

JEEP

JEEP WRANGLER JK KITS

2" SPACER KIT

- Polyurethane coil spring spacers retain OE ride quality
- Front and rear bump stops
- Rear brake line relocation kit
- Choice of BDS NX2 or FOX 2.0 Shocks

2" SYSTEM INCLUDES

- Front and rear Pro-Ride coils
- Front and rear bump stops
- Front lower octocam lock kit included
- Rear brake line relocation
- Front Sway Bar Links

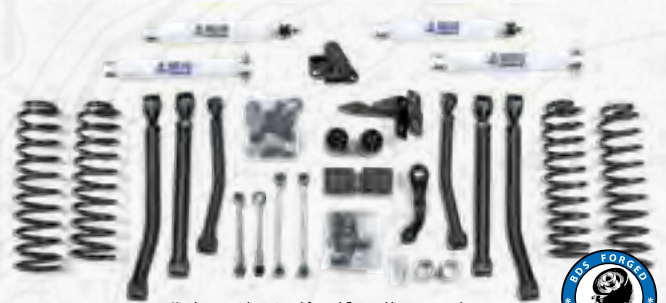

3" SYSTEM INCLUDES

- Front and rear Pro-Ride coils
- Front sway bar ultimate disconnects, for links
- Rear track bar relocation
- Front and rear bump stop extensions
- Brake line extensions
- Choice of BDS NX2 or FOX 2.0 Shocks
- Front lower octocam lock kit included

3" Exhaust Spacers for 2012-2017 JK

Kit shown with optional forged flex end lower control arms (Standard kit uses fixed lower arms)

4" - 4.5" SYSTEM INCLUDES

- Front and rear Pro-Ride coils capable of full coil bind
- Front ultimate sway bar disconnects and rear solid links
- Front track bar relocation designed to work with the new dropped pitman arm
- Front lower control arms included to restore caster
- Rear upper adjustable and lower fixed arms to properly center the axle in the wheel well and allow for pinion adjustment
- Front and rear bump stop extensions
- Rear track bar relocation to properly center the axle
- Choice of BDS NX2 or FOX 2.0 Shocks

4" - 6.5" LONG ARM SYSTEM INCLUDE

- Long Arm 4-Link geometry offers superior on and off road control
- 1/4" steel 4-Link mounting brackets utilizing BDS multi-mount system
- Pro-Ride coils capable of being fully compressed and always coming back to original height
- Fully adjustable upper and lower heavy wall tubular control arms with Clevite rubber bushings and forged flex ends
- Front ultimate sway bar disconnects, rear sway bar brackets for easy one handed operation, rear sway bar brackets
- Front and rear track bar bracket or available Adjustable Track Bars
- Front and rear stainless, braided, Kevlar lined brake lines
- Choice of BDS NX2 or FOX 2.0 Shocks

Notes

- Will not fit 2wd models.
- The fixed front and rear lower control arms can be upgraded to the flex or adjustable arms listed in the accessories.
- The front driveshaft is maxed out at full droop and on certain models the driveshaft boot can contact the transmission pan. Replacement of the front driveshaft is recommended.
- Removing the OE spring isolators will result in a 1" lift if desired.
- 124408 rear track bar or 124308 rear track bar relocation is recommended if using factory wheels.
- The front and rear driveshafts are maxed out at full droop. The front driveshaft boot can contact the transmission pan at extreme articulation on some models. Replacement of the front and rear driveshafts is recommended.
- Exhaust modification may be required.

Notes

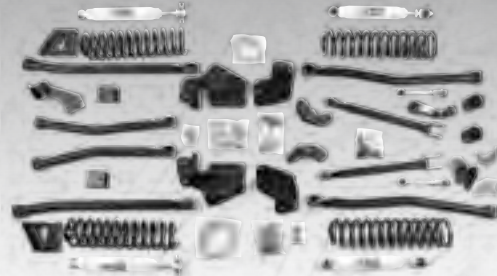

- Will not fit 2wd models.
- The fixed front and rear lower control arms can be upgraded to the flex or adjustable arms listed in the accessories.
- The front driveshaft is maxed out at full droop and on certain models the driveshaft boot can contact the transmission pan. Replacement of the front driveshaft is recommended.
- Removing the OE spring isolators will result in a 1" lift if desired.
- 124408 rear track bar or 124308 rear track bar relocation is recommended if using factory wheels.
- The front and rear driveshafts are maxed out at full droop. The front driveshaft boot can contact the transmission pan at extreme articulation on some models. Replacement of the front and rear driveshafts is recommended.
- Exhaust modification may be required.

Notes

- Models with manual transmissions may need shifter opening in the floorboard enlarged.
- Stabilizer and front lower control arms are highly recommended.
- A slip yoke eliminator kit and CV style rear drive shaft is required.
- May require exhaust modification.
- Some welding required.
- Long Arm systems also fit short wheel base Rubicon models (not Unlimited models)

4.5" ULTIMATE KIT FEATURES

- (8) Fully adjustable Gen II control arms with rubber bushings and forged flexed ends
- Front and rear D.O.T. approved, Kevlar lined, stainless steel brake lines
- Front ultimate sway bar disconnects and rear solid links
- Bump stop extensions
- Rear track bar relocation kit
- Front adjustable track bar
- Pitman Arm

Vehicle Specs: 6.5" Long Arm Kit - 35" M/Ts - 15" Streetlocks

6.5" Long Arm Kit

6.5" LONG ARM KIT FEATURES

- True 4-link long arm design to give you castor control through wheel travel
- All control arms come with forged flex joints for extreme wheel travel
- New adjustable front track bar included and a relocation system to match angles with the supplied dropped pitman arm
- OEM style rubber bushings
- Front and rear braided stainless steel, kevlar-lined brake lines

2003-2006 JEEP WRANGLER TJ UNLIMITED & RUBICON

4.5" ULTIMATE KIT FEATURES

- ProRide coils and bump stop extensions
- (8) adjustable upper/lower, front/rear control arms with forged flex ends
- Forged pitman arm to correct steering angle
- Front and rear adjustable track bars to recenter axles
- Front ultimate sway bar disconnects and rear links
- Front and rear braided stainless steel, kevlar-lined brake lines

JEEP WRANGLER TJ ACCESSORIES

CONTROL ARMS

After more than a year of development and testing, BDS Suspension is proud to announce the next generation of Jeep control arms is now available for popular Jeep JK, TJ, XJ, MJ, WJ and ZJ applications.

The new BDS control arms come fully assembled and sold in pairs. They also come standard in new BDS long arm and short arm lift kits, see specific kit applications for more information.

THE BUSHING DEBATE... RUBBER VS. POLY

BDS now offers control arms with the option of interchangeable vulcanized rubber bushings or dual fluted greaseable urethane bushings. The new rubber bushings are durometer specific, OEM quality vulcanized Clevite rubber bushings for improved longevity and reduced noise. The new control arms are offered in fixed and adjustable lengths, with your choice of pre-installed rubber bushings or greaseable polyurethane. Arms are built from 1-3/4" OD x .250 wall tubular steel and formed for optimal performance. Rubber/Poly bushing kits are interchangeable and can be purchased separately.

UPPER CONTROL ARMS

TJ LOWER ARM SKID PLATES

Weld-on lower control arm skid plates made of 3/16" steel to strengthen and protect the front lower arm pockets
 #124014.....82JK23

TJ STEERING BOX SKID PLATE

Tight clearance design to maintain ground clearance while adding full protection. For Saginaw box only.
 #124051.....78JK35

#124051

1997-2006 HIGH CLEARANCE BELLY PAN

BDS's "belly up" style skid plate is built for off-road abuse. Constructed from 3/16" steel with corner gussets, this belly pan skid increases ground clearance and is designed to add underbody protection. The kit works on stock height Jeeps as well as in conjunction with most short arm lift kits and BDS long arm kits. Unlike other belly up skids on the market, the BDS Belly Skid Plate includes a low profile transmission mount which allows for additional ground clearance without requiring a motor mount lift. Fits 6 cylinder TJs, except '03-06 automatics. Rubicon models require minor modification. Will not work in conjunction with t-case drop kits or on 4 cylinder models.
 #124045.....78JK34

#174001

BUMP STOP EXTENSIONS

Extended Length Bump Stops
 Black urethane bump stops - pair
 #174001.....34JK82

6" ULTIMATE KIT FEATURES

This kit comes with the BDS 6" front and rear Glide-Ride Leaf Spring Suspension System. These spring feature tapered leaves, anti-friction pads, bolt style leaf alignment clamps and a full military wrap to protect your spring eyes from the rocks. If you are actually capable of breaking the main leaf, the military wrap will allow you to limp home off the trail. These springs are made to perform offroad as well as get you to and from work.

Vehicle Specs: 4.5" Lift Kit - 35" M/T MTZ - 15" M/T Sidebiter

Notes

1. May require driveshaft lengthening for 13" (u-joint to u-joint) driveshaft.
2. May require larger diameter driveshaft if equipped with a 41-1/2" front driveshaft.
3. Extended shackles recommended to clear military wrap.
4. Models with accessories like hardtop, rear tire carrier, roof rack etc., should use #004351 springs on front and rear.
5. When combining lifted shackles with a 3.5" suspension system, a tail shaft eliminator kit and a "CV" style rear driveshaft may be required to eliminate driveline vibration.
6. A tail shaft eliminator and CV style rear drive shaft is required and it may be necessary to lengthen the front driveshaft.
7. #124015 front stem eliminator required to use FOX 2.0 Shocks.
8. Includes pitman arm for power steering equipped models only.

Notes
 1. #083402 Pitman arm will increase turning radius (cannot turn as sharp).
 2. Not recommended for Wagoneers or Cherokees with front and / or rear track rods.
 3. 1974-1975 models must have 131" wheelbase and 7200# GVWR or more for #004408 rear springs to fit.
 4. Some 1974 J20's with stock 401 come with a rear 15/16" spring eye stud.
 5. #004402 and #004408 come with OE rubber bushings installed.
 6. Rear shock mount may need to be relocated.

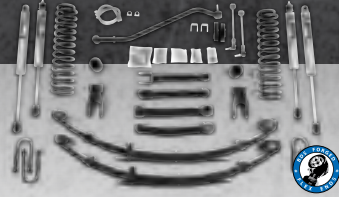

1984-2001 JEEP CHEROKEE XJ 2WD/4WD

6.5" Long Arm Kit

4.5" Long Arm Kit

4.5" Kit

6.5" & 8.5" LONG ARM SYSTEM FEATURES

- Heavy-duty, high clearance belly pan for the ultimate in protection and support
- No welding to the uni-body required
- Extended length upper and lower control arms create a true long arm 4-link system
- Stainless steel Kevlar lined brake lines included
- BDS Ultimate Sway Bar Disconnects
- Rear 5" leaf springs with extended length shackles for some serious flex
- Adjustable upper control arms with flex joints
- Adjustable lower arms built to handle off road abuse
- Extreme dropped pitman arm working with a relocated adjustable track bar for smooth controlled steering

4.5" LONG ARM SYSTEM FEATURES

- Heavy-duty, high clearance belly pan for the ultimate in protection and support
- No welding to the uni-body required
- Extended length upper and lower control arms create a true long arm 4-link system
- Stainless steel Kevlar lined brake lines included
- BDS Ultimate Sway Bar Disconnects
- Rear 5" leaf springs with extended length shackles for some serious flex
- Adjustable upper control arms with flex joints
- Adjustable lower arms built to handle off road abuse
- Adjustable track bar for smooth controlled steering

3" SYSTEM FEATURES

- 3" Pro-Ride coil springs and rear Glide-Ride add-a-leaf or leaf springs
- Transfer case lowering kit corrects driveline vibration
- Front sway bar links included

4.5" SYSTEM FEATURES

- Box kit includes heavy-duty adjustable upper and lower control arms
- Kevlar lined, DOT approved, stainless steel brake lines are included
- A front adjustable track bar is included to properly center the axle
- Ultimate sway bar disconnects are included to ensure on road stability while allowing for off-road capability
- The rear is lifted via BDS 3" Glide-Ride rear springs and a 1" rear shackle to assist with maximum articulation

#124014 - LCA Skid Plates

PN2001 - JKS Quicker Disconnects

* Base kit # includes options for 97-01 model with Chrysler 8.25 rear axle.

Notes

1. Measure the rear u-bolts before ordering. Some XJ's are equipped with a Dana 44 rear axle.
2. Transfer case lowering kit is not required for 2WD models.
3. CV style rear driveshaft (not included) and slip yoke eliminator kit is required.
4. System only works with 4.0L motor and automatic transmission.
5. Some welding required.
6. '96 and earlier models may require a longer emergency brake cable.
7. 124656 will only work with NP231
8. Will produce tail-high stance by 1.5".

2005-2010 JEEP GRAND CHEROKEE WK 4WD

2" UPPER STRUT MOUNT FEATURES

- This kit comes with new front upper strut mounts that add a small amount of pre-load as well as relocate the strut. This maintains the smooth stock ride while offering a little extra for off road performance
- Rear upper coil mounts increase height while maintaining factory ride

Vehicle Specs: 2" Lift Kit - 265/70r17 MTZ - 17x9 M/T Sidebiter (Trimming required)

2005-2010 JEEP GRAND CHEROKEE WK/ COMMANDER XK 4WD

Notes

1. Measure front driveshaft, over 24-1/2" - no modifications should be necessary, 20 to 24" you may need to change to spicer type joint if vibration occurs. If driveshaft is less than 20" then a spicer type joint is required and vibration may persist.
2. Vehicles equipped with V8 may not achieve stated height.
3. If you do not want to drop the transfer case, an aftermarket slip yoke eliminator and CV style rear drive shaft is required.
4. If equipped with CV style drive shaft mount at front pinion, then a new spicer type joint is required to eliminate vibration.
