

BDS SUSPENSION

BDS MISSION

The mission of BDS Suspension, a company dedicated to reliability and customer satisfaction, is to produce high quality products at affordable prices. Our warranty reflects our mission and our confidence in every product we manufacture.

- Founded in 1995
- The only “No Fine Print” Warranty in the industry
- BDS Authorized Distributors can be found across the US and around the globe
- Experienced sales and technical support to help you every step of the way
- “Never Out” philosophy - our goal is to ship every order the same day
- Most “User Friendly” catalog in the industry
- “Self-selling” packaging - retail-friendly packaging that says quality inside!
- Most accurate, complete, and installer friendly instructions shorten installation time

WHY BDS SUSPENSION?

BDS Suspension operates with one guiding premise—to provide true value to the customer by manufacturing the highest quality product at a competitive price, distributed and serviced by the premier jobber/installer expert! What does this mean to you? Simple, we strive to have the best installation instructions, easy to install kits, best performing suspension systems, the best warranty in the business and we're never out of inventory. If you want a lift

kit and it's in this catalog, then it is available. In addition, we have a dedicated staff to assist you with any questions that arise and pride ourselves on excellent customer service. We have built a strong web site to assist with application selection as well as technical information that is available 24 hours a day. We are constantly working on new product, so please check out the web site that is updated immediately when product is available.

BDS SUSPENSION CATALOG

BDS Suspension's Catalog is designed to be the most user friendly catalog in the truck suspension aftermarket. Through research and consultation with the experts—our BDS distributors and dealers—we have created several innovative features designed to assist in the sale of BDS Suspension. These include:

- Kit ID references, kit breakdowns and available accessories are easy to find
- Add-A-Leaf and U-Bolt chart for high demand applications
- Coil Spring, Leaf Spring, and Add-A-Leaf Specifications
- Installation Time Guide provides "real time" estimates on labor hours and tire and wheel size information
- Pricing Code is available for instant price quotes
- Alignment Specifications

DISCLAIMER

BDS Co. reserves the right to update products as necessary without notice, and will not be held responsible for misprints in this catalog or changes/variations made by vehicle manufacturers.

DISTRIBUTION

BDS products are not available through mail order companies. We believe it is in the best interest of the consumer to distribute our product through a network of dedicated, experienced, 4WD enthusiasts.

Our distributors have installed our products, and have the ability to answer questions before and after the purchase. Our mission is customer satisfaction. We believe we can achieve that satisfaction by limiting the distribution of BDS products to expert installers.

SHOP OWNERS

BDS Distributors are carefully selected by BDS Suspension. Our goal is to find honest, experienced, retail/ installers who are 4WD enthusiasts. We look for shops who are committed to the 4WD market with a reputation for good customer service.

HOME OF BDS SUSPENSION

BDS Suspension is the flagship brand of Sport Truck USA Inc operating alongside Zone Offroad Products, JKS Manufacturing, RT Pro UTV and 4x4 Posi-Lok. As a division of FOX Factory, the Sport Truck USA Inc campus operates from 4 locations covering 45 acres in Coldwater, MI with more than 300,000 sq.ft of facilities for sales, marketing, administration, warehousing, manufacturing, engineering, and testing.

BDS Suspension a Division of **FOX**

BDS warrants to the original purchaser of its products that its products shall be free of defects in materials and workmanship for so long as the BDS product is installed on the original purchaser's vehicle. Your exclusive remedy upon BDS' inspection is:

IF IT BREAKS WE WILL GIVE YOU A NEW PART.

SHOCK AND STABILIZER CYLINDER LIMITED LIFETIME WARRANTY:

BDS Suspension Co. warrants to the original retail purchaser that its shock and stabilizer cylinders are free from defects in material and workmanship for so long as they own the vehicle. Excluded from this warranty are the finish of the product and mounting bushings. Defects in material and workmanship do not include such things as dented cylinders or bent rods caused by obvious side impact, rust, worn or deformed bushings. A shock absorber is a wear item and over time will experience diminished damping resistance due to normal component wear. This is not a defect in material or workmanship and is therefore not warrantable. BDS Suspension's obligation under all warranties is limited to the repair or replacement, at BDS's option, of the defective material. Any cost of removal, installation or reinstallation, freight charges, incidental or consequential damages are expressly excluded from these warranties.

WHAT WE DON'T COVER:

Our attorney says we need to tell you, BDS' Limited Warranty doesn't cover damage to your vehicle, non-BDS products or non-BDS components. We don't cover wear and tear items (ex. tires, shocks and stabilizers), components of the vehicle's electronic stability control system, Acts of God, accidents, theft, vandalism or other intentional damage.

Neither BDS or any independent distributor are responsible for any time loss, rental costs, removal or repair costs, or any other incidental, consequential, punitive or other damages you may have or incur in connection with any BDS part purchased. Your exclusive remedy hereunder for covered parts is we will replace the part as described above.

This Limited Warranty gives you specific rights. You may also have other rights that vary from state to state. For example, some states do not allow limitations of how long an implied warranty lasts and/or do not allow the exclusion or limitation of incidental or consequential damages, so the limitations and exclusions herein may not apply to you.

All other warranties are hereby disclaimed, except to the extent prohibited by applicable law, in which case any implied warranty of merchantability, fitness for a particular purpose or other implied warranty are limited to a period of four (4) years from date of original retail purchase.

YOUR WARRANTY IS VALID IF . . .

HIGH CLEARANCE DESIGN

HIGH CLEARANCE CROSSMEMBERS

The main crossmembers in the new high clearance systems have been designed to maximize ground clearance while improving suspension and steering geometry over other systems on the market today. This new method of IFS design has many benefits over more traditional setups:

- Reduced camber change throughout wheel travel
- Entire system designed to put all suspension, steering and driveline angles in-phase, increasing performance and reducing wear on OE components
- Unique high clearance appearance

INDUSTRY LEADING NO TORSION BAR DROP TECHNOLOGY

HIGH CLEARANCE TORSION BAR APPLICATIONS INCLUDE THE BDS NO TORSION BAR DROP SYSTEM, NTBD TECHNOLOGY FOR SHORT. THIS IS A REVOLUTIONARY DESIGN OFFERING IMPROVED GROUND CLEARANCE FOR OFFROAD CAPABILITY.

- Relocation brackets bolt solid to the factory lower control arm
- No moving parts to wear out or break
- Torsion bar crossmember stays in the factory location keeping the torsion bars hidden inside the frame rails for maximum ground clearance
- Factory torsion bar adjustment range is maintained...the torsion bars don't have to be "cranked" up to achieve the correct lift height

4-LINK LONG ARM SYSTEMS

Improving on the factory suspension design, BDS 4-link long arm systems offer more control, stability and drivability for solid axle trucks and Jeeps. In addition to more on road comfort the 4-link design limits caster change to less than 1-degree as the suspension cycles. The oversized arms and greasable bushing are far superior to the factory arms.

For 4-Link Long Arm upgrades, see Page 163

RADIUS ARM SYSTEMS

BDS has new performance oriented options for the late model Ford and RAM HD trucks with these new radius systems. Designed to replace the factory stamped steel arms these systems use gusseted heavy wall DOM-tubular radius arms that are designed to correct the suspension geometry with 2-4" of lift. The arms are formed inward for maximum tire clearance and use large greasable bushings for easy servicing.

For Radius Arm upgrades, see Page 163

Coilover upgrade kits are also available for vehicles already equipped with a BDS lift systems

**THE ULTIMATE
SUSPENSION SYSTEMS
TUNED WITH FOX COILOVERS**

- IFS and 4-link long arm system offered with Fox 2.5 coilovers
- Kits are pre-tuned for specific ride height, can be easily adjusted
- Improved performance for high-speed offroad performance
- Smooth on-road ride quality and improved handling

FOX 2.5 COILOVER SHOCKS

BOLT IN THE ULTIMATE OFFROAD PERFORMANCE UPGRADE

- Smooth bore, clear coated 6061-T6 alloy body
- Hardened chrome 7/8" shaft and black anodized aluminum ends
- Race-developed, high flow piston design with external reservoir
- External reservoir separates shock oil from high-pressure nitrogen
- Fully assembled with Eibach coils and preload set for specific ride height
- Direct bolt-on upgrade kits and coilover conversion kits available

For FOX 2.5 Coilover Shocks, see Page 148

FOX 2.5 DSC COILOVER SHOCKS

Dual Speed Compression (DSC) technology improves the FOX coilover performance with easy adjustability to match your terrain. Same benefits of FOX 2.5 coilovers now with DSC for 12-points of high speed compression adjustment and 10-points of low speed adjustment to dial in the ride.

For FOX 2.5 DSC Coilover Shocks, see Page 148

FOX STEERING STABILIZERS

**IMPROVE STEERING CONTROL
WITH OVERSIZED TIRES**

- Single and dual kits available to fit most lifted applications
- Improves drivability by reducing front end shimmy caused by oversized tires
- Stabilizers use 50/50 valving for improved dampening without causing push/pull
- 100% bolt on installation with all necessary hardware included
- Heavy duty gusseted 3/8" steel construction brackets with stainless BDS badging
- Improves tire wear and front end component life

For FOX 2.0 Performance Series Steering Stabilizers, see Page 156

FOX 2.0 PERFORMANCE SERIES SHOCKS

**DIRECT REPLACEMENT
HIGH-PERFORMANCE
GAS SHOCKS**

- Cold forged 6061-T6 aluminum construction
- IFP design allows for fade-free shock performance
- Hardened chrome 5/8" shaft and black anodized aluminum ends
- Specially formulated race oil designed to operate at extreme temps
- Improve on-road and off-road performance

For FOX 2.0 Performance Series Shocks, see Page 149

10 Notes

- Removal of the factory leaf spring block required. Net rear lift will vary depending on height of factory block, but will result in a level stance.
- If equipped with a 2-piece rear driveshaft, a Carrier Bearing Drop Kit may be required (BDS123402)
- 38 x 13.50 tires may require minor trimming.
- Some models may be factory equipped with a 2-leaf main rear leaf spring pack and others a 3-leaf main. Be sure to order the correct option when customizing your kit.

- The main header is critical in selecting the proper system. Be sure to pay close attention to listings like Gas, Diesel, 2WD, 4WD, 4-Door, etc.
- Both front & rear lift dimensions are given. Always measure the vehicle before selecting a kit to achieve the desired effect. Do you want it level, tail high, tail low?
- Some applications are available in different versions - ie. Long arm, 4-Link, Standard System, Ultimate Kit.
- These are general descriptions of how the vehicle is lifted so you can make the proper selection. Do you want new rear springs, or a block and add-a-leaf?
- The kit # given includes all items listed in the required components section with hydraulic shocks. Be sure to read the notes to find out if anything additional is required. It is always our goal to include every thing you need to properly lift your vehicle in the application, but if anything additional is required it will be in the notes. Kits denoted with #XXXF utilize Fox 2.5 Remote Coilovers and Fox 2.0 rear shocks.
- This section indicates the required parts to properly lift your vehicle and the quantity of each of these components required. Each individual box is available separately.
- Certain applications will ask critical questions to ensure that you get the proper components for your vehicle. Be sure to physically inspect the vehicle prior to selecting your kit to ensure that you get the correct system.
- All kits are listed with the NX2 series hydraulic shocks. These can be upgraded to the new FOX 2.0 series shocks listed in the Optional Accessories section.
- The Optional Accessories section is used to list two different types of products. This section includes both accessories and items that are not needed on all vehicles.
 - Accessories like dual shocks, dual stabilizers, ladder bars, etc. are listed with each application so you don't have to waste time looking them up elsewhere in the catalog.
 - Items that are not required for all vehicles are also listed in the Accessories Section. For example, not all Dodge trucks come with a carrier bearing. If your vehicle has a carrier bearing and you experience a drive line vibration after installation, then the appropriate carrier bearing drop in listed here.
- Notes – These are critical! Always read the notes prior to selecting a system for your vehicle. They contain vehicle specific information that can drastically effect your selection.

IN OPTIONAL ACCESSORIES
LOOK FOR FOX 2.0 SHOCKS!

see Page 149 for details

Look for this stamp indicating kits that utilize the new BDS Forged Flex Ends!

The NHTSA's Federal Motor Vehicle Safety Standard (FMVSS) No.126 requires all new passenger vehicles to include Electronic Stability Control (ESC) systems that meet certain standards tested through a comprehensive series of evasive maneuvers. Aftermarket products must meet these standards as well. BDS Suspension leads the industry having independently tested and proven ESC System compliance of numerous suspension systems for Ford, GM, Dodge, and Jeep vehicles. Look for the "compliant" symbol next to kit applications that have tested and meet FMVSS #126 requirements.

FACTORY PROTECTION PLUS

Factory Protection Plus, the ultimate lifted suspension protection coverage and BDS Suspension now includes it with each and every lift kit. Factory Protection Plus brings together BDS Suspension's exclusive No Fine Print Warranty plus FMVSS No.126 ESC System Compliance Testing plus a 5 Year / 60,000-mile/100,000-mile* Supplemental Drivetrain Warranty. Vehicle may be eligible for parts or all of Factory Protection Plus depending on age of the vehicle and best part about it, it's FREE!

	1	121655	Magneride Box Kit		5
					6

Notes

1. Requires frame bracket modification
2. Requires differential modification to clear electric power steering
3. Vehicles came with steel or aluminum steering knuckles and control arms, must order appropriate kit
4. Add-A-Leaf may be required with rear block kit for more level stance.
5. The Factory 17" and 18" wheels cannot be reinstalled with the lift.
6. BDS leaf springs cannot be installed. Factory leaf spring must be used to retain proper Magneride sensor positioning

Improve your traction on the street, track, and trail with BDS Recoil Traction Bars. This revolutionary floating design uses tunable dual-stage compression springs for improved traction without binding up like traditional traction bars. RECOIL Traction Bars use heavy-wall tubing with a forged flex end and easy bolt-on mounts.

#123409-121409 52CK048

For more information on RECOIL Traction Bars see Page 166

2019 CHEVROLET/GMC 1500 PICKUP 4WD

6" KIT FEATURES

- Advanced High Clearance design to maximize ground clearance and increase performance
- CNC-machined ductile cast iron steering knuckle maintains optimal steering geometry
- Differential skid plate and front skid plate included for offroad protection
- Multi-point differential relocation to secure front axle positioning
- 3-piece skid plate system for maximum off road protection

2019 CHEVROLET/GMC 1500 4WD

LIFT & METHOD	QTY	PART#	DESCRIPTION	RECOMMENDED ACCESSORIES	NOTES	
6" Front / 4" Rear						
IFS System	1	021680	Knuckle Box Kit 1 of 2	98224759	FOX 2.0 Rear Gas Shock (2 req'd)	1
Rear Block Kit	1	021681	Knuckle Box Kit 2 of 2	123409	RECOIL Traction Bar Mounting Kit	2
Kit #746H 09CK6981	1	021682	Front Box Kit 1 of 2	121409	RECOIL Traction Bar	3
	1	021683	Front Box Kit 2 of 2			4
	1	021684	Strut Spacer Box Kit			5
	1	011518	Rear 5" Box Kit			6
	2	85759	Rear NX ² Shock			

Notes:

1. Requires frame bracket modification
2. Will not fit MagneRide / Adaptive Ride equipped models
3. Factory 17" and 18" wheels cannot be reinstalled due to tie rod end interference, stock 20" wheels can be reinstalled.
4. 17" wheels with 4.5" backspacing should be test fit prior to mounting the tire to ensure proper clearance to the steering knuckle / tie rod.
5. All aftermarket wheels should be test fit prior to mounting the tire to ensure proper clearance to the brake caliper. Some wheel profiles will not clear the brake caliper. These can be test fitted before the vehicle is lifted in a stock condition.
6. Will NOT work with TrailBoss or AT4 models.

RECOIL TRACTION BARS

Improve your traction on the street, track, and trail with BDS Recoil Traction Bars. This revolutionary floating design uses tunable dual-stage compression springs for improved traction without binding up like traditional traction bars. RECOIL Traction Bars use heavy-wall tubing with a forged flex end and easy bolt-on mounts.

#123409-12140952CK048

2014-2018 CHEVROLET/GMC 1500 PICKUP 4WD WITH CAST STEEL CONTROL ARMS

Vehicle Specs: 2" Leveling Kit - Stock Wheel/Tire

2" LEVELING KIT

The BDS 2" leveling kit is designed to eliminate the factory rake while improving the trucks all-around performance and allowing larger wheels and tires to be installed. The kit integrates a new top mounted strut spacer in combination with a pre-load spacer to raise the front end while improving the handling and stability.

- Notes
1. Strut compressor required for installation
 2. This system will not fit 2007 classic models
 3. Installation of rear leaf springs requires removal of fuel tank
 4. Requires frame bracket modification
 5. 20" x 9" wheels with 5" to 5-3/4" backspacing recommended to reduce trimming.
 6. Traction bars will not fit regular cab short box models.
 7. Add 121651 Auxiliary Differential support bracket for AWD models. Also may require front driveline modification.
 8. Will not fit two-mode hybrid models with electronic power steering.
 9. Stock 20" wheels can be installed with up to 33x12.50 tires.

#88306136
4" DSC Coilover Kit

#121651 - Auxiliary Differential Brackets
Recommended for AWD or extreme off road use!

#121151
Performance UCA Kit

Notes

1. Will not work with rear air-ride equipped vehicles.
2. Strut compressor required for installation.
3. StabiliTrak system may be more sensitive if using wheels/tires outside of specified size range.
4. Minor frame bracket modification and welding required.
5. 20" wheels with 5" to 5-3/4" backspacing recommended to reduce trimming.
6. Add 121651 Auxiliary Differential bracket for AWD models. Also may require front driveline modification.
7. 2" system also fits 2WD models.

Vehicle Specs: 6" Coilover System - 35" M/T ATZ P3 - 20" Fuel Octane

Notes

1. Special tool (Kent Moore Tools Part# J-42393) required to unload/load torsion bars. Not available through BDS.
2. Requires frame bracket modification and differential mount modification.
3. All wheel drive models will require front drive line modification.
4. If equipped with stock 17" wheels, then must replace with 17" or larger aftermarket wheels.
5. Auto-Ride equipped vehicles require part #121400 or #121011 in place of front and rear shocks.
6. System will not fit 2000 model Escalades.
7. Stock 20" wheels can be installed with up to 33x12.50 tires.
8. Stock 20" wheels can be installed with up to 35x12.50 tires.

1988-1998 CHEVROLET/GMC K1500, K2500 6-LUG TRUCK 4WD

HC
HIGH CLEARANCE

#193H - 6" IFS kit w/ optional FOX 2.0 shocks

6" KIT FEATURES

- Upper A-Arms with greaseable bushings included to allow for zero track width change and reduced ball joint stress and maximize tire clearance
- Heavy duty High Clearance crossmembers are locked together with a differential skid plate and additionally supported with compression struts
- Unlike others on the market, this system offers a full 6" of lift without cranking the torsion bars
- The High Clearance crossmembers combined with the heavy duty upper control arms offer better performance and improved geometry for a system that excels both on and off road!
- Stainless front brake lines included

Vehicle Specs: 6" Lift Kit - 35x12.50 D/C FC-II - 16x10 Eagle Alloy 102

1988-1998 CHEVROLET/GMC K1500, K2500 6-LUG 4WD TRUCK

Notes

1. Requires exhaust modification.
2. Special tool (Kent Moore Tools Part #J-36202-A) required to unload/load torsion bars. Not available through BDS.
3. Requires frame bracket modification and differential mount modification.
4. Not recommended for long box extended cab models due to crossmember interference.
5. All models equipped with auto-trac may require a new front driveshaft. The auto-trac New Process 246 transfer case can be identified by the silver dollar sized plaque on the rear of the transfer case that reads "NP246". The dash mounted display will display the Auto 4WD symbol. NP243 is not auto-trac.
6. Aftermarket wheels required. (see chart in back)
7. System will not work on some '88-'95 vehicles equipped with spindle mounted front ABS sensor.
8. Traction bars will not work on regular cab, short box models.

Notes

- Requires exhaust modification.
- Special tool (Kent Moore Tools Part #J-36202-A) required to unload/load torsion bars. Not available through BDS.
- Requires frame bracket modification and differential mount modification.
- All models equipped with auto-trac may require a new front driveshaft. The auto-trac New Process 246 transfer case can be identified by the silver dollar sized plaque on the rear of the transfer case that reads "NP246". The dash mounted display will display the Auto 4WD symbol. NP243 is not auto-trac.
- Aftermarket wheels required. (See tire and wheel chart in back of catalog)
- System will not work on some 88-95 vehicles equipped with spindle mounted front ABS sensor.
- Four door models require 121002 Torsion Bar Crossmember Kit.

6" KIT FEATURES

- One-piece high clearance front & rear crossmembers made from 1/4" thick steel
- Differential skid plate and compression struts included for off-road protection
- Heavy duty steering knuckle included to correct steering geometry and ease installation
- Increased caster for more control
- Stainless front brake lines included

Vehicle Specs: 6" Lift Kit - 35x12.50 Toyo M/T - 1x9 Moto Metal 962

2011-2019 CHEVROLET SILVERADO 2500/3500HD AND GMC SIERRA/DENALI 2500/3500HD

#727FDSC - 6.5" FOX DSC
Coilover System

**PERFORMANCE
COILOVER SYSTEM**

KIT FEATURES

- Eliminates rough riding torsion bars and converts to tunable FOX 2.5 coilovers
- High clearance crossmembers, skid plate, differential relocation, and steering knuckles
- Rubber bushings and ball joints preinstalled for quiet operation and long life.
- 30% increase to suspension travel
- High strength, fully welded tubular UCAs
- Fully boxed, internally gusseted lower arms
- Allows fitment for up to 37" tires

FOX 2.5 DSC COILOVERS

Dual Speed Compression (DSC) technology improves the FOX coilover performance with easy adjustability to match your terrain. Same benefits of FOX 2.5 coilovers now with DSC for 12-points of high speed compression adjustment and 10-points of low speed adjustment to dial in the ride.

6.5" COILOVER CONVERSION SUSPENSION SYSTEM

The 6.5" coilover conversion high clearance system offers next level performance and capability along with premium on road comfort for the late model HD. These systems eliminate the rough riding factory torsion bars and convert over to FOX factory series 2.5 DSC coilovers. This conversion paired with BDS's high clearance IFS technology offers an unbeatable suspension setup for the HD, regardless of how you use your truck. As with all BDS products these new kits are backed by Factory Protection Plus (aka BDS's No Fine Print Warranty and 5year-100,000mile drivetrain warranty) for peace of mind out on the trail. Take your late model HD to the next level with BDS and FOX.

2011-2019 CHEVROLET SILVERADO 2500/3500HD AND GMC SIERRA/DENALI 2500/3500HD

Vehicle Specs: 2.5\"/>

2.5\"/>

The first true bolt-on coil-over conversion system on the market for 2011-19 Chevy 2500HD owners. This system converts the stiff factory front torsion bar suspension to a smooth riding, tunable, high performance coilover suspension system. In addition, the added ride height clears room for larger tires and provides a more aggressive stance. The system increases suspension travel 30% over stock while still maintaining the stock track width.

- Performance Series Upper Control Arms
- Fully Boxed Lower Control Arms
- Differential Drop/Sway Bar Links
- Coilover Mount System
- FOX 2.5 Factory Series Coilover w/ Remote DSC Reservoir

RECOIL
TRACTION BARS

Improve your traction on the street, track, and trail with BDS Recoil Traction Bars. This revolutionary floating design uses tunable dual-stage compression springs for improved traction without binding up like traditional traction bars. RECOIL Traction Bars use heavy-wall tubing with a forged flex end and easy bolt-on mounts.

#123409-121408 19CK918

For more information on RECOIL Traction Bars see Page 166

Notes

- 1 Torsion Bar Tool required to load/unload the torsion bars.
- 2 Stock 17" & 18" wheels cannot be reinstalled. Stock 20" x 8.5" wheels with 6" backspacing or less will fit with a max tire size of 35 x 12.50
- 3 Factory dually wheels cannot be reinstalled.
- 4 Models with two piece rear driveshaft may require #121612.
- 5 Top mounted rear overload spring equipped models require a different rear kit than non-overload equipped models. Be sure to select the correct option for your truck.
- 6 3" and 4" block kits compatible with dually models, 5" not compatible with dually applications due to u-bolt flip.
- 7 If minor front driveline vibration occurs at highway speeds while in 4wd and the vehicle will be used in this situation on a regular basis, we recommend replacing the front driveshaft with a dual Cardan style driveshaft.

6. Gas models require exhaust modification.
7. Narrow track knuckle will slightly increase turning radius.
8. For tail high stance use #119T57 add-a-leaf with the block kit or #069207 with leaf spring kit.
9. Standard track width knuckles required with coilover upgrade kits.
10. Gas models will require coil-over preload adjustment see instructions, use #129600 spanner wrench

#121252 - Performance UCA Kit

#192H - 4.5" kit shown w/ optional FOX 2.0 shocks

2001-2010 CHEVROLET/GMC C2500 HD 2WD

#149H - 7" kit shown w/ optional FOX 2.0 shocks

7" KIT FEATURES

- One-piece front & rear crossmembers increase frame rigidity while reducing installation time
- Heavy-duty steering knuckles included to correct steering geometry and ease installation
- No Torsion Bar Drop for added ground clearance
- Optional steering stabilizers available
- Increased ground clearance created by high arched crossmembers

2001-2010 CHEVROLET/GMC C2500 HD 2WD TRUCK

Notes

1. Special tool required to unload/load the torsion bars.
2. Will not fit non-HD applications.
3. The 2WD HD was produced with two different styles of carrier bearing crossmembers. If the carrier bearing is mounted above the crossmember, use 121611. If the carrier bearing is mounted below the crossmember, use 121612.

DODGE/RAM

2015-2018 DODGE RAM REBEL 1500 2012-2018 DODGE RAM 1500 4WD TRUCK - DIESEL/GAS

Vehicle Specs: 4" Lift Kit - 35x12.50 Toyo Open Country M/T - 20x9 KMC XD Cyclone

#1623H - 4" lift kit shown with optional FOX 2.0 shocks

4" AIR RIDE KIT FEATURES

The air ride 4" lift system utilizes many of the same components found in the widely popular BDS 4" standard lift systems and allow full functionality of the vehicles factory installed Air Ride air suspension system to raise and lower the ride height in different modes. These systems are designed to lift and level the stance with room for 35" tires. Ride height is set using front and rear bolt-in spacers to correctly position the factory air bags along with relocation brackets for the ride height sensors. Also included are a pair 1/4" thick steel laser cut crossmembers, differential relocation brackets and heavy duty skid plate, CNC-machined ductile cast iron steering knuckles, new tie rod ends, sway bar link extensions, SS-braided brake lines, and a billet front driveshaft spacer. In the rear this kit uses upper control arm relocation brackets, track bar relocation bracket, extended sway bar links and your choice of gas shocks.

2015-2018 DODGE RAM REBEL / 2013-2018 DODGE RAM 1500 4WD TRUCK - DIESEL/GAS - AIR RIDE ONLY

LIFT & METHOD	QTY	PART#	DESCRIPTION	RECOMMENDED ACCESSORIES	NOTES
4" Front / 2.5" Rear	1	022630	Front Box Kit 1 of 4	98224712	1
IFS System	1	022631	Front Box Kit 2 of 4	FOX 2.0 Rear Gas Shock (2 req'd)	2
Factory Air Ride Suspension	1	022403	Front Box Kit 3 of 4 - Air Ride		3
Kit #1623H 42DK8802	1	022625	Front Box Kit 4 of 4		
	1	022259	Rear Air Ride Box Kit		
	2	85719	Rear NX ² Shock		

Notes

1. Rack & Pinion steering system is extremely sensitive to any out of round or out of balance tire/wheel combination. The larger the tire the less the backspacing, the more sensitive the system, causing minor steering wheel shimmy.
2. Stock 17" and 18" wheels can not be re-installed. Stock 20" can be reinstalled with factory tire.
3. The factory air ride is a closed loop system. Opening the system more times than recommended in the lift instructions or factory service manual will require the system to be recharged. This can be done at any Ram dealer service department.

			98224758 FOX 2.0 Rear Gas Shock (2 req'd)		

Notes

- Be sure to measure your vehicle before ordering. Tail height on these trucks vary from 1"-3" from the factory. The 022209, 022309, and 022509 can all be substituted to achieve the desired stance.
- Rack & Pinion steering system is extremely sensitive to any out of round or out of balance tire/wheel combination. The larger the tire the less the backspacing, the more sensitive the system, causing minor steering wheel shimmy.
- Not recommended for AWD models.
- Stock 17" and 18" wheels can not be re-installed. Stock 20" can be reinstalled with factory tire.
- TRX models will achieve approximately 1" of additional lift. This lift is not recommended for use on the TRX models due to possible CV shaft vibration caused by the additional lift. Instead, consider our 4" lift system for 5" of lift or replace the TRX struts with standard struts for use with this system.
- Will not fit adjustable air suspension equipped models.

Notes

1. Will not fit Mega-Cab models.
2. Rack & Pinion steering system is extremely sensitive to any out of round or out of balance tire/wheel combination. The larger the tire the less the backspacing, the more sensitive the system, causing minor steering wheel shimmy.
3. Not recommended for AWD models.
4. For tail-high stance replace with rear leaf springs.
5. Stock 17"-18" wheels can not be re-installed. Stock 20" wheels can be reinstalled with stock tires.
6. Be sure to measure your vehicle before ordering. Tail height on these trucks vary from 1"-3" from the factory. The 022209, 022309, and 022509 can all be substituted to achieve the desired stance.
7. TRX models will achieve approximately 1" of additional lift. This lift is not recommended for use on the TRX models due to possible CV shaft vibration caused by the additional lift. Instead, consider our 4" lift system for 5" of lift or replace the TRX struts with standard struts for use with this system.

2014-2018 DODGE RAM 2500 TRUCK 4WD - DIESEL

8" KIT FEATURES

- 4-link conversion system creates much better handling characteristics.
- Dual rate diesel specific 8" coil springs give excellent on-road handling and ride while still being able to handle the heavy loads a 3/4 ton truck was built for.
- Steering and track bar correction are included in the form of a dropped pitman arm and track bar relocation bracket.
- Extended sway bar links are included to correct the front sway bar angle.
- Front stainless steel extended brake lines and bump stop extensions.
- 6-bolt or 8-bolt t-case indexing ring kits included to improve front driveline operating angle.
- Rear spring mounts outboarded by 8" per side for extra stability and improved handling.

#1626H - 8" 4-Link kit shown w/ optional FOX 2.0 shocks

	2	85763	Rear NX ² Shock	122814	Sway Bar Disconnect Upgrade Kit - 8" kit	
				122007	Rear Driveshaft Spacer Kit - 8" kit	

Notes

1. Not for use with factory rear airbag suspensions
2. Fits Diesel Models Only
3. Indexing ring only fits 6 bolt transfer cases (most common). Some heavy-duty tow package vehicle could have 8-bolt transfer cases (w/Heavy-duty Aisin 6 speed transmissions), order 122813.
4. The carrier bearing drop is necessary for models equipped with two piece rear drive shaft.
5. Some vehicles may require rear driveshaft spacer kit 122007 to maintain adequate rear driveshaft engagement.
6. 40x13.50 tires may require some trimming, and depending on wheel width and backspacing may require spacing the front bumper forward and inner fender trimming.

5.5" STANDARD LIFT KIT

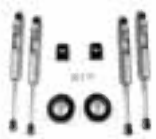

BDS offers several lift options for the late model Hemi-equipped RAM 2500 trucks designed to improve the trucks appearance, capability and tire clearance. Among the options is the 5.5" standard kit designed to retain the factory radius arms. This kit includes:

- Front & Rear Progressive Rate Coils
- Heavy Duty Radius Arm Drop Brackets
- Heavy Duty Front & Rear Track Bar Brackets
- Forged Drop Pitman Arm to correct steering angles
- T-Case Indexing Kit and low-profile Transmission Crossmember
- Bump Stops, Sway Bar Links, NX2 or Fox 2.0 Shocks

Vehicle Specs: 5.5" Lift Kit - 37x12.50 Federal M/T - 20x10 XD Monster II

Notes

1. Not for use with factory rear airbag suspensions
2. Indexing ring only fits 6 bolt transfer cases (most common). Some heavy-duty tow package vehicle could have 8 bolt transfer cases (w/ Heavy-duty Aisin 6 speed transmissions)
3. Will not work with 6.4L Hemi models due to exhaust clearance.
4. May require exhaust modification to clear the front driveshaft.

2014-2018 DODGE RAM 2500 TRUCK W/ REAR AIR RIDE 4WD - GAS

#1633H - 4" kit shown w/ optional FOX 2.0 shocks

4" STANDARD (AIR RIDE) LIFT KIT

BDS offers several lift options for the late model Hemi-equipped RAM 2500 Air Ride trucks designed to improve the trucks appearance, capability and tire clearance while retaining full functionality of the factory installed rear air bag system. Among the options is the 4" standard kit which features:

- Front Progressive Rate Coil Springs, Rear AirBag Spacers
- Heavy Duty Radius Arm Drop Brackets
- Heavy Duty Front & Rear Track Bar Brackets
- Forged Drop Pitman Arm to Correct Steering Angles
- Bump Stops, Sway Bar Links, Air Tank Relocation
- Choice of NX² or FOX 2.0 Gas Shocks

##1622F - 3" Radius Arm kit
shown w/ optional FOX 2.0 shocks

3" RADIUS ARM KIT FEATURES

See Notes ► Continued ►

This kit is perfect for those looking for all the performance of a full-out lift system but with the height of a leveling kit. This new system is built around massive tubular replacement radius arms. These arms are built to handle far more than the factory parts they are replacing. The design incorporates a factory style rubber bushing mount at the frame to keep the NVH levels in check. The 3-1/4" diameter bushings are huge and have a long, maintenance-free service life. The new radius arms mount right into the factory locations so installation is simple and clean. Factory alignment adjustability is maintained using the OE eccentric adjusters. The arm geometry is set to keep the axle angle in the factory specs while compensating for the 3" of lift. A copper-anodized aluminum BDS name plate is mounted each arm.

RADIUS ARM UPGRADE KIT

These new radius arms are a great addition for RAMs running the 2" leveling kit. They should not be used in conjunction 4" radius arm drop bracket kits, but are a great addition to improve the performance over the factory arms when used with the 6" radius arm drop bracket kits.

Will fit 2014-2018 RAM 2500 and 2013-2018 RAM 3500 Models
#122321 83DK645

RECOIL TRACTION BARS

Improve your traction on the street, track, and trail with BDS RECOIL Traction Bars. This revolutionary floating design uses tunable dual-stage compression springs for improved traction without binding up like traditional traction bars. RECOIL Traction Bars use heavy-wall tubing with a forged flex end and easy bolt-on mounts.

#123409-122408 19DK918
For more information on RECOIL Traction Bars see Page 166

Notes

1. Kits come standard with 6-Bolt indexing ring kit. If equipped with heavy-duty 8-bolt t-case order 122813 in place of 122623
2. For rear leaf spring equipped models only.
3. The carrier bearing drop is necessary for models equipped with two piece rear drive shaft.
4. Some vehicles may require rear driveshaft spacer kit 122007 to maintain adequate rear driveshaft engagement

	1	012516	Rear Block Kit		
	2	85752	Front NX ² Shock		
	2	85761	Rear NX ² Shock		

Notes
 1. Indexing ring only fits 6 bolt transfer cases (most common). Some heavy-duty tow package vehicle could have 8 bolt transfer cases (w/ Heavy-duty Aisin 6 speed transmissions)
 2. For rear leaf spring equipped models only.
 3. Will not work with 6.4L Hemi models due to exhaust clearance.

BDS offers several lift options for the late model 2013+ RAM 3500 trucks now featuring the factory front radius arm suspension. Among them is the 5.5" 4-Link System for the Hemi-equipped gas truck that features:

- Front Progressive Rate Coil Springs
- 4-Link Conversion Brackets and HD Control Arms
- Front Track Bar Bracket and Forged Pitman Arms
- T-Case Indexing Kit and low-profile Transmission Crossmember
- Rear Lift Block and Full Leaf Spring Options Available
- Choice of NX² or FOX 2.0 Gas Shocks

2014-2018 DODGE RAM 2500 POWER WAGON - GAS

Vehicle Specs: 4" Lift Kit - 37x13.50 Toyo Open Country R/T - 20x10 Asanti Offroad AB811

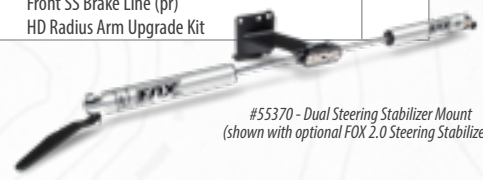

#1636H - 4" kit shown w/ optional FOX 2.0 shocks

4" KIT FEATURES

- Maintains on road drivability while improving off-road capability with clearance for 37" tires
- Provides a full 4" of lift over the factory ride height (similar to 5.5" on a standard RAM 2500).
- Retains full functionality of electronic sway bar disconnect for increased suspension travel
- Includes front and rear dual rate coil springs for on/off-road performance and load capacity
- Heavy duty, 1/4" thick radius arm drop brackets to correct front suspension geometry
- Front & rear track bar relocation brackets to properly reposition axles
- Forged drop pitman arm to correct steering angles
- T-case innng ring and transmission crossmember to improve front driveline operating angle (allows use of factory driveshafts)
- Your choice of single or dual NX² gas or FOX 2.0 performance gas shocks available

				122609	Rear Adjustable Track Bar	
				102003	Front SS Brake Line (pr)	
				122321	HD Radius Arm Upgrade Kit	

Notes
 1 Requires exhaust modification to clear the front driveshaft at full suspension droop, steps outlined in the instructions.
 2 Compatible with factory rear power hop damper.

#55370 - Dual Steering Stabilizer Mount (shown with optional FOX 2.0 Steering Stabilizers)

2009-2013 DODGE RAM 2500, 2009-2012 DODGE RAM 3500 4WD TRUCK - DIESEL

#632H - 8" Longarm kit

6" AND 8" LONG ARM KIT FEATURES

- Progressive rate coil springs
- Heavy duty 4-link long arm brackets and formed control arms improve all around performance by reducing caster change through wheel travel.
- Forged pitman arm and track bar bracket reposition steering.
- T-Case Indexing Ring (option on the 6" kit) to reposition drivelines to function properly.
- Choice of rear block or replacement leaf springs
- Choice of NX² or Fox 2.0 shocks with numerous mounting configurations

RECOIL TRACTION BARS

Improve your traction on the street, track, and trail with BDS RECOIL Traction Bars. This revolutionary floating design uses tunable dual-stage compression springs for improved traction without binding up like traditional traction bars. RECOIL Traction Bars use heavy-wall tubing with a forged flex end and easy bolt-on mounts.

#123409-122408 19DK918

For more information on RECOIL Traction Bars see Page 166

- Notes
1. Measure rear axle tube before ordering. Some 4" axle models with dual overloads will require 4068 - 4063 for 2" rear block.
 2. Rear lift options will not fit dually applications.
 3. If driveline vibration occurs, order either transfer case drop or indexing kit available in optional accessories. NOTE: 122606 Transmission drop kit will only replace the OE bracket #52121938AA
 4. 102009 Rear brake lines will not fit 2012-2013 models.
 5. Additional front driveline modification may be required.
 6. Exhaust modification will be required for dual rear shock kit 122009.

#55371/98224016
Dual Steering Stabilizer Mounting Kit
w/ FOX 2.0 Steering Stabilizer

Notes

1. Measure the diameter of your rear axle before ordering. It should be 3-1/2" or 4" in diameter.
2. May require front exhaust modification to clear front driveshaft at full droop.
3. 102009 rear brake line will not fit 2012 or newer models.
4. Depending on the factory transmission mount, some 4" kits may require the transfer case indexing kit if a driveline vibration persists.

2008 DODGE RAM 2500 & 3500 4WD TRUCK - DIESEL

#690H - 3" kit shown w/ optional FOX 2.0 shocks

3" PERFORMANCE SYSTEM FEATURES

- 3" progressive rate Pro-Ride coils
- 1.5" OD x.250-wall upper/lower greaseable control arms to reposition the front axle
- Heavy duty adjustable track bar to recenter axle
- Extended sway bar links w/ stem eliminator
- Rear block kit and (4) shocks

Vehicle Specs: 3" Lift Kit - 35x12.50 M/T ATZ - 20x9 Raceline

Notes
1. Measure rear axle tube before ordering. Some models with dual overloads will require 4068 - 4063 for 2" rear block.
2. Dually applications require larger U-bolts
3. If driveline vibration occurs, order 122801 or 122802 transfer case index kit.
4. Exhaust modification will be required for dual rear shock kit 122009.

- Notes
1. Measure rear axle tube before ordering. Some models with dual overloads will require 4068.
 2. Rear lift options will not fit dually applications.
 3. Not recommended for Power Wagon applications.
 4. Power Wagon applications require sway bar link kit #122401. The Power Wagon has a 2" taller ride height, so net lift gain will be 4".
 5. If driveline vibration occurs, order transfer case index kit #122801 or 122802.
 6. If you install the index rings, the front crossover pipe on the drivers side will need to be modified.

Notes
 1. Measure the diameter of your rear axle before ordering. It should be 3-1/2" or 4" in diameter.
 2. May require front exhaust modification to clear front driveshaft at full droop.
 3. Depending on the factory transmission mount, some 4" kits may require the transfer case indexing kit if a driveline vibration persists.

2003-2007 DODGE RAM 2500 & 3500 4WD TRUCK - DIESEL

6" LONGARM COILOVER KIT FEATURES

- FOX 2.5 Factory Series Coilovers
- Heavy duty 4-link long arm brackets and formed control arms improve all around performance by reducing caster change through wheel travel.
- Forged pitman arm and track bar bracket reposition steering.
- T-Case Indexing Ring (option on the 6" kit) to reposition drivelines to function properly.
- Choice of rear block or replacement leaf springs
- Fox 2.0 shocks with numerous mounting configurations

#647F - 6" Longarm Coilover System

2003-2007 DODGE RAM 2500 & 3500 DIESEL 4WD TRUCK (INCLUDING MEGA CAB)

#122604 - Dual Auxiliary Front Shock Mounting Kit

- Notes
1. This truck is available with two different axle sizes, 3.5" or 4". Measure rear axle tube before ordering. Some 4" axle models with dual overloads will require u-bolt 4068.
 2. Dually applications require larger U-bolts
 3. Although unusual, if driveline vibration occurs, order transfer case drop kit available in options or t-case index kit. #122801 is included in 8" kits, substitute #122802 for manual transmission.
 4. Optional transfer case drop kits fit automatic transmission models only.
 5. Exhaust modification will be required for dual rear shock kit 122009 on 6.7L Diesel models.

Notes

- This truck is available with two different axle sizes, 3.5" or 4". Measure rear axle tube before ordering. Some 4" axle models with dual overloads will require u-bolt 4066.
- Rear lift options will not fit dually applications.
- Although unusual, if driveline vibration occurs, order transfer case drop kit available in options or t-case index kit.
- Optional transfer case drop kits fit automatic transmission models only.
- If you install the index rings, the front crossover pipe on the drivers side will need to be modified.

Notes

1. Measure the diameter of your rear axle before ordering. It should be 3-1/2" or 4" in diameter.
2. May require front exhaust modification to clear front driveshaft at full droop.
3. Depending on the factory transmission mount, some 4" kits may require the transfer case indexing kit if a driveline vibration persists.

2003-2018 DODGE RAM 2500 & 3500 ACCESSORIES

SWAY BAR DISCONNECTS

2003-2018 RAM 2500/3500 FRONT SWAY BAR DISCONNECT KITS

- Works with 3-8" of lift
- Not for use with any other sway bar relocation brackets. Sway bar needs to be mounted in stock location on frame.

TRACTION BARS

Improve your traction on the street, track, and trail with BDS RECOIL Traction Bars. This revolutionary floating design uses tunable dual-stage compression springs for improved traction without binding up like traditional traction bars. RECOIL Traction Bars use heavy-wall tubing with a forged flex end and easy bolt-on mounts.

LONG ARM UPGRADE KITS

2003-2013 OE 4-LINK TRUCKS

- Works with 6"- 8" of lift
- Complete upgrade with frame brackets, heavy-duty arms, bushings and hardware
- No cutting of factory brackets required

#012801/012802..... 82DK339

2013-2018 OE RADIUS ARM TRUCKS

- Works with 4"- 8" of lift
- Converts factory radius arm to 4-link for better handling and control
- Complete upgrade with frame brackets, heavy-duty arms, bushings and hardware

#012403/012404..... 25DK309

PERFORMANCE COILOVER UPGRADE KITS

- The 2.5 coilovers afford the best clearance to the coilover body as it mounts through the factory upper coil mount.

2003-2013 2500 / 2003-2012 3500 - DIESEL

Notes

1. On models with Saginaw or Corporate type front driveshaft, CV cluster may require dressing to prevent binding.
2. Anti-Sway bar links will have to be sectioned and lengthened.
3. On models equipped with 4WD dash light, wiring will need to be lengthened.
4. Not for heavy duty 3/4 ton.
5. I.D. of bushing is smaller than mounting pin and will require lubrication and extra effort for installation.
6. #082501 steering block only fits Dana 44 with 3 bolt knuckle.
7. Ramcharger will gain additional lift height.

Vehicle Specs: 5" lift kit - 37" Nitto Terra Grappler G2 - 20x9 XD Rockstar 3

FORD

2010-2014 & 2017 FORD F150 RAPTOR

4" LIFT SYSTEM

BDS offers even more capability for the Ford Raptor with 4" lift systems designed to take full advantage of the long travel suspension and factory installed FOX internal bypass coilovers and shocks and allow clearance for 37" tires. By properly relocating these coilovers and shocks, we are able to maintain that amazing performance that makes the Raptor a true offroad machine. The front coilovers are relocated with a heavy-duty spacer at the frame mount while the rear shocks are relocated at the axle with bolt-on brackets. Other Raptor specific items included in the kit are front brake line relocation brackets that maintain adequate brake line slack for the massive amount of wheel travel available. In addition to the brake line brackets, Raptor specific front skid plate relocation is included to maintain the signature Raptor front aluminum skid plate and have it blend cleanly into the BDS front crossmember.

Out back, in addition to the rear shock relocation brackets, is a 4" block and u-bolt kit. The 4" block replaces the factory block to net a level stance and includes a bump stop wing for proper bump stop engagement offroad.

Notes:

1. Strut Compressor required for installation.
2. 1" Rear block kit is available in the accessories.
3. Will fit EcoBoost models.
4. Requires frame bracket modification and welding.
5. 18" wheels with 5-5.5" total backspacing should be test fit prior to mounting tire to ensure proper clearance to BDS steering knuckle.
6. 18" or larger diameter wheels required. Stock 17" & 18" wheels cannot be reinstalled. Stock 20" wheels can be used with up to a 305/60-20 tires.
7. For a level to tail low appearance use #023416 with Kit#1502H or use #013429 with Kit#1503H. Block kits replace factory 1-1/4" block.
8. Models with a 2-piece rear driveshaft may require carrier bearing drop shim kit #122405
9. Will not fit Power Stroke diesel models

RECOIL TRACTION BARS

Improve your traction on the street, track, and trail with BDS RECOIL Traction Bars. This revolutionary floating design uses tunable dual-stage compression springs for improved traction without binding up like traditional traction bars. RECOIL Traction Bars use heavy-wall tubing with a forged flex end and easy bolt-on mounts.

#123409-12341909DK928

For more information on RECOIL Traction Bars see Page 166

2015-2016 FORD F150 4WD

#1506H - 6" kit shown w/ optional FOX 2.0 shocks

4" AND 6" LIFT SYSTEMS

- One piece, high clearance, laser cut crossmembers
- Differential skidplate and offroad protection
- Improves on-road/off-road performance & handling
- FMVSS No.126 (ESC System) Compliant

2.5" LEVELING KIT

- Top and Pre-load Spacer
- Improves performance and handling
- Doesn't max out upper ball joint
- Retains OEM range of motion

Kit #572H

				#123253 Performance UCA Kit	

Notes

1. Supercrew models with 5.5' bed do not require the add-a-leaf 113219.
2. All wheel drive models will require front driveshaft modification.
3. Stock 17's will not fit back on vehicle. Stock 18's & 20's do fit with stock tires.
4. This system also fits 2WD models.
5. Although unusual, a 123609 rear driveshaft spacer may be required.
6. Will not fit HD models (7 lug).
7. Strut compressor required for installation.

1997-2003 FORD F150 4WD

6" KIT FEATURES

- Complete bolt on system – no welding required
- No drive shaft replacement required
- CNC machined steering knuckles maintain factory steering geometry
- Torsion bar drop brackets with the BDS logo
- Longer front sway bar links included
- Heavy-duty, one-piece front and rear main crossmembers

#513H - 6" kit shown w/ optional FOX 2.0 shocks

Vehicle Specs: 6" Lift Kit - 35" BFG A/T - 16" Eagle Alloy 186

Notes

1. Front end alignment required. Alignment cams may be required. See Page 161.
2. If OE alignment bushings in the upper ball joint are more than 1 degree, then 2" coils should not be used.
3. Add two front auxiliary shocks if the vehicle is equipped with factory dual mounts.
4. #123401 recommended if equipped with a front anti-sway bar. Ford produced 3 different styles of sway bar systems between 1980 and 1996. In extremely rare cases, modification may be required.
5. Extended lines required for all 4-6" lifts.
6. Does not fit F150 models without power steering.

1980-1996 FORD F100, F150 TRUCK 2WD

#399H - 6" standard kit shown w/ optional FOX 2.0 shocks

RADIUS ARM UPGRADE KIT

Extended radius arm kit, includes 36" long extended radius arms to enhance steering angles and insure proper formed tire clearance, plus fully gusseted tubular side plates allow 10" of front wheel travel

- Front box kit used with 4" or 6" coils makes it easy to upgrade from 4" to 6" and includes: pitman arm to correct steering angles, axle pivot brackets that are "dual drilled" for 4" or 6" lifts, and radius arm drop brackets to restore OE caster
- Optional 2", 4" and 6" Glide-Ride rear springs available

#123006.....36FK347

- Notes*
1. Front end alignment required. Alignment cams may be required. See Page 161.
 2. SuperCab models may not achieve stated lift and may not be alignable.
 3. U-bolts in 2WD rear kits will need to be shortened.
 4. If OE alignment bushings in the upper ball joint are more than 1 degree then 2" coils should not be used.
 5. #123401 recommended if equipped with a front anti-sway bar.
Ford produced 3 different styles of sway bar systems between 1980 and 1996.
In extremely rare cases, modification may be required.
 6. Extended front brake lines required

#367H - 6" Pro-Ride Radius Arm Suspension System with Dual Add-A-Leafs & Blocks and Shown w/ Optional FOX 2.0 Shocks

Vehicle Specs: 4" Radius Arm Kit - 38" Nitto Mud Grappler - 18" Fuel Hostage

1978-1979 FORD BRONCO

6" Pro-Ride Suspension System With Rear Blocks & Add-A-Leafs

4" & 6" KIT FEATURES

- Pro-Ride coils are black powder coated for long life
- Radius arm drop brackets restore OE caster and are gusseted for superior strength
- Front box kit can be used with 4" or 6" system making it easy to upgrade from 4" to 6"
- Track bar relocation bracket allows full travel and correct axle position
- Optional 4" and 6" Glide-Ride rear springs available

2017-2019 FORD F250, F350 SUPER DUTY 4WD - DIESEL

8" KIT FEATURES

- ProRide coil springs or FOX 2.5 RR coilover conversion
- Pitman arm/trackbar bracket for steering correction
- 4-link conversion for improved strength/performance
- T-case indexing ring to improve front driveline angle
- Glideride replacement rear leaf springs
- Includes your choice of BDS NX² or FOX 2.0 shocks
- Allows fitment of up to 40" tires

#1541FDSC - 8" DSC C/O, 4-Link Longarm System

FOX 2.5 DSC COILOVERS

Dual Speed Compression (DSC) technology improves the FOX coilover performance with easy adjustability to match your terrain. Same benefits of FOX 2.5 coilovers now with DSC for 12-points of high speed compression adjustment and 10-points of low speed adjustment to dial in the ride.

2017-2019 FORD F250, F350 SUPER DUTY 4WD - DIESEL

RECOIL TRACTION BARS

Improve your traction on the street, track, and trail with BDS Recoil Traction Bars. This revolutionary floating design uses tunable dual-stage compression springs for improved traction without binding up like traditional traction bars. Recoil Traction Bars use heavy-wall tubing with a forged flex end and easy bolt-on mounts.

#123409-123416 - 3.5"/4" Axle 18DK068

#123409-123426 - 4.5" Axle..... 18DK068

For more information on RECOIL Traction Bars see Page 166

Notes

1. Removal of the factory leaf spring block required. Net rear lift will vary depending on height of factory block, but will result in a level stance.
2. Front exhaust modification may be required to clear front drive shaft. (Gas Only)
3. If equipped with a 2-piece rear driveshaft, a Carrier Bearing Drop Kit is required (BDS123402)

#1509F - 2.5" Radius Arm Coilover Lift System

2.5" RADIUS ARM COILOVER SYSTEM

- Specially tuned FOX 2.5 remote reservoirs improve ride quality and offroad performance
- Massive tubular replacement radius arms offer superior strength and caster correction
- Heavy Duty turnbuckle style adjustable track bar to securely recenter axle.
- Auxiliary FOX 2.0 shocks mount into the OE shock mount location
- Designed to level the stance and allow clearance for 35" tires
- Bolt on Design, No Welding Needed

Vehicle Specs: BDS 2.5" Radius Arm Coilover System - 35x12.50 General Grabber - 20x10 BMF B.A.T.L.

2011-2016 FORD F250, F350 SUPER DUTY 4WD - DIESEL

Vehicle Specs: 4" 4-Link Lift Kit - 35x12.50 Toyo Open Country M/T - 22" American Force

RECOIL TRACTION BARS

Improve your traction on the street, track, and trail with BDS Recoil Traction Bars. This revolutionary floating design uses tunable dual-stage compression springs for improved traction without binding up like traditional traction bars. Recoil Traction Bars use heavy-wall tubing with a forged flex end and easy bolt-on mounts.

#123409-123408 - SRW Short Box Only 59FK678

#123409-123418 - SRW Long Box Only 59FK678

For more information on RECOIL Traction Bars see Page 166

#123406 - Carrier Bearing Drop Kit for 8" Kit

Notes

- 1a. Removal of factory block required. Net rear lift height will vary depending on height of factory block, but will result in a level stance.
- 1b. For a more tail-high stance, substitute #013519 5" rear block kit
2. Front exhaust modification may be required to clear front drive shaft (gas only).
3. If equipped with 2-piece driveshaft, a Carrier Bearing Drop Kit may be required.
4. Although extremely rare, front driveline vibration may occur.
5. If equipped with rear sway bar, #123009 required.
6. Front bumper spacer kit #123020 may be required to run 38"x15.50" tires.
7. For Diesel models w/o top mounted overload rear springs
8. Front portion of the kit can be installed on an F350 model, which uses a taller 3-7/8" rear block from the factory, in order to level the front with the rear

6" COILOVER CONVERSION 4- LINK SYSTEM FEATURES

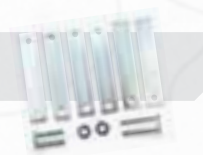

- 4-link provides less than 1 degree of caster change through wheel travel giving you better on and offroad control.
- The heavy duty track bar relocation bracket is designed to match the steering angles of the supplied dropped pitman arm to maintain the factory steering geometry.
- Tuned Fox 2.5 Factory Series Remote Coilovers for race proven performance
- Integrated aux front shock mount to allow fitment of Fox 2.0 - Fox 3.0 shocks
- 1/4"-thick, laser cut frame mounted coilover and 4-link brackets
- 2" O.D. x 0.250" wall DOM 4-link control arms with 2.5" OD greasable urethane bushings.
- GlideRide rear leaf springs for smooth ride and increased load capacity.

Notes

1. Removal of factory block required.
2. This listing will give a tail low stance of approximately 3".
3. Bumper spacer kit #123020 required to run 38" tires.
4. Although extremely rare, front driveline vibration may occur.
5. If equipped with 2-piece driveshaft, a Carrier Bearing Drop Kit is required.

RADIUS ARM UPGRADE KIT

2005-2019 SUPER DUTY
#123251 55FK755

- Built from heavy wall 1-3/4" tubing, gusseted and formed inward for maximum tire clearance.
- Integrated lower alignment cam slot designed to set caster with 2-4" of lift (can be used with other kits in combination with RA drop brackets)

2008-2010 FORD F250, F350 SUPER DUTY 4WD - GAS

Notes

1. If your vehicle is equipped with a carrier bearing, you will need to order 123402 in the options section.
2. Do not install the 4" rear block kit on vehicles equipped with a factory 3-7/8" rear block. Only use rear spring option on these vehicles.
3. Front dual shock hoop requires different cylinders than what comes in the base kit.
4. If equipped with 2 piece driveshaft, a driveshaft alignment kit may be required.

2005-2007 FORD F250, F350 SUPER DUTY 4WD - GAS

4-LINK SYSTEM FEATURES

- Heavy-duty, greaseable 4-link system offers less than 1° of caster change through full wheel travel
- Replacement frame brackets mount to existing frame holes—no drilling or welding required
- Utilizes oversized, greaseable, urethane control arm bushings
- Sway bar and bump stop drops included
- Pitman arm included for steering correction
- Heavy-duty track bar relocation bracket to properly center the axle
- Steering stabilizer bracket cylinder sold separately

STANDARD KIT FEATURES

- Heavy-duty track bar relocation bracket to properly center the axle
- Radius arm drop brackets designed to restore O.E. caster
- Pitman arm included to correct steering angles
- Sway bar and bump stop drops included for proper function
- Rear blocks or Glide-Ride rear leaf springs available, add-a-leaf available on 6" kit only
- Steering stabilizer bracket (cylinders sold separately)

Improve your traction on the street, track, and trail with BDS Recoil Traction Bars. This revolutionary floating design uses tunable dual-stage compression springs for improved traction without binding up like traditional traction bars. Recoil Traction Bars use heavy-wall tubing with a forged flex end and easy bolt-on mounts.

2005-2007 FORD F250, F350 SUPER DUTY 4WD - GAS

4-LINK SYSTEM FEATURES

- Frame mounting bracket replaces OE bracket to increase ground clearance vs. a standard drop kit
- Less than 1 degree caster change through wheel travel giving you better on and offroad control
- Massive 2.5" O.D., greaseable, urethane control arm bushings
- 2" O.D. x 0.250" wall DOM tubing is used to make these extremely rugged control arms

Shown in gray, available in black only.

Notes

1. If equipped with top mounted overload or optional 3-1/2" rear block, use rear box kit #013318.
2. Removal of O.E. block in the rear is required.
4. For tall high stance, use 013419, 013418 in place of 3" block kit. Note: This should only be done on vehicles with a stock 2" block.
5. Front dual shock hoop requires different cylinders than what comes in the base kit.
6. If equipped with 2 piece driveshaft, a Carrier Bearing Drop Kit is required.

RECOIL TRACTION BARS

Improve your traction on the street, track, and trail with BDS Recoil Traction Bars. This revolutionary floating design uses tunable dual-stage compression springs for improved traction without binding up like traditional traction bars. Recoil Traction Bars use heavy-wall tubing with a forged flex end and easy bolt-on mounts.

Notes

1. If equipped with a two-piece rear driveshaft order BDS #123402 or #123406.
2. The stock Super Duty came with a rear 2", or 3-1/2" rear block. You may need to change the block and/or u-bolts in order to level the truck.
3. The front driveshaft will need to be lengthened and/or clearance ground depending on how the vehicle is equipped.
4. Rear kits are for single wheel F350 with Dana 70 only. Dual wheel F350 with Dana 80 requires 4" wide u-bolts.
5. Confirm build date, front u-bolt type and rear leaf pack overload position before ordering.

1999-2018 F250-F350 ACCESSORIES

Improve your traction on the street, track, and trail with BDS RECOIL Traction Bars. This revolutionary floating design uses tunable dual-stage compression springs for improved traction without binding up like traditional traction bars. RECOIL Traction Bars use heavy-wall tubing with a forged flex end and easy bolt-on mounts.

2017-2019 F250/F350/F450 4WD - SHORT AND LONG BOX

#123409-123416 - 3.5"/4" Axle 18DK068

#123409-123426 - 4.5" Axle..... 18DK068

1999-2016 F250/350 RECOIL MOUNTING KIT - SHORT BOX

#123409-123408.....59DK678

1999-2016 F250/350 RECOIL MOUNTING KIT - LONG BOX

#123409-123418.....59DK678

For more information on RECOIL Traction Bars see Page 166

FUNCTION/PERFORMANCE FEATURES

- Unique Floating Traction Bar Design
- Uses dual internal cold wound compression springs to adjust bar resistance. Heavy spring rated at 3,000lb
- Moves Freely, Will Not Bind Suspension or Reduce Articulation like fixed or shackle traction bars
- Traction Bar Resistance Can Be easily loaded or unloaded based on intended use.
 - Unloaded – Road
 - Competition Pulling
 - Trailering
 - Offroading

CONSTRUCTION FEATURES

- Heavy-wall DOM Tube
- Greasable Mounting Points – Threaded Forged Flex Joint at Axle, Floating Mount at Frame
- Heavy Duty, Bolt-On Fabricated Axle and Frame Mount Brackets
- Serviceable, Rebuildable, Tunable

PERFORMANCE COILOVER UPGRADE KITS

Take your Super Duty to the next level in performance with FOX coilovers. These coilover upgrade kits include everything needed to transform your standard kit with the FOX 2.5 factory series remote resi coilovers (with or without the optional DSC adjustment), mounting brackets and hardware. Will work with most lift kits on the market.

					7	

Notes

1. Remove factory block.
2. Models with rear CV driveshaft may experience drive line vibration.
3. Front and rear driveshaft modification will be required.
4. #013007 includes a 4" block to replace the stock 2" block.
5. Due to OE variances, you may need to change the rear block to level the truck.
6. #003202, #003402, #003602, #003609, #003802 & #003809 come with rubber bushings installed.
7. A truck leaf spring will give 2" of additional lift when installed on an Excursion.
8. Gas models may require add-a-leaf kit (113218) to better level the vehicle.

2018 JEEP WRANGLER JL - 2 DOOR

2" & 3" KIT FEATURES

- ProRide coil springs
- NX2 gas shocks
- Sway bar links and quicker disconnects
- Allows clearance for 35" tires

2.5" Kit

FOX Shocks Coming Early 2019.

2018 JEEP WRANGLER JL 2-DOOR - 4WD - ADDITIONAL JEEP JL KIT LISTINGS AND ACCESSORIES COMING SOON

LIFT & METHOD	QTY	PART#	DESCRIPTION	RECOMMENDED ACCESSORIES	NOTES	
2.5" Front/2.5" Rear						
Front Coil Spring	1	014230	2" Box Kit	85432	Single NX ² Steering Stabilizer	1
Rear Coil Spring	1	034240	Front Coil Springs	98302148	Single FOX ATS Steering Stabilizer Kit	2
08JK747	1	034246	Rear Coil Springs	2033	JKS Quicker Disconnect (Included in kit)	
	2	85782	Front NX ² Shock			
	2	85787	Rear NX ² Shock			

Notes

1. Non-Rubicon comes from factory at lower ride height, will net slightly over 2" - final stance the same for all models
2. Stock wheels cannot be reinstalled without spacers due to rear sway bar interference.

Vehicle Specs: 2.5" Lift Kit - 37x12.50 Falken M/T - 17x9 Mamba M23

JEEP WRANGLER JK KITS

2" SYSTEM INCLUDES

- Front and rear Pro-Ride coils (4 door only)
- Front and rear bump stops
- Front lower octacam lock kit included
- Rear brake line relocation
- Front Sway Bar Links
- BDS NX² or FOX 2.0 Series shocks

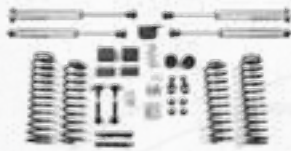

Kit shown with optional forged flex end lower control arms
(Standard kit uses fixed lower arms)

3" SYSTEM INCLUDES

- Front and rear Pro-Ride coils
- Front JKS Quicker Disconnects
- Rear track bar relocation
- Front and rear bump stop extensions
- Brake line extensions
- Choice of BDS NX² or FOX 2.0 Shocks
- Front lower octacam lock kit included

4" - 4.5" SYSTEM INCLUDES

- Front and rear Pro-Ride coils capable of full coil bind
- Front JKS Quicker Disconnects and rear sway bar links
- Front track bar relocation designed to work with the new dropped pitman arm
- Front lower control arms included to restore caster
- Rear upper adjustable and lower fixed arms to properly center the axle in the wheel well and allow for pinion adjustment
- Front and rear bump stop extensions
- Rear track bar relocation to properly center the axle
- Choice of BDS NX² or FOX 2.0 Shocks

4" - 6.5" LONG ARM SYSTEM INCLUDE

- Long Arm 4-Link geometry offers superior on and off road control
- 1/4" steel 4-Link mounting brackets utilizing BDS multi-mount system
- Pro-Ride coils capable of being fully compressed and always coming back to original height
- Fully adjustable upper and lower heavy wall tubular control arms with Clevis rubber bushings and forged flex ends
- Front JKS Quicker Disconnects, rear sway bar brackets
- Front and rear track bar bracket or available Adjustable Track Bars
- Front and rear stainless braided Kevlar lined brake lines
- Choice of BDS NX² or FOX 2.0 Shocks

Exhaust Extensions

			104006	Rear SS Brake Line - SA Kits			

Notes

- Will fit 07-18 2wd models, up to 4.5" SA kits only.
- The fixed front and rear lower control arms can be upgraded to the flex or adjustable arms listed in the accessories.
- The front driveshaft is mated out at full droop and on certain models the driveshaft boot can contact the transmission pan. Replacement of the front driveshaft is recommended.
- Removing the OE spring isolators will result in a 1" lift if desired.
- 124408 rear track bar or 124308 rear track bar relocation is recommended if using factory wheels.
- The front and rear driveshafts are mated out at full droop. The front driveshaft boot can contact the transmission pan at extreme articulation on some models. Replacement of the front and rear driveshafts is recommended.
- Exhaust modification may be required.

Notes

- The fixed front and rear lower control arms can be upgraded to the flex or adjustable arms listed in the accessories.
- The front driveshaft is maxed out at full droop and on certain models the driveshaft boot can contact the transmission pan. Replacement of the front driveshaft is recommended.
- Removing the OE spring isolators will result in a 1" lift if desired.
- 124408 rear track bar or 124308 rear track bar relocation is recommended if using factory wheels.
- The front and rear driveshafts are maxed out at full droop. The front driveshaft boot can contact the transmission pan at extreme articulation on some models. Replacement of the front and rear driveshafts is recommended.
- Exhaust modification may be required.

Notes

- The fixed front and rear lower control arms can be upgraded to the flex or adjustable arms listed in the accessories.
- The front driveshaft is maxed out at full droop and on certain models the driveshaft boot can contact the transmission pan. Replacement of the front driveshaft is recommended.
- Removing the OE spring isolators will result in a 1" lift if desired.
- 124408 rear track bar or 124308 rear track bar relocation is recommended if using factory wheels.
- The front and rear driveshafts are maxed out at full droop. The front driveshaft boot can contact the transmission pan at extreme articulation on some models. Replacement of the front and rear driveshafts is recommended.
- Exhaust modification may be required.

Notes

- Models with manual transmissions may need shifter opening in the floorboard enlarged.
- Stabilizer and front lower control arms are highly recommended.
- A slip yoke eliminator kit and CV style rear drive shaft is required.
- May require exhaust modification.
- Some welding required.
- Long Arm systems also fit short wheel base Rubicon models (not Unlimited models)

4.5" ULTIMATE KIT FEATURES

- (8) Fully adjustable Gen II control arms with rubber bushings and forged flexed ends
- Front and rear D.O.T. approved, Kevlar lined, stainless steel brake lines
- Front ultimate sway bar disconnects and rear solid links
- Bump stop extensions • Rear track bar relocation kit
- Front adjustable track bar • Pitman Arm

Vehicle Specs: 6.5" Long Arm Kit - 35x12.50 M/T - 15x10 StreetLock

6.5" Long Arm Kit w/
optional FOX Shocks

6.5" LONG ARM KIT FEATURES

- True 4-link long arm design to give you caster control through wheel travel
- All control arms come with forged flex joints for extreme wheel travel
- New adjustable front track bar included and a relocation system to match angles with the supplied dropped pitman arm
- OEM style rubber bushings
- Front and rear braided stainless steel, kevlar-lined brake lines

JEEP WRANGLER TJ ACCESSORIES

CONTROL ARMS

After more than a year of development and testing, BDS Suspension is proud to announce the next generation of Jeep control arms is now available for popular Jeep JK, TJ, XJ, MJ, WJ and ZJ applications.

The new BDS control arms come fully assembled and sold in pairs. They also come standard in new BDS long arm and short arm lift kits, see specific kit applications for more information.

THE BUSHING DEBATE... RUBBER VS. POLY

BDS offers control arms with the option of interchangeable vulcanized rubber bushings or dual fluted greaseable urethane bushings. The rubber bushings are durometer specific, OEM quality Clevis rubber bushings for improved longevity and reduced noise. The control arms are offered in fixed and adjustable lengths, with your choice of pre-installed rubber bushings or greaseable polyurethane. All lower arms are built from 1-3/4" OD x .250 wall tubular steel and formed for optimal performance. Rubber/Poly bushing kits are interchangeable and can be purchased separately.

- Front or Rear 1.75" spacers (pr.)**
#174201..... 73JK34

PROTECTION

#124014

TJ LOWER ARM SKID PLATES

Weld-on lower control arm skid plates made of 3/16" steel to strengthen and protect the front lower arm pockets
#124014..... 82JK23

TJ STEERING BOX SKID PLATE

Tight clearance design to maintain ground clearance while adding full protection. For Saginaw box only.
#124051..... 78JK35

1997-2006 HIGH CLEARANCE BELLY PAN

BDS's "belly up" style skid plate is built for off-road abuse. Constructed from 3/16" steel with corner gussets, this belly pan skid increases ground clearance and is designed to add underbody protection. The kit works on stock height Jeeps as well as in conjunction with most short arm lift kits and BDS long arm kits. Unlike other belly up skids on the market, the BDS Belly Skid Plate includes a low profile transmission mount which allows for additional ground clearance without requiring a motor mount lift. Fits 6 cylinder TJs, except '03-06 automatics. Rubicon models require minor modification. Will not work in conjunction with t-case drop kits or on 4 cylinder models.
#124045..... 78JK334

#124051

BUMP STOP EXTENSIONS

EXTENDED LENGTH BUMP STOPS

Black urethane bump stops - pair
#174001..... 34JK82

1987-1995 JEEP WRANGLER YJ

#1431H - 5" kit shown w/ optional FOX 2.0 shocks

BDS YJ ULTIMATE KITS FEATURES

At the heart of these kits are the industry leading GlideRide leaf springs designed with full military wrapped ends, tapered leaf design with anti-friction pads and bolt style leaf alignment clamps providing comfort, durability, and impressive articulation. As with all BDS parts these springs are backed by the No Fine Print Warranty. Also included are new u-bolts, bump stop extensions, extended length SS brake lines, steering and track bar correction, heavy duty shackles (6" kits only) and your choice of sway bar links or disconnects, and either NX2 or FOX 2.0 gas shocks.

Notes

1. May require driveshaft lengthening for 13" (u-joint to u-joint) driveshaft.
2. May require larger diameter driveshaft if equipped with a 41-1/2" front driveshaft.
3. Extended shackles recommended to clear military wrap.
4. Models with accessories like hardtop, rear tire carrier, roof rack etc., should use #004351 springs on front and rear.
5. When combining lifted shackles with a 3.5" suspension system, a tail shaft eliminator kit and a "CV" style rear driveshaft may be required to eliminate driveline vibration.
6. A tail shaft eliminator and CV style rear drive shaft is required and it may be necessary to lengthen the front driveshaft.
7. #124015 front stem eliminator required to use FOX 2.0 Shocks.
8. Includes pitman arm for power steering equipped models only.

JEEP WRANGLER YJ ACCESSORIES

TRACK BAR COMPONENTS

YJ FRONT & REAR TRACK BAR RELOCATION BRACKET KIT

Contains front and rear track bar relocation brackets and hardware for 3.5"-4.5" of lift

#124004..... 91JK36

FRONT TRACK BAR RELOCATION BRACKET KIT

Includes front track bar relocation bracket and hardware for 5"-6" of lift

#124501..... 97JK43

DRIVE LINE ADJUSTMENT

YJ TRANSFER CASE DROP

For 3.5"-4.5" of Lift

1.5" Drop - Tube Style

#124322..... 87JK06

SWAY BAR LINKS

JKS QUICKER DISCONNECTS

On road stability and off-road performance.

For 0"-6" of Lift

#4100..... 00JK571

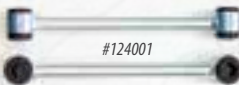

YJ SOLID FRONT SWAY BAR LINK

For 2"-3.5" of Lift

#124001..... 10JK63

For 5"-6" of Lift

#124013..... 50JK83

SHOCK CONVERSION

#124015

YJ SHOCK STEM ELIMINATOR

Allows use of eye-to-eye shock in front stem-eye shock location

#124015..... 13JK82

BRAKE LINES

#104001

YJ STAINLESS STEEL BRAKE LINES

DOT approved, Kevlar lined. For 3.5"-6" of Lift.

Front

#104001..... 89JK011

Rear

#104007..... 07JK94

PROTECTION

#124050

YJ STEERING BOX SKID PLATE

Made from 3/16" steel with durable black powder coat; snug design to offer as much ground clearance as possible while protecting your steering box

#124050..... 90JK34

SHACKLES

SHACKLES

Bolt together style shackles made from 3/8" steel 1" lift front or rear YJ Shackles (pair)

Notes
 1. #083402 Pitman arm will increase turning radius (cannot turn as sharp).
 2. Not recommended for Wagoneers or Cherokees with front and / or rear track rods.
 3. 1974-1975 models must have 131" wheelbase and 7200# GVWR or more for #004408 rear springs to fit.
 4. Some 1974 J20's with stock 401 come with a rear 15/16" spring eye stud.
 5. #004402 and #004408 come with OE rubber bushings installed.
 6. Rear shock mount may need to be relocated.

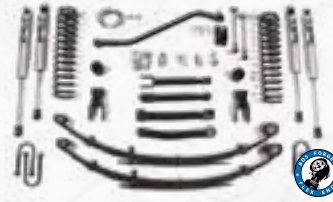

1984-2001 JEEP CHEROKEE XJ 2WD/4WD

3" Kit

3" SYSTEM FEATURES

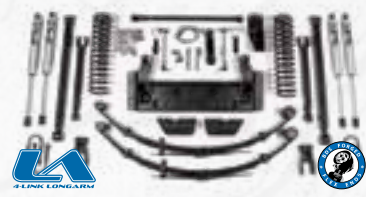

- 3" ProRide coil springs
- Rear add-a-leaf kit or GlideRide leaf springs
- Extended sway bar links
- Transfer case lowering kit
- Replacement u-bolts
- NX² or FOX 2.0 gas shocks

4.5" Kit

4.5" SYSTEM FEATURES

- 4.5" ProRide full length front coil springs
- 3" GlideRide rear leaf springs with 1" HD shackles
- Adjustable UCA/LCA with forged flex ends
- Sway bar disconnects
- HD adjustable front track bar
- Transfer case lowering kit
- Replacement u-bolts
- NX² or FOX 2.0 gas shocks

6.5" Long Arm Kit

4.5" - 8.5" LONG ARM SYSTEM FEATURES

- Full length ProRide front coil springs
- GlideRide rear leaf springs with 1" HD shackles
- HD high clearance belly pan 4-link crossmember
- Adjustable Long arm UCA/LCA with forged flex ends
- HD adjustable front track bar
- Dual shear track bar bracket and pitman arm (6.5"/8.5" only)
- Sway bar disconnects
- NX² or FOX 2.0 gas shocks

#124014 - LCA Skid Plates

PN2001 JKS Quicker Disconnects

* Base kit # includes options for 97-01 model with Chrysler 8.25 rear axle.

Notes

1. Measure the rear u-bolts before ordering. Some XJ's are equipped with a Dana 44 rear axle.
2. Transfer case lowering kit is not required for 2WD models.
3. CV style rear driveshaft (not included) and slip yoke eliminator kit is required.
4. System only works with 4.0L motor and automatic transmission.
5. Some welding required.
6. '96 and earlier models may require a longer emergency brake cable.
7. 124656 will only work with NP231
8. Will produce tail-high stance by 1.5".

2005-2010 JEEP GRAND CHEROKEE WK 4WD

2" UPPER STRUT MOUNT FEATURES

- This kit comes with new front upper strut mounts that add a small amount of pre-load as well as relocate the strut. This maintains the smooth stock ride while offering a little extra for off road performance
- Rear upper coil mounts increase height while maintaining factory ride

Vehicle Specs: 2" Lift Kit - 265/70r17 MTZ - 17x9 M/T Sidebiter (Trimming required)

2005-2010 JEEP GRAND CHEROKEE WK/ COMMANDER XK 4WD

Notes
1. Strut compressor required for installation.

1999-2004 JEEP GRAND CHEROKEE WJ

Vehicle Specs: 4" Lift Kit - 265/70r17 STZ - 17" JK

#448H - 4" kit shown w/ optional FOX 2.0 shocks

SYSTEM FEATURES

- Front & rear Pro-Ride coil springs
- Front track bar bracket and pitman arm to correct steering angles and eliminate bump steer
- Front adjustable lower control arms to fine tune alignment
- Bump stop extensions
- Extended length rear sway bar links
- Rear upper tri-link spacer
- Transfer case drop kit for proper driveline angles

			2001 JKS Quicker Disconnect Kit		

Notes

1. Measure front driveshaft, over 24-1/2" - no modifications should be necessary, 20 to 24" you may need to change to spicer type joint if vibration occurs. If driveshaft is less than 20" then a spicer type joint is required and vibration may persist.
2. Vehicles equipped with V8 may not achieve stated height.
3. If you do not want to drop the transfer case, an aftermarket slip yoke eliminator and CV style rear drive shaft is required.
4. If equipped with CV style drive shaft mount at front pinion, then a new spicer type joint is required to eliminate vibration.

FJ Cruiser and 4Runner Models:

1. Strut compressor required for installation.
2. Other equivalent tire/wheel size options should work - may require minor trimming for some combinations.

4Runner Models:

3. Will not work with factory X-REAS shock system
4. Will not work with factory KDSS sway bar system

Vehicle Specs: 3" lift kit - 285/65r18 Nitto Ridge Grapplers - 18x9 XD Wheels

2007-2018 TOYOTA TUNDRA 4WD

4.5" & 7" COILOVER SYSTEM FEATURES

- FOX 2.5 Factory Series Coilovers (available with DSC Adjustors)
- High Clearance Crossmembers and Belly Skid
- Ductile Iron Steering Knuckles and Tie Rod Ends
- Sway Bar and Differential Relocation

3" COILOVER SYSTEM FEATURES

- FOX 2.5 Factory Series Coilovers (available with DSC Adjustors)
- Performance Upper Control Arms
- Differential Spacers and rear Shackle Kit

PERFORMANCE UCA KIT FEATURES

- High strength 1.5" x .120wall DOM tubing, gusseted for strength and durability
- MOOG ball joint for quiet operation and superior corrosion protection
- OE-durometer rubber bushings to isolate NVHs
- Increased suspension travel with 2-3" and 7" kits (not recommended for 4.5" kits)
- Fully assembled, ready to install

FOX 2.5 DSC COILOVERS

Dual Speed Compression (DSC) technology improves the FOX coilover performance with easy adjustability to match your terrain. Same benefits of FOX 2.5 coilovers now with DSC for 12-points of high speed compression adjustment and 10-points of low speed adjustment to dial in the ride.

WHAT IS 4X4 POSI-LOK™?

- A permanent replacement of the failure prone O.E. vacuum and electric front axle engagement systems.
- Allows you to engage the front axle from inside the cab.
- Engagement every time because you are in direct control.
- A one-inch pull of the cable ensures you will have 4-wheel drive when you need it, as long as the transfer case is engaged.
- It is not a posi-trac or locker.
- Simple and easy to install.
- A patented front axle engagement system.

4X4 POSI-LOK™ BENEFITS

- Provides the benefits of 2-wheel drive low range, giving the vehicle 4-LO torque at the rear axles with bind free steering only available in 2-HL. This feature is not available with factory systems and is beneficial when maneuvering trailers.
- Reduces front differential wear and right axle breakage.
- Will not disengage when the ignition is turned off or the differential is submerged.
- Compatible with manual or electric transfer cases and complete installation can be completed in one to two hours with basic hand tools. No internal differential work required.

PSL400

Notes

1. Designed to work with BDS Suspension lifts
2. Fully Adjustable Coilover Assembly

SPANNER WRENCH

The spanner wrench is a pin-style design that is precision machined to fit in the Fox 2.5 Coilover adjustment collar holes. This precise fit provides the best grip and reduces the chance of damage to the tool, adjustment collar and your knuckles. The tool was designed to accept any standard 1/2" drive ratchet (sold separately) for ease of use.

#129600.....53BK31

2.5 DSC COILOVER SHOCKS

Dual Speed Compression (DSC) technology improves the FOX coilover performance with easy adjustability to match your terrain. Same benefits of FOX 2.5 coilovers now with DSC for 12-points of high speed compression adjustment and 10-points of low speed adjustment to dial in the ride.

FOX LIMITED WARRANTY FOX Factory, Inc., a California corporation having offices at 130 Hangar Way, Watsonville, CA 95076 ("FOX"), makes the following LIMITED WARRANTY with respect to its suspension products:

LIMITED ONE (1) YEAR WARRANTY ON SUSPENSION PRODUCTS Subject to the limitations, terms and conditions hereof, FOX warrants, to the original retail owner of each new FOX suspension product, that the FOX suspension product, when new, is free from defects in materials and workmanship. Unless otherwise required by law, this warranty expires one (1) year from the date of the original FOX suspension product retail purchase from an authorized FOX dealer or from a FOX authorized Original Equipment Manufacturer where FOX suspension is included as original equipment on a purchased vehicle. If law requires a warranty duration of greater than one (1) year, then, subject to the other provisions hereof, this warranty will expire at the end of the minimum warranty period required by such law.

TERMS OF WARRANTY This warranty is conditioned on the FOX suspension product being operated under normal conditions and properly maintained as specified by FOX. This warranty is only applicable to FOX suspensions purchased new from an authorized FOX source and is made only to the original retail owner of the new FOX suspension product and is not transferable to subsequent owners. This warranty is void if the FOX suspension product is subjected to abuse, neglect, improper or unauthorized repair, improper or unauthorized service or maintenance, alteration, modification, accident or other abnormal, excessive, or improper use. Should it be determined by FOX in its sole and final discretion, that a FOX suspension product is covered by this warranty, it will be repaired or replaced, by a comparable model, at FOX's sole option, which will be conclusive and binding. THIS IS THE EXCLUSIVE REMEDY UNDER THIS WARRANTY.

ANY AND ALL OTHER REMEDIES AND DAMAGES THAT MAY OTHERWISE BE APPLICABLE ARE EXCLUDED, INCLUDING, BUT NOT LIMITED TO, INCIDENTAL OR CONSEQUENTIAL DAMAGES OR PUNITIVE DAMAGES.

This limited warranty does not apply to normal wear and tear, malfunctions or failures that result from abuse, improper assembly, neglect, alteration, improper maintenance, crash, misuse or collision. This limited warranty gives the consumer specific legal rights. The consumer may also have other legal rights which vary from state to state or country to country. Some states and countries do not allow the exclusion or limitation of incidental or consequential damages or warranties, and if dictated by law the above limitations or exclusions may not apply to you. If it is determined by a court of competent jurisdiction that a certain provision of this limited warranty does not apply, such determination shall not affect any other provision of this limited warranty and all other provisions shall remain in full effect.

THIS IS THE ONLY WARRANTY MADE BY FOX ON ITS SUSPENSION PRODUCTS AND COMPONENTS, AND THERE ARE NO WARRANTIES WHICH EXTEND BEYOND THE DESCRIPTION HEREIN. ANY WARRANTIES THAT MAY OTHERWISE BE IMPLIED BY LAW INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE ARE EXCLUDED.

2.0 PERFORMANCE SERIES SHOCK

DIRECT REPLACEMENT HIGH-PERFORMANCE 2" SHOCK ENGINEERED SPECIFICALLY FOR YOUR BDS SUSPENSION SYSTEM

APPLICATION SPECIFIC VALVING

- Fox and BDS joined forces to custom valve each application to work perfectly with each BDS Suspension system. The basic shock design is based on Fox Racing Shox race products, but re-designed to turn your BDS equipped truck or Jeep into an offroad machine.

HEAT-REDUCING DESIGN

- Cold-forged, metal impacted 6061 T6 aluminum shock body dissipates heat three times faster than a conventional steel body shock. The 2.0 Performance Series shock runs as cool as a 2.5 diameter shock on the same application.
- FOX Racing Shox formulated race shock oil developed for ultimate performance at variable temperatures.

TOUGH FINISH

- CNC machined aluminum components are Type II hard anodized to a scratch- and fade-free black finish.
- Heavy-duty 5/8" chrome shafts are induction case hardened to over 55 Rockwell C, virtually eliminating scratches caused by roost and debris.

FADE-FREE PERFORMANCE

- The Internal Floating Piston (IFP) design separates shock oil from the high pressure nitrogen charged gas chamber, eliminating oil aeration and cavitation, while providing a predictable ride — capable of handling the roughest conditions with fade-free performance.

NX² SERIES SHOCK ABSORBERS

NX² NITRO SERIES PREMIUM SHOCK ABSORBER

These NX² shocks give high-end performance at an affordable price. They use a pressurized nitrogen charged twin-tube design with 10-stage velocity sensitive valving for lightning fast dampening adaptive to whatever terrain you find yourself traversing on or off-road. The 2" bodied shocks use a large 1-3/8" fluon banded piston, self lubricating seals and a 14mm hardened chrome shaft to help resist rock chips and corrosion. The ends are dual welded for increased strength. Polyurethane bushings and metal sleeves are included to make swapping over your shocks a breeze. These shocks are offered in various stem and eyelet bushing configurations for custom applications and available to work with all current BDS lift kits. The exterior of the shocks are finished in a durable metallic silver paint with NX² branded decals. The NX² shocks will accept standard shock boots, which are available separately. Upgrade your vehicle's shocks with the NX² Nitro Series from BDS Suspension.

* When ordering dual stabilizer kit, you must order two (2) cylinders and one (1) bracket kit.

- Notes
1. Dual stabilizer kit is an end-to-end design.
 2. For 3" axle tube diameter - some trucks may have larger axles, measure first
 3. Dual stabilizer will work on stock height applications
 4. Must have "T" style steering, older "Y" style steering must be converted to "T"
 5. This dual system will not work on vehicles with 2" of lift or less.
 6. #55376 bracket required only if vehicle not currently equipped with BDS front track bar relocation bracket
 7. Will not fit V8 Grand Cherokee ZJ models due to larger tie rod diameter.
 8. #55378 bracket requires front 2" bump stop extensions

NX² SERIES STEERING STABILIZER MOUNTING SYSTEMS

FEATURES INCLUDE:

- Heavy-duty gusseted construction
- Durable black finish for long life
- All hardware and instructions included
- Single and dual systems available for most lifted applications

INSTALLATION OF COMPLETE SYSTEM WILL...

- Enhance vehicle control with reduced steering shimmy and bumpsteer
- Improve tire wear and front-end component life
- Lessen side-to-side motion caused by wide tires and road conditions

MODEL	YEAR	SINGLE		DUAL		
		CYLINDER	BRACKET KIT	CYLINDER*	BRACKET KIT	NOTES
Samurai	85-95					

* When ordering dual stabilizer kit, you must order two (2) cylinders and one (1) bracket kit.
 ** Will not fit with factory sway bar

Notes

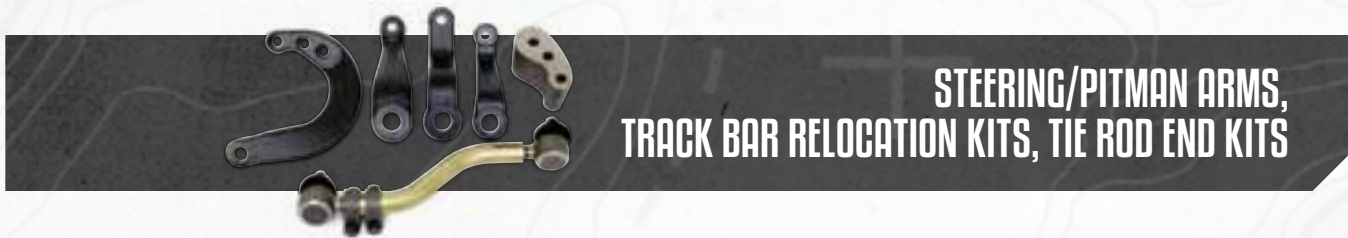

- Dual stabilizer kit only works in combination with the 6" BDS suspension system.
- Dual stabilizer kit is a stacked design (over/under).
- Dual stabilizer kit is an end-to-end design.
- 55414 stabilizer kit only works in combination with the 5" BDS suspension system.
- 1976-77 models with power steering and inverted "Y" steering linkage must be converted to a 1978-79 inverted "T" style in order to install dual steering stabilizers.
- For 3" axle tube diameter – some ¾, 1 ton trucks may have larger axles, measure first
- Will not work with suspension lifts that use a modified steering link and will not fit stock height vehicles.
- Dual stabilizer kit will work on stock height applications.
- Single bracket kit 55326 will work on stock height only.
- Will not work with vehicles equipped with factory front sway bar.
- Single and dual kits will only work in combination with the 4"-6" BDS Suspension systems.
- Dual system will not work for vehicles with 2" of lift or less.
- For use with BDS kits 4" of lift or higher.
- For use with 3" of lift or less.
- For 3" axle tube diameter – some ¾, 1 ton trucks may have larger axles, measure first
- Will not fit V8 Grand Cherokee ZJ models due to larger tie rod diameter.
- #55378 bracket requires front 2" bump stop extensions
- Designed for models that are not equipped with steering stabilizer mount from the factory
- Works for all stock and lifted applications where the center link remains in the stock location.

Notes

1. Tie Rod Ends on adjustable drag link are not covered under warranty. These are a wear item and are available separately #081403.
2. #082501 3" Steering Block fits all open knuckle, 3-bolt Dana 44 or Corporate axles including Dodge, GMC, and pre-1980 Ford F250.
3. Does not fit production codes prior to 3-1-99. (Use #083401).
4. Increases turning radius on this application (cannot turn as sharp).
5. 3" Steering Block replacement stud kit #082001.

- Springs are either cold wound with chrome silicon 9254 or hot wound with 5160 to guarantee long life.
- A polyester based powder coat is applied to ensure flexibility and durability
- Each spring is preset with a hydraulic stress to reduce fatigue in the steel and prevent sagging.
- Shot peening increases tensile strength and allows for maximum wheel travel without sacrificing the life of the spring.
- BDS coil springs are designed to withstand full coil bind. In other words, you can smash our coils to totally flat and they will return to their original height.

Note: All coil springs are black powder coated and are sold in pairs.

CONTROL ARMS

#124331

FRONT FIXED LOWER CONTROL ARM

- Durometer specific vulcanized rubber or polyurethane bushings
- 1/4" wall, 1-3/4" O.D. center tube
- Formed arms to increase tire clearance
- Good for 2" or 3" lifts

#124332

FRONT ADJUSTABLE LOWER CONTROL ARM WITH FORGED FLEX ENDS

- 1-1/4", 12 threaded forged flex ends
- Easily rebuildable flex ends
- 15 degrees of twist allowed to increase droop and compression without transferring rotational load
- Center steel ball is controlled by urethane races to absorb shock and vibration while increasing off road performance
- Vulcanized rubber bushing at the standard end for daily or off road use

#124333

REAR ADJUSTABLE UPPER CONTROL ARM WITH FORGED FLEX ENDS

- 12mm ID x 2" width, 1" RH thread
- Center steel ball is controlled by urethane races to absorb shock and vibration while increasing off road performance
- Easily rebuildable flex ends

#124338

REAR ADJUSTABLE LOWER CONTROL ARM WITH FORGED FLEX ENDS

- 1-1/4", 12 threaded forged flex ends
- Easily rebuildable flex ends
- 15 degrees of twist allowed to increase droop and compression without transferring rotational load
- Center steel ball is controlled by urethane races to absorb shock and vibration while increasing off road performance

ATTENTION:

Look for this stamp indicating kits that utilize the new BDS Forged Flex Ends!

CONTROL ARM BUILDER PARTS

FORGED FLEX END KIT

- Heavy-duty forged steel housing use 1-piece flex balls and polyurethane races
- Comes completely assembled with grease fitting and jam nut
- 1 end per kit

#124033Large Forged Flex End - 1-1/4"-12 Thread - 9/16" Bolt x 2-5/8" Wide.....	65JK35
#124034Small Forged Flex End - 1"-14 Thread - 7/16"(10mm) Bolt x 2" Wide	52JK34
#124035Small Forged Flex End - 1"-14 Thread - 12mm Bolt x 2" Wide	52JK34
#124037Small Forged Flex End - 1"-14 Thread - 9/16" Bolt x 2-5/16" Wide.....	52JK34

FORGED FLEX END REBUILD KITS

- Kits include races, washer and snap ring to rebuild 1 end

#124043Large Forged Flex End Rebuild Kit	32JK9
#124044Small Forged Flex End Rebuild Kit.....	61JK7

RUBBER BUSHINGS BUILDER'S KIT - JEEP LCA

- Kit includes 1 weld-on eye, and 1 press-in rubber bushing

#1240392.25" x .118" DOM control arm plus bushing	27JK52
---------	-------------------------------------------------------	--------

WELD-IN THREADED TUBE INSERTS

- Weld into the appropriate sized tube to create custom control arms, track bars, etc. using the BDS line of forged ends

#1240401-1/4"—12 Thread for 1.5" ID Tube	93JK61
#1240411"—14 Thread for 1.375" ID Tube	93JK61
#1240421"—14 Thread for 1.25" ID Tube	93JK61

FLEX END REBUILD TOOL

- Tools are designed for traditional BDS fabricator style flex ends or new forged flex ends
- Great for assembling new ends, trail fixes or replacing bushings
- Can be used with hand tools with arm still partially installed on vehicle or in a bench vise
- Includes tools for both large and small flex ends

#124032Flex End Rebuild Tool	27JK52
---------	----------------------------------	--------

FORGED UNI-BALL END KIT

- Unique design incorporates the popular uni-ball (COM bearing) design with a forged flex end housing
- Fully rebuildable, works with any standard 7/8" mis-alignment inserts (not included) allowing for numerous mounting bolts and widths
- Great for many custom applications including track bars, control arms and traction bars
- Uni-ball has injection molded nylon race for smooth, quiet operation and long life
- Comes completely assembled and includes jam nut
- 1 end per kit

#124036Forged Uni-Ball End - 1"-14 Thread - 7/8" Uni-Ball	82JK44
#124048Misalignment Spacers (pair) - 1/2" Bolt x 2" Wide	30JK81
#124049Replacement Uni-Ball Kit - includes Uni-ball and Snap Ring.....	36JK22

FABRICATOR FLEX END KITS

- Weld on flex eye kits, all parts needed to make a complete control arm
- Includes 2 flex eyes ready to weld on and assemble

#124028Large Flex Eye Fabricator Kit - 9/16" Bolt x 2-5/8" Wide.....	78JK87
#124029Small Flex Eye Fabricator Kit - 7/16"(10mm) Bolt x 2" Wide.....	20JK47

FABRICATOR FLEX END REBUILD KITS

- Kits include races, washers and snap ring to rebuild 2 ends
- Use to rebuild fabricator flex ends or BDS control arm ends where eye is welded to arm

#124030Large Fabricator Flex End Rebuild Kit	32JK82
#124031Small Fabricator Flex End Rebuild Kit	60JK62

For replacement bushings see Page 172

TRACTION BARS

RECOIL TRACTION BARS

BDS Suspension introduces a revolutionary spring loaded traction bar system engineered to improve traction and limit axle wrap without negatively affecting suspension travel or ride quality. These next generation RECOIL traction bars offer you the freedom to tune the spring tension for optimal performance on-road, off-road, towing, or competition pulling. These traction bars can be used on stock height or lifted trucks and work with both lift blocks and replacement leaf spring kits. They use a full floating design that won't bind up allowing the full range of wheel travel without limiting articulation.

These new RECOIL traction bars are built to the highest standards for the ultimate performance on and off-road. The bars are fabricated from 2" OD x 3/16" wall steel tubing with a threaded bung welded in toward the axle and a CNC machined end at the frame. The axle mount uses the tried and true BDS large forged flex end and jam nut to take whatever abuse you throw at it. Utilizing a forged housing with large 1-1/4" -12 threaded shank, a single sided snap ring and 1-piece flex ball, the flex ends are capable of up to 15-degrees of misalignment in either direction. At the frame end the bar uses a durometer specific polyurethane bushing and free floats in the traction bar utilizing a pair of dual stage internal compression springs and UHMW polyurethane bearings. Both ends are greaseable and serviceable.

RECOIL BRACKETS

Fully assembled the RECOIL traction bars are 55" long and mount to the vehicle using fabricated 1/4" steel brackets. Bracket kits are vehicle specific. The frame brackets install by drilling mounting holes for the brackets while the axle brackets install using a set of u-bolts. The traction bars and mounting brackets use a durable gloss black powdercoat finish.

ADJUSTABLE AXLE WRAP CONTROL

These new RECOIL traction bars are built to the highest standards featuring quick and easy adjustment while installed on the vehicle. To adjust spring tension, use the supplied spanner wrenches at the axle to loosen the jam nut. From there the main bar can be rotated to load or unload the springs at the frame side of the bar. Using the concave end of the wrench handle against the frame end check the location of the end of the main bar in relation to the notches on the wrench to verify the load on the springs, the shorter the distance the more loaded the springs are. Repeat this process on the other traction bar and use the wrenches to tighten down the jam nuts and you are ready to go!

Notes

1. Fits 0-6" of rear lift
2. Will NOT work on standard cab models
3. Will fit Single and Dually rear wheel models
4. Designed to work on vehicles with 4" to 8" of lift.
5. Fits 4" Rear Axle Models Only
6. Fits Single Rear Wheel (SRW) Models Only
7. Fits crew cab, all box sizes
8. Will work with vehicles equipped with factory rear sway bar
9. Fits Double Cab Short Box & CrewMax Short Box models
10. Requires 2" Rear Bump Stop Extension
11. Includes (1) 123409 Traction Bar Box Kit & (1) Mounting Kit
12. Will not work with long bed models

FIXED TRACTION BARS

- Reduce Rear Axle Wrap
- Tubular Design for Optimal Strength and Appearance
- Bars are Constructed from 1.25 OD x 1/8" Wall Steel Tubing
- Application Specific Mounting Brackets Made from 3/16" Steel Plate
- Durometer Specific Polyurethane Bushings
- Includes BDS's "No Fine Print" Lifetime Warranty

BLOCK KITS, LEAF SPRING ANTI-FRICTION PADS, DEGREE SHIMS, LEAF SPRING ALIGNMENT CLAMPS, CENTER PINS

STANDARD BLOCKS

- Blocks are made of cast iron for strength
- Tapered for correct pinion angle
- Steel pin and hole are offset to restore axle position
- Blocks come in pairs
- 2", 3", 4", 5" blocks are black powder coated

Notes

1. 5/8" and 1" blocks are made to be attached directly to the leaf pack via the center pin. Order center pins separately. See Page 167.
2. Lift blocks are for rear axles only!
3. Not for use with Quadra-Steer rear axles.

SHIMS

PART#	DESCRIPTION
228000	2" x 4 Degree Shim
228001	.25" x 4 Degree Shim
228006	.25" x 6 Degree Shim
228013	3" x 4 Degree Shim
228016	3" x 4 Degree Shim (Triple Center Pin)

Note: Shims are designed to be bolted to springs. Order center pins separately.

LEAF SPRING ANTI-FRICTION PADS

#129007	2" Wide Pads
#129008	2.5" Wide Pads
#129009	3" Wide Pads

Notes: Will only fit BDS leaf springs. All of these kit #'s come with 10 individual pads.

Note: Due to the amount of lift achieved by BDS Systems you may encounter tire to fender/flare interference.

THIS GUIDE IS TO BE USED STRICTLY AS A REFERENCE!

Footnotes

- May require new alignment eccentrics to align after kit installation.
- Exhaust modification is required.
- Minor trimming required.
- If equipped with factory 17" wheels, then must replace with aftermarket 17" wheels. Do not downsize from any OEM wheel size!
- Bumper spacer kit #123020 required to run 38" tires.
- 18" Wheels with 5" backspacing should be test fit for tie rod to wheel clearance.

The times mentioned above are estimates. Actual installation time will vary. Add extra time for wheel alignment, exhaust modification and driveshaft modification. These times are based on installation performed by an ASE certified mechanic who is familiar with the particular kit, has access to all necessary tools and equipment, and is safely installing a kit on a relatively clean and rust free vehicle. Note: Due to these factors BDS is not responsible for any estimates of time and/or dollars relative to this guide or any other reference to installation of any BDS Product.

- Always follow the recommendations of the individual tire and wheel manufacturers. Tires are generally designated by series and actual physical dimensions may vary.
- Most suspension systems will settle after installation and clearance will be reduced. When selecting a tire size, be sure to leave extra clearance for this to occur.
- Installation of a larger diameter tire may reduce the life of original OE suspension, steering, or related components. These items are not the responsibility of BDS Co.
- Larger tire diameters can cause premature wear of the clutch and/or transmission.
- Larger diameter tires may require recalibration of the speedometer and/or the anti-lock braking system and will reduce engine RPM throughout the range of the engine.
- Backspacing is defined as the measurement from the hub mounting surface to the extreme back edge (toward center of vehicle) of the wheel, not the bead seat. Some wheel manufacturers do not follow this definition, so always check clearances before operating the vehicle.
