

How It Works

Safe motorcycle riding starts with a clear view of the road ahead. Chemical Guys Clear Vision Helmet Cleaner helps riders navigate the world with crystal clarity. Normal riding conditions leaves helmets covered in bugs, water spots, road grime, and foggy film. Cleaning with the wrong products scratches up clear visors and makes riding dangerous. Clear Vision Helmet Cleaner lubricates any dirt and grime for scratch-free cleaning and wiping over clear visors, glossy plastic, shiny painted parts, matte wraps and satin decals, and even carbon fiber. The custom helmet cleaner is blended with a unique spray sealant to protect all glossy, matte, and clear parts from the elements. Protect helmets from pollution, contamination, fading from harsh UV sunlight, and any swirls and scratches from improper cleaning and wiping. Just mist a few sprays of Clear Vision over exterior helmet parts, wipe clean with a premium microfiber towel, then buff dry to perfection. Clear Vision is even safe for cleaning the inside of the visor shield for clear vision through and through. Clean and protect helmets so they can keep you safe on the road with Chemical Guys Clear Vision Helmet Cleaner & Protectant.

Clean Safety Gear For Safe Riding

Rider safety is crucial for any motorcycle enthusiast. A prepared rider should always wear the proper boots, pants, jacket, gloves, and helmet whenever riding and operating a motorcycle. Good helmet maintenance starts with a clear visor and protecting the outer skin from the harsh elements. Chemical Guys Clear Vision Helmet Cleaner & Protectant cleans, protects, and enhances all exterior helmet parts. The slick lubrication of the helmet cleaner helps remove abrasive dirt and grime from clear visors without installing any swirls or scratches that obscure vision. Clean off any exterior helmet surface like glossy plastic, bright decals, matte finishes, satin stickers, carbon fiber parts, and even vent grilles and visor gaskets. Choose the right product for the job and keep helmets clean and clear with Chemical Guys Clear Vision Helmet Cleaner & Protectant.

Protected Helmets Last Longer

Long term exposure to the elements damages and degrades helmet parts. Harsh UV sunlight fades, discolors, and weakens exterior plastic and carbon fiber shells and impact-resistant face visors. Chemical Guys Clear Vision Helmet Cleaner & Protectant is blended with optical select spray sealant technology. These protectants help reject UV rays that damage helmet pieces, and the slick finish left behind helps remove abrasive dirt and dust, and even insects and bird droppings. Clear Vision works on all helmet finishes and materials, including painted parts, clear optical plastics, glossy plastics, metal, carbon fiber, and even matte and satin finishes. Shielding exterior helmet parts from harsh sunlight with Clear Vision Helmet Cleaner & Protectant helps keep them from turning brittle and cracking, which helps them last longer.

Part Of A Full Motorcycle Gear Detail

The wide variety of build materials and textures on motorcycle gear is difficult to clean with inferior detailing products and methods. Regular gentle cleanings are easier to perform and take less time than letting gear get filthy and opting for one deep cleaning. Chemical Guys Clear Vision Helmet Cleaner & Protectant is easy to use right when messes pop up on the go, after a full detail, or right before a meet. Simply mist Clear Vision over all the exterior helmet parts to remove dirt, grime, and debris from riding on and off road. An ounce of prevention is better than a pound of cure: clean light dirt, dust, and road grime as they pop up and avoid expensive refinishing and replacements later on with Chemical Guys Clear Vision Helmet Cleaner & Protectant.

Formulated For All Motorcycles And Offroad Quads

The Chemical Guys Motorcycle Line of detailing products is designed and blended for use on all types of cycles and quads. Clean, restore, and protect any street bike, racing motorcycle, competition bike, vintage cycle, custom chopper, touring bike, supermoto, motor trike, mini and pocket bikes, motor scooter, offroad dirt bike, quad bike, dual-sport/adventure motorcycle, ATV, and even bicycles with the full lineup of products from Chemical Guys. All cycles operate in similar conditions, and are built with similar materials across the board. The full Chemical Guys Motorcycle Line of products addresses every cleaning and detailing need for all these materials on these machines. Clean, shine, and protect any cycle anywhere with the Chemical Guys Motorcycle Line.

Other Sizes Available

Clear Vision Helmet Cleaner & Protectant is also available in a [4 ounce size](#).

How To Use:

1. Ready to use - no need to dilute.
2. Close helmet visor shield.
3. Mist Clear Vision over all.
4. Wipe dirt and grime in one direction with a premium microfiber towel.
5. Buff away any streaks with a clean microfiber towel.
6. Mist a few sprays of clear vision and wipe the inside of the visor from the bottom helmet opening.
7. Buff away any streaks off the inside of the visor with a clean microfiber towel.
