

SERIAL NUMBER INTERPRETATION

date of an ARB Air Locker can be ascertained from the serial number, as follows:

Serial Number: **05080476**

- The first two numbers refer to the year of manufacture (i.e. 2005).
- The second two numbers refer to the month of manufacture (i.e. August).
- The last four numbers are a sequential series starting at 0001 in each month.

Thus, the example above was the four hundred and seventy sixth Air Locker manufactured in the month of August, 2005.

It is important to provide the serial number along with the part number when ordering spare parts or making warranty claims.

The model number of unpackaged/unidentified Air Lockers can be cross referenced by contacting ARB.
