Reduce Road Noise & Vibration

Improve Stereo Sound Quality

Quiet Luxury Can Be Installed

“INSTALL DYNAMAT FIRST AND LEAVE THE NOISE BEHIND”
Control Noise & Heat

Is your vehicle too noisy? Is your vehicle too hot? Is it uncomfortable? The original materials used by the auto makers are inadequate. The unwanted heat and noise are viewed as something we cannot change. Effective solutions are now available for these unwanted problems. Everyone enjoys a 70°F (20°C) environment and given the choice, we all prefer quiet over noise. There is no reason to tolerate an uncomfortable car or truck. Dynamat and Dynaliner are the secret to enjoying a cool and quiet ride.

Quality Can Be Installed

The quality of your car goes beyond fit and finish. The feel of the car when driving down the road is the #1 most important quality of your car! The addition of our products takes your car to another level of quality and perceived value. Dynamat lowers the noise level beyond luxury car levels and makes your door “click like a vault instead of clanking like a tin can.” Dynamat upgrades your vehicle like nothing else. Installation is simply peel and stick.

Enjoy a Relaxing Ride

High noise levels cause driver fatigue. Vibrations, squeaks and rattles reduce your driving enjoyment. After a long day at work, a noisy car seems even louder and more irritating. Quiet cars are more relaxing. A Dynamatted car is a quiet, more solid car that gives a relaxing, enjoyable ride for you and your passengers.

Get Better Sound

When you lower the noise level with Dynamat, you hear more of your music, conversations, mobile phone and navigation. Dynamat is a “wireless” noise reduction that greatly improves the sound quality and reception on both ends of your phone call. When you reduce the noise level just 3 decibels, your stereo and your hands free phone sound twice as loud.
Custom Cut “Easy Kits”

Your new speakers plus a Dynamat Speaker Kit give you **Better Sound!**

Your new amplifier plus a Dynamat Door Kit give you **More Music!**

Your new subwoofer plus a Dynamat Trunk Kit give you **More Bass!**

Your car audio system plus Dynamat and professional installation give you **Great Sound!**

Dynamat your vehicle without measuring or cutting!

Our computer generated sheets of Dynamat Xtreme eliminate calculations, templating and cutting. It is incredibly easy! You literally open the package, peel, stick and you’re done!

No more guesswork. No more waste. With a Dynamat Custom Cut Kit, we have already done the work for you. Now there is no mystery behind how much product you will need, where you should put it and how much it will cost.

It has never been easier. It has never been quicker.

Kits are now available for many classic cars and late model trucks. We are constantly adding more.
To find out how much material you will need, take each panel of your car and do this rough area calculation:

\[
\text{Length” X Width” ÷ 144 = Square Feet}
\]

This gives you the amount needed for full coverage. For partial coverage do the following:

\[
\text{Square Feet} \times 0.30 = 30\% \text{ Area}
\]

Apply Dynamat first to all accessible interior panels. Your vehicle becomes more quiet and solid with every panel you cover. Apply Dynaliner on top of the Dynamat. Dynaliner is the highest efficiency automotive insulator available. Maximum coverage equals maximum results.

All of our products are easy to cut and fit

- No special cleaning
- No special tools
- Dynamat and Dynaliner are peel and stick

The minimum coverage recommended for basic resonance control is 30% of the area of any panel. Unlike Dynamat, Dynaliner should ALWAYS cover 100% of any given panel using the thickness that the space allows.
You & Your Car Deserve the Dynamat Treatment

Want to feel the road instead of body vibrations? Want to feel your air conditioning instead of the engine heat? Want to feel the joy of driving instead of the stress? Want to feel quality instead of an old car? Dynamat is the ultimate upgrade and the first step to a great vehicle. Discover the Dynamat difference! You deserve it.

Proven Results

Millions of cars all over the world benefit from the installation of Dynamat. It has been proven in study after study that Dynamat drastically reduces cabin noise in any vehicle. Dynaliner on top of Dynamat insulates the cabin from any outside heat sources.

Dynamat is the Best at Stopping Noise

Dynamat is the #1 material engineered to reduce structure borne vibration into silent energy. Dynamat outperforms other materials, some by as much as 5 times. Dynamat also works better at a broader and higher range of temperatures. This is important in the hot environment of an automobile.

High levels of noise develop in your vehicle due to impacts from the suspension and drivetrain. As the vehicle body vibrates, the vibrations move from one panel to another. As the speed of the vehicle increases or the road gets rougher, the noise level in the vehicle increases. Stopping the noise causing vibration is the key to a quieter vehicle.

The unique VECTOR™ Chemistry of Dynamat increases its ability to convert dynamic motion into silent energy. No other material utilizes VECTOR™ technology.

Dynaliner is a Super Insulator

Engine and exhaust heat make your vehicle miserably hot and uncomfortable. Unlike your home, you can’t use a 12” deep layer of insulation in your car for a 30° difference. A 1/2” of Dynaliner gives you a 150° difference.

*The data listed is typical of average values based on tests conducted by independent laboratories or by the manufacturer. They are indicative only of the results obtained in such tests and should not be considered as guaranteed maximums or minimums. Materials and installation methods must be tested under actual service to determine their suitability for a particular purpose.
**Dynamat Xtreme**

Dynamat Xtreme is the highest efficiency energy conversion, sound deadener available*. Xtreme is a self-adhesive, elastomeric "space age" synthetic rubber with a heavy 4 mil aluminum constraining layer. VECTOR™ Chemistry directs the noise causing energy into silent energy. Xtreme is also the easiest product to install. The super sticky rubber and heavy aluminum stretches and contours better than any other product on the market.

*Third Party Testing

**Dynaliner**

Dynaliner is the most effective automotive thermal insulator available. Dynaliner is a soft, self-adhesive closed cell rubber that resists oil and water. It will not hold water or promote rust or mildew like most under carpet padding. Dynaliner provides acoustic absorption and thermal insulation. Available in 1/8", 1/4" and 1/2" thicknesses, use the thickest one that your space will allow.

**The Cool & Quiet Combination**

Dynamat and Dynaliner both reduce heat and noise. Dynamat is best for noise, but also reduces heat. Dynaliner is best for heat, but also reduces noise. Combined, you get the benefit of both products due to the interfacial thermal resistance for a super cool, quiet and solid vehicle.

*Third Party Testing
Dynamat SuperLite utilizes the same VECTOR™ Chemistry as Dynamat Xtreme in a thinner, and therefore, light weight self-adhesive sound deadener. SuperLite is 30% thinner and lighter and still out performs other brands of damping material. The gleaming blue alloy layer is 2 mils thick and helps you get a quieter car without the weight!

Dynaplate

Dynaplate is a very thin, strong and light weight sound deadener. The solid aluminum sheet is self-adhesive. Use Dynaplate where space is an issue or to bridge openings in body panels. It’s a great product to help turn a door into a speaker enclosure.

DynaPad

DynaPad is a four layer composite barrier for extra hard to control noise problems. It is a heavy, one pound per square foot mat for use on diesel truck floors and car audio installations. DynaPad has a vinyl barrier between two layers of acoustic foam and a waterproof poly facing. It has no adhesive so it can be reused.

DynaDeck

DynaDeck is a weather proof and wear resistant replacement for carpet and padding in classic and vintage vehicles. The 1/8” vinyl barrier and 1/4” Dynaliner combines to stop noise and heat in traditional hot rods, classic sports cars, trucks and off road vehicles. The durable, deep twist, embossed textured mat is offered in brown, green and black. It has no adhesive so it can be reused.

The Hoodliner

The Hoodliner is an acoustic “sound soaker” foam with an aluminized reinforced skin that is oil and water resistant and cleanable. The high-tack self-adhesive material is of adequate size for most vehicle hoods. Dress up your engine compartment and stop the noise!
Discover the Dynamat Difference

- Dynamat exceeds other materials because of proprietary VECTOR™ Chemistry.
- Dynamat damps better at an extended higher temperature range.
- Dynamat Xtreme has a 4 mil aluminum while the imitators are thinner.
- Dynamat’s heavy aluminum forms and contours without tearing.
- It’s much easier to do a better job with Dynamat’s larger sheets of 3, 4 and 8 square feet while imitators can have less than 2 square feet.
- Dynamat and Dynaliner do not absorb moisture.
- Dynamat sticks to overhead, vertical and oily surfaces.
- Dynamat is and has been made in the USA for over 20 years. We guarantee it.
