Step 1

Place assembled cover over your cab end of the truck box.

Step 2

Unfold the cover fully to adjust proper alignment on cab/tail over the bed

Step 3

Carefully refold the cover without shifting its position on the bed.
Step 4

Secure the two clamps on the bulkhead side of the bed, by turning the clap handle clockwise to clamp the metal truck bed wall edge.

(Note: adjust the clamp position by rotating the clamp on the bolt to ensure the clamp is tightly clamped on the edge. Do not secure to only lip of the bedliner or rail cap)

Step 5

Insert Locking pins into these two clamps.

Step 6

With tailgate open and bulkhead clamps secure, completely unfold the cover. Repeat step 4 and 5 on the tailgate clamps.

Installation finish in mins!!
To open the cover

1. Open the tailgate, release the clamps, fold the cover forward

2. Completely fold the cover, secure the folded cover by fastening the straps with buckles.

Attention:

Never drive with cover open or unsecure.
