Passion and Italian manufacturing

G3 Production is the evident result of the Italian design and engineering. Our products are manufactured in Reggio Emilia, a small city located in Emilia Romagna. Inside our company is still possible to feel the origins, which are strongly linked to our tradition. However during these 45 years, **G3** has always kept attention on innovation with the aim of a constant improvement of its processes and its products. Our last goal has been represented by the improvement of products range with bike carriers starting from the one for the rear trunk door. All **G3** products are 100% made in Italy, as fully designed, developed and produced inside our factories.

Maximum Flexibility

Our aim is to be able to lead the process and to follow your request: we want to meet your needs.

Quality Management

Production site and processes are certified ISO 9001:2015 and IATF 16949:2016.

Specific Engineering

We follow all the processes, from the concept to the production, to reach the best fitting solution.

Domestic Production

Our products are proudly 100% made in Italy to give worldwide solutions.

Official Supplier

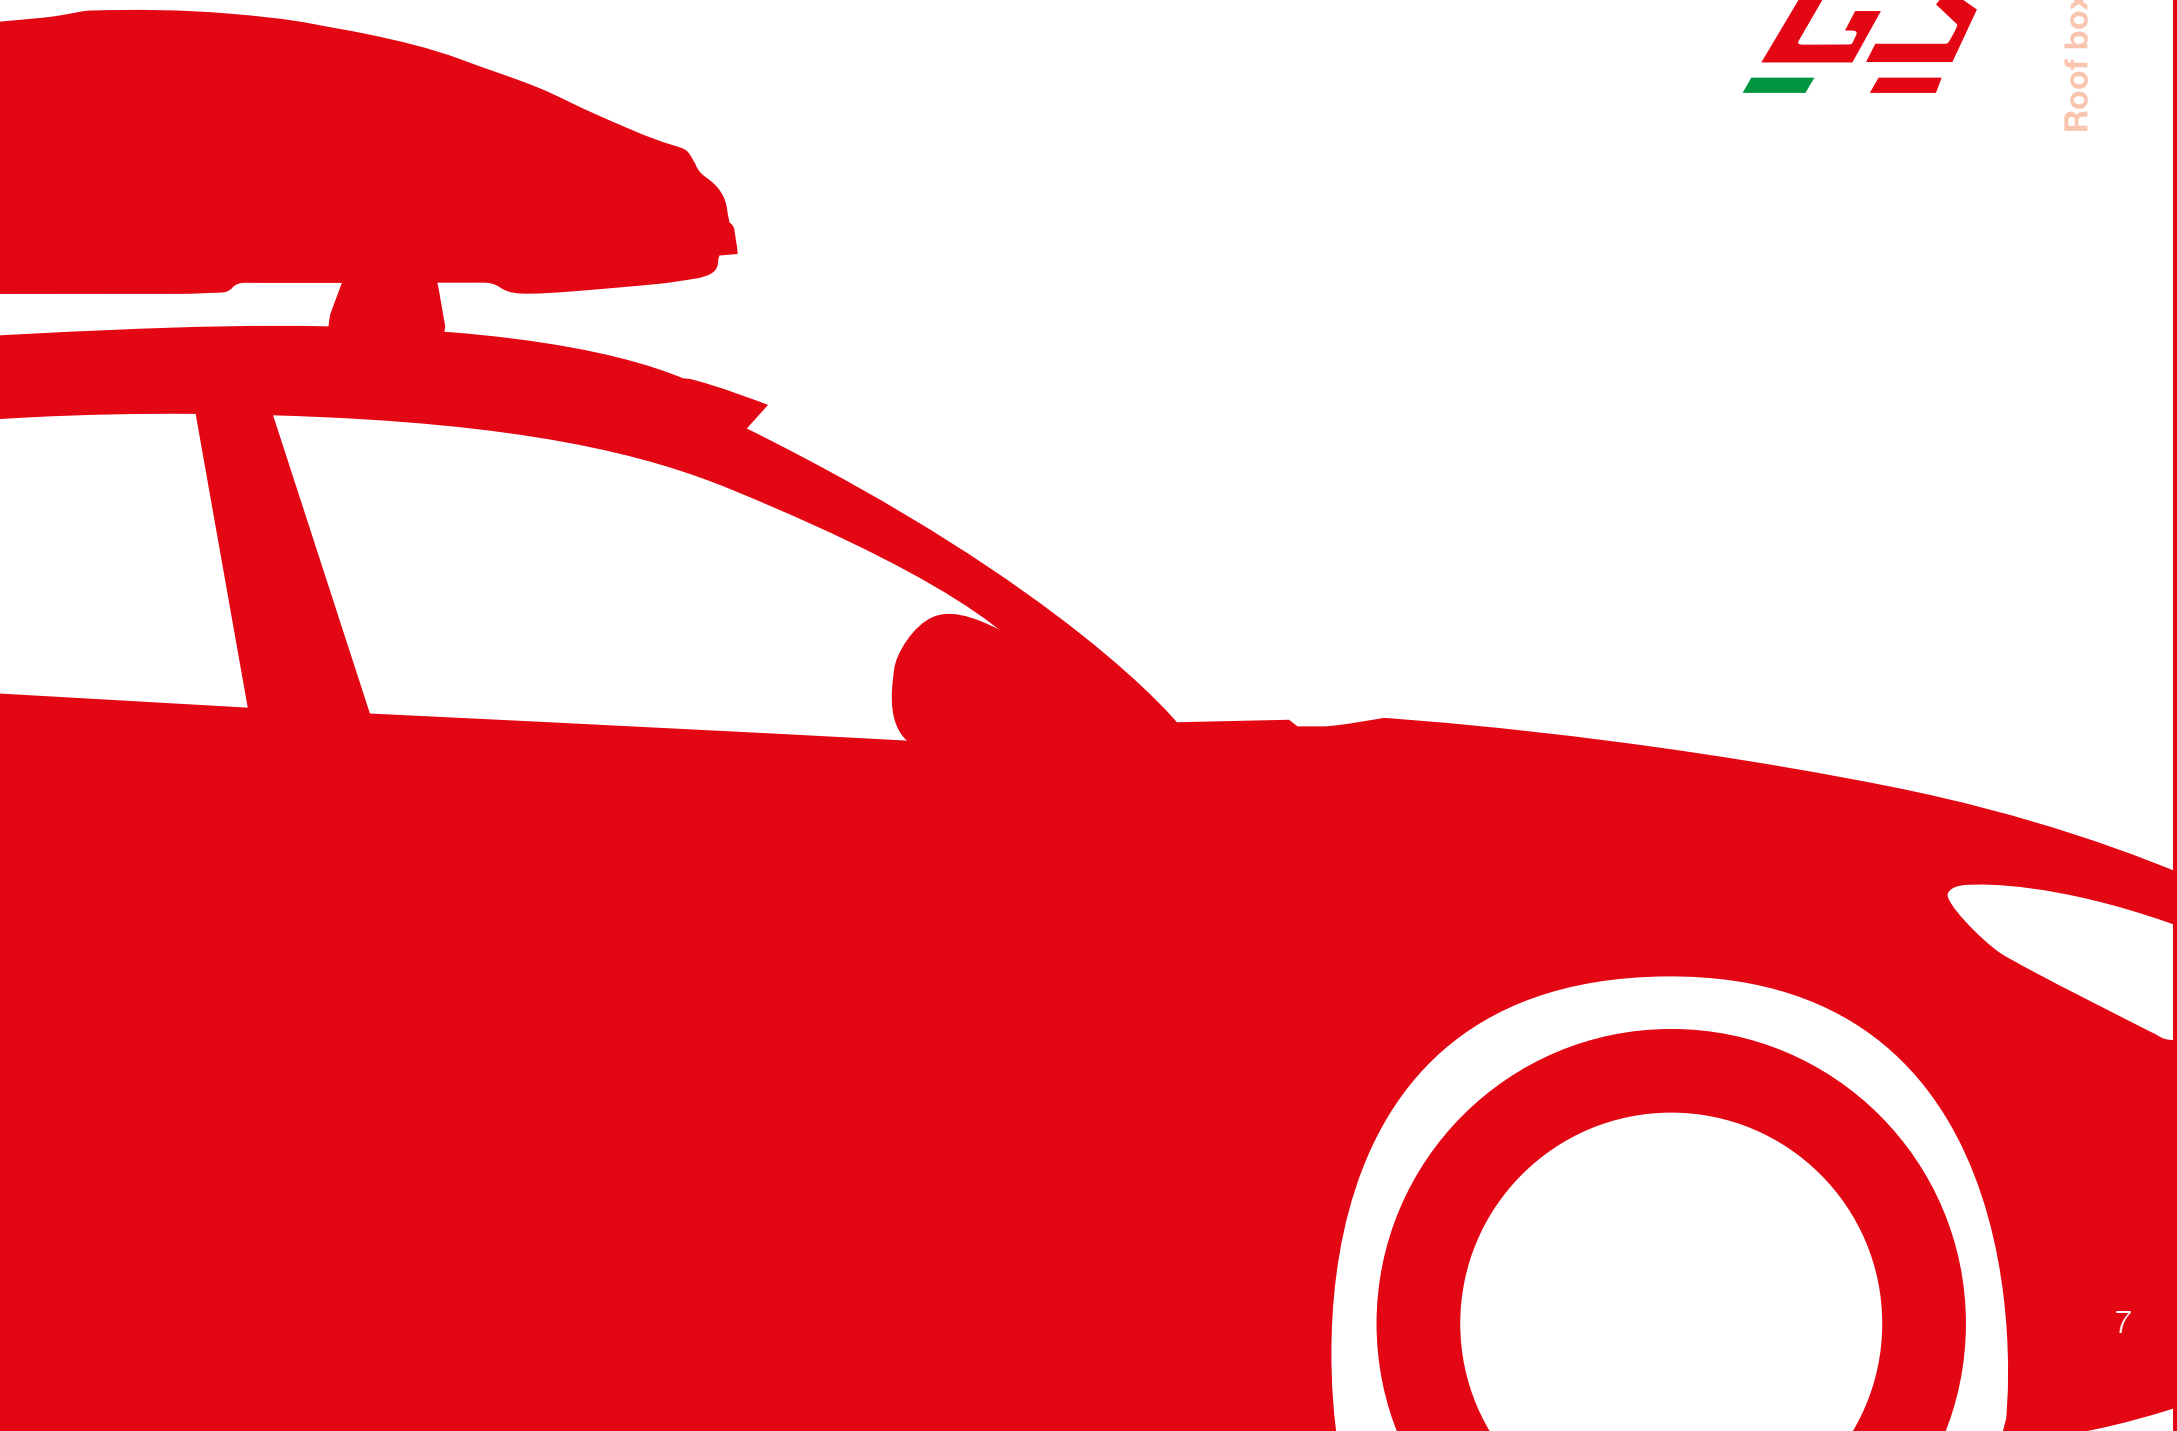

Our know-how

Our artisan origins keep being tangible inside the company, but over the years G3 has adopted new R&D processes to be up to the demand of our worldwide customers. Research on better lines, care for details, constant investments in the research of raw materials, these are the directions leading the organisation, maintaining its interest in offering avant-garde products never forgetting the typical Italian style and design.

Roof boxes

DUAL-SIDE OPENING SYSTEM

The dual-side opening system allows customer to open the roof box from both sides: in this way the mounting process gets easier as well as loading and unloading operations.

G3 engineers have created this dual-side opening system in order to improve **G3** roof box range performances. An only key is required to open the box by each side: in this way a better and easier access to the roof box can be achieved. This solution makes the box more comfortable and practical in every condition. Furthermore the dual-sided opening represent a essential solution for all the countries with left-lane driving way and, at the same time, it provides the opportunity to match the roof box with other accessories on the roof bar. At the beginning this innovation will be applied only on the high-level **G3** roof boxes, enriching in this way a range of products offering good-looking finishes, central locking and city crash test certification.

Once again, **G3** roof boxes try to fulfill the growing market demand, increasing the versatility and improving the access to the loaded luggage without losing sight on their practicality and elegance.

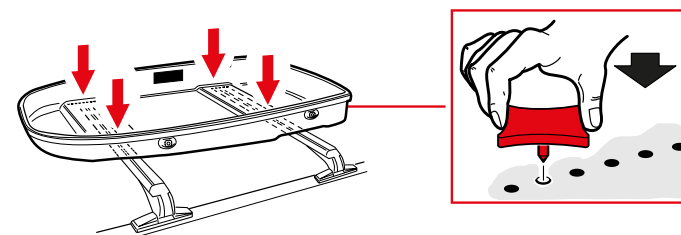

Dual Side

PRE -DRILLED HOLES

Thanks to the innovative skills of our technicians it's been possible to create the practical system of pre-drilled holes which distinguishes the **G3** roof boxes. It is possible to fix the roof box with the practical Hole Maker Tool, a new tool developed by our company and made available to each customer in order to simplify the fixing process. Simply and quickly, the customer is not required to manage dangerous tools to fix the box which might be risky. The result is excellent, absolutely better than any other competitor can provide on the market: the system of pre-perforation improves the precision of mounting and contributes to increase the quality of **G3** boxes.

WARRANTY

G3 guarantees that every new product is made in our factory in Italy, in order to underline the quality of the product and the attention that the company has toward the customers.

CITY CRASH

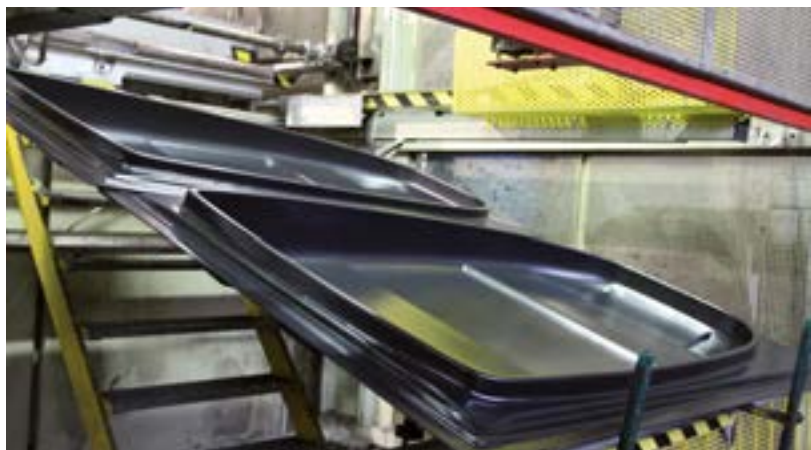

G3 complete roof bars range (open, pacific, clop and atlantic) has successfully passed the ISO/PAS tests. All the bars are tested with an impact force equal to 8G and weight that range from 50 kg (for pacific) to 75 kg.

COLOR

G3 roof box range is available in different colors, shapes and finishings, which also included silk-screen printing like UK, Camou and the new Road. All of this, to keep up with the new trends and to meet every need of the customers.

EASYFIX

Easy and fast assembling of the product without the use of any additional tool.

UV

Shielding treatment of the material protects the product from Ultraviolets (uv rays) in order to last in the years.

MATERIAL

ABS= Acrylonitrile Butadiene Styrene.

MATERIAL

PS= Polystyrene.

ASSEMBLY TIME

Time estimated from **G3** to have a correct assembly of the product.

EASY-SYSTEM

Efficient rapid assembly time (not more than 15 min.) achieved thanks to a pre-assembly work and the **G3** attention to details.

RANGE

The wide range of **G3** car roof boxes satisfies every need: from space for higher comfort, to research of fashion and fascinating products. **G3** offers a lot of models (all satisfy all city crash standards), among which the new UK, camouflage and road colours.

BUYER'S GUIDE

Does any roofbox fits on my car?

Yes.

Roof boxes are almost universal products. You can choose it depending on your loading needs. Please consider that any longer carriage system may reduce the good opening of the trunk door. **G3** suggestion for all its customers is to compare roof boxes with car dimensions in order to choose the most suitable one.

COMPARATIVE CHART

We compared (mainly as example) each size of **G3** roof boxes with the main car categories in order to give our customer the possibility to understand which match car & roof box may suit better to his needs.

WARRANTY

G3 guarantees that every new product is made in our factory in Italy, in order to underline the quality of the product and the attention that the company has toward the customers.

EASY-SYSTEM

Efficient rapid assembly time (not more than 5 min.) achieved thanks to a pre-assembly work and the G3 attention to details.

EASYFIX

EASYFIX

Easy and fast assembling of the product without the use of any additional tool.

ASSEMBLY TIME

ASSEMBLY TIME

Time estimated from **G3** to have a correct assembly of the product.

CITY CRASH

G3 complete roof bars range (open, pacific, clop and atlantic) has successfully passed the ISO/PAS tests. All the bars are tested with an impact force equal to 8G and weight that range from 50 kg (for pacific) to 75 kg.

ISO PAS 11154

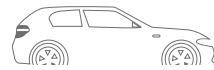

ISO/PAS

International reference standard that encloses main European regulations.

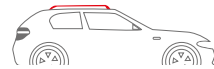

This collection of standards specifies the minimum safety requirements for all load mounting above the roofs of cars and commercial vehicles (until 3.5 ton.).

TO EACH ROOF ITS ROOF BAR CARRIAGE SYSTEM

G3 roof bars range is composed by three different product lines (Pacific, Open and Clop), everyone satisfying some particular and specific roof features in order to meet every type of fixation needs. Company's aim is to offer three type of roof bars that may fit the whole range of vehicles available on the market, always thinking about the quality and the simplicity distinguishing **G3** products. The company has decided to match Pacific and Open ranges with a .basic edition: in this way **G3** is able to satisfy the most demanding customers that are looking for safety products at cheap prices.

FINAL SOLUTION FOR ANY VEHICLE WITH NO RAILING SYSTEM

G3 proposes the **Pacific** range as a solution for cars with no roof rails. Once again, our technicians worked hard on G3 target: easy assembly, innovative solutions and an high level of adaptability. This loading system is continuously under update in order to fit all the new car models launched on the market. **Pacific** range is composed by only two parts: the roof bar and the specific fixing kit. The bar is available in three lengths that are the same for each car dimension. At the same time, the fastening kit has been conceived and designed ad hoc for every car. Only fixing kits who can be suitable to more vehicles.

THE BEST SOLUTION FOR CARS WITH NO RAILS, BUT WITH THE DUE ATTENTION TO THE POCKET

Pacific.basic line is also composed by roof bars and fixing kits in a cheaper version. Only fixing kits who can be suitable to more vehicles on the markets will be included and available in the pacific basic range. In addition, thanks to the brand new line Pacific.basic kitless, **G3** implements the bars range for cars without railing. The Kitless version is composed by a Pacific.basic bar without the fixing kit inside the box (but always available for separate purchase). Each bar can match every Pacific, eliminating all the applicability limits of basic line. In this way the customer has the possibility to benefit of an economic version of the product for each reference indicated by the Premium one. What is left to the customer is the simple assembly and to enjoy this system adaptability.

Application list: see table page 64

SUITABLE TO ALL OPEN RAILING SYSTEMS

The **G3 Open** roof bars have been developed with the same great attention in design and technical features as all the other products. The main purpose of **G3** is to provide a product suitable to all types of vehicles provided by an open longitudinal railing system: easy to fit for an immediate use. Contrary to many similar products that can be found on the market, the **G3 Open** bars are pre-assembled so the customer is only required to fix them on top of the car with a simple manual device and without any additional tool. The bars are fixed on the car roof by 4 mounting-feet and served by an only key. This is also a good antitheft-solution in order to guarantee the security of the bars and their carriage. After a careful study, the **Open** bars are produced in three different length: 100cm, 127cm and 145cm; The basic **Open** bars are only 122cm length instead, steel-made and covered with a plastic sealing. All of this to fit, with efficiency and elegance, to the widest number of car.

ABSOLUTELY INNOVATIVE

Clop system is designed to fit 100% of the circulating vehicles with closed railing bars and the most with open ones.

Starting from the name this product aims to sum up this dual nature: CLOSE + OPEN.

This item contains the typical **G3**'s characteristics: safety, versatility and ease of assembly.

Clop is sold preassembled: indeed the user will easily complete the mounting in few minute.

ELEGANCE AND INNOVATION

Using CLOP patented system, **G3** decided to enrich its selection of bars with a new outline. **Clop.airflow**, developed and fabricated within one of our plants, is characterised by its aerodynamic and symmetrical shape and it is composed of aluminium, which gives an amazing elegance.

It is further provided with flex system's cap to use the accessories in a simple and quick way.

PROFESSIONAL BAG

This accessory bag helps you to take care about your roof bars when you get it off. Keeps the tidiness, maintains perfectly the product, avoid to lose any spare part. Available for all roof bar ranges **Pacific, Open, Open basic, Clop.**

Cod	EAN
69.900	8010682043136

ANTITHEFT KIT

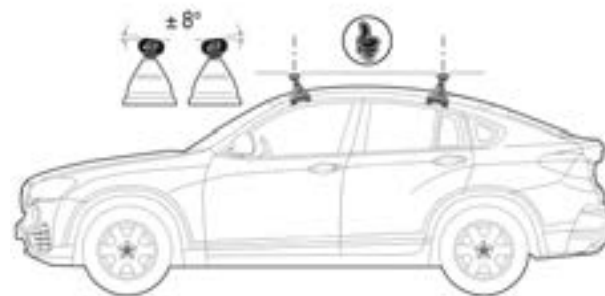

Set composed by 4 locks and 2 keys. Only one combination. It can help as a spare part or improves the safety of products which do not have a device like this.

Cod	EAN
69.011	8010682041835

BALANCING SUPPORT KIT

Thanks to the rotating action of our new Balancing Support, can be put in position also on slightly round roof.
The Balancing Support can be mounted exclusively with **Pacific** and **Atlantic** roofbars.

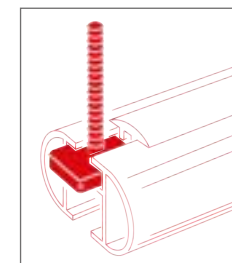

> **EASYFIX** **ASSEMBLY TIME**

Cod	EAN
69.013	8010682046687

T-SHAPED FIXING KIT

Set of 4 sliding “T-shaped” fixing kit. This optional allows to fix every accessory on your roof in a safe and invisible way. Adapt for all aluminium models of **Pacific**, **Open**, **Clop** range.

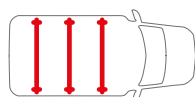

> **EASYFIX** **ASSEMBLY TIME**

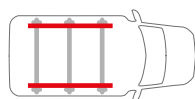

Cod	EAN

Roof bars for vans

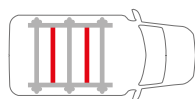

> *atlantic*

Sistema di portaggio professionale / Professional roof rack system

> *atlantic.pro*

Sistema di portaggio professionale con sponde / Professional roof rack system with side profile

> *atlantic.prowork*

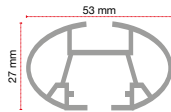

Sistema di portaggio professionale a cestello / Professional roof rack system with load basket

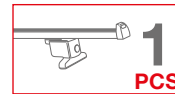

PROFESSIONAL CARRIAGE SYSTEM

The professional roof rack system of the **Atlantic** range has been conceived by **G3** technicians with the purpose to satisfy the needs of those people who work with industrial vehicles carrying bulky equipment. The Atlantic system could be integrated with different optional like a couple of sideboard bars that allows more stability to the loaded goods (**Atlantic.pro** system) or a transverse bars system which permits to complete the fitting of the basket load of the van (**Atlantic.prowork** system).

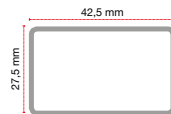

MATERIAL
AL = Extruded aluminium profile.

PCS
Number of pieces in each pack.

MATERIAL
ACC = Steel flue ermined in plastic material.

MAX LOADING CAPACITY
Maximum load indication that the roof bars can support.

INCLUDED FIXING KIT
Each pack contains the fixing system of the bars to the roof.

SIDE PROFILE A/B/C
A = lenght 130 cm
B = lenght 160 cm
C = lenght 200 cm

PROFESSIONAL CARRIAGE SYSTEM

The professional roof rack system of the Atlantic range has been conceived by **G3** technicians with the purpose to satisfy the needs of those people who work with industrial vehicles carrying bulky equipment. The product design has been carefully studied for minimizing the noise during the drive and for boosting its esthetic details. Moreover, each aluminum bar has a groove covered by a rubber seal that avoids the slipping and maximizes the grip. The Atlantic bars are also available in the steel edition with plastic covering.

ATLANTIC.PRO - SIDE PROFILE

Adding the side bars device to the Atlantic system, you achieve the **Atlantic.pro** fitting. The side profiles are available in different length (130 cm, 160 cm and 200 cm). This device allows to have a heavy-duty rack for vehicles. Suitable for all the bars of Atlantic range (aluminium and steel).

Professional roof rack system with load basket

> **atlantic.prowork**

> **QUALITY TEST** ISO PAS 11154 **EASYFIX** **ASSEMBLY TIME** **100 Kg** per roof bar **MAX LOAD** **2 PCS** **AL MATERIAL**

BIKE RACK SYSTEMS

The new **G3** bike rack line is composed by two innovative elements: the bike rack for trunk door **Frame** and **Frame.basic**. Thanks to these new products **G3** has widened its transport and outdoor range of products, stepping the bike carriers world. Even through this new adventure, **G3** brought its characteristics which makes it different from the others: passion, design and simplicity.

WARRANTY

G3 guarantees that every new product is made in our factory in Italy, in order to underline the quality of the product and the attention that the company has toward the customers.

EASYFIX

Easy and fast assembling of the product without the use of any additional tool.

EASY-SYSTEM

Efficient rapid assembly time (not more than 5 min.) achieved thanks to a pre-assembly work and the **G3** attention to details.

ASSEMBLY TIME

Time estimated from **G3** to have a correct assembly of the product.

MAX LOADING CAPACITY

Maximum load indication that the bike carrier can support

READY TO USE

Ready to be mounted with no extra tools.

MAX PORTABILITY

Max. no. of portable bikes.

UNIVERSAL

Almost 100% cars compatible.

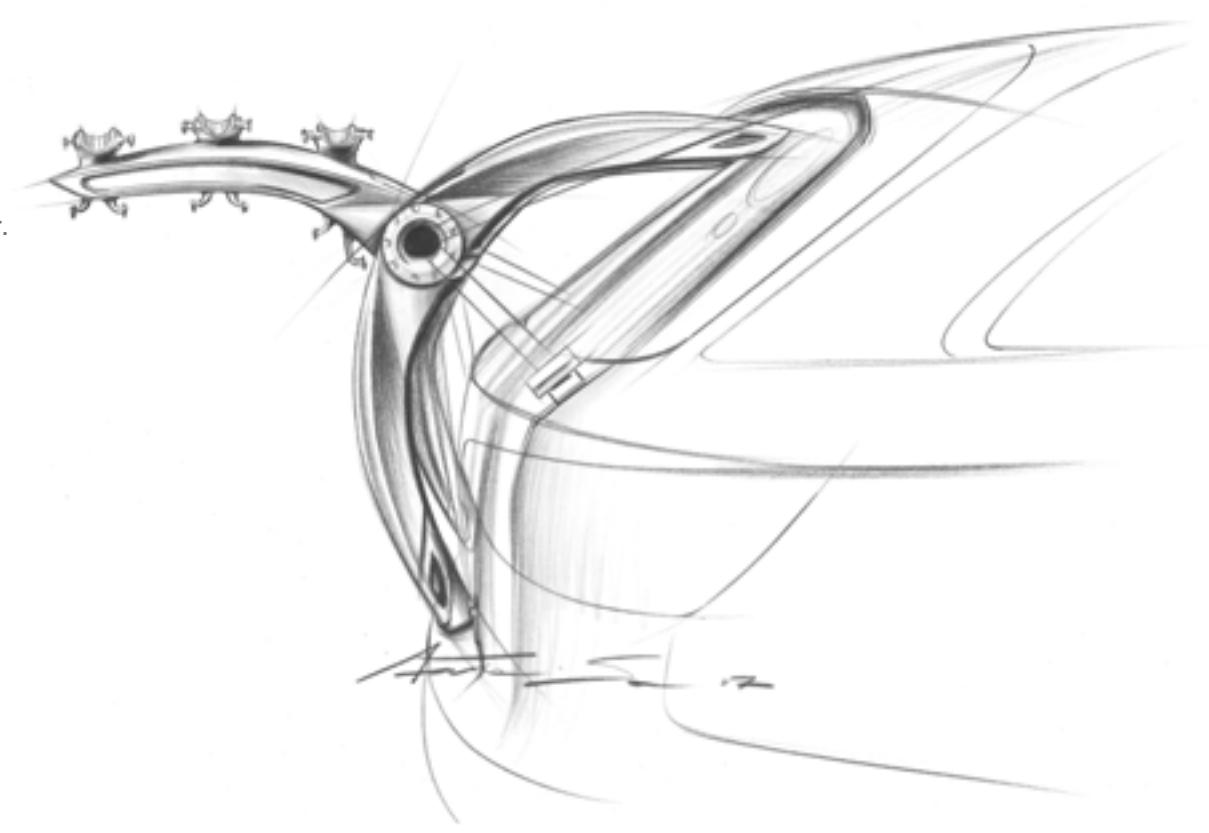

MATERIAL

PP GF30 = Polypropylene with 30% glass fiber.

RECYCLING

Polypropylene parts are 100% recyclable.

Wind and rain deflectors

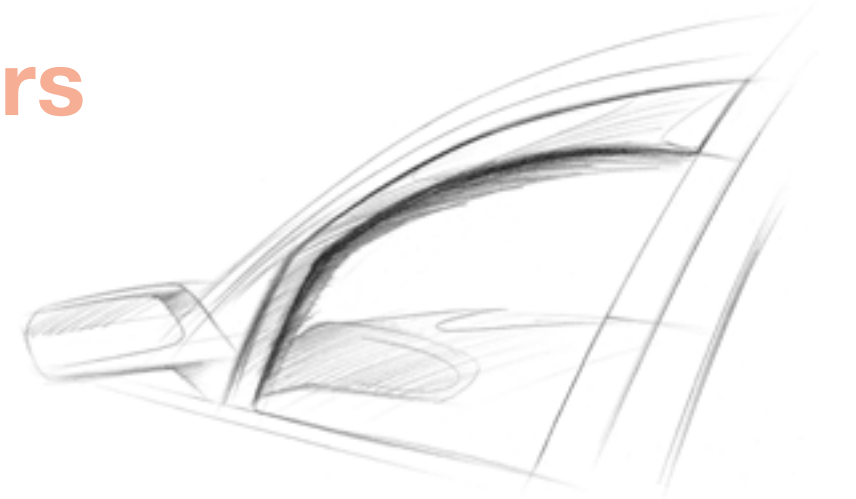

Wind and rain deflectors

Wind and rain deflectors

AERODYNAMIC AND STRONG RESISTANCE TO IMPACTS

Since 1979, **G3** has produced with success this useful and functional product. Through the years and after many studies, the company discovered a good application of the extruded PMMA with a high shatter resistance that is appreciated also by our OEM-Customers. This material is characterized by an high cold and heat resistance (-35°C/+80°C), an high flammability and light resistance, high crash strength following DIN 50306 (no impact marks under 3 meters). **G3** is able to develop this product starting from CAD-Data and complete our project achieving ECE standards, TUV approval and KBA certification (under the German law).

WARRANTY

G3 guarantees that every new product is made in our factory in Italy, in order to underline the quality of the product and the attention that the company has toward the customers.

EASY-SYSTEM

Efficient rapid assembly time (not more than 5 min.) achieved thanks to a pre-assembly work and the G3 attention to details.

MATERIAL

PMMA = Impact resistant polymethyl methacrylate.

ASSEMBLY TIME

Time estimated from G3 to have a correct assembly of the product.

THICKNESS

Maximum thickness of the product.

EASYFIX

Easy and fast assembling of the product without the use of any additional tool.

FLEXIBLE

G3 deflectors are made of flexible material that reduce the risk of damage.

BALL DROP TEST

Tested with falling load (227 gr. weight) from 3 mts. height at the room temperature of -20° C. This test verifies the material resistance in critical condition, like low temperatures.

QUALITY TESTS

Our products have to pass strict quality tests to meet all the imposed requirements before their launch on the market.

SMOKE OUT

Our wind deflectors give the possibility to keep the side window open even during rainy days, letting the smoke out but impeding the water to get inside the car.

TEMPERATURE LEAP RESISTANCE

The material our wind deflectors are made of, has brilliantly passed high and low temperature tests (-35°C/+80°C).

NOISELESS

The product minimizes the noise due to currents of air during the drive.

MAX SPEED

Maximum speed suggest if the product is install.

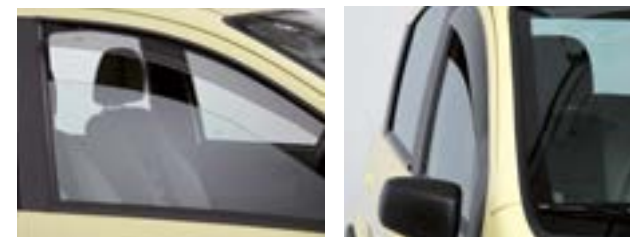

BAD WEATHER RESISTANCE

Material and design of G3 wind deflectors make this product perfect for each season.

FUNCTIONALITY

G3 wind deflectors have no particular obstacles: you can wash your car with no needs to remove the accessory.

Trunk liners

CAR TRUNK/BOOT PROTECTION TRAYS

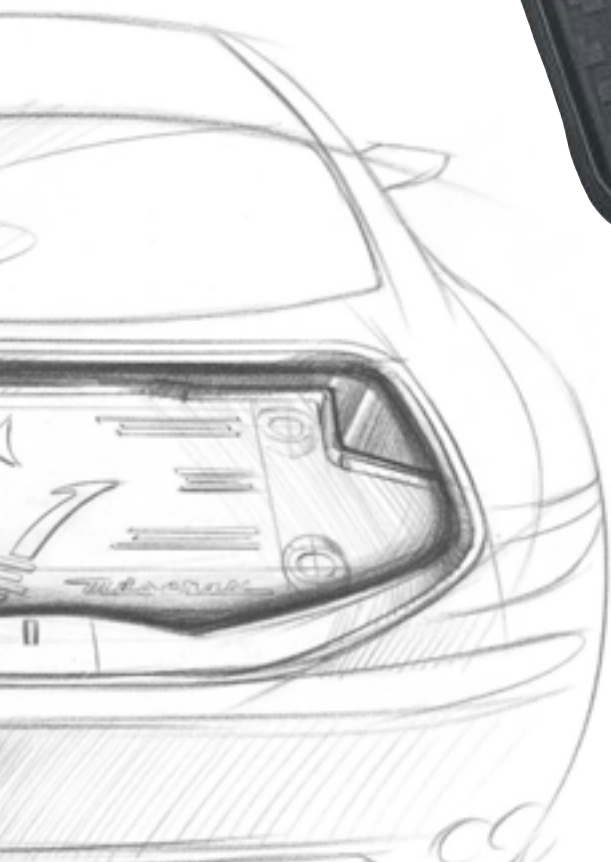

Multipurpose non-slip tray, washable and waterproof, made with recyclable materials. Ideal for trips, gardening, leisure and pets.

The boot tray represents a simple and practical solution to keep the car trunk clean and protected. Custom-made for specific vehicles or universal, it is produced in the flexible or in the semi-rigid version in order to meet the always increasing demand of different drivers.

after market

OEM products

WARRANTY

G3 guarantees that every new product is made in our factory in Italy, in order to underline the quality of the product and the attention that the company has toward the customers.

EASY-SYSTEM

Efficient rapid assembly time (not more than 5 min.) achieved thanks to a pre-assembly work and the G3 attention to details.

MATERIAL

FOAM-PE = Cross-linked foam polyethylene.

ASSEMBLY TIME

Time estimated from G3 to have a correct assembly of the product.

QUALITY TESTS

Our products have to pass strict quality tests to meet all the imposed requirements before their launch on the market.

> **5 mm**
THICKNESS

THICKNESS
Thickness of the material.

3 mm
THICKNESS

> **h 30 mm**
DIMENSION

DIMENSION
Total thickness of the boot tray.

EASYFIX
Easy and fast assembling of the product without the use of any additional tool.

EDGE
Shape of the containment edge.
