

ORDERING INFORMATION

Bushwolf Camouflage™ is sold in 3 different sizes for each pattern. Our Small, Medium and Large patterns give you the ability to choose the actual size of the pattern itself.

You'll also need to choose the amount of camo you want by the running foot. For example if you want the medium sized pattern, choose -26" Medium- and then choose the number of running feet you want under the "Quantity" option in the cart. Qty of 1 = 1 feet, 2 = 2 feet, etc.).

12"
SMALL PATTERN

The 12" - Small camo will have the smallest pattern we offer. This pattern is made for wrapping smaller items and still having the camo visible. For example if you try to wrap an ipad with the 52" Large Camo, you may only get a single leaf or a single branch on the finished ipad wrap.

This size is ideal for items such as:

- Smart Phones
- Ipads and Tablets
- Game Controllers

Because Bushwolf Camouflage™ patterns don't repeat there are maximum lengths that can be ordered on a single sheet.

! 12" -Small- Max Length is 6 feet.

26"
MEDIUM PATTERN

The 26" - Medium camo will have a medium sized pattern. This pattern is made for wrapping any items that are in between the largest and the smallest items. For example the 26" Medium camo works great for small tool boxes, mailboxes & vehicle interior trim wraps.

This size is ideal for items such as:

- ATV's
- Motorcycles
- Small to Medium Tool Boxes
- Mailboxes

Because Bushwolf Camouflage™ patterns don't repeat there are maximum lengths that can be ordered on a single sheet.

! 26" -Medium- Max Length is 12 feet.

52"
LARGE PATTERN

The 52" - Large camo will have the full scale sized pattern. This pattern is made for wrapping vehicles, refrigerators or any items that will work well with a full sized camo pattern. This is the scale of camo you would typically see printed on camo clothing such as shirts, pants or vests.

This size is ideal for items such as:

- Vehicle Wraps
- UTV's
- Refrigerators
- Man Cave Furnishings (tables, etc.....)

Because Bushwolf Camouflage™ patterns don't repeat there are maximum lengths that can be ordered on a single sheet.

! 52" -Large- Max Length is 13 feet.

THE BUSHWOLF™ DIFFERENCE

Compare Bushwolf NON-REPEATING Camo to the other leading camo patterns and one thing will become obviously clear. Our competitor's patterns are used primarily in the garment business and other small scale printing so they've only ever created a small swatch of each of their patterns. In order for them to cover a large surface such as a vehicle or even a refrigerator they have resorted to simply repeating the pattern 10 or fifteen times to make it look bigger. The results are something similar to a quilt-like repetitiveness. Bushwolf patterns do not repeat. Our patterns have been created from the ground up with the idea that if nature doesn't repeat, why should your camo?

Bushwolf™ non-repeating patterns provide total outline Obliteration™. Unrivaled depth and true to life natural outdoor hues that come together while twisting in defining elements of what our breed is all about. This is camouflage like you've never seen before.
