Part number SES1869
2000-05 Mitsubishi Eclipse
3.0L V6

2- (76mm) CP-76 S.S       (#4015)
Torsion clamp
1- SES exhaust decal       (#7027)
2- page instruction

Note: The installation of this SES exhaust does require mechanical skills. Removal of the stock parts does require loosening and removing several parts and screws that may be difficult. Injen strongly recommends that this system be installed by a professional mechanic.
Slip primary exhaust pipe onto the factory catalytic converter, using the factory bolts and gasket.

Then use a 19mm wrench and tighten factory M14 nuts connecting both factory catalytic and Injen primary exhaust pipe.

Injen secondary exhaust tube shown connected to primary exhaust pipe using 76mm exhaust torsion clamp.

Slip the end of the rear section of the Injen exhaust through the sub-frame as shown above.

Prior to tightening all the 76mm torsion clamps, make sure the Injen exhaust tip clears the bumper exhaust cut-out and the muffler hangers are hanging correctly on the factory grommets.

Your installation is now complete.
