Definitions: Safety Guidelines

The definitions below describe the severity of each signal word. Please read the manual and pay attention to the following definitions:

WARNING: Indicates an immediately hazardous situation which, if not avoided, will result in death or serious injury.

CAUTION: Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.

WARNING: Indicates a hazardous situation which, if not avoided, may result in minor or moderate injury.

NOTE: Provides important information that is not related to personal injury, but which may result in property damage.

1) WORK AREA SAFETY

Keep work area clean and well lighted. Cluttered or dark areas invite accidents. Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.

Keep children and bystanders away during operation of power tool. Distraction may cause you to lose control.

2) ELECTRICAL SAFETY

Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with power tools. Use only three-wire receptacles with power tools having three-prong plugs.

3) PERSONAL SAFETY

Do not use power tool while you are under the influence of alcohol or drugs.

4) POWER TOOL USE AND CARE

Do not force the power tool. Use the correct power tool for your application. The correct power tool will do the job better and safer at the rate for which it was designed.

Do not use the power tool if the switch does not turn it on and off. Any power tool that cannot be controlled with the switch is dangerous and must not be used.

Do not overreach. Keep proper footing and balance at all times. This enables better control of the power tool in unexpected situations.

5) SERVICE

If devices are proceed for the connection of dust extraction and collection facilties. If damaged, have the power tool repaired before use. Many accidents are caused by poorly maintained power tools.

SAVE ALL WARNINGS AND INSTRUCTIONS FOR FUTURE REFERENCE

The term "power tool" refers to all OREGON™ brand power tools including corded power tool or battery-operated (cordless) power tool.

1) WORK AREA SAFETY

Keep work area clean and well lighted. Cluttered or dark areas invite accidents. Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.

NOTE: Indicate faulty battery pack by refusing to light or by displaying problem pack or charger. This charger will not charge a faulty battery pack. The charger will...

WEAK BATTERY PACKS:

LEAVING THE BATTERY PACK IN THE CHARGER

The red light will continue to blink, but a yellow indicator light will be illuminated during this maximum battery life. The red light flashes long, then short while in the hot/cold delay mode. When the battery has cooled, the charger automatically switches to the pack charging mode. This feature ensures automatically starts a delay, suspending charging until the battery has cooled. After the battery has cooled, the yellow indicator light will be illuminated during this delay. This indicates as the original, have the charger and the battery pack tested at an authorized service center.

FUEL GAUGE PACKETS (FIG. 3)

Some DCB101 battery packs include a fuel gauge which consists of three green LED lights that indicate the level of charge remaining in the battery pack. To actuate the fuel gauge, press and hold the fuel gauge button H. A combination of the three green LED lights will illuminate designating the level of charge left. When the level of charge in the battery is below the switch limit, the fuel gauge will not illuminate and the fuel gauge will not need to be recharged. NOTE: The fuel gauge is only an indication of the charge left on the battery pack. It does not indicate tool functionality and is subject to variation based on product components, temperature and end-use application. For more information regarding fuel gauge battery packs, please call 1-800-4-

NOTE: Battery packs should not be stored completely depleted of charge. The battery pack will...
