Official supplier

Our artisan origines keep being tangible inside the company, but over the years G3 has adopted new R&D processes to be up to the demand of our worldwide customers. Research on better lines, care for details, constant investments in the research of raw materials, these are the directions leading the organisation, maintaining its interest in offering avant-garde products never forgetting the typical Italian style and design.

Fiat, Alfa Romeo, Lancia, Maserati, Audi, Volkswagen, Lamborghini, Seat, Skoda, Kia, Hyundai, Ford, Mitsubishi, Nissan, Opel, Peugeot, Citroen, Dacia and Renault have chosen to collaborate with G3 S.p.a.

Maximum Flexibility

Our aim is to be able to lead the process and to follow your request: we want to meet your needs.

Quality Management

Production site and processes are certified
ISO 9001:2015 and IATF 16949:2016.

Specific Engineering

We follow all the processes, from the concept to the production, to reach the best fitting solution.

Domestic Production

Our products are proudly 100% made in Italy to give worldwide solutions.

Box da tetto
Roof boxes

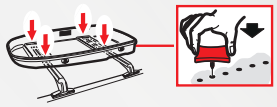
Our quality

CITY CRASH
G3 complete range has successfully passed the ISO/PAS tests. All roofboxes are tested with an impact force equal to 8G and a weight range between 50 kg and 75 kg.

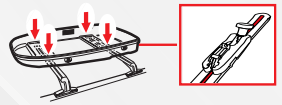
EASY-SYSTEM
Efficient rapid assembly time (no longer than 15 min.) achieved thanks to a pre-assembly work and G3 attention to details.

UV
Shielding treatment of the material protects the product from Ultraviolets (uv rays) in order to last over time.

DUAL SIDE OPENING SYSTEM
The Dual Side opening system allows you to open the box from both sides to facilitate assembly, loading and unloading.



PRE-DRILLED HOLES
Thanks to G3 pre-drilling system, the use of the practical Hole Maker Tool (supplied with each box) will help you with the assembly phase.



"RAPID" SLIDING HOOK
Thanks to the new G3 Quick Coupling system, the installation of the box will be even easier and faster.

EASYFIX
Easy and fast assembling of the product without the use of any additional tool.

MATERIAL
PS = Polystyrene.

MATERIAL
ABS = Acrylonitrile Butadiene Styrene.

COMPARATIVE CHART

We have compared the different sizes of our boxes to give you the opportunity to understand which product best matches your car segment.

	CITY CAR	COMPATTA	BERLINA	SW	SUV
S 1180/1338 mm	●	●	●	○	○
M 1440/1520mm	○	●	●	●	○
L 1776/1985 mm	○	●	●	●	●
XL 2200/2280 mm	○	○	●	●	●

Roof bars

Our quality

CITY CRASH
G3 complete range has successfully passed the ISO/PAS tests. All the bars are tested with an impact force equal to 8G and a weight range from 50 kg to 75 kg.

EASY-SYSTEM
Efficient and rapid assembly system (not more than 15 min.) achieved thanks to a pre-assembly work and the G3 attention to details.

ISO/PAS
International standard regulation that encloses main European rules.

MATERIAL
Aluminium: exdruded aluminium profile.

MATERIAL
Steel: steel pipe covered by plastic material.

PCS
Number of pieces in each pack.

EASYFIX
Easy and fast assembling of the product without any additional tool.

MAX LOADING CAPACITY
Maximum indicative loading weight for which the pair of bars has been tested.

FIXING KIT
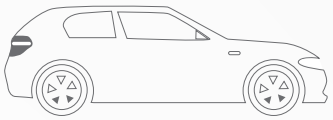
Fixing kit will be included/not included in roofbars package.

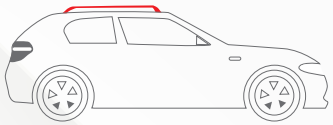
LOCKING KIT
The product includes a centralized anthitheft lock with an engraved 3 digits code, useful in case of key loss.

TO EACH ROOF ITS OWN ROOF BAR

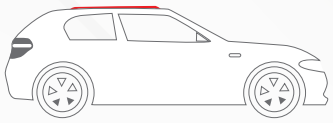
G3 roof bars range is composed by three different product lines (Pacific, Open and Clop), everyone satisfying some particular and specific roof feautures in order to meet every type of fixation needs.

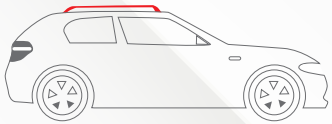


pacific - pacific.basic
pacific.basickitless - pacific.airflow
Specific Roof bars



open - open.basic
Open rails roof bars





clop - clop.infinity - clop.airflow
Roof bars for integrated railing and open railing

PROFESSIONAL LOAD CARRIER
The professional roof bars of the Atlantic range have been designed by G3 technicians in order to satisfy all the needs of people who work with industrial vehicles and have the need of loading and transporting bulky equipment. Atlantic roof bars can be supplemented with different accessories, like a side panels' system improving the storage capacity of the vehicle's roof (Atlantic.pro equipment) and a system of cross bars to complete the basket equipment of the van (Atlantic.prowork).

Wind and rain deflectors

Our quality

EASY-SYSTEM
Efficient and rapid assembly system (not more than 15 min.) achieved thanks to a pre-assembly work and the G3 attention to details.

MATERIAL
PMMA = Impact resistant polymethyl methacrylate.

THICKNESS
Maximum thickness of the product.

MAX SPEED
Maximum speed suggest if the product is install.

EASYFIX
Easy and fast assembling of the product without the use of any additional tool.

FLEXIBLE
G3 deflectors sre made of flexible material that reduce the risk of damage.

QUALITY TESTS
our products have to pass strict quality tests to meet all the imposed requirements before their launch on the market.

BALL DROP TEST

Tested with falling load (227 gr. weight) from 3 mts. height at the room temperature of -20°C. This test verifies the material resistence in critical condition, like low temperatures.

SMOKE OUT

Our wind deflectors give the possibility to keep the side window open even during rainy days, letting the smoke out but impeding the water to get inside the car.

TEMPERATURE LEAP RESISTANCE

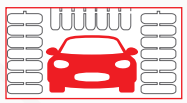
The material or wind deflectors are made of, has brilliantly passed high and low temperature tests (-354°C/+80°C).

NOISELESS

The product minimizes the noise due to currents of air during the drive.

BAD WEATHER RESISTANCE

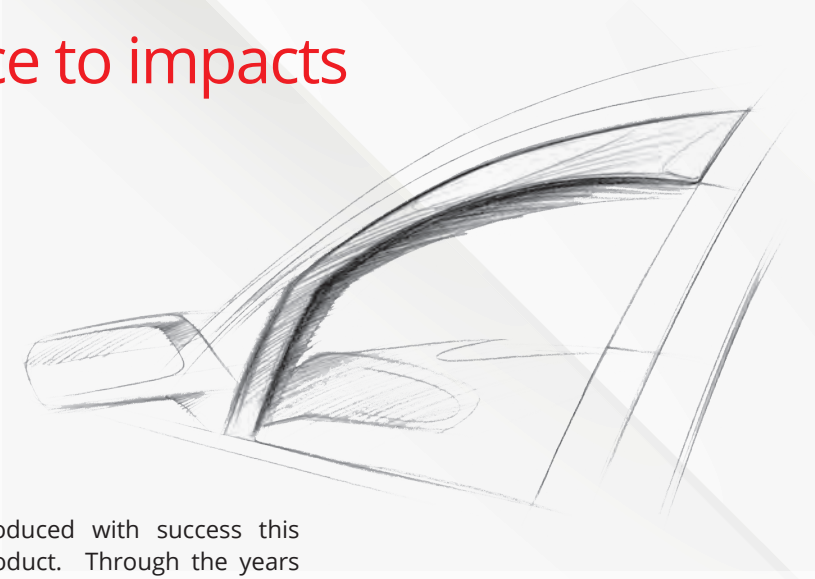
Material and design of G3 wind deflectors make this product perfect for each season.



FUNCTIONALITY

G3 wind deflectors have no particular obstacles: you can wash your car with no needs to remove the accessory.

Aerodynamic, and strong resistance to impacts



Since 1979, G3 has produced with success this useful and functional product. Through the years and after many studies, the company discovered a good application of the extruded PMMA with a high shatter resistance that is appreciated also by our OEM-Customers. This material is characterized by an high cold and heat resistance (-35°C/+80°C), an high flammability and light resistance, high crash strength following DIN 50306 (no impact marks under 3 meters). G3 is able to develop this product starting from CAD-Data and complete our project achieving ECE standards, TUV approval and KBA certification (under the German law).
