

Who We Are and What We Do...

We are a family of motorcycle and power sport enthusiasts who design and manufacture Distinctive Performance Exhausts and Ride-Enhancing Products.

Why We Do What We Do...

We exist to bring **MORE LIFE** to your riding experience.

How We Do What We Do...

Bringing more life to your riding experience is not easy. We do it through a unique combination of....

- Personalized Distinctive **"Sound"**
 - Individual Tailored **"Style"**
 - Added On-Demand **"Power"**
- ...from passionate riders just like you!

2017

New Products

*It's not about what you ride...
It's about bringing life to your ride.*

SuperTrapp FatShots

- Add or subtract discs to optimize power and sound!
- Tunable, 4" external disc-based muffler
- Dyno proven power

P/N 728-71578 '17 FLH
 P/N 728-71576 '95-'16 FLH

SuperTrapp Unfiltered 2:1:2 Bagger Headpipe

- Tuned for performance
- Aggressive price
- Utilizes factory heatshields and crossover
- Compatible with popular SuperTrapp and Kerker performance Slip-Ons

- Reduced heat vs stock headpipe
- Substantially outflows the factory unit
- Has 12mm O2 ports for factory O2 sensor
- Chrome plated for durability

P/N 188-71800 '10-'16 FLH
P/N 188-71870 '17 FLH

SuperTrapp Unfiltered Headpipe and Muffler Kits

- Unfiltered 2:1:2 headpipe with a pair of Kerker Slash Slip-Ons

P/N 128-76130 '10-'16 FLH

- Unfiltered 2:1:2 headpipe with a pair of Kerker Stout Slip-Ons

P/N 148-78226 '10-'16 FLH

FatShots 2:1 Systems

- Add or subtract discs to optimize power and sound!
- Huge performance gains
- Chrome-plated 2:1 headpipe
- 1.75" diameter primary pipes flow into a 2.5" diameter collector
- Full coverage bright chrome heatshields
- 3.5" chrome-plated body flares out to 4"
- 2.5" diameter performance core
- Supplied with discs, closed end cap, and polished trim ring
- Fits Baggers, Softails, and Dynas

Baggers '10 - '16: P/N 828-74800

Internal Disc Series Slip-Ons for Indian Scout

- Serious bolt-on performance gains
- Aggressive sound
- Significant increase in exhaust flow
- Tunable, 3" internal disc-based Slip-On mufflers
- Chrome-plated 3.5" diameter muffler bodies
- Supplied with chrome-plated removable tapered end caps
- Features a rebuildable core
- Fits '15 - '16 Indian Scout

P/N 628-21130

Jardine Backrests and Racks

- Quick Detach and Fixed Mount configurations
- Multiple Backrest styles available
- Luggage Racks available separately
- Quick & easy installation or removal within seconds
- Harley and Metric applications available

Jardine Highway Bars

- Classic style and function
- Heavy duty thick wall American steel tubing
- Available in chrome or black
- Harley and Metric applications available

JayBrake J-FL Forward Controls

- Simple installation, uses stock master cylinder
- Machined from steel and billet aluminum
- Fits with or without highway bars.
- Available in chrome or black
- Matching grips and pegs available

High Performance Off-Road Radiators

PERFORMANCE

- High efficiency brazed aluminum cores
- Significant increase in fluid capacity
- Direct fitment design
- Reduce engine temps by up to 30%

DURABILITY

- Double the strength of OEM parts
- TIG- welded to maximize strength
- FPS Racing price is less than most OEM's
- Off the shelf availability

Coolant Catch Tank

- Universal coolant overflow tank
- For dirt bikes and ATV
- Holds 6.1 oz / 180cc
- Durable high impact construction
- Meets AMA standard

P/N FPS11-OFB-6

SuperTrapp Industries, Inc. is

based in Cleveland, OH.

For 44 years, SuperTrapp Industries, Inc. has been a leading manufacturer of performance exhaust products

for motorcycle, ATV and automotive applications.

SuperTrapp Industries manufactures the signature

SuperTrapp tunable disc diffuser exhaust systems,

Kerker brand of exhaust systems, as well as Jardine Performance

Products & FPS Racing High Performance Off-Road Radiators & Oil Coolers.

We know that you have many options these days and we appreciate that you chose SuperTrapp! With exhaust applications for V-Twin, Metric, Sport, Dirt, ATV and Automotive - there's something for everyone and it's all made in Cleveland, Ohio.

Terms & Conditions:

Pricing: All prices, terms and conditions are subject to change without notice.

Retail Terms: Money order or credit card. State sales tax will be added for residence in Ohio.

Dealers: Money order or credit card.

Refused Orders: Customer is responsible for all freight costs to and from destination for refusing a product delivery, plus a 15% restocking fee. These charges are to be paid before any new orders are processed for shipment.

Returns: All requests for product returns must be made within 30 days from date of purchase. The return has to have a Return Material Authorization (RMA) number from SuperTrapp Industries and must include a copy of the original purchase invoice. Customer pays for the return freight and SuperTrapp Industries will exchange product or process a credit to your account. All returns must be in the original packaging to be eligible for any credit or exchange. Any return sent C.O.D. will not be accepted. Special order sales are final and may not be returned.

All warranty claims must be made through your point of purchase.

Limited Warranty: SuperTrapp's warranty extends to the original purchaser only and a copy of the sales receipt must be provided. **Keep your receipts.** SuperTrapp offers a one year warranty for defects in material and workmanship. Repair will be the initial resolution. Replacement will be at SuperTrapp's discretion. To obtain warranty service, call to receive a Return Material Authorization (RMA) number. Return must include description of the problem and a copy of the purchase invoice. Customers are responsible for freight charges to SuperTrapp. SuperTrapp will pay the ground freight when returning the product to the customer. Any misuse, negligence in handling or installation, redesign or unauthorized repair work will void warranty coverage. Chrome plated billet aluminum products are very fragile. They must be handled and installed with extreme care. The parts are guaranteed to be free of defect at time of shipping. **SuperTrapp warranties chrome plating for one year** from the date of purchase for defects. (Defects include peeling or blistering of the chrome from the base material.) Damage that may occur during installation or use are the responsibility of the customer. It is up to the discretion of SuperTrapp to determine if the products were properly cared for.

Chrome Parts: SuperTrapp ensures that our parts are chrome plated to the highest quality. However, chrome must be properly cared for. Salt, sand and humidity are all harmful to chrome. The life of your chrome may be shortened if not properly cleaned with a mild soap, water and waxed. Do not use abrasive or chemical cleaners.

Notice: Reference in this catalog to any trademarked product(s), name(s) or OEM numbers is intended solely for reference to the usage for that SuperTrapp part.

SAE-J2825 Sound Test: A test developed by the MIC (Motorcycle Industry Council) and published by the SAE (Society of Automotive Engineers) International. It is a consistent and economical sound test standard that is used to determine whether a street bike (on-highway motorcycle) exhaust system emits excessive sound. Our SAE-J2825 sound compliant exhausts were tested on a 2007 FLHRC Road King and a 2012 FLHRC Road King.

California Customers: Not all products are approved for sale in California.

Tunable Disc Technology - Find Your Sweet Spot!

**More exhaust out.
More fresh air & fuel in.
More horsepower & torque out.**

HOW THEY WORK

The gap between the discs is smaller on the inside than on the outside. This creates an expansion chamber which allows the exhaust gases to move faster from the high pressure inside of the exhaust to the low pressure outside. The low pressure helps pull the exhaust gases out of the motor which in turn allows more fresh air & fuel to enter the motor on the next stroke. This is what is meant by a "scavenging effect". More exhaust out. More fresh air & fuel in. More torque & horsepower out.

HOW TO USE THEM

Think of each disc as a hole in the exhaust. Using more discs increases horsepower, sound & flow. Each of our exhaust systems comes w/ a recommended number of discs to use. Simple experimenting will allow you to find your sweet spot. Our tunable exhausts grow with future performance enhancements to your motor. It's like getting a wall full of exhausts all in one!

Tunable exhausts grow with future performance enhancements to your motor.

Non Disc-Based Technology

***Slows down the exhaust stream.
High frequency sound is absorbed.
Optional baffles available.***

HOW THEY WORK

Non disc-based exhausts use more traditional methods of modifying the exhaust stream. Baffles, tubes & chambers are used to make the exhaust change direction and reduce velocity. Slowing down the exhaust stream allows it to remain in contact w/ the packing materials longer.

These materials absorb the higher frequency sound waves. Sound quality can also be altered by changes in baffle configuration. As sound waves travel through the exhaust canister, they can be bounced off of surfaces and reflected back against themselves to alter the frequencies or tone of the sound.

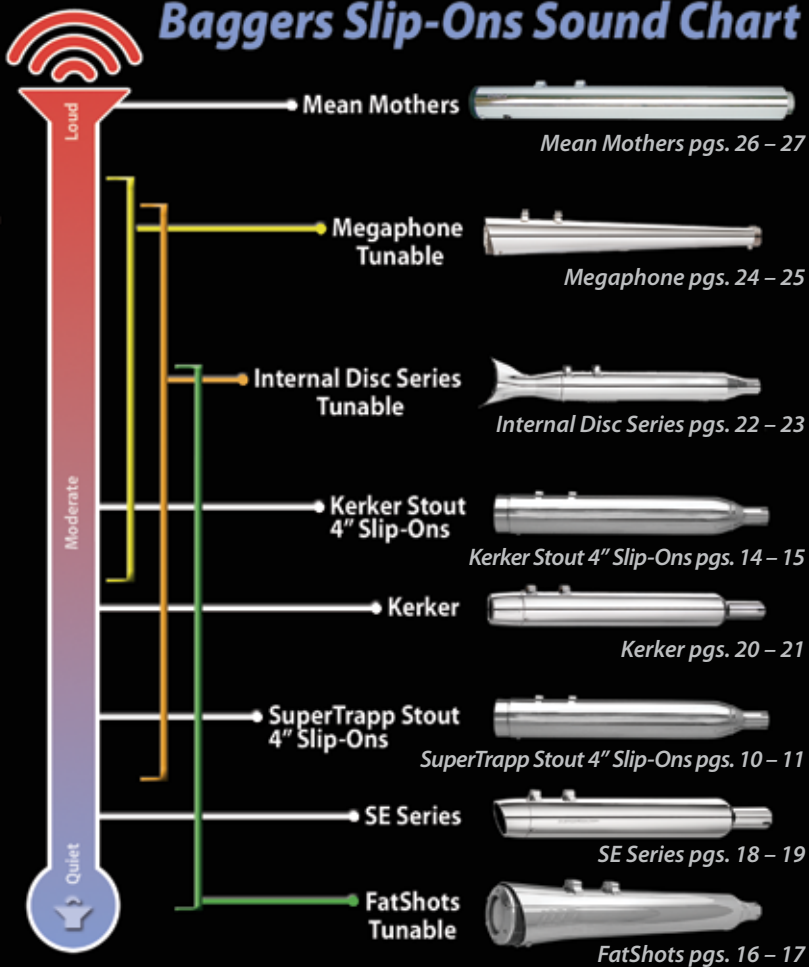

HOW TO USE THEM

They have fixed performance characteristics designed to perform optimally under specific conditions. You do not have the ability to make changes to the exhaust itself. In most cases, you'll be required to make jetting or fuel map changes to your motor in order to use a non disc-based exhaust.

The Others Just Don't Stack Up!

Baggers Slip-Ons Sound Chart

Our tunable disc-based exhausts give you bolt-on performance gains right out of the box! Add discs to increase horsepower, sound and flow. Subtract discs to decrease sound and flow, but increase low-end torque.

No other exhaust offers you the versatility that our performance exhausts do!

SuperTrapp Stout 4" Slip-Ons are non disc-based, but offer 9.3 (16%) horsepower gains and 16.5 (14%) torque gains. Kerker Stout 4" Slip-Ons offer 9.6 (17%) horsepower gains and 9 (12%) torque bolt-on performance gains.

Our legendary, non disc-based shootout champions, SE and Kerker Slip-Ons are compatible with 15 End Cap options.

Mean Mothers Slip-Ons provide a Drag Pipe sound at a Slip-On price.

All Slip-Ons are compatible with SuperTrapp True Duals.

10

TOURING

MegaShots are a tunable, disc-based system designed specifically for big inch, high output 103" - 140" motors (minimum Stage 4 level builds). Fits '14 & older Baggers. Massive 1.78" - 2" - 2.125" Stepped Headpipes with a 3" collector that flows into 2.5" core FatShot-style, tunable, disc-based mufflers. Equally-stepped front & rear pipes.

1.875" inlet. 2" mid pipe. 2.125" collector. Available for 18mm & 12mm sensors.

Full-coverage 2.5" heat shields available in Chrome or Black Ceramic.

Includes twenty-six, 4" discs. Available only as a full system.

Make the most of your investment with MegaShots!

Additional Discs & End Caps are sold separately (pg.89).

Add Discs for:

- + Horsepower
- + Sound
- + Flow

Subtract Discs for:

- Sound
- Flow
- + Low-end torque

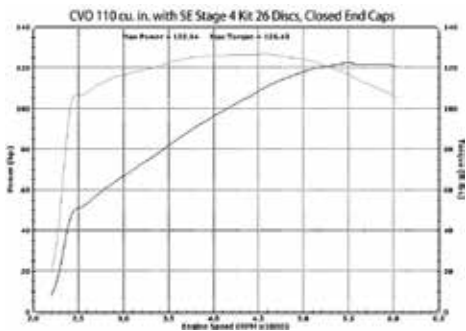

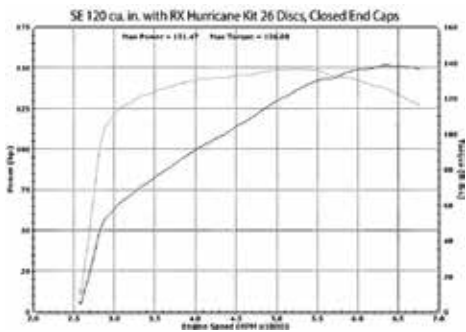

MegaShots Big Bore 2:1:2 System

MegaShots Big Bore 2:1:2 System

Model / Year	Chrome P/N	Black P/N
FLH / FLT '95 - '15	828-71967	827-71967

SuperTrapp Stout Slip-Ons are brewed to perfection. These non disc-based, massive 4" Slip-Ons make a bold statement. The '10 - '12 apps feature a newly developed, tapered core. The streamlined, internal tapered end cap w/ recessed fasteners comes pre-installed.

The oval cut outs are a sign of the true craftsmanship that went into the design of these pipes.

SuperTrapp Stout Slip-Ons provide a heavy, broad spread power curve right from idle w/ a 9.3 (16%) hp and 10.5 (14%) torque gain over stock (measured on a stock 2010 FLH).

At 95.6 dB @ 2,000 rpm, or 2.4dB over stock, these are SAE-J2825 sound compliant.

SuperTrapp Stouts quench the thirst of riders longing for beautifully, crafted 4" Slip-Ons with a pleasant tone & unsurpassed performance gains. Compatible w/ True Duals (pg. 28).

Note 1: Installation of True Duals on 2014 and newer Touring models, other than CVO, will require the use of an alternate air cleaner housing. The larger design of the O.E. housing interferes w/ the routing of the front head pipe and will not allow proper fitment. Use of an air cleaner w/ a smaller outside profile is required.

Note 2: Sound test data on '10 -'15 model specific Slip-Ons was achieved using the OEM CAT-equipped headpipe. Use of these mufflers on a headpipe w/ the CAT removed or True Duals will result in substantially louder results. Optional cores are available for certain models at an additional cost.

SuperTrapp Stouts 4" Slip-Ons
on Paul Yaffe's Custom H-D Road Glide

Kerker Stout Slip-Ons are brewed for your riding pleasure. These non disc-based, massive 4" Slip-Ons use a more traditional core.

The streamlined, internal tapered end cap w/ recessed fasteners comes pre-installed.

Oval cut outs make you stand out from the rest. The predominantly displayed Kerker logo lets everyone know that your pipes perform!

Kerker Stouts provide a bold, strong, power curve from mid-range on up w/ a 9.6 (17%) hp and 9 (12%) torque gain over stock (measured on a stock 2010 FLH).

Louder than the SuperTrapp version, they're 5dB over stock w/ that classic Kerker, deep, throaty rumble. Kerker Stouts are bold and powerful. Compatible w/ True Duals (pg. 28).

Note 1: Installation of True Duals on 2014 and newer Touring models, other than CVO, will require the use of an alternate air cleaner housing. The larger design of the O.E. housing interferes w/ the routing of the front head pipe and will not allow proper fitment. Use of an air cleaner w/ a smaller outside profile is required.

Note 2: Sound test data on '10-'15 model specific Slip-Ons was achieved using the OEM CAT-equipped headpipe. Use of these mufflers on a headpipe w/ the CAT removed or True Duals will result in substantially louder results. Optional cores are available for certain models at an additional cost.

Kerker Stout 4" Slip-Ons
on H-D Road Glide

FatShots are one of our most versatile, Tunable Slip-Ons. 3.5" diameter, Chrome-Plated body. Flares out to a 4", slash cut end. Straight through 2" diameter, pillow-pack wrapped performance core. Capped off with our legendary SuperTrapp 4" discs and a Polished Trim Ring.

Bolt on these tunable exhausts and kick it up a notch with 12 discs per muffler and Closed End Caps for a 15% hp and 12% torque gain. Your pipes don't have to be loud to make power. If you want to tone it down, these versatile Slip-Ons let you do that. 6 discs per muffler and Closed End Caps. This setup is sound compliant. 86dB @ idle. That's quieter than stock, but with enhanced performance!

FatShots Slip-Ons include twenty-four, 4" discs. Compatible w/ True Duals (pg. 28). Additional Discs & End Caps are sold separately (pg. 89).

Note 1: Installation of True Duals on 2014 and newer Touring models, other than CVO, will require the use of an alternate air cleaner housing. The larger design of the O.E. housing interferes w/ the routing of the front head pipe and will not allow proper fitment. Use of an air cleaner w/ a smaller outside profile is required.

Note 2: Sound test data on '10-'15 model specific Slip-Ons was achieved using the OEM CAT-equipped headpipe. Use of these mufflers on a headpipe w/ the CAT removed or True Duals will result in substantially louder results. Optional cores are available for certain models at an additional cost.

SE Series Slip-Ons & True Duals

SE's race-proven baffle gives you 10-12% more hp. These are non disc-based. King of bottom-mid range torque. 3dB louder than stock, but SAE-J2825 sound compliant.

Steel, Chrome-Plated shells. Steel core. Internal baffle heat shield keeps them bluing-free. Compatible with 15 end caps. SE's are commonly known as the "old H-D Performance II muffler", which our 15 end caps also fit. SE's include a non-serviceable core, meaning that their core cannot be re-packed, only replaced.

An optional replacement core is sold separately and will make the SE's rebuildable.

Compatible w/ True Duals (pg. 28).

Note 1: Installation of True Duals on 2014 and newer Touring models, other than CVO, will require the use of an alternate air cleaner housing. The larger design of the O.E. housing interferes w/ the routing of the front head pipe and will not allow proper fitment. Use of an air cleaner w/ a smaller outside profile is required.

Note 2: Sound test data on '10-'15 model specific Slip-Ons was achieved using the OEM CAT-equipped headpipe. Use of these mufflers on a headpipe w/ the CAT removed or True Duals will result in substantially louder results.

Kerker Slip-Ons & True Duals

Kerker Slip-Ons have the same look as our popular SE's. These are non disc-based. 8dB louder than stock. Deep, profound, throaty rumble. 12 - 13% hp gains. Great mid - high range power. An optional Mikuni core is available for peak performance & ultimate flow. Rebuildable core & packing. Compatible with 15 end caps, which also fit H-D Performance II Mufflers.
Compatible w/ True Duals (pg. 28).

Note 1: Installation of True Duals on 2014 and newer Touring models, other than CVO, will require the use of an alternate air cleaner housing. The larger design of the O.E. housing interferes w/ the routing of the front head pipe and will not allow proper fitment. Use of an air cleaner w/ a smaller outside profile is required.

Note 2: Sound test data on '10 -'15 model specific Slip-Ons was achieved using the OEM CAT-equipped headpipe. Use of these mufflers on a headpipe w/ the CAT removed or True Duals will result in substantially louder results. Optional cores are available for certain models at an additional cost.

Mean Mothers Slip-Ons & True Duals

Mean Mothers Slip-Ons give Baggers a loud and throaty drag pipe sound at a slip-on price. Riders just need to add these to the ends of their stock head pipes or SuperTrapp True Duals (pg. 28) for the same sound as the original Mean Mothers systems.

Mean Mothers Slip-Ons feature 2.75" chrome-plated heat shields with a 2.25" expansion chamber. A removable, louvered core is included. Black ceramic coated billet end caps are included and are the only compatible end caps with SuperTrapp's Mean Mothers Slip-Ons.

Note 1: Installation of True Duals on 2014 and newer Touring models, other than CVO, will require the use of an alternate air cleaner housing. The larger design of the O.E. housing interferes w/ the routing of the front head pipe and will not allow proper fitment. Use of an air cleaner w/ a smaller outside profile is required.

Note 2: Sound test data on '10-'15 model specific Slip-Ons was achieved using the OEM CAT-equipped headpipe. Use of these mufflers on a headpipe w/ the CAT removed or True Duals will result in substantially louder results. Optional cores are available for certain models at an additional cost.

Crossover Conversion

TOURING

29

Our Crossover Conversion turns the OEM 2:1 into a 2:1:2. This gives you back the stock dual exhaust look and sound. It connects to the stock head pipe which keeps your OE catalytic converter in place. It crosses under the frame like the OE 2:1:2 system. Heat shields are included.

The Crossover Conversion is designed specifically to work with all of our FLH Slip-Ons such as:

- SE Series (pgs. 18 - 19)
- Kerker (pgs. 20 - 21)
- Internal Disc Series (pgs. 22 - 23)
- Megaphone Series (pgs. 24 - 25)
- FatShots 2:2 Series (pgs. 16 - 17)
- Mean Mothers Slip-Ons (pgs. 26 - 27)
- SuperTrapp & Kerker Stouts (pgs. 12 - 15)

SE Series and Kerkers let you choose from a variety of 15 End Cap options. Internal Disc Series offer 6 End Cap options. Personalize the look of yours!

SuperTrapp 2:1 SuperMegs (pg. 30) are one of the most popular pipes out there. The tunable, disc- based system provides unsurpassed 15% bolt-on performance gains . Due to popular demand, SuperTrapp now offers the Imposter. The Imposter allows riders to return their 2-into-1 equipped Bagger to a balanced, stock, True Dual look. The Imposter is a non-functioning, cosmetic, left-side pipe that does not connect to the 2-into-1 head pipe. It mounts at the transmission bracket and to the stock muffler mount bracket. The SuperTrapp Imposter includes twenty, 4" discs, a Closed End Cap and a heat shield. Additional Discs & End Caps are sold separately (pg. 89).

Black Kerker Imposter
on 2010
H-D Street Glide

Kerker 2:1 SuperMegs (pg. 32) are a non disc-based performance pipe w/ a full flow mechanical core and deep, throaty, bottomless rumble. It provides excellent top-end performance gains.

The Imposter allows riders to return their 2-into-1 equipped Bagger to a balanced, stock, True Dual look.

The Imposter is a non-functioning, cosmetic, left-side pipe that does not connect to the 2-into-1 head pipe, but rather it mounts at the transmission bracket and to the stock muffler mount bracket. The Kerker Imposter includes a heat shield.

FLH / FLT '85 - '08	169-71574	167-71574

Our Paul Yaffe-designed, Baffled FLH Phantom Pipe is a quieter, baffled pipe derived from the original smash-hit Phantom Pipe, but with a Bagger flair. Non disc-based. This Baffled version adds custom style to your Bagger without the high custom price tag. A Black Ceramic, curvy, 2:1 pipe based off of the original. Decorative Billet End Cap is engraved with domino dots.

4-piece stylized, chrome heat shields included.

Due to the changed oxygen sensor locations in 2010 models, the Baffled FLH Phantom Pipe styling is different than the 2009 FLH Phantom. The core and collector length is carried over from the 2009 FLH Phantom Pipe, but the primary head pipes and heat shields are styled after the Right Side Drive Phantom Pipe (pg. 68).

The Baffled FLH Phantom Pipe extends past the rear foot peg. It ensures a cool ride, even for the passenger.

Note 1: This product will not fit models w/ mid controls. Changing to forward controls will allow fitments on these models.

Note 2: Installation of this product on 2014 and newer Touring models, other than CVO, will require the use of an alternate air cleaner housing. The larger design of the O.E. housing interferes with the routing of the front head pipe and will not allow proper fitment. Use of an air cleaner with a smaller outside profile is required.

SE Series Slip-Ons

SE's race-proven baffle gives you 10-12% more hp. These are non disc-based. King of bottom-mid range torque. 3dB louder than stock. Tough, low rumble sound. Steel, chrome-plated shells. Steel core. Internal baffle sleeve keeps them bluing-free.

Compatible with 15 end caps. SE's are commonly known as the "old H-D Performance II muffler", which our 15 end caps also fit. SE's include a non-serviceable core, meaning that their core cannot be re-packed, only replaced. An optional replacement core is sold separately and will make the SE's rebuildable.

100-7580 (fits P/N 128-78065)

Classic Caps

This curvy, 2:1 is an updated version of the original Phantom Pipe for Softails and the Baffled FLH Phantom Pipe. Available in a baffled, black ceramic version. 2" removable and rebuildable core that's tough sounding and even better performing. The 4-piece stylized chrome-plated heat shields come pre-installed. The Turned-Up Claw End Tip features a domino dot-engraved decorative billet end cap that makes a bold statement without the drag pipe sound arrival. The Phantom Pipe II features a 2" primary pipes and a 3.5" diameter collector.

Note 1: This product will not fit Dyna models w/ mid controls. Changing to forward controls will allow fitments on these models.

Note 2: Installation of this product on 2008 & newer models will require the use of an aftermarket air cleaner housing. The design of the stock air cleaner housing extends forward and interferes with the front head pipe on the Phantom and will not allow fitment on the bikes. Use of a different style air cleaner housing will allow fitment on these models.

The MudSlinger is non disc-based & developed for large displacement ATVs.

Bolt-on power. Durable, Polished Stainless Steel body. Aluminum End Cap. Shootout champion. Deep, husky sound.

96dB compliant. Includes a U.S. Forest Service Approved Spark Arrestor. Rebuildable core & packing.

Low restriction, mechanical core for superior flow.

Holds up to the abuse ATV riders can dish out.

Deep Water Snorkel Kit is available and sold separately.

It's a "must have" for mud boggers!

Universal MudSlingers are available for unique apps (pg. 88).

WHICH UNIVERSAL WILL FIT YOUR APPLICATION?

1. **Measure the Inlet Diameter (ID).** The ID is the diameter of your muffler at the point where you're going to slip the universal on. The ID should be at least the size of the pipe you will be fitting it to.
2. **Measure the Outlet Diameter (OD).** The OD is the diameter of the head pipe that your SuperTrapp will slip over. The OD determines the ID that you will want your SuperTrapp slip-on to have. For example, a 2.5" ID muffler is designed to fit onto / over a 2.5" OD pipe.
3. **Measure the length of your current muffler(s)** to ensure you're not going to try to put something on your bike that may end up being too short or too long. Knowing the length of your existing muffler vs. the length of our mufflers will help you make an informed decision in this regard.
4. **Horsepower.** Up to 100 hp = 3" Disc Muffler
Up to 250 hp = 4" Disc Muffler
Up to 400 hp = 5" Disc Muffler
5. **Max Engine Displacement Per Muffler.** 1.5 L. / 92 CI = 3" Disc Muffler
4.0 L. / 250 CI = 4" Disc Muffler
5.7 L. / 350 CI = 5" Disc Muffler
6. **Sound.** Larger = Quieter. Meaning, the larger the muffler body(diameter and length), the more sound deadening capability the muffler has.
7. **Mounting.** Depending on which slip-on you purchase, you will need to weld on the brackets that are included with the muffler or use a clamp that goes around the body of the muffler. Depending on the application, you may need to fabricate a connector pipe and / or mounting bracket.
8. **Accessories.** Most of the Universal mufflers come with 12 discs and a closed end cap, which may be enough for a stock machine. More discs may be needed. Additional discs can be purchased in 6 and 12 packs.
9. **Tuning.** You will be able to control the exhaust flow, "tune", by adding or removing discs to maximize your bike's combination.

Adding discs will increase horsepower, exhaust tone (sound) and flow.

Subtracting discs will reduce sound and increase low-end torque.

An Open End Cap can be used if more sound is desired or you want to use less discs.

On 4" mufflers, **the open end cap is equivalent to running 10 - 12 discs.**

AUTOMOTIVE / UNIVERSAL

Automotive / WaveTech Sport Compact Exhaust

Designed for 4 & 6-cylinder sport compact imports. Tunable, disc-based. Polished T-304 Stainless Steel body includes a Polished Stainless Steel Closed End Cap. Perforated Stainless Steel core. Optional End Caps in 4 color options are available & sold separately including Polished Aluminum TrappCaps. Select models include twelve, 4" discs. Additional Discs & End Caps are available & sold separately (pg. 89).

SCREAMIN' EAGLE TUNE KITS, CORES & PACKING

Screamin' Eagle FatShotz Dual Slip-Ons for FLH / FLT H-D #80847-1 (Chrome)

For bikes equipped w/ dual exhausts. Assembled w/ 10 discs, 1 Open End Cap and Black Trim Ring per muffler. Mufflers utilize a full length 2" diameter perforated core.

FatShotz Tune Kit: P/N 404-7847

Includes: 10 extra discs, 12 screws, 2 Closed End Caps, special wrench to remove the tamper resistant screw and anti-seize grease.

FatShotz Re-Pack Kit: P/N 400-7847

Includes: 2 pillow packs to rebuild two mufflers.

Screamin' Eagle Nightstick Single Slip-On for '10 FLHX / FLTRX: H-D #80881-10 (Chrome) H-D #80846-10 (Black)

Bike came stock w/ a 2:1 exhaust. Assembled w/ 10 discs, 1 Closed End Cap and a Black Trim Ring. Equipped w/ a solid, full length core and no packing material.

Nightstick Tune Kit: P/N 404-7881

Includes: 10 extra discs, 6 screws, 1 Open End Cap, special wrench to remove the tamper resistant screw and anti-seize grease.

Nightstick Performance Core: P/N 100-7881

Includes: Perforated core w/ pillow packing.

Screamin' Eagle Nightstick Single Slip-On for '12 Dyna Switchback: H-D #80872-120 (Chrome) H-D #64900137 (Black)

Bike came stock w/ a 2:1 exhaust. Assembled w/ 16 discs and 1 Closed End Cap. Chrome comes w/ Polished Cap. Black comes w/ Black Cap. Equipped w/ a solid, full length core and no packing material.

Nightstick Tune Kit: P/N 404-7881

Includes: 10 extra discs, 6 screws, 1 Open End Cap, special wrench to remove the tamper resistant screw and anti-seize grease.

Nightstick Perforated Core & Pillow Pack Packing P/N 100-7872

Screamin' Eagle Nightstick Dual Slip-Ons for FLH / FLT H-D #64900093 (Chrome) H-D #64900091 (Black)

For bikes equipped w/ dual exhausts. Assembled w/ 10 discs and 1 Closed End Cap per muffler. Chrome comes w/ Polished Cap. Black comes w/ Black Cap. Equipped w/ a solid, full length core and no packing material.

Nightstick Tune Kit: (needs 2 kits to modify both mufflers) P/N 404-7881

Includes: 10 extra discs, 6 screws, 1 Open End Cap, special wrench to remove the tamper resistant screw and anti-seize grease.

Nightstick Perforated Core Kit: Core & Packing (needs 2 to complete the set) P/N 100-7872

WARNING: Not to be used with aircraft applications.
