

The Premier Manufacturer of Automotive Restoration Interiors since 1969

2016 MASTER CATALOG

## ABOUT DISTINCTIVE INDUSTRIES

It started in 1969 in a little Santa Monica car upholstery shop, with a dream, a prayer, and whole lot of pride. It has become an industry legend. Manufacturing perfect factory replacement automotive interior products since 1969, Distinctive Industries pioneered the aftermarket replacement interior industry. Since then, Distinctive Industries has quietly become the world's leading provider of OEM quality interiors for 1960's, 1970's, 1980's, 1990's, and early 2000's muscle car, special interest, and collectible vehicles. These factory reproduction interiors capture the essence of original manufacturing techniques, utilizing exact factory color matching, grain, and textured materials. Our products are continuously recognized for quality in craftsmanship. Our interiors are cut on state-of-the-art digital cutting machines, sewn to original specifications, and inspected by the most knowledgeable manufacturing staff in the industry. Often copied, but never equaled, Distinctive Industries is your one stop solution for all of your auto interior restoration needs.

## ABOUT THIS CATALOG

Distinctive Industries has combined all of our catalogs into one Master Catalog. This catalog covers all products for all car lines including Bronco, Camaro, Chevelle, Comet/Cyclone, Cougar, Cutlass/442, Datsun Roadster/Z, Econoline/Ford Pickup, Fairlane, Falcon, Firebird, Galaxie, GTO/Lemans, Impala, Mustang, Nova, Ranchero, Riviera,

Sylark/GS, and Torino. The catalog is sorted by Ford, GM, and Imports with the carlines in alphabetical order.

*Look no further, this 2016 Distinctive Industries Master Catalog is the source for all Distinctive Industries products, and product details.*

# NEW PRODUCTS

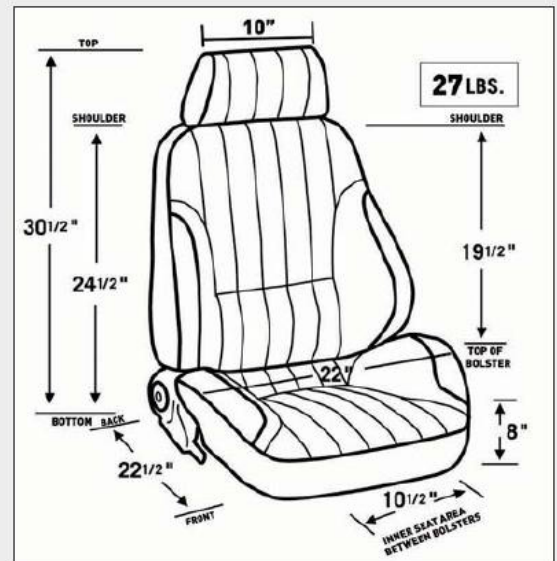

The Distinctive Industries Touring II seat is manufactured using the proven Procar® by Scat seat frame and foam and is covered in high quality, Distinctive Industries restoration upholstery. The steel seat frame is **TIG welded** and **electrostatically coated** for strength and durability. The completed seat offers a **20 position reclining seat back** and includes a **18 position sliding seat track** built into the frame all which adds up to a comfortable and customizable seating position for the occupant.

The Touring II seats are an innovative product in that the seat frame is specifically designed and manufactured for use as a **supportive, bolstered seat** unlike many other currently offered seat's that are simply bolstered using nothing more than a bolstered foam which will eventually break down and separate. The support, detail and value that the Touring II seat offers is simply unmatched by any other seat!

The Distinctive Industries Touring II seats have been painstakingly patterned to very closely **mimic the original upholstery's design** and details for a seat compliments your existing original interior while the **20 position reclining seat back** is a real solution to a problem that has existed with the original seats for decades.

The **Distinctive Industries Touring II Mustang** seat is a drop in option for both restoration oriented and Resto-mod themed vehicles and have the added value of matching the rest of the Distinctive Industries interior product line.

## introducing *Touring II* Seats

brought to you by  distinctive industries  
Premium Restoration Interior Products

& **PROCAR**  
by Scat

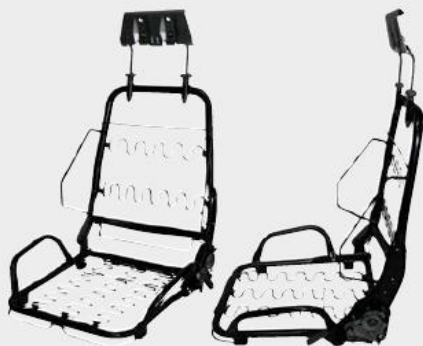

## Attention to Detail

Don't worry, seats are color matched to all Distinctive Industries' products and mimic the original interior design.

## Comfort & Support

Procar® by Scat seat frames are designed to support high bolstered injection molded seat foam, making this the perfect bolstered seat platform. Headrest brackets are already installed in the seat and headrests are included, but not installed.

## Strength & Durability

Procar® by Scat has perfected the manufacturing process. Seat frames and tracks are TIG welded and electrostatically coated for long life and durability.

## Lean Back

Feel free to lean back and get comfortable with 20 reclining seat positions and 18 seat tracking positions. Enjoy the perfect driving position!

**Introduction To The Catalog**

Thank you for choosing Distinctive Industries as your provider of Restoration Interior Products. The catalog you are reading was designed with the input of our existing customers and moving forward, will continue to be a representation of their needs, and the needs of restoration experts worldwide.

**Design**

We have designed our catalog for the Restoration Professional, from the Local Upholstery and Restoration Shop, to the National Distributor of Restoration Products. The thought was to create a catalog that eases the pain of product entry for those building catalogs, and to ease ordering for those that order directly from the catalog. We accomplished this by listing product by year, model, and trim level. You will find this catalog to be easy to use.

**Descriptions**

Descriptions are a blend of Marketing and Technical descriptions. After polling our customers we found that aside from the design, missing was a good description of the products in today's catalogs. We remedied that by providing a blended description as a basis for our customers to expand upon, or use as is.

**Colors**

Color swatches are placed near the product with labeled color codes to avoid confusion. Color Code boxes are located near the applicable products. We offer many special order color combinations as well as an option for leather in most cases.

**Images**

Images are available for License through Distinctive Industries.  
• Licensed images must be accompanied and located adjacent to the matching Distinctive Industries product.

# Hands On

EXPERIENCE

Can you whoop a kid on video games? Probably not. But you can show them a whole new “reality” by taking them to a car show. Encouraging a child to get outside, see glistening paint jobs, and hear the purr of finely tuned engines will awaken all of their senses. You might even be surprised at how much your own enthusiasm is rekindled!

Life is full of choices for kids. You can help them make the right ones by sharing your appreciation for cool old cars. The practical knowledge you share with a child today...just may be the experience that sets them on a lifetime of success.

Can you whoop a kid on video games? Probably not. But you can show them a whole new "reality" by taking them to a car show. Encouraging a child to get outside, see glistening paint jobs, and hear the purr of finely tuned engines will awaken all of their senses. You might even be surprised at how much your own enthusiasm is rekindled!

Life is full of choices for kids. You can help them make the right ones by sharing your appreciation for cool old cars. The practical knowledge you share with a child today...just may be the experience that sets them on a lifetime of success.

## Introduction To The Catalog

Thank you for choosing Distinctive Industries as your provider of Restoration Interior Products. The catalog you are reading was designed with the input of our existing customers and moving forward, will continue to be a representation of their needs, and the needs of restoration experts worldwide.

### Design

We have designed our catalog for the Restoration Professional, from the Local Upholstery and Restoration Shop, to the National Distributor of Restoration Products. The thought was to create a catalog that eases the pain of product entry for those building catalogs, and to ease ordering for those that order directly from the catalog. We accomplished this by listing product by year, model, and trim level. You will find this catalog to be easy to use.

### Descriptions

Descriptions are a blend of Marketing and Technical descriptions. After polling our customers we found that aside from the design, missing was a good description of the products in today's catalogs. We remedied that by providing a blended description as a basis for our customers to expand upon, or use as is.

### Colors

Color swatches are placed near the product with labeled color codes to avoid confusion. Color Code boxes are located near the applicable products. We offer many special order color combinations as well as an option for leather in most cases.

### Images

Images are available for License through Distinctive Industries.

- Licensed images must be accompanied and located adjacent to the matching Distinctive Industries product.

## Introduction To The Catalog

Thank you for choosing Distinctive Industries as your provider of Restoration Interior Products. The catalog you are reading was designed with the input of our existing customers and moving forward, will continue to be a representation of their needs, and the needs of restoration experts worldwide.

### Design

We have designed our catalog for the Restoration Professional, from the Local Upholstery and Restoration Shop, to the National Distributor of Restoration Products. The thought was to create a catalog that eases the pain of product entry for those building catalogs, and to ease ordering for those that order directly from the catalog. We accomplished this by listing product by year, model, and trim level. You will find this catalog to be easy to use.

### Descriptions

Descriptions are a blend of Marketing and Technical descriptions. After polling our customers we found that aside from the design, missing was a good description of the products in today's catalogs. We remedied that by providing a blended description as a basis for our customers to expand upon, or use as is.

### Colors

Color swatches are placed near the product with labeled color codes to avoid confusion. Color Code boxes are located near the applicable products. We offer many special order color combinations as well as an option for leather in most cases.

### Images

Images are available for License through Distinctive Industries.

- Licensed images must be accompanied and located adjacent to the matching Distinctive Industries product.

**Take a Kid to a Car Show**  
is dedicated to:

- Sharing the classic car hobby with kids
- Encouraging involvement by a new generation of automotive restoration enthusiasts
- Giving kids a constructive choice in how to spend their time

Take a Kid to a Car Show is a program of ARMO, the Automotive Restoration Market Organization, a SEMA Council.

## Introduction To The Catalog

Thank you for choosing Distinctive Industries as your provider of Restoration Interior Products. The catalog you are reading was designed with the input of our existing customers and moving forward, will continue to be a representation of their needs, and the needs of restoration experts worldwide.

### Design

We have designed our catalog for the Restoration Professional, from the Local Upholstery and Restoration Shop, to the National Distributor of Restoration Products. The thought was to create a catalog that eases the pain of product entry for those building catalogs, and to ease ordering for those that order directly from the catalog. We accomplished this by listing product by year, model, and trim level. You will find this catalog to be easy to use.

### Descriptions

Descriptions are a blend of Marketing and Technical descriptions. After polling our customers we found that aside from the design, missing was a good description of the products in today's catalogs. We remedied that by providing a blended description as a basis for our customers to expand upon, or use as is.

### Colors

Color swatches are placed near the product with labeled color codes to avoid confusion. Color Code boxes are located near the applicable products. We offer many special order color combinations as well as an option for leather in most cases.

### Images

Images are available for License through Distinctive Industries.

- Licensed images must be accompanied and located adjacent to the matching Distinctive Industries product.

## Introduction To The Catalog

Thank you for choosing Distinctive Industries as your provider of Restoration Interior Products. The catalog you are reading was designed with the input of our existing customers and moving forward, will continue to be a representation of their needs, and the needs of restoration experts worldwide.

### Design

We have designed our catalog for the Restoration Professional, from the Local Upholstery and Restoration Shop, to the National Distributor of Restoration Products. The thought was to create a catalog that eases the pain of product entry for those building catalogs, and to ease ordering for those that order directly from the catalog. We accomplished this by listing product by year, model, and trim level. You will find this catalog to be easy to use.

### Descriptions

Descriptions are a blend of Marketing and Technical descriptions. After polling our customers we found that aside from the design, missing was a good description of the products in today's catalogs. We remedied that by providing a blended description as a basis for our customers to expand upon, or use as is.

### Colors

Color swatches are placed near the product with labeled color codes to avoid confusion. Color Code boxes are located near the applicable products. We offer many special order color combinations as well as an option for leather in most cases.

### Images

Images are available for License through Distinctive Industries.

- Licensed images must be accompanied and located adjacent to the matching Distinctive Industries product.

Those hands stay small for such a short time. Now's the time to lead a child down a path that could expand into a lifetime of enjoyment. Going to a car show is a history lesson, a social event and storytime all wrapped up into one!

Life is full of choices for kids. You can help them make the right ones by showing them your appreciation for cool old cars. Your passion for collector cars today may even nurture a shared interest for years to come...when those hands are as big as your own.

Take a Kid to a Car Show is a program of ARMO, the Automotive Restoration Market Organization, a SEMA Council.

The  
difference  
between

**MEN**

**& Boys**

*is the size of  
their toys!*

**E**ven if there is a generation or two between you and a child, collector cars can be a terrific common ground. Your enthusiasm and knowledge could be the spark of a child's lifelong passion. Bring kids to *your* playground...a car show...and have fun.

Life is full of choices for kids. You can help them make the right ones by sharing your appreciation for cool old cars. (And a kid might even call you "cool" too!)

Take a Kid to a Car Show is a program of ARMO, the Automotive Restoration Market Organization, a SEMA Council.

Thank you for choosing Distinctive Industries as your provider of Restoration Interior Products. The catalog you are reading was designed with the input of our existing customers and moving forward, will continue to be a representation of their needs, and the needs of restoration experts worldwide.

**Design**

We have designed our catalog for the Restoration Professional, from your Local Upholstery and Restoration Shop, to the National Distributor of Restoration Products. The thought was to create a catalog that eases the pain of product entry for those building catalogs, and to ease ordering for those that order directly from the catalog. We accomplished this by listing product by year, model, and trim level. You will find this catalog to be easy to use.

**Descriptions**

Descriptions are a blend of Marketing and Technical descriptions. After polling our customers we found that aside from the design, missing was a good description of the products in today's catalogs. We remedied that by providing a blended description as a basis for our customers to expand upon, or use as is.

**Colors**

Color swatches are placed near the product with labeled color codes to avoid confusion. Color Code boxes are located near the applicable products. We offer many special order color combinations as well as an option for leather in most cases.

**Images**

Images are available for License through Distinctive Industries.  
 • Licensed images must be accompanied and located adjacent to the matching Distinctive Industries product.

## 1969 DELUXE/GRANDE AND MACH 1 BUCKET & BENCH SEAT UPHOLSTERY

### 1969 DELUXE/GRANDE SEAT UPHOLSTERY

Our 1969 Mustang Deluxe/Grande Upholstery features the original Corinthian grain skirts with Ruffino grain upper and Comfortweave lower seat-back inserts along with the Comfortweave seat-bottom inserts in 32 oz. vinyl. Our welting is solid for black and vinyl wrapped for all other colors to ensure an exact color match. Matching headrests covers are included. The dielectric patterns and pleats are just like the originals with the correct spacing and design.

- \* *Grande originally came with a cloth insert in the seat-bottom that is not available at this time.*
- \* *Grande is a Coupe only model.*
- \* *Deluxe Convertible comes with Ruffino grain inserts in the seat-bottom.*
- \* *We offer other colors as a special order (see samples).*

#### Features

- Corinthian grain vinyl with Ruffino and Comfortweave inserts
- Correct 6 stitch per inch stitching
- Correct colors matched to the original vinyl
- Limited lifetime warranty

- Installs Under Existing Upholstery

Each kit comes complete with switch, harnesses and two carbon fiber element pads to complete one seat install. Switch can be dash, console, or hidden in a place of choice.

Thank you for choosing Distinctive Industries as your provider of Restoration Interior Products. The catalog you are reading was designed with the input of our existing customers and moving forward, will continue to be a representation of their needs, and the needs of restoration experts worldwide.

**Design**

We have designed our catalog for the Restoration Professional, from the Local Upholstery and Restoration Shop, to the National Distributor of Restoration Products. The thought was to create a catalog that eases the pain of product entry for those building catalogs, and to ease ordering for those that order directly from the catalog. We accomplished this by listing product by year, model, and trim level. You will find this catalog to be easy to use.

**Descriptions**

Descriptions are a blend of Marketing and Technical descriptions. After polling our customers we found that aside from the design, missing was a good description of the products in today's catalogs. We remedied that by providing a blended description as a basis for our customers to expand upon, or use as is.

**Colors**

Color swatches are placed near the product with labeled color codes to avoid confusion. Color Code boxes are located near the applicable products. We offer many special order color combinations as well as an option for leather in most cases.

**Images**

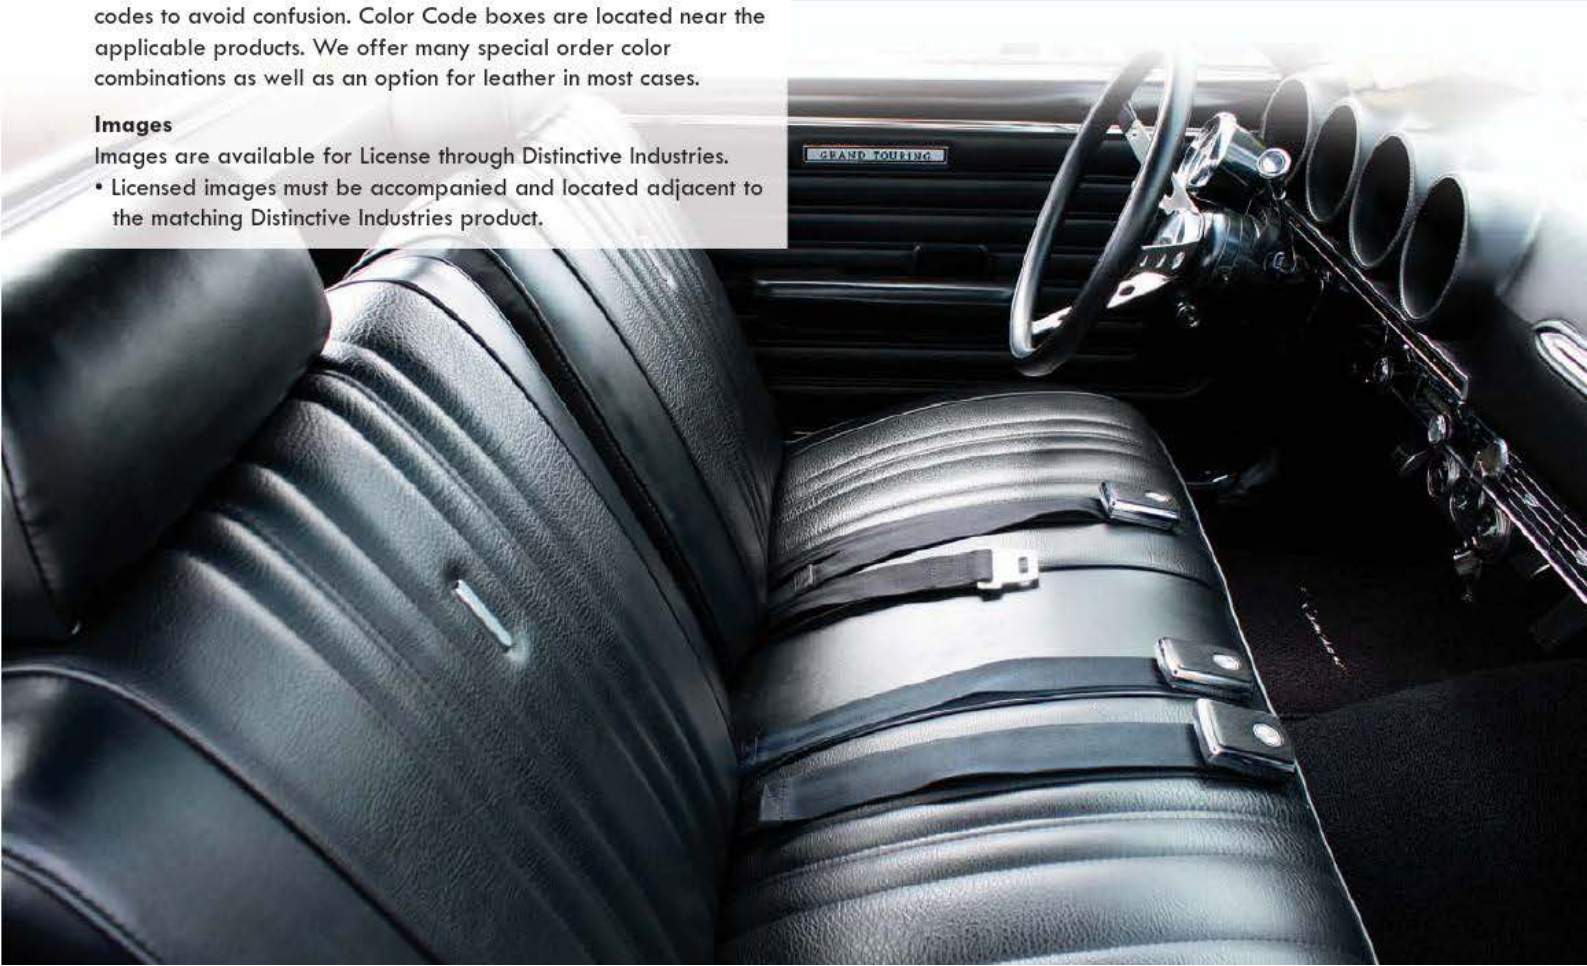

Images are available for License through Distinctive Industries.

- Licensed images must be accompanied and located adjacent to the matching Distinctive Industries product.

The difference between **MEN & Boys** is the size of their toys!

Even if there is a generation or two between you and a child, collector cars can be a terrific common ground. Your enthusiasm and knowledge could be the spark of a child's lifelong passion. Bring kids to your playground...a car show...and have fun.

Life is full of choices for kids. You can help them make the right ones by sharing your appreciation for cool old cars. (And a kid might even call you "cool" too!)

Take a Kid to a Car Show is a program of ARMO, the Automotive Restoration Market Organization, a SEMA Council.

## Introduction To The Catalog

Thank you for choosing Distinctive Industries as your provider of Restoration Interior Products. The catalog you are reading was designed with the input of our existing customers and moving forward, will continue to be a representation of their needs, and the needs of restoration experts worldwide.

### Design

We have designed our catalog for the Restoration Professional, from the Local Upholstery and Restoration Shop, to the National Distributor of Restoration Products. The thought was to create a catalog that eases the pain of product entry for those building catalogs, and to ease ordering for those that order directly from the catalog. We accomplished this by listing product by year, model, and trim level. You will find this catalog to be easy to use.

### Descriptions

Descriptions are a blend of Marketing and Technical descriptions. After polling our customers we found that aside from the design, missing was a good description of the products in today's catalogs. We remedied that by providing a blended description as a basis for our customers to expand upon, or use as is.

### Colors

Color swatches are placed near the product with labeled color codes to avoid confusion. Color Code boxes are located near the applicable products. We offer many special order color combinations as well as an option for leather in most cases.

### Images

Images are available for License through Distinctive Industries.

- Licensed images must be accompanied and located adjacent to the matching Distinctive Industries product.

## Introduction To The Catalog

Thank you for choosing Distinctive Industries as your provider of Restoration Interior Products. The catalog you are reading was designed with the input of our existing customers and moving forward, will continue to be a representation of their needs, and the needs of restoration experts worldwide.

### Design

We have designed our catalog for the Restoration Professional, from the Local Upholstery and Restoration Shop, to the National Distributor of Restoration Products. The thought was to create a catalog that eases the pain of product entry for those building catalogs, and to ease ordering for those that order directly from the catalog. We accomplished this by listing product by year, model, and trim level. You will find this catalog to be easy to use.

### Descriptions

Descriptions are a blend of Marketing and Technical descriptions. After polling our customers we found that aside from the design, missing was a good description of the products in today's catalogs. We remedied that by providing a blended description as a basis for our customers to expand upon, or use as is.

### Colors

Color swatches are placed near the product with labeled color codes to avoid confusion. Color Code boxes are located near the applicable products. We offer many special order color combinations as well as an option for leather in most cases.

### Images

Images are available for License through Distinctive Industries.

- Licensed images must be accompanied and located adjacent to the matching Distinctive Industries product.

## Introduction To The Catalog

Thank you for choosing Distinctive Industries as your provider of Restoration Interior Products. The catalog you are reading was designed with the input of our existing customers and moving forward, will continue to be a representation of their needs, and the needs of restoration experts worldwide.

### Design

We have designed our catalog for the Restoration Professional, from the Local Upholstery and Restoration Shop, to the National Distributor of Restoration Products. The thought was to create a catalog that eases the pain of product entry for those building catalogs, and to ease ordering for those that order directly from the catalog. We accomplished this by listing product by year, model, and trim level. You will find this catalog to be easy to use.

### Descriptions

Descriptions are a blend of Marketing and Technical descriptions. After polling our customers we found that aside from the design, missing was a good description of the products in today's catalogs. We remedied that by providing a blended description as a basis for our customers to expand upon, or use as is.

### Colors

Color swatches are placed near the product with labeled color codes to avoid confusion. Color Code boxes are located near the applicable products. We offer many special order color combinations as well as an option for leather in most cases.

### Images

Images are available for License through Distinctive Industries.  
• Licensed images must be accompanied and located adjacent to the matching Distinctive Industries product.

# HandsOn

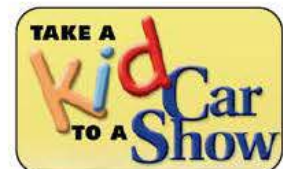

EXPERIENCE

Take a Kid to a Car Show is a program of ARMO, the Automotive Restoration Market Organization, a SEMA Council.

**C**an you whoop a kid on video games? Probably not. But you can show them a whole new “reality” by taking them to a car show. Encouraging a child to get outside, see glistening paint jobs, and hear the purr of finely tuned engines will awaken all of their senses. You might even be surprised at how much your own enthusiasm is rekindled!

Life is full of choices for kids. You can help them make the right ones by sharing your appreciation for cool old cars. The practical knowledge you share with a child today...just may be the experience that sets them on a lifetime of success.

## Introduction To The Catalog

Thank you for choosing Distinctive Industries as your provider of Restoration Interior Products. The catalog you are reading was designed with the input of our existing customers and moving forward, will continue to be a representation of their needs, and the needs of restoration experts worldwide.

### Design

We have designed our catalog for the Restoration Professional, from the Local Upholstery and Restoration Shop, to the National Distributor of Restoration Products. The thought was to create a catalog that eases the pain of product entry for those building catalogs, and to ease ordering for those that order directly from the catalog. We accomplished this by listing product by year, model, and trim level. You will find this catalog to be easy to use.

### Descriptions

Descriptions are a blend of Marketing and Technical descriptions. After polling our customers we found that aside from the design, missing was a good description of the products in today's catalogs. We remedied that by providing a blended description as a basis for our customers to expand upon, or use as is.

### Colors

Color swatches are placed near the product with labeled color codes to avoid confusion. Color Code boxes are located near the applicable products. We offer many special order color combinations as well as an option for leather in most cases.

### Images

Images are available for License through Distinctive Industries.

- Licensed images must be accompanied and located adjacent to the matching Distinctive Industries product.

**HandsOn**  
EXPERIENCE

Take a Kid to a Car Show is a program of ARMO, the Automotive Restoration Market Organization, a SEMA Council.

Can you whoop a kid on video games? Probably not. But you can show them a whole new "reality" by taking them to a car show. Encouraging a child to get outside, see glistening paint jobs, and hear the purr of finely tuned engines will awaken all of their senses. You might even be surprised at how much your own enthusiasm is rekindled!

Life is full of choices for kids. You can help them make the right ones by sharing your appreciation for cool old cars. The practical knowledge you share with a child today...just may be the experience that sets them on a lifetime of success.

**Introduction To The Catalog**

Thank you for choosing Distinctive Industries as your provider of Restoration Interior Products. The catalog you are reading was designed with the input of our existing customers and moving forward, will continue to be a representation of their needs, and the needs of restoration experts worldwide.

**Design**

We have designed our catalog for the Restoration Professional, from the Local Upholstery and Restoration Shop, to the National Distributor of Restoration Products. The thought was to create a catalog that eases the pain of product entry for those building catalogs, and to ease ordering for those that order directly from the catalog. We accomplished this by listing product by year, model, and trim level. You will find this catalog to be easy to use.

**Descriptions**

Descriptions are a blend of Marketing and Technical descriptions. After polling our customers we found that aside from the design, missing was a good description of the products in today's catalogs. We remedied that by providing a blended description as a basis for our customers to expand upon, or use as is.

**Colors**

Color swatches are placed near the product with labeled color codes to avoid confusion. Color Code boxes are located near the applicable products. We offer many special order color combinations as well as an option for leather in most cases.

**Images**

Images are available for License through Distinctive Industries.  
 • Licensed images must be accompanied and located adjacent to the matching Distinctive Industries product.

## Introduction To The Catalog

Thank you for choosing Distinctive Industries as your provider of Restoration Interior Products. The catalog you are reading was designed with the input of our existing customers and moving forward, will continue to be a representation of their needs, and the needs of restoration experts worldwide.

### Design

We have designed our catalog for the Restoration Professional, from the Local Upholstery and Restoration Shop, to the National Distributor of Restoration Products. The thought was to create a catalog that eases the pain of product entry for those building catalogs, and to ease ordering for those that order directly from the catalog. We accomplished this by listing product by year, model, and trim level. You will find this catalog to be easy to use.

### Descriptions

Descriptions are a blend of Marketing and Technical descriptions. After polling our customers we found that aside from the design, missing was a good description of the products in today's catalogs. We remedied that by providing a blended description as a basis for our customers to expand upon, or use as is.

### Colors

Color swatches are placed near the product with labeled color codes to avoid confusion. Color Code boxes are located near the applicable products. We offer many special order color combinations as well as an option for leather in most cases.

### Images

Images are available for License through Distinctive Industries.

- Licensed images must be accompanied and located adjacent to the matching Distinctive Industries product.

- Will-call orders accepted
- Drop Shipments available

Manufacturing High Quality Restoration Interiors for over 40 years  
*Available at Reputable Dealers Nationwide Since 1969*

**MADE IN AMERICA**

## Introduction To The Catalog

Thank you for choosing Distinctive Industries as your provider of Restoration Interior Products. The catalog you are reading was designed with the input of our existing customers and moving forward, will continue to be a representation of their needs, and the needs of restoration experts worldwide.

### Design

We have designed our catalog for the Restoration Professional, from the Local Upholstery and Restoration Shop, to the National Distributor of Restoration Products. The thought was to create a catalog that eases the pain of product entry for those building catalogs, and to ease ordering for those that order directly from the catalog. We accomplished this by listing product by year, model, and trim level. You will find this catalog to be easy to use.

### Descriptions

Descriptions are a blend of Marketing and Technical descriptions. After polling our customers we found that aside from the design, missing was a good description of the products in today's catalogs. We remedied that by providing a blended description as a basis for our customers to expand upon, or use as is.

### Colors

Color swatches are placed near the product with labeled color codes to avoid confusion. Color Code boxes are located near the applicable products. We offer many special order color combinations as well as an option for leather in most cases.

### Images

Images are available for License through Distinctive Industries.

- Licensed images must be accompanied and located adjacent to the matching Distinctive Industries product.

## Introduction To The Catalog

Thank you for choosing Distinctive Industries as your provider of Restoration Interior Products. The catalog you are reading was designed with the input of our existing customers and moving forward, will continue to be a representation of their needs, and the needs of restoration experts worldwide.

### Design

We have designed our catalog for the Restoration Professional, from the Local Upholstery and Restoration Shop, to the National Distributor of Restoration Products. The thought was to create a catalog that eases the pain of product entry for those building catalogs, and to ease ordering for those that order directly from the catalog. We accomplished this by listing product by year, model, and trim level. You will find this catalog to be easy to use.

### Descriptions

Descriptions are a blend of Marketing and Technical descriptions. After polling our customers we found that aside from the design, missing was a good description of the products in today's catalogs. We remedied that by providing a blended description as a basis for our customers to expand upon, or use as is.

### Colors

Color swatches are placed near the product with labeled color codes to avoid confusion. Color Code boxes are located near the applicable products. We offer many special order color combinations as well as an option for leather in most cases.

### Images

Images are available for License through Distinctive Industries.

- Licensed images must be accompanied and located adjacent to the matching Distinctive Industries product.

## HandsOn EXPERIENCE

Can you whoop a kid on video games? Probably not. But you can show them a whole new "reality" by taking them to a car show. Encouraging a child to get outside, see glistening paint jobs, and hear the purr of finely tuned engines will awaken all of their senses. You might even be surprised at how much your own enthusiasm is rekindled!

Life is full of choices for kids. You can help them make the right ones by sharing your appreciation for cool old cars. The practical knowledge you share with a child today...just may be the experience that sets them on a lifetime of success.

Take a Kid to a Car Show is a program of ARMO, the Automotive Restoration Market Organization, a SEMA Council.

## Introduction To The Catalog

Thank you for choosing Distinctive Industries as your provider of Restoration Interior Products. The catalog you are reading was designed with the input of our existing customers and moving forward, will continue to be a representation of their needs, and the needs of restoration experts worldwide.

### Design

We have designed our catalog for the Restoration Professional, from the Local Upholstery and Restoration Shop, to the National Distributor of Restoration Products. The thought was to create a catalog that eases the pain of product entry for those building catalogs, and to ease ordering for those that order directly from the catalog. We accomplished this by listing product by year, model, and trim level. You will find this catalog to be easy to use.

### Descriptions

Descriptions are a blend of Marketing and Technical descriptions. After polling our customers we found that aside from the design, missing was a good description of the products in today's catalogs. We remedied that by providing a blended description as a basis for our customers to expand upon, or use as is.

### Colors

Color swatches are placed near the product with labeled color codes to avoid confusion. Color Code boxes are located near the applicable products. We offer many special order color combinations as well as an option for leather in most cases.

### Images

Images are available for License through Distinctive Industries.

- Licensed images must be accompanied and located adjacent to the matching Distinctive Industries product.
