# PRODUCT OVERVIEW

Gaskets and head bolts

Cabin air filter

Radial shaft and valve stem seals

Brake hoses

Vibration control parts for chassis, engine and transmission

No matter which products you choose from the Corteco product portfolio, you always receive outstanding original quality. This high quality standard is directly linked to Freudenberg and characterises our comprehensive spare parts range. Corteco offers more than 20,000 products and service kits to garages - among them leading brands such as the Simmerring® radial shaft seal. Our extensive product programme comprises oil seals, valve stem seals, flat gaskets and engine kits, vibration control technology such as engine mounts, pulleys and suspension mounts as well as cabin air filters and brake hoses.

Innovating together

# MORE THAN 160 YEARS OF EXPERTISE

1849

Carl Johann Freudenberg establishes tannery in Weinheim. Production of patent leather begins.

1936

Agreement with Carl Freudenberg company, distribution of technical leather goods for engines.

1900

Hermann Ernst Freudenberg develops a tanning process using chrome liquor instead of vegetable products. The company becomes the largest leather manufacturer in Europe.

1936

Perbunan (synthetic rubber) is used as a sealing material for Simmerrings and replaces leather.

1920s

Corte & Cosso established in Turin, Italy.

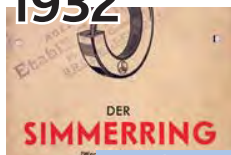

1957

Trust the Expert

In 1957 Freudenberg embraces vibration control technology.

1932

The Simmerring® is developed on the basis of the first seals.

1960

Involvement with Nippon Oil Seal Industry Company Ltd, Tokyo (NOK) and partnership in Japanese Vilene Company Ltd (also Tokyo) the company becomes a worldwide operating business group.

1978

TransTec established, partially owned by Freudenberg & Co.

2008

Corteco-Meillor S.A.S. becomes Corteco S.A.S.

1988

Particle filter development commences.

Trust the Expert

2010

Foundation of Corteco China. Further branches open in Poland, Russia, America and Asia.

1996

Carbon activated filter production starts.

2012

TrelleborgVibracoustic established as joint venture company for automotive anti-vibration solutions. Corteco India and Corteco Ishino Japan are established.

1996/97

Corteco brand established in Turin (Italy), Viernheim (Germany) and Lutterworth (UK).

2014

Corteco expands power steering business. Auto Suppliers Ltd acquired by Corteco.

2001

Vibracoustic created as joint venture between Freudenberg and Phoenix AG.

2001

TransTec name changed to Corteco USA.

2016

Corteco - a global company, with focus on partnership, service and quality.

# NEW AUTOMOTIVE GENERATION

Your partner for a

## **FREUDENBERG - INNOVATING TOGETHER**

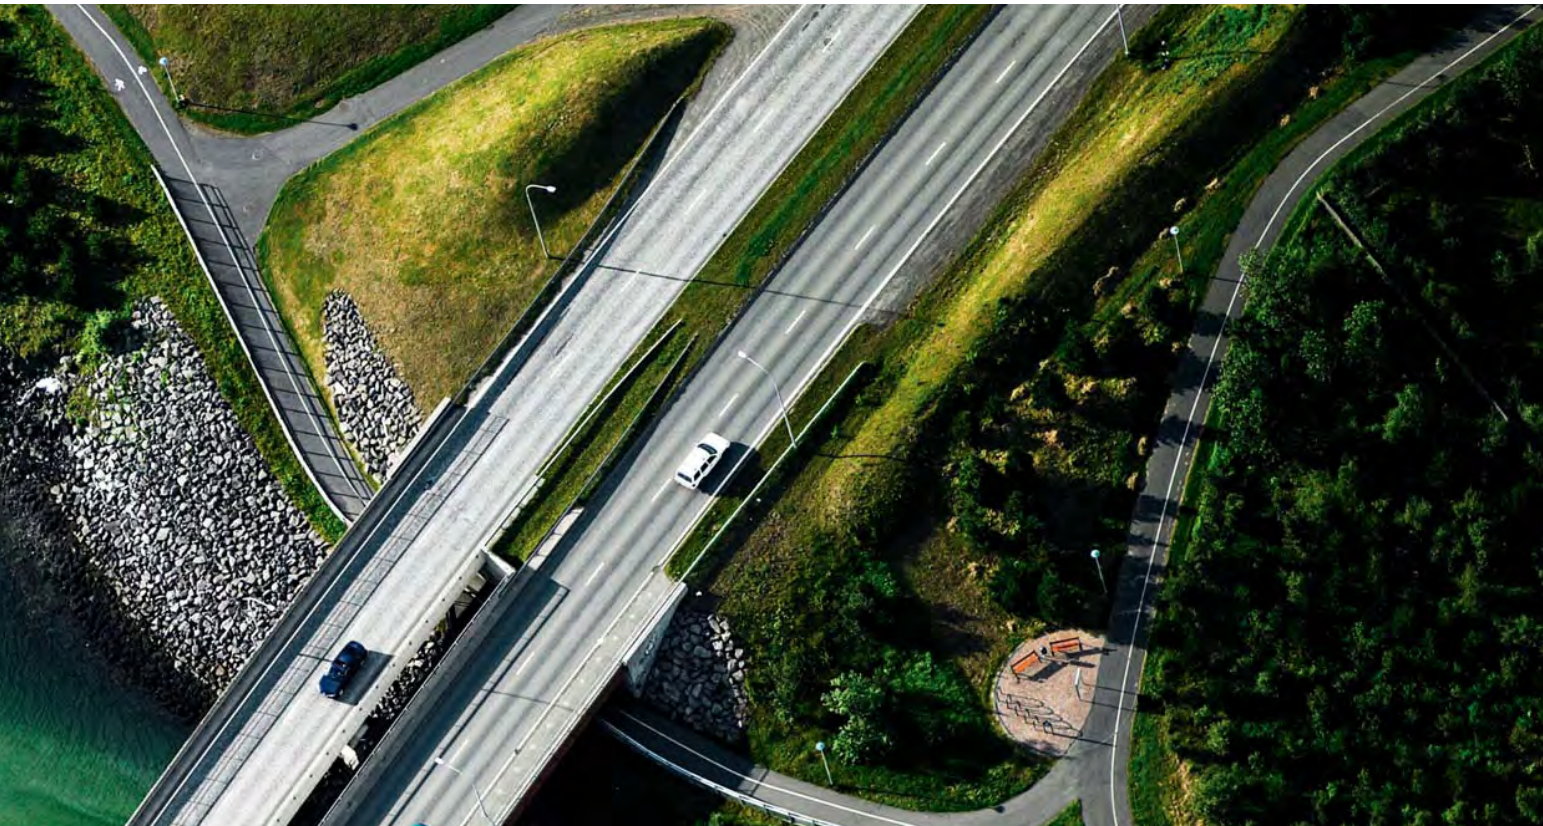

We are inspired by technology and innovation. Together with our customers and with our research partners, we develop leading-edge technologies, products, solutions and services. Having pioneered innovation throughout our history – from chrome tanning and the development of the Simmerring to sophisticated and high-tech medical devices – our company is an innovation champion. For us, striving together for solutions that support global sustainability is both our motivation as well as our concept for success. We live “Innovating Together” across business groups and world regions. This enables us to provide our customers with solutions and answers to tomorrow’s questions, today.

## **Driving Balance**

Vibracoustic is the global market leader in the field of automotive vibration control technology. And thus, supplies virtually every passenger vehicle and commercial vehicle manufacturer in the world with components that clearly and noticeably boost the comfort on board.

The global R&D network enables the engineers at Vibracoustic to develop unparalleled vibration damping technologies, gain new insights every day into manufacturing and materials engineering that are the key to superior products. Here, Vibracoustic never focuses on an individual component, but rather its effect on the vehicle as a whole.

Corteco, subsidiary of the Freudenberg group, is responsible for the distribution of automotive products to the independent aftermarket. With OE connections like this and a reputation for customer service and logistical support that's second to none, it's no wonder that Corteco is able to deliver so many appropriate solutions for so many different countries.

Highest driving comfort

## HYDRAULIC ENGINE MOUNTS

### HYDRAULIC FLUID IMPROVES DAMPING CHARACTERISTICS

Everyone is familiar with the front wheels beginning to shake while driving on what appears to be a flat surface. The steering wheel shakes and excessive vibrations and noises find their way into the vehicle. This is caused by the interaction between the vehicle and road in combination with forces from the vehicle.

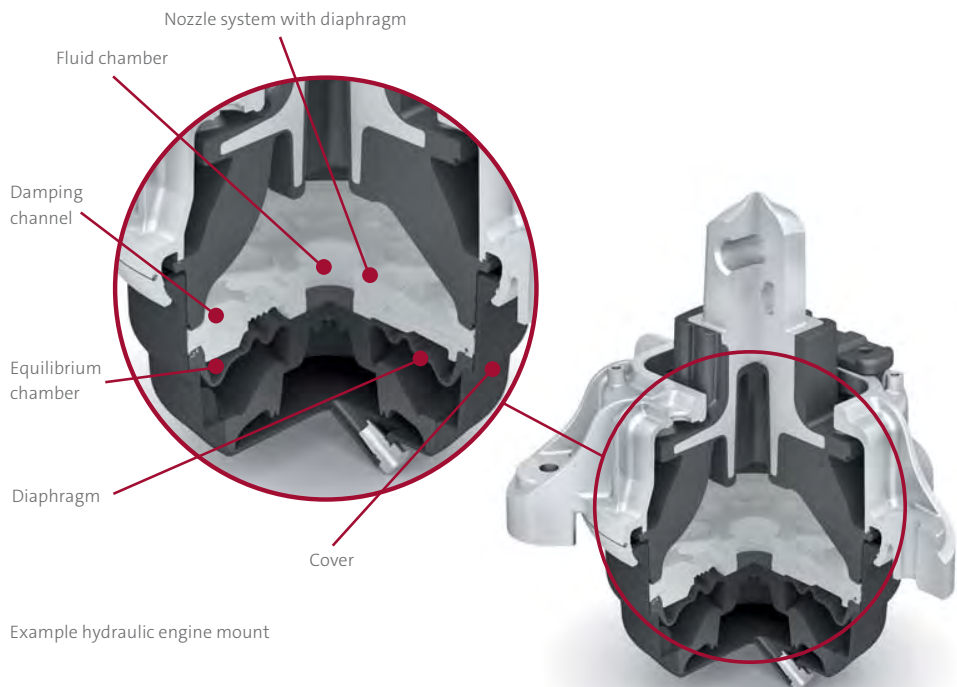

Car manufacturers increasingly install hydraulic engine mounts, as they combine acoustic isolation functions of conventional rubber engine mounts with a balanced damping performance.

The strain for engines during idle can be too high for conventional rubber engine mounts leading to insufficient damping qualities. Hydraulic engine mounts can adapt their characteristics depending on the induced strain. The viscous liquid in the hydraulic mount acts as a damper and ensures optimum driving comfort.

### THIS IS HOW IT WORKS

In a hydraulic engine mount, the main rubber spring has an upper and lower chamber. The chambers are connected by a series of canals and separated by a rubber valve. The mainspring is filled with the viscous liquid which acts as a secondary damper. On impacts that generate shock and vibrations, the

rubber valve opens and closes the bypass channel redirecting the viscous liquid flow between the two chambers. This changes the stiffness of the mount, creating optimum damping characteristics for any road condition.

## MAKING A DIFFERENCE

Environmental considerations and a reduction in the combustion of precious fuels are crucial factors in the development of new eco-friendly technologies for the automotive sector.

Automatic start-stop systems are good examples, providing a 5 to 7 % improvement in fuel economy and a similar reduction of carbon dioxide emissions.

The vehicle comes to a standstill, the engine is stopped and then restarted after a brief period of time. This process increases the vibrations and the strain throughout the entire accessory drive.

**On average, an ordinary engine mount will have to withstand up to 50,000 to 70,000 starts. A start-stop engine mount on the other hand, will have to endure 500,000 to 700,000 starts.**

Developing engine mounts that can withstand ten times as many starts without breaking or failing, poses an enormous challenge. Extensive research, development and testing makes it possible to deliver the solutions.

Counterfeit parts are exposed to none of these and therefore cannot match OE requirements.

## THE CORTECO START-STOP RANGE

There are over 20,000 Vibration Control, Sealing and Filtration products and more than 1,410 of these are specifically for start-stop applications.

The Corteco range already includes:

- ▶ 112 Corteco start-stop engine mounts covering over 41 million vehicles

## STRONGER PARTS FOR A HIGHER DURABILITY

As the aftermarket distribution arm of the Freudenberg Group, Corteco is able to draw on the wealth of design and development resources available from a company renowned as one of the world's largest manufacturers of components for OE.

Transforming an ordinary hydro mount into the perfect start-stop component is a complicated process. Some of the stages include:

- ▶ Optimising construction by changing the inner diameter or developing a stronger geometry between components
- ▶ Developing new materials such as high temperature and performance elastomers (Nano-EPDM Technology) - Conceiving new mounting and bonding processes specifically designed for metal and rubber parts
- ▶ Enhancing the bonding characteristics through enlargement of the holding surfaces to improve isolation and extend durability

# SIGNS AND SYMBOLS

	Construction year from / Construction year to
	Chassis number from / Chassis number to
	Engine number from / Engine number to / Engine Code
	Transmission number from / Transmission number to / Transmission Number / Transmission Type
	for vehicles with air conditioning / for vehicles with automatic climate control
	for vehicles without air conditioning
... ->	DAM number from / VET Number from / Organisation number from
...x	Required quantity
-> ...	VET Number to / Organisation number to
4-AUT	Transmission Type, Automatic Transmission, 4-speed
4-MAN	Transmission Type, Manual Transmission, 4-speed
5-AUT	Transmission Type, Automatic Transmission, 5-speed / Transmission Type, 5-Speed manual transmission, operated automatically
5-MAN	Transmission Type, Manual Transmission, 5-speed
6-AUT	Transmission Type, Automatic Transmission, 6-speed / Transmission Type, 6-Speed manual transmission, operated automatically
6-DK	Transmission Type, 6-Speed dual-clutch transmission
6-MAN	Transmission Type, Manual Transmission, 6-speed

SW+	Vehicle Equipment, for vehicles with reinforced shock absorbers
Taxi	Special Purpose Vehicle, for taxis
TF	Suspension, for vehicles with lowered chassis
TR	Country-spec. model, Turkey
U	Fitting Position, Lower
USA	Country-spec. model, USA
V	Fitting Position, Front
VA	Fitting Position, Front Axle
VAA	Suspension, for vehicles with height-adjustable suspension
Vers. ...	Version
VL	Fitting Position, Left Front
VR	Fitting Position, Right Front
ZA	Country-spec. model, South Africa
ZBA	Engine Block Material, Aluminium
ZBG	Engine Block Material, Cast Steel
ZG: ...	Axle Load [kg]
Ø: ...	Diameter [mm]

# SIGNS AND SYMBOLS

7-AUT	Transmission Type, Automatic Transmission, 7-speed
7-DK	Transmission Type, 7-Speed dual-clutch transmission
7-MAN	Transmission Type, 7-Speed Manual Transmission
9-AUT	Transmission Type, Automatic Transmission, 9-speed
A	Fitting Position, Outer
Africa	Country-spec. model, Africa
AU	Country-spec. model, Australia
AUT	Transmission Type, Automatic Transmission / Transmission Type, Fully Automatic / Transmission Type, for automatic transmission
A Ø: ...	Outer diameter [mm]
BE	Country-spec. model, Belgium
BM: ...	Type
BRA	Country-spec. model, Brazil
CA	Country-spec. model, Canada
CN	Country-spec. model, China
CVT-AUT	Transmission Type, CVT (Stepless)
Cyl: ...	Number of Cylinders
DK	Clutch, for vehicles with double clutch
DPF	Exhaust System, for soot particulate filter / Catalytic Converter Type, for vehicles with soot filter
ES	Country-spec. model, Spain
