# About Camco

Camco started in 1966 with one product and one employee. Don Caine and his wife Teresa, his one employee, mixed the antifreeze by hand in a 55 gallon drum with a big two by four plank. Lots of hard work, love and dedication have made Camco into the business it is today. Competitive pricing, superior service, quality products and customer satisfaction are the foundations upon which Camco operates.

Camco has always held a commitment to its employees and its country. It boasts over 1,000 employees and six separate manufacturing facilities in the United States, where it creates and assembles many of its 4,000+ products. By working with inventors, entrepreneurs and small businesses, Camco has been able to bring and keep products in the market. Camco takes pride in meeting the ever changing demands of a challenging marketplace while maintaining its strong reputation of quality products and customer satisfaction.

**Superior Ice Retention**

Currituck Tumblers are made of durable, high quality, kitchen-grade 18/8 stainless steel with vacuum insulation. The layer of vacuum insulation between the walls provides superior ice retention, and ensures that the tumbler won't sweat, no matter how cold your drink and how hot the day. The vacuum insulation is also great for keeping hot drinks hot. These tumbler walls don't let heat out or in, perfectly maintaining the desired temperature of your drink. The Eastman Tritan BPA-free lid has a built-in gasket that helps prevent temperature loss and leaks, and all sizes fit in most standard cup holders.

**How it Works**

Currituck Tumbler has a double-wall, vacuum insulated design that creates a vacuum in between two walls of high quality, kitchen grade stainless steel. That vacuum helps prevent heat from getting in or out, meaning that you can keep your drink at the desired temperature- hot or cold- for much longer than standard tumblers or cups. The lid is constructed of Eastman Tritan BPA-free material and has a built-in gasket that helps seal in temperature and prevent leaks from around the edges of your cup.

Armada AquaBlock uses virtually the same fluorocarbon technology as the fabric manufacturers do to last an entire season. Application is therefore more effective, durable and easier to use than a less compatible agent. AquaBlock has been independently laboratory tested against the three leading waterproofing products in the marine industry and was found superior.

WDH with Adjustable Sway Technology®

**RECURVE R3** A weight distribution hitch that features adjustable sway technology. By simply adjusting the clamp, you can decide how much sway control is exerted on the trailer. The ReCurve R3 will distribute the weight of your trailer evenly across the axles of the tow vehicle and provide as much sway control as you choose. Or, turn the sway control completely off in dangerous or icy road conditions. Its top-loading spring bars give it more ground clearance than other hitches, and the streamlined design makes the hitch and the trailer move as one, while creating a sleek look. # RECURVE<sup>®</sup>

WDH with Adaptive Sway Technology<sup>®</sup> WDH

**RECURVE R6** Our most user friendly weight distribution hitch, and it features premium adaptive sway technology. With other sway control hitches, turning can be an even bigger hassle than it usually is with a trailer because the sway control “locks” the trailer straight. With the ReCurve R6, the hitch will control your sway for normal driving, but when you turn, the sway control will automatically disengage, making maneuvering smoother and easier on the driver. The sway control can easily be turned completely off in dangerous or icy road conditions. Its top-loading spring bars give it more ground clearance than other weight distribution hitches, and the streamlined design makes the hitch and the trailer move as one, while creating a sleek and subtle look. Hitch ball included.

- 48733 1,000 lb Hitch Kit
- 48734 1,200 lb Hitch Kit
- 48779 600 lb Hitch Kit, 2" Ball

Sway resistance is increased as needed and automatically disengages for turning and maneuvering.

## Innovative Weight Distributing Hitch with Adaptive Sway Technology

- Adaptive sway resistance
- Noise suppressed

### Easy On/Off Sway Control

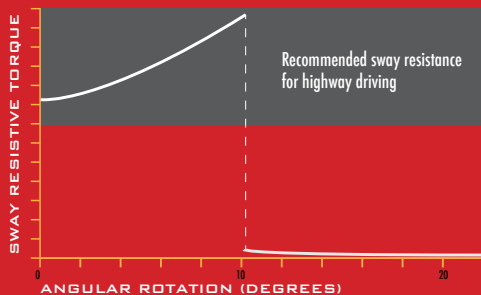

- Distribution bars are easy to move into place
- Turns off quickly for dangerous road conditions

### Automatic Sway Control Disengagement

- Disengages for tight maneuvering
- Decreases wear

Eaz-Lift's Trekker hitch is designed with Adaptive Sway Technology

Sway resistance is instant when driving on the highway. Trekker reacts and increases resistance as needed when challenged with wind gusts and passing trucks. When taking sharper turns or tight maneuvering where sway control is unnecessary, Trekker disengages sway for improved handling.

**EAZ-LIFT TREKKER** The perfect combination of premium weight distribution and sway control in an easy-to-install hitch. Trekker utilizes adaptive sway technology which goes above and beyond that of the competitors' weight distribution hitches. When towing and challenged with wind gusts and passing trucks, the Trekker reacts and increases resistance as needed! During sharp turns and maneuvering, when sway control is unnecessary, the Trekker disengages sway control completely for improved handling. When towing in dangerous conditions, such as slippery or icy roads, sway control is unwanted. Trekker's easy on/off sway control makes it a breeze to manually disengage. This feature also comes in handy when hooking-up and unhooking. Includes High-Low Shank.

**ROUND BAR WEIGHT DISTRIBUTING HITCHES** Over five decades ago, Eaz-lift became the first patented weight distributing system in North America. Designed with fewer parts, forge-tapered round spring steel bars provide a smoother ride with interchangeable bars that have positive latching action for operation. Eaz-Lift has a broad selection of weight distributing hitches that include right and left hand sway control mounts and bolt together ball mounts providing adjustability of ball height and ball mount angle. Each hitch includes hook-up brackets, spring bars, chains, ball mount, shank and hitch pin, clip and bolt package for adjustable hitches.

## Why Eaz-Lift Sway Controls are better than cam-action type sway controls:

- Eaz-Lift Sway Controls do not create noise problems as does the cam-action type.
- Eaz-Lift Sway Controls do not reduce road clearance.
- Eaz-Lift Sway Controls are easily released when road conditions do not warrant their use...unlike cam-action type sway controls that depend upon hitch weight to operate and cannot be released on icy and oily road conditions where straight line action would possibly impair driving control.
- Eaz-Lift Sway Controls do not lose sway control ability during turns.

**EAZ-LIFT SWAY CONTROLS** Sway Controls minimize sway caused by passing trucks and sudden wind gusts, and do not lose control ability during turns. Double friction pads provide constant sway abatement. Eaz-Lift Sway Controls attach with easy socket and spring clip connectors remove for easy storage. **NOT FOR USE ON TRAILERS WITH SURGE BRAKES.** Trailers over 25' long or smaller broad-sided trailers may require two Sway Controls. Use left hand Sway Control part number 48381.

**48380** Sway Control, Right-Mounted Pass. Side

**48381** Sway Control, Left-Mounted Driver Side (includes one 48390 Ball Mount Bar)

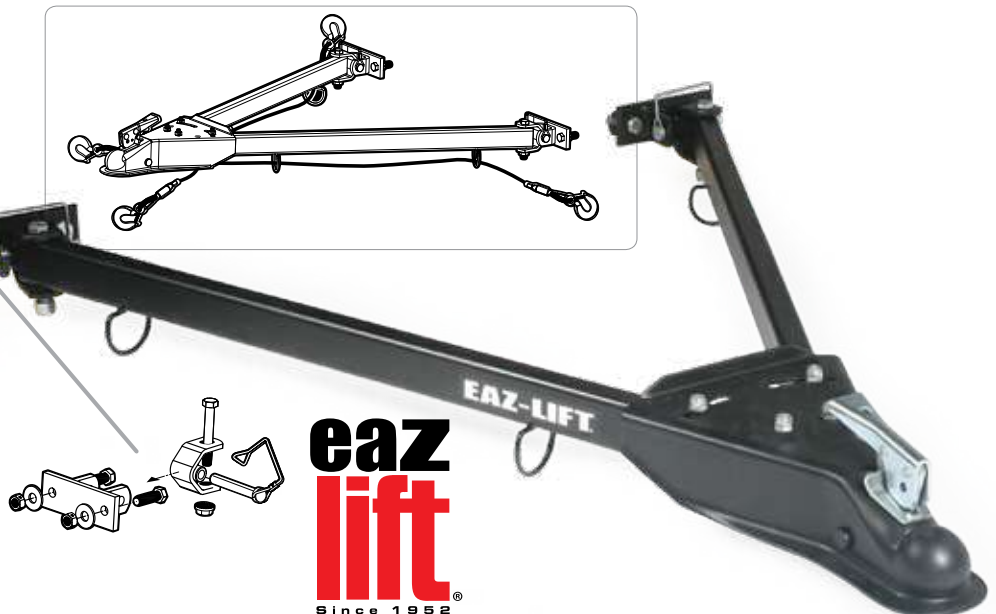

**Note: some vehicles require custom base plates.**

NOTE: THIS TOW BAR IS TO BE INSTALLED BY A PROFESSIONAL INSTALLER/FABRICATOR EXPERIENCED IN SELECTING VEHICLE ATTACHMENT AREAS WITH ADEQUATE STRENGTH.

**TOW BAR** Rated at 5,000 lb GVW for towing pick-ups, cars and multi-purpose vehicles. Designed and constructed for universal fit, with adjustable arms that extend from 24" to 41". The Tow Bar comes with all zinc-plated hardware. The quick disconnect pull pins allow for easy removal and the collapsing side arms afford trunk storage. A 2" ball is required. The Tow Bar is boxed, completely assembled.

**MAGNETIC HITCH ALIGNMENT KIT**

Camco's Magnetic Hitch Alignment Kit is designed for one-person hook-up on the first try every time. Easily visible balls take the guesswork out of linking up your hitch. Attach one guide to the tow vehicle and one to the trailer. Guides extend to 50" for easy viewing, and a swivel base allows the guides to be positioned directly above hitch and receiver. This system works with virtually any tow vehicle and any trailer: gooseneck trailers, fifth wheel trailers, horse trailers and boat trailers.

**EAZ-LIFT TOWING KIT**

The Eaz-Lift Towing Kit is a ready to use hitch mount designed for 2" hitch receivers. Includes a convenient no-mess storage case for all included parts. The heavy-duty tow kit has a 5000 lb towing capacity and is designed for use with Class III Trailers.

**51952** 2" Ball and 5/8" Pin w/ Plastic Case

**BALL MOUNTS** Ball mounts are 2" x 2" and are used to convert a receiver from a weight distributing hitch to a weight carrying hitch. Ball mounts create a ball platform for attaching a hitch ball. The ball mounts or utility hitch bar length are determined by measuring from the center of the pull pin to the center of the hitch ball hole. The drop or rise is determined by measuring from the top of the mount to the top of the tongue. All 2" x 2" ball mount shank holes are 1", except 48282, which has a 3/4" hole.

GARDEN WATER FILTRATION

### TWIN Water Filter System

Working pressure: 20–100 PSI non-shock  
(1.4–6.9 Bar)

Operating temp.: 35°–100° F (2–38° C)

Output: 2.5 GPM (9.46 LPM)

## Improve your garden and your soil by improving the quality of the water you use

The Hydro Life Hydroponics Twin Filtration System is perfect for urban gardens, organic veggies and flowers. The two step filter system includes a 25 micron pre-filter and Catalytic Carbon filter with KDF 85 media. The pre-filter is a sacrificial filter that removes heavy sediment from water, helping to extend the life of the KDF 85 filter. The KDF 85 filter has Catalytic Carbon filtration to provide you with safer, cleaner water from any potable source and KDF 85 to help prevent bacteria growth when the filter is not in use. Removing chlorine and other contaminants from your irrigation water promotes larger and faster root growth, which translates to larger and faster plant growth and larger yields.

### Effectively Reduces

- Bacteria
- Chlorine and chloramines
- Harmful chemicals
- Salts and heavy metals
- Sediment
- Rust flakes (iron)
- Organic matter
- Sulfur

### Reverse Osmosis 100 Water Filter System

Working pressure: 20–100 PSI non-shock  
(1.4–6.9 Bar)

Operating temp.: 35°–100° F (2–38° C)

Output: 100 GPD (378.5 LPD)

## Get the most from your expensive nutrients by starting with pure water

Growing with pure water and adding nutrients at the grower's discretion makes growing more predictable. The Hydro Life Hydroponics RO 100 Filter System removes 99% of all contamination in water through reverse osmosis. This three step system includes a 25 micron pre-filter, premium Catalytic Carbon filter with KDF 85 media and hydron membrane. This RO 100 system removes the same contaminants as the Twin filter system but the addition of the hydron membrane, which rejects everything but water molecules, leaves a final product that has 99% reduction in parts per million contaminants in water. The RO 100 Water Filter System is easy to install and includes garden hose connector, mounting bracket, blue RO filtered water line, black wastewater line, white inlet line and filter wrench, all preinstalled and ready to go.
