

You don't repair just one type of diesel engine.
We don't make parts for just one either.

Think Delphi for Diesel.

Diesel-powered vehicles are a growing segment of the market for repair shops. Delphi's Diesel product portfolio features parts for light-, medium- and heavy-duty applications, from Ford Superduty to GM Duramax trucks to heavy-duty Detroit Diesel engines. The applications cover the parts needed to compete in today's marketplace.

Now Available

Light-Duty

- Ford Powerstroke
- Chevrolet Duramax
- Dodge Cummins

Medium-Duty

- Navistar

Heavy-Duty

- Detroit Diesel
- Caterpillar
- Cummins

*Delphi also carries high-pressure Diesel oil pumps.

Delphi Diesel

Think Delphi for light-duty injectors.

Delphi diesel injectors cover more than five million light-duty vehicles on the road today. That's more than 30 million injectors in the field!

During remanufacture, each injector is completely disassembled, cleaned and examined for wear and breakage. After all critical components and worn-out or nonfunctioning parts are replaced with new parts, each injector is assembled and tested to OE standards for compliance in fuel delivery, injection pressure and timing.

More than 60 years of Delphi OE manufacturing expertise in the most advanced diesel fuel injection systems ensures that each injector meets OE specifications and performance.

Features

Tested for proper pressure operating parameters

Surface lapping of each critical component

100% O-ring replacement

Benefits

Helps ensure that pressure meets OE specifications

Ensures pressure sealing of sub-assemblies

Proper sealing

Did You Know?

- 100% of our diesel injectors are remanufactured in the United States
- All are tested to OE standards.

Think Delphi for medium- and heavy-duty injectors.

Delphi now offers a wide range of medium- and heavy-duty diesel injectors. Using its 60 years of fuel delivery systems expertise, Delphi has brought to market more than 50 injectors covering Caterpillar/Detroit Diesel, Cummins Celect and Navistar engines.

Did You Know?

Delphi brings you the benefit of 60 years of experience with advanced diesel fuel injection and fuel delivery systems.

Think Delphi for injection pumps.

Delphi's Diesel product portfolio includes diesel injection pumps suitable for the independent aftermarket.

Remanufactured injection pumps are available for the most popular engines in North America, and all parts used in the rebuild process are Delphi validated and approved to ensure quality.

The Power of Diesel

Rotary common rail pumps generate more than 25,000 PSI injection pressure – nearly 10 times more than a GDI gasoline engine and over 600 times more than a standard multiport gasoline engine.

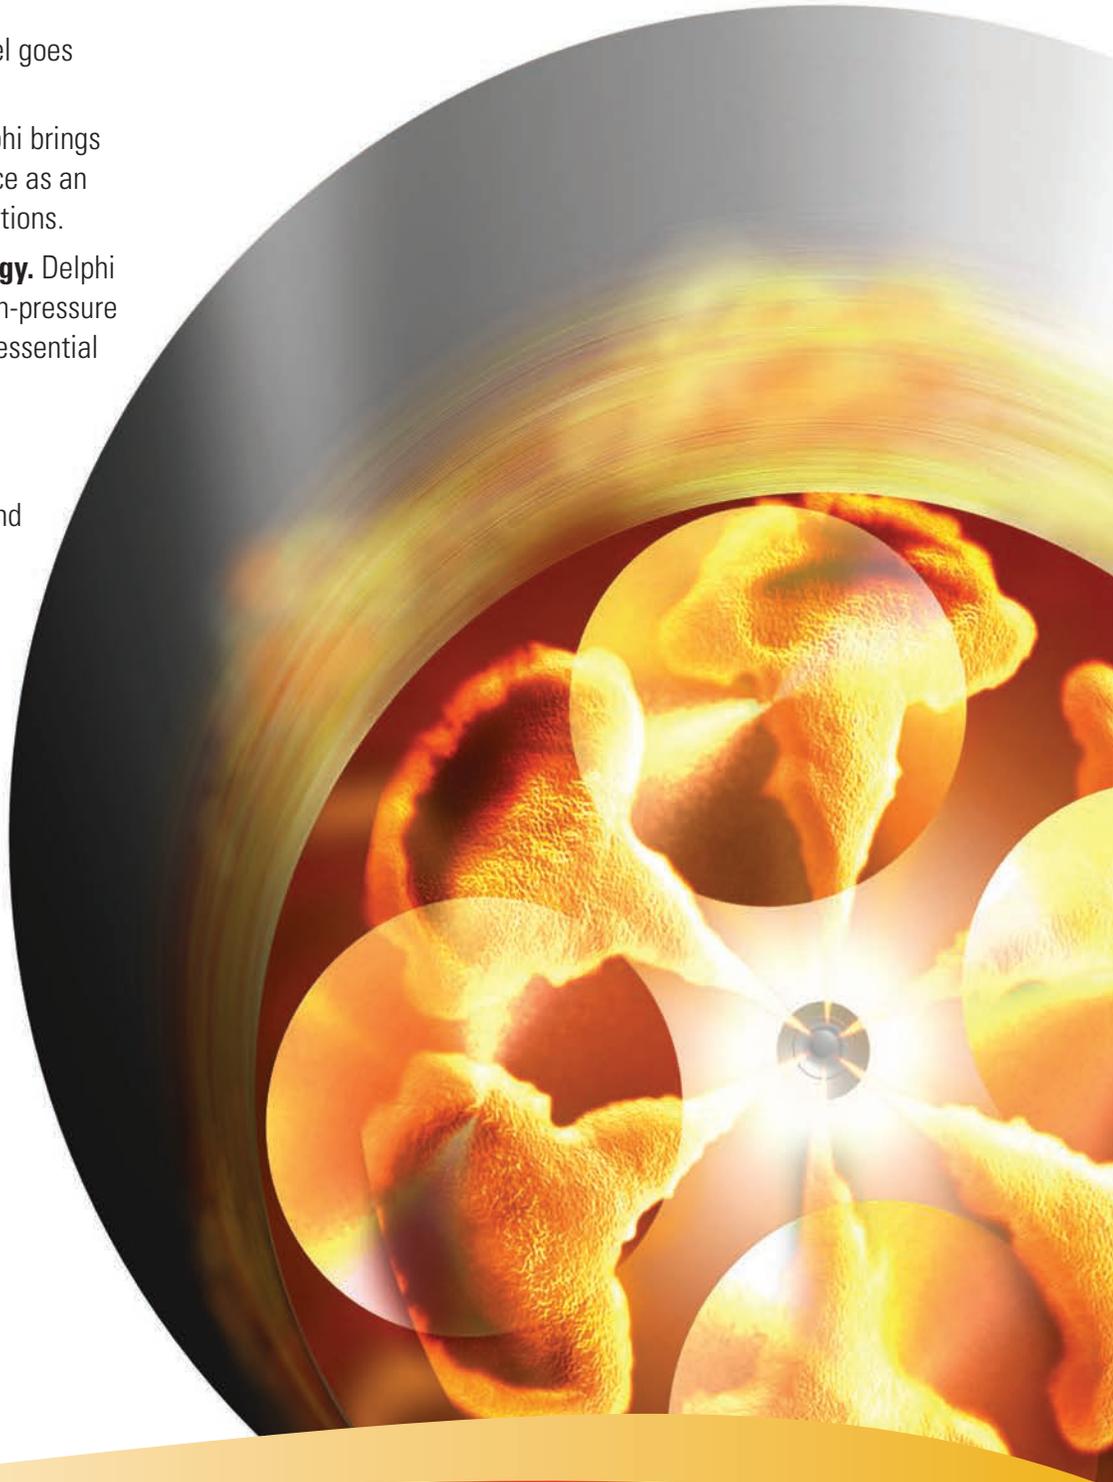

The right part when you need it.

The Right Applications. The Right History.

The benefit of buying Delphi Diesel goes beyond the applications.

- **We know Diesel.** In fact, Delphi brings more than 60 years of experience as an industry leader in diesel applications.
- **We understand the technology.** Delphi has extensive experience in high-pressure fuel injection technology that's essential for diesel-powered vehicles.
- **We focus on quality.** All of our diesel parts are built to OE specifications, for an exact fit and the highest quality.
- **We're focused on your success.** We continue to expand application coverage with competitive pricing so your customers will look to you first.

When you have a diesel repair, think Delphi. We have industry-leading expertise and more than 100 years of OE heritage and a process designed to get you the right part when you need it.

Why Delphi for Diesel?

As a global leader in engine management systems, Delphi is actively involved in the development of advanced diesel technology. In fact, Delphi has developed several innovative design and control strategies to meet customer needs for cost-competitive injection systems. What's more, Delphi has helped manufacturers worldwide meet emissions requirements, improve fuel economy and enhance performance.

With 15 diesel design and engineering centers around the world, plus 21 manufacturing facilities in 13 countries, Delphi can provide exceptional on-time delivery of both new and remanufactured parts.

Delphi uses the same OE expertise and stringent standards for remanufactured parts

as it does for parts on new vehicles. Delphi reman parts are produced in our own Delphi ISO 9001:2008-certified U.S. facility with a clean room that ensures impeccable quality control.

When Delphi diesel applications are remanufactured, all critical components in the Delphi parts are replaced. Some competitive parts are simply cleaned and flushed without replacing components. Delphi's reman center is staffed with highly trained technicians and engineers that use exclusive testing methods and equipment to simulate "live" engine performance.

Every Delphi reman part comes with a 12-month warranty.

Did You Know?

92% of ambulances are based on the Ford E-Series van 6.0L diesel engine – which means a large potential market.
