

4X4 ACCESSORIES

DESCRIPTION:

[Winch Bumper](#)

APPLICATION:

Jeep JK Wrangler

PART NO. :

3950200- Integrit Texture

3950210- Black Satin

AVAILABILITY DATE:

3950200- September

3450240- TBD

PRODUCT SPECIFICATION

DESIGN & DEVELOPMENT:

The JK Wrangler winch bumper is an all-new design for those JK owners who want the protection of a steel bar, a mounting location for driving lights and a winch, but want to retain the visual appeal of the 7-slot grill of the JK.

This hoopless bar includes the integrated winch platform that allows the mounting of most traditional low mount style winches and narrow mount pattern competition type winches. Incorporated recovery points, Hi-Lift lifting points and auxiliary light mounting provisions provide massive amounts of functionality to this bumper outside of the added protection it provides.

For improved corrosion resistance JK Deluxe Combination Bull Bars are now pre-treated with a zinc shield before being coated in one of two different powder coat finishes.

ARB, in partnership with a major global manufacturer of powder coatings, has developed a next generation automotive powder coat for customers who demand uncompromising performance in the harshest off road conditions. Integrit™ textured powder coat is uniquely formulated to replicate the appearance of automotive grade black plastic, on steel or alloy fabricated products. It is designed for maximum aesthetic appeal with an ultra-low sheen, matte finish. Visually, the finish is similar to the OE flares of the JK.

DESIGN & DEVELOPMENT CONTINUE

Integrit™ powder coated surfaces benefit from self-cleaning capabilities, with the formula incorporating a synthetic PTFE wax for resistance against dirt and road grime. The coating is easily cleaned with a mild wash solution. Vehicle color matching is not an option for the textured powder coat finish.

The traditional ARB satin black powder coat finish is available for customers who wish to paint their Deluxe Bull Bar to match or contrast their vehicles color. This will be a limited product offering for customers.

An optional winch cover panel is available if a winch is not to be fitted to the bumper.

PROTECTION & STYLING CHARACTERISTICS:

- Vehicle Specific design to complement the JK Wrangler
- Durable steel construction for maximum protection
- Superbly engineered, airbag compatible mounting system
- Two powder coat options available (Integrit™ and satin)
- New wing brace design allows for a 37-inch tire to be fitted (with suitable suspension lift and rim offset)
- Equally suited to winch and non winch applications
- Will accommodate Warn low mount electric winches up to 10,000lbs including the Warn ZEON
- Twin Hi-Lift jack points in the bar
- Provision to accommodate a range of IPF and ARB Driving lights
- Retains OE Fog lights
- Redesigned tow points allowing for improved approach angle
- Durable urethane buffers
- Zinc primed followed by textured or satin black powder coat finish
- Satin black powder finish is available for color matching to individual vehicles. Color matching is not an option on textured powder coat finish

WINCH BAR OPTIONS - INTEGRIT TEXTURE & SATIN BLACK

Part Number	Description	Powder Coat	Retail Price
3950200	Combination Bar JK Text	Integrit Texture	
3950210	Combination Bar JK Satin	Satin Black	

3550120	Optional Winch Cover Panel JK Text	Integrit Texture	
3550170	Optional Winch Cover Panel JK Satin	Satin Black	

DRIVING LIGHT MOUNTS:

JK Deluxe Bull Bars include laser cut holes in the top of the center pan for fitment of a range of compatible driving lights such as ARB Intensity and IPF 808, 800 and 901 Series Lights.

Note: Pinning holes are provided for ARB Intensity LED Driving lights.

WINCH MODEL FITMENT:

JK Deluxe Bull Bars fit the following winches:

- Warn M8000, XD9000, 9.5XP and 9.5 XDC
- Warn VR8000, VR10000
- Warn ZEON 8, 8-S, 10 and 10-S

Additional Hawse Fairlead Spacer Kit Part No 3500600 is required if winch has synthetic rope.

Please note that this bar is not suitable for Warn Powerplant winch fitment.

WING DESIGN & BRACE:

The wing and wing brace design allows fitment of up to a 37-inch tire with no contact (subject to suitable suspension and rim offset).

FOG LIGHTS:

Retains OE fog lights in a pressed form recess in the wing.

HI-LIFT JACK POINTS:

Designed primarily for Hi-Lift brand jacks, the lifting point is reinforced with 4mm steel plate to prevent distortion or damage. When the jack is inserted into the point, the lip of the jack foot locates past the internal reinforcing plate to prevent slippage.

INTEGRIT™ POWDER COAT:

Manufactured in Australia, this proprietary polymer blend delivers incredible resistance to damage from sources such as road debris, surface abrasion, weathering, acid spotting, and off road usage. For improved corrosion resistance products available with Integrit™ are now pre-treated with a zinc rich powder coat primer before coating. Utilizing ARB's quality controlled pre-treatment process; the textured finish offers class leading protection, providing unparalleled corrosion resistance.

The Integrit™ texture powder coated surfaces benefit from self-cleaning capabilities, with the formula incorporating a synthetic PTFE wax for resistance against dirt and road grime. The coating is easily cleaned with a mild wash solution.
