

GasAlert MicroClip

multi-gas detectors

Multi-gas made easier

The easy to wear, slim and compact GasAlertMicroClip provides affordable protection from atmospheric gas hazards. For standard operation with features you can count on, opt for the GasAlertMicroClip XT. For extended battery life, especially in cold weather, choose the GasAlertMicroClip XL. Both offer visual compliance at a glance with the flashing, green IntelliFlash™. Easy one-button operation reduces training time and lets workers focus on the job at hand. For simple, cost-effective management of your records, calibration and bump testing, choose BW's MicroDock II automatic test and calibration system and Fleet Manager II software.

GasAlert
MicroClip XL

GasAlert
MicroClip XT

- Easy and comfortable to wear; thin and lightweight
- Easy operation and straightforward training with one-button simplicity
- Easy visual compliance with flashing, green IntelliFlash™
- Easy and cost effective to own

WATER RESISTANT

BW
Technologies
by Honeywell

Wear yellow. Work safe.

Additional GasAlertMicroClip features:

- Choose the GasAlertMicroClip XL for cold weather performance
- IntelliFlash™ verifies operation and compliance to both the user and supervisor
- Tamper-proof, one button operation
- Powered by a rechargeable lithium polymer battery

Standard features of BW multi-gas products:

- Continuous LCD shows real-time gas concentrations
- Compact and lightweight design makes it comfortable to wear
- Water-resistant
- Simple automatic calibration procedure; compatible with BW MicroDock II automatic test and calibration station
- Full function self-test of sensor, battery status, circuit integrity and audible/visual alarms on start up
- Bright wide-angled visual alarm bars
- Built-in concussion-proof boot
- Multi-language support in English, French, German, Spanish and Portuguese
- Conveniently manage your fleet using Fleet Manager II

GasAlertMicroClip Specifications

	GasAlertMicroClip XL	GasAlertMicroClip XT
Size	4.4 x 2.4 x 1.2 in. / 11.3 x 6.0 x 3.1 cm	4.4 x 2.4 x 1.1 in. / 11.3 x 6.0 x 2.9 cm
Weight	6.7 oz. / 190 g	6.0 oz. / 170 g
Temperature	-4 to +122°F / -20 to +50°C	
Humidity	0% - 95% RH (non-condensing)	
Alarms	- Visual, vibrating, audible (95 dB) - Low, High, STEL, TWA, OL (over limit)	
Tests	Audible/visual alarms on activation; sensors, battery and circuitry (continuous)	
Typical battery life*	18 hours Recharges in less than 6 hours	10 hours Recharges in less than 4 hours

Alarm setpoints for all sensors are user adjustable. Setpoints are automatically displayed during instrument start up.		

Overview / Talking Points for Distribution Partners – GasAlertMicroClip XL

Distributors to Share with their Teams:
Inside Sales, Outside Sales, Service

About the NEW GasAlertMicroClip XL

The GasAlertMicroClip XL is an addition to the GasAlertMicroClip line of portable multi-gas detectors offered by BW Technologies by Honeywell.

Both the new GasAlertMicroClip XL detector model and the existing GasAlertMicroClip XT model will be offered in the line. Choose up to four gases to detector for simultaneously:

What's the XL difference?

Both XT and XL models come equipped with a rechargeable battery. The new XL model offers an enhanced battery to serve customers with extra-long shifts, even in extreme weather.

What makes the new GasAlertMicroClip XL model easy to sell?

It's the only multi-gas detector that offers the combination of these four values: best-in-class comfort, best-in-class price, best-in-class ease of use, along with a battery run-time enduring longer shifts in harsh environments.

If customers own an XT model already, it's seamless; no need to invest in new accessories or training.

Both XL and XT are offered in the same gas combinations (1, 2, 3 or 4 gases) and use the same replacement sensors. Choose yellow or black.

Detect for up to four atmospheric gas hazards simultaneously

- Hydrogen Sulfide (H₂S)
- Carbon Monoxide (CO)
- Oxygen (O₂)
- Combustible Gases (%LEL)

Choose GasAlertMicroClip XL for longer shifts or for use in cold weather

GasAlertMicroClip XL battery run-time is 18 hours and is cold weather tested to last 12 hours at 4°F / -20°C after 2 years.

Customers that already own XT model accessories or a MicroDock II docking system with a GasAlertMicroClip XT docking module do not have to buy new equipment. The GasAlertMicroClip XL detector fits right in and works right away. No new steps. Easy.

Both GasAlertMicroClip XL and XT models are ...

Easy to wear

- ultra-comfortable, thin and lightweight

Easy to use

- one-button simplicity keeps operation simple and training straightforward

Easy for compliance

- supervisors and users see status at a glance with flashing, green IntelliFlash™

Easy to manage

- using Fleet Manager II software and MicroDock II automated bump testing, calibration and record management docking system.

Easy on the wallet

- affordable upfront and cost effective to own

XL models have more battery power than ever but you can't tell the difference in size or weight.

Both XL and XT detector models operate identically.

Both XL and XT detector models are compatible with existing Fleet Manager II software – versions higher than 3.4.2 have updated report labels that include XL labelling

Promo Pricing

For a limited time BW is offering an instant rebate off introductory list price for any GasAlertMicroClip XL detector. With the rebate, BW list price for the XL and XT models are the equivalent during the promotional period.

New to selling gas detection? Keep this in mind:

The GasAlertMicroClip XL is the easiest portable multi-gas detector to sell.

1. What gases does your customer need to detect?
2. What run-time does your customer require for the rechargeable battery?
3. What about a MicroDock II docking system for automated bump testing, calibration and data management?
4. Does your customer need calibration gas and a regulator?
5. And don't forget to ask about accessory needs such as confined space kits, carrying and protective options, sampling and testing equipment, charging options, IR DataLink for data download and MicroDock II docking system options etc. (See the full Order Sheet for details.)

Introducing the ONE multi-gas detector that checks all your boxes:

GasAlert **MicroClipXL**

NEW!

Multi-Gas Detector Checklist

- Easy to Wear
- Easy to Use
- Easy on the Wallet
- Enhanced Battery Performance 

GasAlert **MicroClipXL**

It's easy to sell!

The NEW GasAlertMicroClip XL offers the same great features as the GasAlertMicroClip XT multi-gas detector and for a limited time at the same great price. The GasAlertMicroClip XL is unlike any monitor enabling you to offer it all: best-in-class comfort, simplicity, affordability and enhanced battery performance for long shifts, even in extreme weather conditions. Check. Check. Check. Check. It's that easy.

Have an existing GasAlertMicroClip XT customer? It's seamless.

The GasAlertMicroClip XL is fully compatible with any existing GasAlertMicroClip XT model accessories customers already own, including GasAlertMicroClip XT docking modules for MicroDock II docking systems.

*Offer applies to orders placed on or before December 31, 2014 within the United States and Canada only. Applicable to GasAlertMicroClip XL model detectors (order number prefix MCXL-) only. Enjoy a \$20 instant rebate off the promotional introductory list price of all GasAlertMicroClip XL models (4-, 3-, 2- and 1-gas) during offer period. Pricing and promotional conditions are subject to change without notice. Normal distributor discounts apply to the instant rebate list price.

GasAlert MicroClip

The *GasAlertMicroClip* provides affordable and easy to wear protection. For standard operation with features you can count on, opt for the *GasAlertMicroClip XT*. For extended battery life, especially in cold weather, choose the *GasAlertMicroClip XL*.

Choose any sensor combination for your *GasAlertMicroClip* multi-gas detector, which comes with a battery charger for your specific region. A variety of accessories and spares are available to complement your detector and suit your application, such as confined space kits, carrying accessories, power options, docking station systems and sampling/testing equipment.

Standard Package Contents

- GasAlertMicroClip
- Rechargeable battery
- Wall outlet charging adaptor
- Calibration/test cap and hose
- Manual
- Multi-language CD manual

Confined Space Kit includes

- Leather carrying case
- IR connectivity kit with Fleet Manager II software
- 0.5 LPM regulator
- Auxiliary filter kit
- Manual aspirator kit
- 10 ft. / 3 m sampling hose with quick connect
- Calibration cap with 1 ft. / 0.3 m hose with quick connect
- Sampling probe
- Hard-sided carrying case with insert pockets and foam case insert

F	Replacement screws (kit of 20)	MC-SCREW-K1

How to Replace a Sensor

1. With detector OFF, use No. 1 Phillips screwdriver to remove 6 screws from back enclosure (E)
2. Lift back enclosure (E) straight up
3. Use No. 1 Phillips screwdriver to remove 2 screws from back of PCB (D)
4. Lift PCB (D) together with battery and sensors (C, G, H, I) straight up
5. Remove sensors (C, G, or H) by sliding out or sensor (I) by pulling straight up from PCB (D)
6. Insert new sensor (C, G, H, I) into PCB (D)
7. Replace PCB (D) and 2 screws and hand-tighten until firm
8. Replace back enclosure (E)
9. Replace 6 screws in back enclosure (E) and hand-tighten until firm

How to Replace the Sensor Screen

1. With detector OFF, use No. 1 Phillips screwdriver to remove 6 screws from back enclosure (E)
2. Lift back enclosure (E) straight up
3. Use No. 1 Phillips screwdriver to remove 2 screws from back of PCB (D)
4. Lift PCB (D) together with battery and sensors (C, G, H, I) straight up
5. Remove sensor screen (J) from front enclosure (B)
6. Insert new sensor screen (J) into front enclosure (B)
7. Replace PCB (D) and 2 screws and hand-tighten until firm
8. Replace back enclosure (E)
9. Replace 6 screws in back enclosure (E) and hand-tighten until firm
