAL APPLICATIONS**
- Heavy equipment assembly and cleanup
- Handling door panels, hoods and other sharp-edged materials
- Sheet metal handling and finishing
- Handling glass or slippery plastics
- Heavy duty handling of castings, cores and fabricated metals
- Servicing and maintaining metalworking equipment
- Handling abrasive or sharp-edged building materials

#### A high level of cut protection for the most demanding applications*

**DESCRIPTION**
- Heavyweight 100% DuPont™ Kevlar® string knit featuring a reinforced thumb crotch for excellent cut resistance*
- Designed to be durable
- Protects hands from sharp metal, ceramic, glass and other edges*
- Styles featuring PVC dots make them the ideal choice when enhanced grip is desired
- Reversible design allows glove to be worn on either hand, reducing replacement costs

**FEATURED TECHNOLOGY**

**DuPont™ Kevlar.**

*CAUTION: The elastic band on this product may contain natural rubber latex which may cause allergic reactions in some individuals.*

**INDUSTRIES**
- Automotive
- Metal Fabrication
- Metalworking
- Plastics
- General Carpentry
- Masonry/Tile

**IDEAL APPLICATIONS**
- Final assembly areas
- General material handling
- Handling slitter blades and utility knives
- Handling smooth, slippery or sharp-edged materials like glass, sheet metal, tile and veneer
- Carpentry, drywall, roofing
- Handling door panels, hoods and other sharp-edged materials

### Description
- Yarns contain three strands of stainless steel for exceptionally high cut protection*
- Heavyweight glove with no seams to irritate hands
- More cost effective than chain mesh designs
- Comes with 12 glove liners for additional comfort
- Reversible, so it can be worn on either hand

### Industries
- Food Processing
- Food Service
- Automotive
- Machining
- Metal Fabrication

### Ideal Applications
- Fruit and vegetable processing (sorting, cleaning, paring)
- Handling heavy metals and trimming/cutting plastic, carpet and cardboard
- Heavy duty handling of castings, cores and fabricated metals
- Meat processing
- Changing stationary blades in food slicers
- Outdoor construction work

### ANSI Standards
- ANSI 5 CUT
- EN 388
- EN 381
- X1XXX

### Description
- 100% DuPont™ Kevlar® knit liner with a leather palm
- Highly resistant to punctures, slashes, abrasions and moderate heat levels*
- Double-stitched leather palm with reinforced leather thumb crotch
- Excellent grip in both wet and dry conditions
- Protects hands from intermittent dry heat contact up to 400°F

### Featured Technology
- DuPont™ Kevlar®

### Industries
- Agricultural
- Automotive
- Machining
- Metal Fabrication
- Metalworking
- Paper
- Plastics
- Textiles
- General Carpentry
- Masonry/Tiling

### Ideal Applications
- Sheet metal handling and finishing
- Handling slitter blades and utility knives
- Canning of food products
- Carpentry, drywall, roofing
- Handling door panels, hoods and other sharp-edged materials

### DESCRIPTION

- Features Armor Technology™ with DuPont™ Kevlar®
- Ideal for work environments that demand tough protection from sharp, jagged edges and sparks and flames*
- Provides 2.5 times better performance than mediumweight Kevlar® based gloves
- Provides 1.8 times better performance than heavyweight Kevlar® based gloves

### FEATURED TECHNOLOGY

DuPont™ Kevlar.

**Heavyweight protection from cuts and sparks with a lightweight feel**

**INDUSTRIES**

- Automotive
- Metal Fabrication
- Lumber/Wood/Paper
- Appliance Manufacturing
- Metalworking
- Paper
- Plastics

**IDEAL APPLICATIONS**

- Forming, machining and bending of small sharp parts
- Handling glass or slippery plastics
- Processing and converting pulp into paper
- Handling door panels, hoods and other sharp-edged materials
- Handling heavy metals and trimming/cutting plastic, carpet and cardboard

*CAUTION: The elastic band on this product may contain natural rubber latex which may cause allergic reactions in some individuals.*

</table>

Unprecedented combination of cut protection and dexterity with improved durability*

**DESCRIPTION**
- Ansell’s exclusive Intercept Technology® with DuPont™ Kevlar® Stretch Armor
- ANSI cut level 4 reduces the risk of injury and related expenses*
- Offers a redesigned finger length for greater dexterity, comfort, wear and flexibility
- Enhanced Cuff Overedging (ECO) utilizes new yarn technology and increased elasticity in cuff area

New proprietary green foam nitrile coating
- Provides workers with the ability to handle sharp parts and knives with confidence in light oil or dry applications
- New coating formulation provides longer wear
- Silicone-free and latex-free for worker and product protection

**FEATURED TECHNOLOGY**

**INDUSTRIES**
- Aerospace
- Automotive
- Metal Fabrication
- Tier 1
- White Goods

**IDEAL APPLICATIONS**
- Forming, machining and bending of small sharp parts
- Small scale metal stamping and assembly
- Handling slitter blades and utility knives
- Handling glass or slippery plastics
- Door and wood framing
- Handling heavy metals, and trimming/cutting plastic, carpet and cardboard

**DESCRIPTON**
- Perfect for applications with a low-to-moderate risk of laceration*
- Made from DuPont™ Kevlar® fibers and cotton-blended yarns
- Specially plied yarns provide increased strength
- An economical alternative to 100% Kevlar® gloves

**FEATURED TECHNOLOGY**
- Protection of DuPont™ Kevlar® with the comfort of cotton

**INDUSTRIES**
- Automotive
- General Industry
- Metal Fabrication
- Warehousing
- Metalworking
- Plastics
- Textiles
- General Carpentry
- Masonry/Tile

**IDEAL APPLICATIONS**
- Engine and transmission assembly
- Handling machined parts free from shavings and sharp edges
- Handling slitter blades and utility knives
- Handling abrasive or sharp-edged building materials
- Handling door panels, hoods and other sharp-edged materials

**DESCRIPTION**
- At least 8 times more cut protection than most popular leather and construction gloves*
- Featuring Stretch Armor Yarn — a unique combination of DuPont™ Kevlar® and Ansell Intercept Technology®
- Designed to deliver comfort, barehand dexterity and excellent cut resistance*
- Foam nitrile coating delivers great wear and grip

**FEATURED TECHNOLOGY**
- The serious cut protection you demand*

**INDUSTRIES**
- General Carpentry
- HVAC/Sheet Metal Users/Window Glazers
- Plumbers
- Masonry/Tile

**IDEAL APPLICATIONS**
- Carpentry, drywall, roofing
- Door and wood framing
- Handling abrasive or sharp-edged building materials
- Handling of fabricated building materials such as concrete block, brick, tile and lumber
- Handling and assembling HVAC components
- Glass and window installation
- Stone and tile installation
- Outdoor construction work

HyFlex® 11-500

Performance and safety combined

DESCRIPTION
Ergonomically designed DuPont™ Kevlar® stretch liner with spandex
- Provides “second skin” closeness, reducing risk of snags and cuts*
- Ability to handle sharp parts with confidence, increasing productivity and safety*

Black foam nitrile coated palm
- Enhances grip in light oil conditions with good abrasion resistance*
- Silicone-free and natural rubber latex-free for worker and product protection

FEATURED TECHNOLOGY
- ZONAL PLAITING

INDUSTRIES
- Aerospace
- Automotive
- General Industry
- Metal Fabrication
- Appliance Manufacturing
- Glass
- Metalworking

IDEAL APPLICATIONS
- General maintenance
- Forming, machining and bending of small sharp parts
- General material handling
- Small scale metal stamping and assembly
- Electrical wiring in residential and commercial structures
- Carpentry, drywall, roofing
- Glass installation

Comfort and Durability

DESCRIPTION
DuPont™ Kevlar® stretch liner with spandex
- Patented Nylon and Kevlar® zonal plaiting on palm and back of hand provide reinforced abrasion resistance
- Incorporates ComfortFlex cuff, giving the wearer a soft feel and provides sweat absorption

Black foam nitrile coated palm
- Provides enhanced grip in light oil conditions with good abrasion resistance
- Silicone-free and latex-free for worker and product protection

FEATURED TECHNOLOGY
- ZONAL PLAITING

INDUSTRIES
- Aerospace
- Automotive
- General Industry
- Metal Fabrication
- Appliance Manufacturing
- Glass
- Metalworking
- Paper

IDEAL APPLICATIONS
- General maintenance
- Forming, machining and bending of small sharp parts
- General material handling
- Small scale metal stamping and assembly
- Electrical wiring in residential and commercial structures
- Carpentry, drywall, roofing
- Glass installation

*Performance data varies by application.
### HyFlex® 11-627

**CUT-PROTECTION | LIGHT**

#### Description
- Dyneema® and Lycra® liner
- Cool and comfortable feeling
- Relaxed, natural fit liner helps reduce hand fatigue
- Polyurethane coating and liner combination
- Improves tactile sensitivity
- Excellent grip in dry environments
- Effective control in minimally oily environments
- Launderable, durable materials

#### Featured Technology

#### Industries
- Aerospace
- Automotive
- Metal Fabrication
- Lumber/Wood/Paper
- Appliance Manufacturing
- Glass
- Metalworking
- Plastics
- General Carpentry
- HVAC/Sheet Metal Users/Window Glazers
- Plumbers

#### Ideal Applications
- Assembly application when handling small to medium abrasive parts
- Small scale metal stamping and assembly
- Handling abrasive or sharp-edged building materials
- Handling and assembling HVAC components
- Stone and tile installation
- Electrical component assembly and installation
GoldKnit® Lightweight 70-200

**Lightweight cut protection for light-duty applications**

**DESCRIPTION**
- 100% DuPont™ Kevlar® glove provides light-duty cut protection
- Protection from sharp edges of metals, ceramics, glass and other materials
- Reversible design allows glove to be worn on either hand, reducing replacement costs
- Launderable

**FEATURED TECHNOLOGY**

DuPont™ Kevlar.

**CAUTION:** The elastic band on this product may contain natural rubber latex which may cause allergic reactions in some individuals.

**INdUSTRIES**
- Automotive
- General Industry
- Warehousing
- General Carpentry

**IDEAL APPLICATIONS**
- Final assembly areas
- General material handling
- As a liner under work gloves in industrial applications where extra protection is required
- Shipping and receiving - handling cartons and packaging
- Carpentry, drywall, roofing
Get optimal control in slippery situations with our Ansell Grip Technology. The unique coating wicks oil away from the glove surface and prevents oil penetration. That means workers can handle small or sharp objects in oily, slippery environments with confidence. The HyFlex® 11-920 glove is specially engineered to increase safety, performance and productivity in these conditions.

**DESCRIPTION**

Ansell patent pending Grip Technology coating
- Nitrile layer with microscopic channels actively transfers oils and other lubricants away from the gripping surface*
- Increases surface contact for enhanced grip and control
- Prevents oil penetration and reduces the risk of dermatitis and liquid exposure*
- Multi-layer dipping process provides high abrasion resistance and increases wear life*

Special nylon fine-gauge liner
- Provides softness, comfort and breathability

**FEATURED TECHNOLOGY**

- Oil Refining
- Automotive
- Machining
- Metal Fabrication

**IDEAL APPLICATIONS**

- Engine and transmission assembly
- Final assembly areas
- General material handling
- Refuse collection
- Janitorial and general plant maintenance work
- Handling glass or slippery plastics
- Machine shops

**INDUSTRIES**

- Oil
- Automotive
- Machining
- Metal Fabrication

**Superior heat resistance with complete protection for hand and wrist**

**DESCRIPTION**
- Non-woven felt insulation and a full-length heat barrier designed for intermittent handling of objects up to 400°F
- Two-piece construction eliminates outseams for better finger comfort, dexterity and flexibility
- Bonded nitrile coating protects against snags, punctures, abrasions and cuts
- Provides excellent grip when handling dry or oily surfaces
- Contains no asbestos
- Back of hand heat insulation (42-445 & 42-474)

**INDUSTRIES**
- Food Service
- Metal Fabrication
- Glass

**IDEAL APPLICATIONS**
- Bottling and glass handling
- Handling large panes of hot glass
- Intermittent handling of hot cores, castings, fabricated metals and controls up to 400°F

Winter Monkey Grip®

When the going gets cold, stay warm and dry

**DESCRIPTION**
- Tough PVC vinyl coating protects hands from abrasion and stays soft even when cold*
- Foam insulation keeps hands warm and dry
- Curved fingers, wing thumb and soft jersey lining offer superior comfort

**INDUSTRIES**
- Natural Gas
- Janitorial/Sanitation
- General Carpentry

**IDEAL APPLICATIONS**
- Any winter application where a high visibility glove is required (23-491)
- Refuse collection
- Cold storage and unheated warehouses
- Handling chilled or refrigerated products
- Outdoor construction work

**DESCRIPTION**
- Premium protection at high frequencies combined with protection across a broad spectrum of frequencies
- A cost-effective means of minimizing Hand-Arm Vibration Syndrome (HAVS)
- Gelfom padding reduces vibration while nitrile coating provides snag, puncture and abrasion resistance
- Matches the contours of the hand, enhancing flexibility and reducing hand fatigue
- Silicone-free and launderable

**INDUSTRIES/APPLICATIONS**
- **Energy**
- **Public Utilities:**
  - Cable installation, maintenance and splicing

**DESCRIPTION**
- Glove materials are inherently flame resistant, providing protection even after multiple launderings
- Meets FR Testing CGSB 155.20-2000
- Provides Hazard/Risk Category (HRC) Level 1 Arc Flash protection (ATPV) 5.7 cal/cm². Based on the analysis method of ASTM F1959-05.
- ANSI Level 4 cut protection provides the worker the ability to handle sharp parts and materials with confidence
- Offers an ergonomic design, superior comfort, dexterity and flexibility based on patented technology
- Thin 13g knitted liner with DuPont™ Kevlar® increases productivity and compliance
- Proprietary soft foam coating ensures a secure grip in wet, oily and dry environments to reduce slippage and tension in the hands

**INDUSTRIES /APPLICATIONS**
- **Energy**
- **Public Utilities:**
  - Cable installation, maintenance and splicing
  - Electric and gas line installation and maintenance
  - Transformer installation, maintenance and repair
  - Handling wire mesh and rebar

ThermaKnit™ Insulator®

**DESCRIPTION**
Thermolite® fabric delivers warmth against cold or damp conditions, even when wet
- Lightweight fabric provides heavy duty performance
- Thermolite® fast-wicking fibers act as hand warmers
- Machine washable
- Offers usability as a liner under gloves

**FEATURED TECHNOLOGY**

**INDUSTRIES**
- Food Processing
- Fishing
- Warehousing
- General Carpentry
- Public Utilities

**IDEAL APPLICATIONS**
- Outdoor utility work
- General maintenance
- As a liner under work gloves in industrial applications where extra warmth is required
- Handling chilled or refrigerated products
- Outdoor construction work (as a liner)

**SPECIAL-PURPOSE**

 Participation Type: L - Light

CAUTION: The elastic band on this product contains natural-rubber latex which may cause allergic reactions in some individuals.
When the job calls for chemical protection, Ansell has the right glove for your application. Our broad range of gloves includes products that offer splash protection for minimal chemical exposure and products that provide protection for applications involving full chemical immersion. By utilizing numerous polymer types, our gloves protect against a wide variety of chemicals and liquids along with offering varying levels of cut, tear, abrasion, puncture and thermal resistance.*

Choose from nitrile, polyvinyl chloride (PVC), neoprene, polyvinyl alcohol (PVA), natural rubber latex, laminated film, butyl or viton/butyl gloves that meet your chemical protection needs. Each one is designed using the latest technology with comfort and dexterity in mind. A wide variety of single use and reusable options are available, making it easy to find gloves that offer protection and affordability.

**PRIMARY INDUSTRIES:**

- Construction
- Critical Environment
- Energy
- First Responder/Defense
- Food
- Manufacturing
- Other Occupations

**Performance Series:** Using the latest technology, these performance gloves are designed for today's toughest and most demanding applications. These innovative gloves blend the highest levels of worker safety and comfort to provide the most versatile solutions.

- **Sol-Vex® Gloves**
  With a versatile, high performance polymer, Sol-Vex® provides the ideal balance of mechanical and chemical protection and performance for use in wet or dry environments. Sol-Vex® remains an industry benchmark in chemical resistant gloves.

- **AlphaTec® Gloves**
  Experience improved dexterity and comfort for applications that require chemical protection and certain levels of mechanical performance. AlphaTec® gloves integrate advanced Ansell technologies for applications that demand greater performance.

- **Touch N Tuff® Gloves**
  Thin enough to allow superior dexterity and maximum flexibility, yet tough enough to resist punctures and tears. Touch N Tuff® single-use polymer gloves protect workers and products in wet and dry environments.

**Classic Products:** Time tested and proven across a wide range of industries and applications, these are the gloves that are trusted worldwide. For performance and reliability, look no further than these classics from Ansell.

*For additional details, please see page 127.*
ASSESSMENT PROCESS

1 EXPOSURE TYPE

Confirm the degree of exposure the glove must resist.

**Immersion**
Glove provides protection against full chemical immersion.

**Splash**
Glove provides protection to minor chemical exposure, but is not suitable for full immersion.

2 DECISION SUPPORT TOOLS

Ansell leads the industry in consolidating chemical risk analyses and polymer performance information concerning hand protection. Utilize the Ansell SpecWare® Chemical Resistance Diagnostics System decision support tools to determine the specific chemical risk in your work environment.

**SpecWare® Quick Reference**
Consult the Chemical Permeation and Degradation Resistance Guide on pages 122–125 of this catalog.

- Comprehensive, global diagnostic tool
- Regularly updated product/rating information
- Detailed global standards cross-reference
- Consultative resource for determining chemical and liquid protection needs
- Expert global risks and standards specialists
- Deep industry exposure and risk knowledge

3 IDEAL POLYMER

Identify the ideal polymer for resisting that chemical type and select the hand protection that fits your needs.
## POLYMER OVERVIEW

<table>
<thead>
<tr>
<th>Polymer</th>
<th>NBR</th>
<th>PVC</th>
<th>Neoprene</th>
<th>PVA</th>
</tr>
</thead>
</table>
| **Nitrile** | • Excellent puncture, abrasion and snag resistance for a thin polymer glove  
• Protects from bases, oils, many solvents and esters, greases and animal fats  
• Excellent wet and dry grip  
• Not recommended for ketones or heavy organic solvents | • Provides good resistance against many acids, caustics, bases and alcohols  
• Excellent abrasion resistance  
• Not recommended for ketones and many solvents  
• Punctures and tears more easily than equivalent nitrile or neoprene styles | • Resists a broad range of oils, acids, caustics and solvents  
• Excellent mobility and flexibility even at low temperatures  
• Less resistant to snags, punctures, abrasions and cuts than nitrile | • High resistance to aliphatics, aromatics, chlorinated solvents, esters and most ketones  
• Resists snags, punctures, abrasions and cuts  
• Water soluble: will degrade if exposed to water-based solutions |

| **Natural Rubber Latex** | • Provides resistance to many acids and alcohols  
• Highly flexible material  
• Good cut protection  
• May cause allergic reactions  
• Should not be used with lubricants and/or oils | • Broader spectrum of chemical resistance in Ansell glove range (250 chemicals)  
• Lightweight and flexible  
• Often used in spill and response kits  
• Limited protection against mechanical hazards | • Provides resistance against aldehydes, ketones, esters and concentrated mineral acids  
• Excellent dexterity and flexibility | • Provides resistance against aliphatics, halogenated and aromatic hydrocarbons, and concentrated mineral acids |

### CHEMICAL & LIQUID PROTECTION

# PRODUCT COMPARISON & SELECTION

## NBR Nitrile

Along with good protection against bases, oils, many solvents, greases and animal fats, our nitrile gloves also offer excellent resistance to snags and punctures, abrasions and cuts for a thin polymer glove.* Use this chart to compare properties of our Performance Series and Classic Series gloves.

*Nitrile gloves are not recommended for use with ketones and some organic solvents.

*Industry Standard

---

**Versatile chemical protection that performs across a diverse range of applications**

**DESCRIPTION**

- High performance nitrile compound provides an outstanding combination of chemical resistance and strength*
- Offers superior snag, puncture and abrasion protection over rubber or neoprene gloves*
- Suitable for heavy-duty cleaning applications
- High levels of flexibility, comfort and dexterity
- Won’t swell, weaken or degrade, and does not promote contact dermatitis
- All Sol-Vex® gloves comply with FDA food handling requirements (21 CFR 177.2600)

**INDUSTRIES**

- Aerospace
- Automotive
- General Industry
- Janitorial/Sanitation

**IDEAL APPLICATIONS**

- Exposure to chemicals, solvents, hazardous liquids, PVC cements or standing water
- Chemical processing, oil refining and petrochemicals
- Chemical plants and transportation
- Cleaning and de-greasing
- Janitorial and maintenance work

---

**DESCRIPTION**

- Excellent chemical protection with a new level of grip, fit and comfort*
- Raised-diamond pattern for superior grip on wet or slippery materials
- Form-fitting fingers and a tapered wrist for a more comfortable, ergonomic fit
- High performance nitrile compound provides an outstanding combination of chemical resistance and strength*
- Offers superior snag, puncture, abrasion and cut protection over rubber or neoprene gloves*
- All Sol-Vex® II gloves comply with FDA food handling requirements (21 CFR 177.2600)

**INDUSTRIES**

- Aerospace
- Oil Refining
- Petrochemical
- Military
- Food Processing

**IDEAL APPLICATIONS**

- Exposure to chemicals, solvents, hazardous liquids, PVC cements or standing water
- Chemical processing, oil refining and petrochemicals
- Chemical plants and transportation
- Cleaning and de-greasing
- Janitorial and maintenance work

**DESCRIPTION**

- A new generation of chemical protection for improved safety and productivity
- Revolutionary Ansell Grip Technology – a nitrile layer filled with microscopic channels that actively transfer oils and other lubricants away from the gripping surface
- Consistent polymer coating significantly reduces the likelihood of chemical leakage*
- Unique combination of grip, chemical resistance and superior comfort*
- Superior tactility and dexterity for greater control, significantly reducing fatigue and Carpel Tunnel Syndrome-related injuries

**FEATURED TECHNOLOGY**

**IDEAL APPLICATIONS**

- Masonry/Tile
- Chemical Processing
- Mining
- Oil Refining
- Petrochemical
- Public Utilities
- Aircraft
- Automotive
- General Industry
- Machining
- Metal Fabrication

- Handling fillers, solvents, dye agents, cleaning solvents, cement and mortar mixing
- Chemical processing, oil refining and petrochemicals
- Chemical plants and transportation
- Handling equipment and abrasive materials coated with oil, grease, acids and solvents
- Cleaning and de-greasing

#### CHEMICAL & LIQUID PROTECTION

**DESCRIPTION**
- Reinforced nitrile glove with an interlock knit cotton liner resists a wide range of chemical hazards
- Protects against sharp edges and abrasive surfaces better than lightweight neoprene or PVC
- Liner eliminates seams that cause hand irritation and premature wear-through
- Curved, pre- flexed fingers and wing thumb reduce hand fatigue for extra worker comfort
- Sol-Knit® gloves comply with FDA food handling requirements (21 CFR 177.2600)

#### IDEAL APPLICATIONS

#### SPLASH

**DESCRIPTION**
- Made of 100% nitrile
- Offers three times the puncture resistance of standard latex or vinyl gloves*
- Combines excellent fingertip sensitivity with exceptional durability
- Gives a high level of protection against grease and oil*
- Lightweight and comfortable to wear
- Silicone-free (92-500 & 92-600)
- Touch N Tuff® gloves comply with FDA food handling requirements (21 CFR 177.2600)

#### IDEAL APPLICATIONS
- Pharmaceutical
- Research Laboratories
- Chemical Processing
- Petrochemical
- EMS
- Police and Fire
- General Industry
- Janitorial/Sanitation

**DESCRIPTION**
- Nitrile rubber disposable gloves
- Product elasticity enables the glove to mold to the wearer’s hand for a snug, comfortable fit
- Textured fingertips for better grip in wet and dry situations
- Ambidextrous gloves
- Exam grade
- Micro-Touch® EP® gloves comply with FDA food handling requirements (21 CFR 177.2600)

**INDUSTRIES**
- Medical Laboratories
- Pharmaceutical
- Research Laboratories
- Chemical Processing
- Petrochemical
- EMS
- Police and Fire
- Food Processing
- Food Service
- General Industry

**IDEAL APPLICATIONS**
- Handling specialty chemicals
- Handling oils, acids, caustics and alcohols
- Emergency response (EMS and EMT)
- Protection from blood and other bodily fluids
- Janitorial and maintenance work
- Detergents and cleaning liquids
- Small parts assembly
CHEMICAL & LIQUID PROTECTION
PRODUCT COMPARISON & SELECTION

**PVC**

PVC provides good resistance against many acids, caustics, bases and alcohols, and also offers good abrasion resistance.* Consult this chart to compare characteristics of Ansell PVC gloves. With these gloves, workers with latex allergies can experience the comfort of natural rubber latex without worrying about having an allergic reaction. These gloves are not recommended for ketones and many other types of solvents.

**Economical and safe, providing resistance against a wide range of chemicals**

**DESCRIPTION**
- Long wearing, durable vinyl coating
- Great for handling oils, acids, caustics and alcohols
- Excellent abrasion resistance*
- Two-piece lining eliminates irritating seams

**INDUSTRIES**
- Chemical Processing
- Oil Refining

**IDEAL APPLICATIONS**
- Handling equipment and abrasive materials coated with oils, grease and acids
- Handling oils, acids, caustics and alcohols
- Plant maintenance
- Cleaning and de-greasing with soaps and detergent formulations

**For soft, flexible and comfortable safety in warm or cold environments**

**DESCRIPTION**
- Unique vinyl coating stays soft and flexible even when cold
- Very lightweight and comfortable to wear
- Two-piece lining eliminates irritating seams
- Curved, preflexed fingers and wing thumb give extra dexterity and comfort

**INDUSTRIES**
- Oil Refining
- Petrochemical
- General Industry

**IDEAL APPLICATIONS**
- Handling equipment and abrasive materials coated with oils, greases and acids
- Janitorial and maintenance work
- Handling oils, acids, caustics and alcohols
Designed to perform in jobs where excessive contamination is the norm

**DESCRIPTION**
- Excellent choice for applications where gloves become excessively contaminated or where glove controls are difficult to administer
- PVC coating provides good resistance to many chemicals
- Rough finish optimizes cut/abrasion protection and provides excellent wet grip*
- Comfortable lining provides flexibility and launderability

Glove Sizing Chart Pg. 5 | Detailed ANSI/EN Standards Pg. 129 | *For additional details, please see page 127.*
Neoprene

Neoprene resists a broad range of oils, acids, caustics and solvents, but is less resistant to snags, punctures, abrasions and cuts than nitrile or natural rubber. This chart shows the characteristics of our neoprene gloves, making it easy to find the right choice for your application.

**DESCRIPTION**
- Specially designed neoprene construction
- Knit lined for comfort and easy donning and doffing
- Textured finish provides excellent grip on wet and slippery materials with great flexibility
- Snug fit with high degree of fingertip sensitivity
- Interlock knit cotton two-piece lining eliminates seams that can cause hand irritation and premature wear-through

**INDUSTRIES**
- Pharmaceutical
- Chemical Processing
- Oil Refining
- Petrochemical
- Aerospace
- Automotive
- General Industry
- Lumber/Wood/Paper
- Plastics

**IDEAL APPLICATIONS**
- Handling specialty chemicals
- Handling oils, acids, caustics and alcohols
- Bulk chemical handling and transport
- Handling alkalies and salts
- Cleaning and de-greasing

**DESCRIPTION**
- Excellent broad-spectrum chemical resistance
- Cotton lining enhances puncture and snag resistance
- Curved fingers and a wing thumb provide a natural fit and greater comfort
- Suitable for intermittent handling of warm liquids
- Two-piece lining eliminates irritating seams

**INDUSTRIES**
- Chemical Processing
- Oil Refining
- Petrochemical
- Military
- Police and Fire
- Aerospace
- Automotive
- General Industry
- Metal Fabrication
- Metalworking

**IDEAL APPLICATIONS**
- Chemical processing, oil refining and petrochemicals

**Description**

- Top-quality neoprene coating protects against a wide range of chemicals*
- Protects hands against intermittent contact with hot surfaces up to 400°F and offers lightweight cut resistance*
- Removable liner and integrated hanging loop allow gloves to be stored and dried quickly
- Passes ASTM F903 for penetration by liquid
- Thermaprene gloves comply with FDA food handling requirements (21 CFR 177.2600)

**Industries**

- Chemical Processing
- Oil Refining
- Petrochemical
- Food Processing
- Food Service
- General Industry
- Janitorial/Sanitation

**Ideal Applications**

- Chemical processing, oil refining and petrochemicals
- Chemical plants and transportation
- Handling specialty chemicals
- Handling oils, acids, caustics and alcohols
- Bulk chemical handling and transport
- Pesticide manufacturing
- Handling equipment and abrasive materials coated with oils, greases, acids and solvents
- Cleaning and de-greasing
- Janitorial and maintenance work
- Detergents and cleaning liquids

**NeoTouch® creates a new category in disposable gloves for its comfort, durability and chemical resistance**

**DESCRIPTION**
- The first neoprene single-use gloves for industrial usage
- An alternative to natural rubber latex that protects against Type I allergies
- Excellent resistance to acids, bases and alcohols
- Exclusive formulation provides superior comfort
- Exam grade
- Food grade - complies with FDA food handling requirements (21 CFR 177.2600)

**INDUSTRIES**
- Aerospace
- Automotive
- General Industry
- Plastics

**IDEAL APPLICATIONS**
- Chemical plants and transportation
- Handling oils, acids, caustics and alcohols
- Emergency response (EMS and EMT)
- Lab analysis and technical work
CHEMICAL & LIQUID PROTECTION

PRODUCT DETAILS

Polyvinyl Alcohol

The Ansell PVA glove delivers very high resistance to aliphatics, aromatics, chlorinated solvents, esters and most ketones. It is also resistant to snags, punctures, abrasions and cuts, making it an ideal choice in rugged work environments.* Because they are water soluble, these gloves are not suitable for environments where they may be exposed to water or light alcohols.

Specially designed to provide protection against dangerous organic solvents

**DESCRIPTION**
- Nearly inert to strong solvents, including aromatics, aliphatics, and chlorinated solvents – which quickly deteriorate natural rubber, neoprene and PVC gloves
- Cotton interlock liner adds strength to the glove and improves comfort levels
- Lasts 10-15 times longer than any other coated glove when handling many solvents
- Offers good resistance to snags, punctures, abrasions and cuts*

**INDUSTRIES**
- Electronics Manufacturing
- Chemical Processing
- Military
- Police and Fire
- Aerospace
- General Industry
- Plastics
- Textiles

**IDEAL APPLICATIONS**
- Handling specialty chemicals
- Handling strong organic solvents
- HazMat work
- Working with epoxies and pre-impregnated composite fibers
- Handling ketones

*Because they are water soluble, these gloves are not suitable for environments where they may be exposed to water or light alcohols.
### Natural Rubber Latex

With great flexibility and good resistance to many acids and alcohols, Ansell’s natural rubber latex gloves make a comfortable choice for chemical and liquid protection. Compare gloves using this chart to determine which rubber latex glove works best for you.

**Products containing natural rubber latex may cause allergic reactions and, in addition, should not be used when lubricants and/or oils are present.**

Get a greater level of chemical and abrasion resistance*

**DESCRIPTION**
- Case hardened to provide greater chemical and abrasion resistance than standard natural rubber gloves*
- Recessed diamond finish gives a good wet grip
- Generously proportioned wrist provides easy donning and doffing
- Soft cotton flock lining absorbs perspiration and feels good on the hand
- Complies with FDA food handling requirements (21 CFR 177.2600)

CAUTION: This product contains natural rubber latex which may cause allergic reactions in some individuals.

A flexible and durable glove that’s useful for a wide range of jobs

**DESCRIPTION**
- Fully coated natural rubber latex glove offers great flexibility and durability
- Soft-knit cotton liner helps keep hands and fingers comfortable in hot or cold environments*
- Excellent grip for wet applications
- Excellent dexterity
- Stays flexible in cold temperatures (down to as low as -25°F, depending on contact time and conditions)*
- Hy-Care® gloves comply with FDA food handling requirements (21 CFR 177.2600)

CAUTION: This product contains natural rubber latex which may cause allergic reactions in some individuals.

The perfect combination of strength and sensitivity

**DESCRIPTION**
- Natural latex provides a high degree of tensile strength
- Cotton flock lining helps maintain excellent sensitivity
- Provides snag, puncture, abrasion and cut resistance
- Fishscale pattern provides grip on wet or dry objects
- 87-155 complies with FDA food handling requirements (21 CFR 177.2600)

CAUTION: This product contains natural rubber latex which may cause allergic reactions in some individuals.

Heavy-duty protection for the toughest applications

**DESCRIPTION**
- 29 mil palm is 50% thicker than most standard flock-lined gloves
- Increased tensile strength and puncture/cut protection against chemical and physical hazards
- 100% cotton flock lining increases user comfort
- Recessed diamond design provides grip on wet or dry objects

CAUTION: This product contains natural rubber latex which may cause allergic reactions in some individuals.

### Extra protection and durability for more demanding applications

**DESCRIPTION**
- Unique dipping process combines neoprene over natural rubber latex for increased protection against a wide range of chemicals
- 27 mils thick for extra ruggedness, durability and protection against physical hazards
- Diamond pattern provides added grip on wet or dry surfaces
- Cotton flock lining absorbs perspiration and increases worker comfort

**INDUSTRIES**
- Chemical Processing
- Aerospace

**IDEAL APPLICATIONS**
- Chemical processing
- Chemical plants and transportation
- Handling specialty chemicals
- Pesticide manufacturing
- Handling acids, alkalis, salts and ketones
- Cleaning and de-greasing with soap and detergent formulations
- Wiping down parts and machinery

### All-around protection from a glove that feels great

**DESCRIPTION**
- Unique 20 mil neoprene and natural rubber latex blend
- Excellent chemical, snag, puncture and abrasion resistance
- Pebble embossing provides added grip on wet or dry surfaces
- 100% cotton flock lining offers increased comfort
- Omni® gloves comply with FDA food handling requirements (21 CFR 177.2600)

**INDUSTRIES**
- Chemical Processing
- Petrochemical
- Food Processing

**IDEAL APPLICATIONS**
- Chemical processing
- Handling specialty chemicals
- Handling acids, alkalis, salts, ketones and alcohols
- Canning and food processing

CAUTION: This product contains natural rubber latex which may cause allergic reactions in some individuals.
Technicians 88-390

An ideal glove for safety and dexterity in the food processing industry

**DESCRIPTION**
- Excellent dexterity, tensile strength and elasticity
- 13 mil blend of neoprene and natural rubber latex delivers optimal durability and chemical resistance
- Pebble embossed design increases grip on wet or dry surfaces
- Dexterity and sensitivity combined with moderate chemical protection
- Technicians comply with FDA food handling requirements (21 CFR 177.2600)

**INDUSTRIES**
- Pharmaceutical
- Research Laboratories
- Chemical Processing
- Petrochemical
- Food Processing
- Aerospace
- Automotive
- General Industry

**IDEAL APPLICATIONS**
- Handling acids, alkalies, salts, ketones and alcohols
- Canning and food processing
- Janitorial and maintenance work
- Detergents and cleaning liquids

CAUTION: This product contains natural rubber latex which may cause allergic reactions in some individuals.

Canners and Handlers 88-343

An ideal glove for safety and dexterity in the food processing industry

**DESCRIPTION**
- Excellent dexterity, tensile strength and elasticity
- 20 mil thickness provides good chemical, snag, puncture, abrasion and cut resistance
- Diamond embossed for excellent grip on wet or dry surfaces
- All Canners and Handlers comply with FDA food handling requirements (21 CFR 177.2600)

**INDUSTRIES**
- Agriculture
- Food Processing
- General Industry

**IDEAL APPLICATIONS**
- Fruit and vegetable processing
- Canning and food processing
- Food packing and handling
- Light duty maintenance and clean up

CAUTION: This product contains natural rubber latex which may cause allergic reactions in some individuals.

Glove Sizing Chart Pg. 5 | Detailed ANSI/EN Standards Pg. 129 | *For additional details, please see page 127.*
Laminated Film

Trust the Barrier® glove for the broadest spectrum of chemical resistance in the Ansell glove range, inert to 250 chemicals.* This versatile glove is often used in various spill and response kits, allowing workers to perform their job with confidence, knowing that the glove is providing the required safety.

These gloves provide limited protection against mechanical hazards. They are lightweight and flexible, and can also be used as an underglove.

State-of-the-art, five layer laminated film glove for the broadest range of chemical protection – the best option for when the chemical hazard is not clearly identified*

**DESCRIPTION**
- Proprietary seam-fusion technology provides a secure seal against chemicals*
- Wing-thumb, hand-specific design provides greater dexterity and reduced hand fatigue
- Comfortable to wear, even for extended periods
- Can be worn as a liner under heavier gloves

**INDUSTRIES**
- Chemical Processing
- Petrochemical
- Military
- Police and Fire
- Aerospace

PRODUCT DETAILS

BU Butyl

The ChemTek™ Butyl glove delivers superior resistance against aldehydes, ketones, esters and concentrated mineral acids.* It has the added benefit of excellent dexterity and flexibility, making it easier to grasp and manipulate small parts. For an extra measure of security, each pair is packed with an individual insert so critical information is always at your fingertips.

Designed to perform under the toughest conditions

**DESCRIPTION**
- The broadest line of highly resistant chemical protective gloves in the industry*
- Delivers the ketone resistance of natural rubber plus better hydrocarbon resistance*
- Provides the ester resistance of nitrile with improved aldehyde resistance
- Each pair is packed with an individual insert so critical information is always at your fingertips

**INDUSTRIES**
- Medical Laboratories
- Pharmaceutical
- Research Laboratories
- Chemical Processing
- Aerospace
- Automotive
- General Industry

**IDEAL APPLICATIONS**
- Chemical processing
- Chemical plants and transportation
- Handling specialty chemicals
- HazMat work
- Handling acids, alkalies, salts and ketones

*Butyl is designed to perform under the toughest conditions.
The ChemTek™ Viton/Butyl glove offers an extra level of protection. The Viton layer over the butyl means a lower cost glove for aggressive chemical exposure to aliphatic, halogenated and aromatic hydrocarbons as well as concentrated mineral acids.* For an extra measure of security, each pair is packed with an individual insert so critical information is always at your fingertips.

### ChemTek™ Viton/Butyl

**DESCRIPTION**
- Delivers a unique balance of ergonomic design and tactile sensitivity with optimum chemical splash protection*
- Viton® gloves provide an extra level of protection in applications involving aromatic chemicals and chlorinated solvents*
- The Viton® layer over the butyl means a lower cost glove for aggressive chemical exposure*
- Each pair is packed with an individual insert so critical information is always at your fingertips

*For additional details, please see page 127.
For applications that demand product and worker protection, Ansell delivers gloves that meet the specific regulatory requirements for a variety of environments. Whether you’re in a pharmaceutical lab, an electronics cleanroom or the food processing industry, there’s a product protection glove designed to enhance safety, reduce the risk of product contamination* and improve performance.

**Critical Environment**

In critical environments, including pharmaceutical and electronics labs and cleanrooms, gloves need to offer protection and also offer low levels of extractables and particles. That’s why Ansell offers gloves that protect against chemical splashes in the manufacturing, extraction, processing, purification and packaging of chemical materials. You can also choose gloves with optimal electrostatic discharge (ESD) properties or select a glove suitable for environments that restrict the presence of organisms that might cause disease or infection.

**Food Processing and Service**

When working with food, gloves must comply with national standards for food contact and food hygiene. That’s why Ansell offers gloves that deliver protection from contamination, safeguard from hot and cold thermal hazards, provide barrier protection between worker and product, provide liquid protection, and protect workers from potential cut injuries.*

**PRIMARY INDUSTRIES:**
- Critical Environment
- Energy
- First Responder/Defense
- Food
- Other Occupations

**Performance Series:** Designed to perform in the toughest environments, these gloves feature innovations that enhance worker and product protection. For solutions that meet the demands of the job while exceeding expectations, trust our Performance Series gloves.

- **Touch N Tuff® Gloves**
  These gloves are thin enough to allow superior dexterity and maximum flexibility, yet tough enough to resist punctures and tears. Touch N Tuff® single-use polymer gloves protect workers and products in wet and dry environments.

- **Sol-Vex® Gloves**
  Made from a versatile, high performance polymer, Sol-Vex® provides the ideal balance of protection and performance for use in wet or dry environments. Sol-Vex® remains an industry benchmark in chemical resistant gloves.

**Classic Products:** These classic, application-specific gloves continue to perform and impress. For proven performance, durability, comfort and protection, choose the gloves that are trusted across a broad range of industries.

*For additional details, please see page 127.
Each pharmaceutical or electronics job application demands unique product protection and glove properties. Use this chart to help determine which glove has the right performance characteristics for your needs.

**PHARMACEUTICAL LABS & CLEANROOMS**

Gloves that protect products from contamination and offer workers protection against chemical splashes. Suitable for the manufacturing, extraction, processing, purification and packaging of chemical materials to be used as medication for humans and animals.*

**Sample Applications:**
- Preparing pharmaceutical products
- Lab analysis and technical work

**Performance Series**
- Touch N Tuff®

**Classic Product**
- Touch N Tuff®

**Electronics Labs & Cleanrooms**

Gloves that are specially designed for the electronics industry. Suitable for environments that require low levels of extractable substances and low levels of particulate, optimal ESD properties and consistency in product features and quality.

**Sample Applications:**
- Assembly and inspection
- Electronics manufacturing

**Classic Product**
- NeoTouch®

---

**Lab/Exam**

Provide protection from chemical splashes, while also protecting products from worker contamination*

**Controlled**

For use in regulated environments where low levels of particles and extractables are present

**Critical**

For use in regulated environments where exceptionally low levels of particles and extractables are present

**Sterile**

Suitable for environments that restrict the presence of organisms that might cause disease or infection*

---

* *
Pharmaceuticals/Electronics

Jobs in highly regulated environments require unique characteristics to stay within specification. Ansell offers a wide range of gloves suitable for various applications within the pharmaceutical and electronics industries. With this chart, you can easily compare properties of our Performance and Classic Series gloves.

**DESCRIPTION**

- Made of 100% nitrile
- Offers three times the puncture resistance of standard latex or vinyl gloves
- Combines excellent fingertip sensitivity with exceptional durability
- Gives a high level of protection against grease and oil
- Lightweight and comfortable to wear
- Silicone-free (92-500 & 92-600)
- Touch N Tuff® gloves comply with FDA food handling requirements (21 CFR 177.2600)

### Dura-Touch®

**Description**
- Durable, 5 mil nitrile gloves
- Soft and comfortable
- Textured fingers for exceptional grip
- Choose powdered or powder-free
- Packaged in a polybag for added cleanliness (92-625)
- TNT® Blue gloves comply with FDA food handling requirements (21 CFR 177.2600)

**Industries**
- Pharmaceutical
- Research Laboratories
- Chemical Processing
- Petrochemical
- EMS
- Pharmaceutical
- Research Laboratories
- Chemical Processing
- Petrochemical
- EMS
- General Industry

**Ideal Applications**
- Assembly and inspection
- Lab analysis and technical work
- Pharmaceutical manufacturing
- Protection from blood and other bodily fluids
- Dairy processing
- Beef/pork/poultry/fish processing

### TNT® Blue

**Description**
- Made from premium quality PVC for extra durability
- Powder-free (34-175, 34-650, 34-725, 34-740)
- Exam grade (34-175)
- Dura-Touch® gloves comply with FDA food handling requirements (21 CFR 177.2600)

**Industries**
- Agriculture
- Food Processing
- Food Service
- Automotive
- General Industry

**Ideal Applications**
- Small parts handling
- Painting
- Laboratory testing
- Lab work and analysis, especially when resistance to acids is required

*Hand Specific

An outstanding combination of cleanliness and safe handling

**DESCRIPTION**

- A low particle glove with a low level of extractables
- 100% natural rubber, free of pigments or fillers
- Ergonomically designed, hand-specific gloves provide exceptional dexterity
- Beaded cuff makes donning easier and stays in position on the arm

**CAUTION:** This product contains natural rubber latex which may cause allergic reactions in some individuals.

Specifically designed for strength and comfort in critical environments

**DESCRIPTION**
- Significantly reduced particulate and extractable levels
- 100% powder-free with no plasticizers, silicone or pigments
- Superior strength of nitrile
- Thinner than comparable vinyl or latex gloves for a lighter, more comfortable glove
- Improved dexterity and tactility

**INDUSTRIES**
- Electronics Manufacturing
- Medical Laboratories
- Pharmaceutical Laboratories

**IDEAL APPLICATIONS**
- Electronics assembly
- Handling sensitive parts and materials
- Product protection in handling
  - cosmetics packaging
  - optical goods
  - microelectronic and micro-mechanic components
- Pharmaceutical manufacturing
- Protection from blood and other bodily fluids
PRODUCTION PROTECTION

FOOD PROCESSING & SERVICE OVERVIEW

Each food processing or service application demands unique product protection and glove properties. Use this chart to help determine which glove has the right performance characteristics for your needs.

FOOD PROCESSING

Gloves that offer protection from contamination, as well as worker protection against puncture, thermal and cut hazards. Meets FDA requirements for food contact. Excellent for processing, packaging, freezing, shipping and receiving, maintenance and sanitation.

SERVICE MARKETS

Gloves that protect your workers, customers, products and business. Meets FDA requirements for food contact along with providing varying degrees of mechanical protection. Excellent for baking, food preparation, dishwashing, food safety and handling hot liquids.
Provide workers protection from liquid and minor mechanical hazards, in addition to product contamination protection.

SAMPLE APPLICATIONS:
- Dairy processing
- Seafood processing
- Fruit and vegetable processing

Sample Applications:
- Beef/pork/poultry/fish processing
- Knifehand applications
- Cleaning and changing stationary slicer blades

CUT-Protection

Protect workers from potential cut-related injuries caused by handling materials and tools with sharp edges while also protecting against product contamination.

SAMPLE APPLICATIONS:
- Handling hot baking trays
- Designed for intermittent handling of objects up to 400°F

*Industry Standard

**VERSATILE CHEMICAL PROTECTION**

**DESCRIPTION**
- High performance nitrile compound provides an outstanding combination of chemical resistance and strength*
- Offers superior snag, puncture and abrasion protection over rubber or neoprene gloves*
- Suitable for heavy-duty cleaning applications
- High levels of flexibility, comfort and dexterity
- Won’t swell, weaken or degrade, and does not promote contact dermatitis
- All Sol-Vex® gloves comply with FDA food handling requirements (21 CFR 177.2600)

**INDUSTRIES**
- Chemical Processing
- Oil Refining
- Petrochemical
- Military
- Food Processing
- Food Service
- Aerospace
- Automotive
- General Industry
- Janitorial/Sanitation

**IDEAL APPLICATIONS**
- Laboratory testing
- Beef/pork/poultry/fish processing
- For use in kill and processing areas
- Fruit and vegetable processing
- Food packing and handling

**DESCRIPTION**

- Top quality neoprene coating protects against a wide range of chemicals*
- Protects hands against intermittent contact with hot surfaces up to 400°F and offers lightweight cut resistance*
- Removable liner and integrated hanging loop allows gloves to be stored and dried quickly
- Passes ASTM F903 - for penetration by liquid
- Thermaprene gloves comply with FDA food handling requirements (21 CFR 177.2600)

**INDUSTRIES**

- Chemical Processing
- Petrochemical
- Food Processing

**IDEAL APPLICATIONS**

- Removing sterilized products from autoclaves
- Bakeries, delicatessens and high volume canteens
- For acidic, aqueous and alcoholic food contact
- Handling chilled or refrigerated products
- Cleaning fryers and grills
- Handling hot rotisserie ovens

Full-coverage chemical protection with the added safety of fire resistance
(Arc Hazard Rating 2)

**DESCRIPTION**

- Features comfortable Gore® Chemical Splash Fabric
- Outstanding chemical splash protection*
- Breathable Gore-Tex fabric keeps workers cool in hot situations and warm in cold situations
- Lightweight, flexible, snag- and tear-resistant, stain-repellent and launderable*
- CPC Nomex provides fire-resistant chemical splash protection*
- Special sizes may be available upon request

**INDUSTRIES**

- Chemical Processing
- Petrochemical
- General Industry

**IDEAL APPLICATIONS**

- Chemical processing, oil refining and petrochemicals
- Chemical plants and transportation
- Handling specialty chemicals
- Bulk chemical handling and transport
- Handling acids, alkalies, salts and ketones

**FLAME RESISTANT**

**Liquid, chemical and fire resistance for the toughest jobs**

**DESCRIPTION**
- Nylon netting is bonded between two heavy-duty layers of PVC
- Material is tough, yet flexible
- Excellent resistance to oil, caustics, alcohols, oxidation and mildew

**INDUSTRIES**
- Chemical Processing
- Natural Gas
- Oil Refining
- General Industry
- Metal Fabrication

**IDEAL APPLICATIONS**
- Handling oils, acids, caustics and alcohols
- Gas and oil drilling
- Steel manufacturing
- Industrial maintenance
- Working outside in wet conditions

Economical protection for light-duty and medium-duty applications

**DESCRIPTION**

- High-quality virgin material combines flexibility and resistance to chemicals, fats and oils*
- Easy to clean and conveniently packaged
- Available in embossed or smooth styles
- Poly barrier gown
- Component materials comply with FDA regulations for food contact

**INDUSTRIES**

- Food Processing
- Food Service
- Janitorial/Sanitation

**IDEAL APPLICATIONS**

- Food handling and catering
- Food preparation, processing and handling
- Food service
- Janitorial and maintenance work

### Premium quality and superior protection for industrial applications

#### DESCRIPTION
- Vinyl thicknesses of 8 and 20 mil combine flexibility and resistance to abrasions and punctures*.
- Excellent resistance to oils, fats and chemicals*.
- PVC grommets are permanently sealed to the aprons for durability.
- Nylon neck and waist ties are extra-long and pre-attached for immediate use.

#### INDUSTRIES
- Chemical Processing
- Food Processing
- Food Service
- Janitorial/Sanitation

#### IDEAL APPLICATIONS
- Beef/pork/poultry/fish processing
- Food preparation, processing and handling
- Food service
- Janitorial and maintenance work

*For additional details, please see page 127.*

### Heavy-duty protection for confidence on the toughest jobs

**Description**
- Highest-quality virgin vinyl in 4, 6, 8, 12 and 18 mil thicknesses
- Superior resistance to chemicals, fats, oils, greases, punctures and abrasions*
- Raw edge and premium sewn edge styles provide flexibility
- Heavy-duty styles available featuring a stomach patch for extended wear

### Industries
- Chemical Processing
- Public Utilities
- Food Processing
- Food Service

### Ideal Applications
- Chemical processing, oil refining and petrochemicals
- Dairy processing
- Beef/pork/poultry/fish processing
- Food preparation, processing and handling
- Food service
- Cleaning and de-greasing
- Janitorial and maintenance work
- Industrial maintenance

### Reinforced neoprene, hycar and urethane for rugged wear

**DESCRIPTION**
- Neoprene styles are resistant to a wide range of chemicals*
- Hycar styles, a tough nitrile blend, are ideal for grease and animal fats
- Ideal for working in cold conditions*
- Urethane styles offer lightweight comfort and long wear
- Available in a variety of weights and colors

*For a detailed consolidation of chemical risk analyses and polymer performance information, please consult the Chemical Permeation and Degradation Resistance Guide on pages 122–125 of this guide.

### INDUSTRIES
- Electronics Manufacturing
- Medical Laboratories
- Pharmaceutical Research Laboratories
- Chemical Processing
- Natural Gas
- Oil Refining
- Food Processing

### IDEAL APPLICATIONS
- Chemical processing, oil refining and petrochemicals
- Food packing and handling
- Meat packaging
- Food processing
- Industrial maintenance

High performance, adaptable protection for a wide variety of jobs

**DESCRIPTION**
- Outperforms traditional materials such as neoprene, nitrile, vinyl and other films
- Lightweight, strong, durable and environmentally friendly
- Exceptionally resistant to abrasions, chemicals, and deterioration from oils and fats
- Softer, easier to clean, more comfortable, and flexible even in cold temperatures
- Component materials comply with FDA regulations for food contact

**INDUSTRIES**
- Medical Laboratories
- Pharmaceutical
- Research Laboratories
- Chemical Processing
- Food Processing
- Janitorial/ Sanitation

**IDEAL APPLICATIONS**
- Chemical processing, oil refining and petrochemicals
- Beef/pork/poultry/fish processing
- Janitorial and maintenance work
- Clean rooms

</tbody>
</table>

**Greater body coverage that's still cool and comfortable to wear**

**DESCRIPTION**
- High-quality virgin vinyl in 6 and 8 mil thicknesses
- Permits cleaning to Class 100 standards
- No exposed elastic or metal parts to create static and corrosion

**INDUSTRIES**
- Medical Laboratories
- Pharmaceutical
- Research Laboratories
- Chemical Processing
- Food Processing
- Janitorial/Sanitation

**IDEAL APPLICATIONS**
- Chemical processing, oil refining and petrochemicals
- Beef/pork/poultry/fish processing
- Janitorial and maintenance work
- Clean rooms

The quality, versatility and comfort of denim

DESCRIPTION
- High quality, heavy-duty, 14-ounce pre-shrunk denim
- All cotton shop aprons feature coolness, comfort and launderability
- A variety of pocket configurations and ties are available

INDUSTRIES
- General Carpentry
- Automotive
- General Industry
- Metal Fabrication
- Warehousing

IDEAL APPLICATIONS
- Maintenance of heavy equipment
- Manufacturing operations
PolarBear® Plus Sleeves

**DESCRIPTION**
- Unique combination of HDPE and other high-strength fibers
- Extremely cut resistant, flexible and comfortable
- An attached adjustable strap is included to hold the sleeve in place
- Can be bleached while laundering

**INDUSTRIES**
- Agriculture
- Food Processing
- Food Service
- Beverage Mfg
- General Industry
- Appliance Manufacturing
- Fishing
- Glass
- Metalworking

**IDEAL APPLICATIONS**
- Food Processing
- Fruit and vegetable processing
- Handling slitter blades and utility knives
- Filleting fish
- Handling large panes of glass

Assembler 100 Sleeve

**DESCRIPTION**
- 100% DuPont™ Kevlar® interlock fabric is lightweight and breathable
- A high level of cut resistance, abrasion resistance and comfort

**INDUSTRIES**
- Aerospace
- Automotive
- General Industry
- Metal Fabrication
- Appliance Manufacturing
- Metalworking

**IDEAL APPLICATIONS**
- Automotive assembly and painting
- Aircraft assembly
- Maintenance of heavy equipment
- Welding

- **DESCRIPTION**
  - Manufactured from a lightweight and breathable FR Kevlar® Blend
  - Excellent protection from the high heat and open flame of welder’s torches*
  - Superior cut resistance over cotton or light denim sleeves*

- **INDUSTRIES**
  - Aerospace
  - Automotive
  - General Industry
  - Metal Fabrication
  - Appliance Manufacturing
  - Metalworking

- **IDEAL APPLICATIONS**
  - Automotive assembly and painting
  - Aircraft assembly
  - Maintenance of heavy equipment

### Economically priced arm protection for practically every application

**DESCRIPTION**
- The industry’s most complete line of protective sleeve materials and styles
- Vinyl, urethane, neoprene, polyethylene, denim and cane mesh options
- Excellent protection against chemicals, snags, punctures and abrasions* 

*CAUTION: The elastic band on this product may contain natural rubber latex which may cause allergic reactions in some individuals.

### INDUSTRIES
- Electronics Manufacturing
- Pharmaceutical
- Chemical Processing
- Natural Gas
- Oil Refining
- Food Processing
- Food Service
- Forestry

### IDEAL APPLICATIONS
- Exposure to chemicals, solvents, hazardous liquids, PVC cements or standing water
- Meat packaging
- Food processing
- Food packing and handling
- General manufacturing
To easily find the glove perfectly suited to your needs, listed on the following pages are the top gloves recommended for your industry. These charts give you a comparison of the gloves so you can see the benefits of each at a glance. Based on a wide variety of performance characteristics that each industry and application may require, the top gloves can come from any of the three protection categories.

If you need further assistance to find the right glove, don’t hesitate to call your local Ansell sales representative or our customer service team. Your representative will be happy to work with you to make sure you get the glove that provides the right levels of protection, comfort and performance.

## DECISION SUPPORT
### PERMEATION/DEGRADATION RESISTANCE GUIDE

The first square in each column for each glove type is color coded to provide an overall rating for both Degradation and Permeation. The letter in each colored square is for Degradation alone.

**GREEN:** The glove is very well suited for application with that chemical.

**YELLOW:** The glove is suitable for that application under careful control of its use.

**RED:** Avoid use of the glove with this chemical.

**SPECIAL NOTE:** The chemicals in this guide highlighted in BLUE are experimental carcinogens, according to the ninth edition of Sax’s Dangerous Properties of Industrial Materials. Chemicals highlighted in GRAY are listed as suspected carcinogens, experimental carcinogens at extremely high dosages, and other materials which pose a lesser risk of cancer.

**CHEMICALS:**

& 1. Acetaldehyde
& 2. Acetic Acid, Glacial, 99.7%
& 3. Acetone
& 4. Acetonitrile
& 5. Acrylic Acid
& 6. Acrylonitrile
& 7. Allyl Alcohol
& 8. Ammonia Gas
& 9. Ammonium Fluoride, 40%
& 10. Ammonium Hydroxide, Conc. (28-30% Ammonia)
& 11. n-Amyl Acetate
& 12. Amyl Alcohol
& 13. Aniline
& 14. Aqua Regia
& 15. Benzaldehyde
& 16. Benzene (Benzol)
& 17. Benzotrifluoride
& 18. Benzotrifluoride
& 19. Bromine Water
& 20. 1-Bromopropane (Propyl Bromide)
& 21. Benzene (Benzol)
& 22. n-Butyl Acetate
& 23. n-Butyl Alcohol
& 24. Butyl Carbitol
& 25. Butyl Cellosolve
& 26. gamma-Butyrolactone
& 27. Carbon Disulfide
& 28. Carbon Tetrachloride
& 29. Cellosolve (Ethyl Glycol Ether, 2-Ethoxyethanol)
& 30. Cellosolve Acetate (2-Ethoxyethyl Acetate, EGEA)
& 31. Chlorine Gas
& 32. Chlorobenzene

A degradation test against this chemical was not run. However, in view of data obtained with similar compounds, the Degradation Rating is expected to be Good to Excellent.

A degradation test against this chemical was not run. However, in view of data obtained with similar compounds, the Degradation Rating is expected to be Fair to Poor.

NOTE:
These recommendations are based on laboratory tests, and reflect the best judgement of Ansell in the light of data available. Because the conditions of ultimate use are beyond our control, and because we cannot run permeation tests in all possible work environments and across all combinations of chemicals and solutions, these recommendations are advisory only. The suitability of a product for a specific application must be determined by testing by the purchaser. The data in this guide is subject to revision as additional knowledge and experience are gained. Test data herein reflect laboratory performance of partial gloves and not necessarily the complete unit. Anyone intending to use these recommendations should first verify that the glove selected is suitable for the intended use and meets all appropriate health standards. These recommendations are not a substitute for personal protective equipment. THIS GUIDE IS NOT A SUBSTITUTE FOR A USER'S OWN JUDGMENT BASED ON HIS OR HER INDIVIDUAL SAFETY REQUIREMENTS.
Laundering gloves, sleeves and aprons makes sense. It extends the service life of your products and your hand protection budget. Many styles can be easily laundered to remove routine dirt and contaminants.

Because our products are manufactured from many different materials, there are a variety of recommended laundering practices. The following guide discusses different cleaning techniques for cleaning dirt and soil encountered in typical industrial work environments.

### Cotton, Polyester, Poly/Cotton, Nylon Knitted Styles

- **HyFlex®:** 11-600, 11-624, 11-627, 11-800, 11-801, 11-830, 11-900, 11-920
- **PowerFlex®:** 80-100

Most Other Ansell Lined Styles:
- **Hycron®, Hylite®, Hynit®, Scorpio®, Sol-Knit®, Neox®, Snorkel®,** etc.

- Use commercial laundry soap or detergent (Do NOT use dry cleaning solutions!)
- Wash in warm to medium hot water, do not exceed 120°F (50°C)
- Wash for 10 minutes
- Rinse in medium hot water, 160°F (70°C)
- Repeat wash & rinse if soiling is especially heavy
- Tumble dry – maximum temperature 140°F (60°C)

### Gloves/Sleeves Containing DuPont™ Kevlar®

- **GoldKnit®** cut-resistant gloves and sleeves
- **Assembler 40** and **Assembler 100** sleeves: Includes 100% DuPont™ Kevlar® and Kevlar®/cotton blends
- **HyFlex®:** 11-500, 11-510, 11-511
- **Metalist®** and **NitraSafe®;** All styles
- **PowerFlex®:** 80-600, 80-813
- **Grab-It®:** All styles

- Use commercial laundry soap or detergent (Do NOT use dry cleaning solutions or bleach!)
- Wash in warm to medium hot water, do not exceed 120°F (50°C)
- Wash for 10 minutes
- Rinse in medium hot water, 160°F (70°C)
- Repeat wash & rinse if soiling is especially heavy
- Rinse in cold water
- Tumble dry – maximum temperature 140°F (60°C)

### Gloves/Sleeves Containing Spectra®

- **SafeKnit®:** All styles of gloves and sleeves
- **PolarBear®, PolarBear® Plus**
- **PawGard®:** Gloves and sleeves

- Use commercial laundry soap or detergent (may be bleached to help restore whiteness)
- Wash for 10 minutes in warm water, do not exceed 120°F (50°C)
- Rinse in cold water
- Use high speed spin extraction for best results
- Tumble dry – do not exceed 160°F (70°C) or dry longer than 10 minutes

### Ansell Aprons

- **Vinyl Aprons** – Machine or hand wash using commercial laundry soap or detergent – do not exceed 110°F. Air or machine dry with no heat.
- **Neoprene** – Hand wash or wipe down with commercial cleaning solution. Line or air dry with no heat.
- **Hycar** – Hand wash or wipe down with commercial cleaning solution. Line or air dry with no heat.
- **PVC** – Machine or hand wash using commercial laundry soap or detergent – do not exceed 110°F. Air or machine dry with no heat.
- **Endurosaf®** - Machine or hand wash using commercial laundry soap or detergent – do not exceed 110°F. Air or machine dry with no heat.
- **Urethane** – Machine or hand wash using commercial laundry soap or detergent – do not exceed 110°F. Air or machine dry with no heat.
- **Denim** – Machine or hand wash using commercial laundry soap or detergent – do not exceed 120°F. Air or machine dry with no heat.

**PLEASE NOTE:**

1. **CAUTION:** Toxic or hazardous contaminants may require special handling or disposal.
2. When laundering gloves that have especially heavy dirt or grease, include several pieces of heavy canvas in the second wash cycle – friction from the canvas against the gloves helps loosen and remove deep dirt.
In the USA:

According to current OSHA regulations, the employer has the final responsibility for selecting gloves and other personal protective equipment. Ansell Guardian™ is another innovative breakthrough that helps your business thrive while meeting productivity, safety and cost reduction requirements. Our experts work closely with you to develop a plan specifically tailored to your processes and objectives that will yield measurable results.

We use multiple measurement tools to identify significant cost reductions in PPE/safety related expenditures, improve processes and implement best practices. With more than a half century of real world, on-site experience, we’ve helped a long list of premier companies reduce costs without sacrificing efficiency or safety — and we can help you achieve up to a 30% cost reduction.

**Seven Key Cost Drivers**

<table>
<thead>
<tr>
<th>Discipline Description</th>
