Factory Wiring Harness Systems

Push Button Start Systems

With the Keep It Clean Push Button Start Kit, you can easily convert your older vehicle to today’s standards. The push button start has a revolutionary activation for your ignition, greatly reducing engine start with programmable on/off times that make it ideal for any vehicle. Each E.U.D. dimensional button is available in 6 different colors and can be switched with anything you want.

Gauge Wiring Harness

Keep It Clean Universal Gauge Wiring Harness has everything you need to wire up your dash instrumentation and electric equipment. The kit makes the process easy and fast as it can be. Detailed instructions are included, and backed by a Limited Lifetime Warranty.

Billet Switch Kits

Dress up your vehicle with Keep It Clean™ Billet Switch Kits. Adds a touch of class to any vehicle. Includes all colored O Rings.

Engine Start Activation Control Module

Keep It Clean KCOB14002 remote engine start control allows you to deactivate your car with a push of a button.

Light Sequencer

Indicates turn, with style. The light sequencer controller flashes your turn signal in succession, instead of all at the same time.

Dome Light Delay Controller

Sets of leaving your dome light on! The dome light controller automatically times your dome light to turn off your dome light, preventing dead batteries and increasing the overall security of your vehicle.

Retained Accessory Controller

Keep It Clean’s Retained Accessory controller allows you to operate any item setup up to your ignition circuit when the key is in the ignition for a limited time.

Self-Conceting Controller

The self-conceting controller on your vehicle will convert your existing turn signal, tail, and brake lights to stay on for 5 seconds, if not canceled.

Touch Headlight Controller

Touch the ignition switch to cancel device and allow your turn signal, tail, and brake lights to turn on in sequence. It allows drivers to keep their vehicle’s brake light operational, but only when necessary.

Break Light Turn Signal Converter Module

Keep It Clean™ offers the brake light turn signal converter module. This handy and allows you to keep your vehicle brake light operational, but only in the case of an emergency.

L.E.D Tail Lights

NEVER REPLACE YOUR LIGHTS!

Upgrade your classic car lighting elements with ease! Keep It Clean® unique bolt-in design allows you to keep your factory light covers while replacing the inefficient incandescent bulbs with energy-efficient LED lights.

- Super Bright LED Auto Bulbs
  Keep It Clean® super bright LED bulbs are the ideal choice for your vehicle. Our LED lights feature 10 individual LED bulbs instead of the industry standard of 12; for ultimate brightness, color, and clarity. These LED's are one ideal turn signal replacement.

1. Choose Your Bulb Styler

No Load Adjustable Pulse Flasher
Pulls at your own speed. Keep It Clean® No Load Adjustable Pulse Flasher is the ideal companion for your L.E.D. tailights.

Standard 13v Flasher
Your typical factory, but with Keep It Clean®'s equally and Trouble-free.

No Load Fixed 13v Flasher
Works like a simple flasher, but doesn't need the second percent of current to operate.

No Load Adjustable Pulse Flasher
Similar to a regular flasher but with adjustable timing and control features.
