ABOUT MASTERCRAFT

As leading pioneers in the recreational off-road and racing market since 1970, MasterCraft Safety, together with our recently acquired brand, Impact Racing, have been a mainstay and trusted name brand for nearly two generations of off-road and motorsports enthusiasts. The recipe to our success is simple; we were the first and we are the best.

John D. Rockefeller once said, "The secret of success is to do the common thing uncommonly well," while Herman Melville is quoted with saying, "It is better to fail in originality than to succeed in imitation." These two doctrines have been a driving force for Robbie Pierce, owner and CEO of MasterCraft and Impact, and have kept both brands continually advancing and innovating.

MasterCraft is the first company to offer a suspension seat specifically designed for the off-road racing market. This seemingly simple creation provided competitors with comfort and much-needed energy attenuation lacking from the early beam suspension racecars. It didn't take long for the recreational off-road market to demand the same level of comfort and fatigue-fighting ergonomics, thus the Rubicon® and MasterCraft Baja RS® were born. The launch of these two seats for the everyday street-to-trail recreational market forged a new level of comfort and made MasterCraft a brand that has been often imitated but never duplicated.

Founded on a tradition of maximizing racer safety, MasterCraft has since expanded its product lines to include occupant restraints rated to both the SFI 16.1 and 16.5 standard as well as SFI 27.1 rated window nets. MasterCraft also offers a full line of tie downs and ruggedized storage solutions to keep your tools and other necessities safely nestled in your weekend trail rig and your race vehicle securely strapped onto the trailer. We offer many more safety and convenience essentials, so be sure to check out our full-line up of products on the following pages.

Robbie Pierce, MasterCraft® Safety and Impact Racing CEO

When the opportunity to purchase Impact presented itself, Robbie Pierce realized this was his chance to make racers everywhere safer; including himself. With a history deeply rooted in off-road racing safety and a unique understanding of driver needs, it was easy to understand how Pierce and the team at MasterCraft welcomed the challenge of acquiring Impact.

The merging of these two renowned brands combines a powerful wealth of expertise in a broad range of recreational off-road and traditional motorsports. MasterCraft's long standing reputation, combined with Impact's revolutionary product lines, make these two companies a perfect match further improving the safety of weekend warriors and racers alike!

Moab Photo Provided by Harry Wagner.

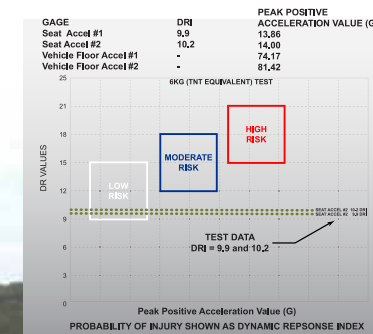

ANATOMY of a MASTERCRAFT SEAT

Constructed from mandrel bent and laser-notched .065 three-quarter inch tubing, all MasterCraft seats are expertly welded to exacting Mil-spec standards and feature either a flat strap or four-tab mount fully integrated into the frame. By incorporating the frame mounting straps, MasterCraft strengthened the overall integrity of the structure ensuring your seat can handle abuses ranging from weekend wheeling to extreme Baja racing. Finished with a high-resiliency fatigue fighting foam and fire retardant UV-treated upholstery, your MasterCraft seat has been extensively tested and validated to comply with all applicable seat criterion of the Federal Motor Vehicle Safety Standard. Don't settle for inferior construction – only a genuine MasterCraft seat offers this level of craftsmanship!

While comfort and safety on the trail is important, MasterCraft also expanded into a market where impact absorption and energy attenuation can quite literally mean the difference between life and death. As devoted patriots, Robbie Pierce and the team at MasterCraft are exceptionally proud of our work with the armed forces.

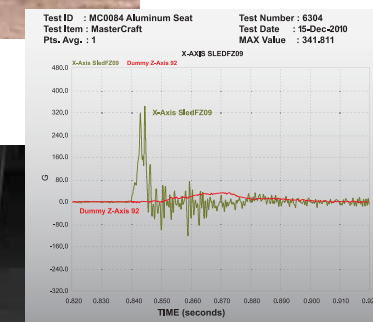

Developing and testing seating systems to exceed requirements outlined by stringent military standards is never an easy task. To that end, MasterCraft took on the challenge and delivered a line of energy-mitigating seats that perform remarkably well in a conflict environment. MasterCraft's Made in the U.S.A. defense seating and restraint systems have been used in US military combat vehicles such as the MRAP and LSAC for nearly a decade and have a proven track-record.

Independent tests have shown MasterCraft Safety's line of energy-attenuating defense seating provides an 84% reduction in force from a 50 "G" load live fire (blast) event; a force equal to that of 6kgs of explosive mass as outlined in the NATO Stanag 4569 2A standard. These are exactly the types of impacts that IEDs inflict on combat vehicles and why MasterCraft has devoted tremendous resources and technology towards developing safety solutions for our men and women serving overseas.

BLAST TESTED

Independent tests indicated that MasterCraft Safety's line of defense seating provided remarkable and repeatable energy-attenuation during +Z axis impacts. The above graph indicates a massive 342G +Z-axis hit to the seat base resulting in only 34Gs of energy reaching the 50th percentile Hybrid III Anthropomorphic Test Device's instrumented pelvis. This test is representative of the extreme forces experienced by combat vehicles in conflict areas and demonstrative of MasterCraft's ability to mitigate enormous impact energy.

SLED TESTED

BAJA RS® PREMIUM RECLINING SUSPENSION SEAT

The first reclining suspension seat for off-road enthusiasts, the MasterCraft Baja RS® offers comfort, containment, safety and fatigue-fighting ergonomics perfect for exploring Moab or taking on your grueling everyday commute. Designed with both form and function in mind, MasterCraft's Baja RS® seat features a mid-rise side bolster for ease of ingress and egress while also providing superior containment; even during the most spirited adventures. Featuring a durable yet comfortable UV-resistant Marquesa fabric, the Baja RS® also offers superior lumbar support with our proprietary high-resiliency foam offering the ultimate in energy attenuation and fatigue-fighting comfort. The machined billet lever and 9-position reclining mechanism provide years of trouble-free use while the integrated seat belt slots and belt loops provide harness guides ensuring your five-point belts stay in place. With available "creature comfort" options such as seat heaters, lumbar support, seat pockets and Camelbak™ pouches, the MasterCraft Baja RS® provides the ultimate seat balancing everyday practicality with features specifically designed for off-road use. Additionally, MasterCraft seats are sled and drop-tested and exceeds Federal Motor Vehicle Safety Standard (FMVSS) requirements. The Baja RS® shares the same flexibility in mounting as our popular Rubicon® series seat and is the perfect addition to your Jeep® JK, TJ, CJ and YJ as well as Ford Bronco, Toyota Tacoma, and more. Available in five standard color combinations and five Dirt Sport color combos, the MasterCraft Baja RS® will enhance both the comfort and interior of your vehicle!

- 9-Position Reclining Seat from Forward Tilt to Full Recline
- Left (Driver) or Right (Passenger) Recliner Mechanism Location
- High Resiliency Foam for Superior Energy Attenuation & Comfort

SAHARA™ BUDGET RECLINING SUSPENSION SEAT

MasterCraft is never willing to compromise on safety, however we also recognize that different households have varying budgets to devote to their passions and hobbies. It was with this thinking in mind that the Sahara™ was created.

The Sahara™ seat offers many of the same features and qualities that made the MasterCraft brand a mainstay amongst off-road and Jeep enthusiasts. The Sahara™ is a true suspension seat designed from the ground-up featuring precision-crafted tubular construction, an open-mesh liner, and high resiliency foam for comfort, longevity, and the durability MasterCraft Safety is famous for.

The MasterCraft Safety Sahara™ is a budget-minded import version based on our legendary Baja RS seat. The Sahara™ is only offered in black, with only two part numbers (the only difference is which side the reclining lever is on).

The Sahara™ also uses the same mounting tabs and installation kits as the Baja RS, so no additional development costs were required. These savings are passed on, allowing MasterCraft to utilize high-end materials like the wear-resistant proprietary UV-treated seat cover fabric while maintaining a reasonable price.

- Direct Bolt-in Application for Most CJ5s, all CJ7 and YJs

RUBICON® PREMIUM SUSPENSION SEAT

The MasterCraft Safety Rubicon® is a fixed-back seat and is the ideal choice for off-roaders wanting the benefits and comfort of a true suspension seat while not requiring a reclining function. The Rubicon® features the same high-quality precision craftsmanship that has made MasterCraft a trusted household name for Jeep® and off-road enthusiasts worldwide. Featuring a three-quarter rise bolster, the Rubicon® offers 6.5-inches of hip containment and 5.5-inches of shoulder containment keeping you safely nestled into your seat, even while maneuvering the most challenging obstacle or conquering the seat's namesake; the "Rubicon Trail."

MasterCraft's Rubicon® also offers superior lumbar support with our proprietary high-resiliency foam providing unsurpassed energy attenuation and fatigue-fighting comfort. The easy-care Marquesa fabric features ultra-violet resistance and durability providing years of trail use and enjoyment. With available "creature comfort" options such as seat heaters, lumbar support, seat pockets and Camelbak™ pouches; the MasterCraft Rubicon® provides the ultimate seat designed with the rigors of trail-riding and the daily commute in mind. The Rubicon® bolts directly into most Jeep® CJ-5 and all CJ-7 and YJ models making it an excellent interior upgrade for many applications. The Jeep® TJ, XJ and JK models are also bolt-in when used with our vehicle specific mounting kits. MasterCraft's Rubicon® also works well with the Suzuki Samurai and Toyota Tacoma in addition to many of the popular overlanding vehicles. All MasterCraft seat models have been extensively sled and drop-tested and exceeds Federal Motor Vehicle Safety Standard (FMVSS) requirements so you can wheel your vehicle with confidence. Available in five standard color combinations, the MasterCraft Rubicon® will not only improve your vehicle's ride and comfort, it will compliment and enhance the interior as well!

- Race Inspired Off-Road Seat
- Three-Quarter Rise Bolster for Superior Containment
- High Resiliency Foam for Exceptional Energy Attenuation and Comfort
- Precision Crafted Laser Cut Tubular Frame Construction
- Secondary Suspension Straps for Additional Support and Fatigue-Fighting Comfort
- 5-Point Seat Belt Slots (with additional seatbelt loops to secure harnesses in place)
- Tested and Validated to Comply with Applicable FMVSS
- Direct Bolt-In Application for Most Jeep® CJ-5s, all Jeep® CJ-7 & YJs
- Other Vehicle Fitments Available when Used with MasterCraft Safety Supplied Mounting Kits. See Page 27 for More Info.
- Hip Containment: 6.5-inches
- Upper Torso Containment: 5.5-inches

NOMAD™ BUDGET SUSPENSION SEAT

The MasterCraft Safety Nomad™ is a budget-minded import version based on our legendary fixed-back Rubicon®. Designed from the ground-up as a true suspension seat, the Nomad™ features precision-crafted tubular construction, an open-mesh liner, and high resiliency foam for comfort, longevity and durability. The Nomad™ offers many of the same features and qualities that made MasterCraft a cornerstone brand among off-road and Jeep® enthusiasts. Mounting and installation is easy too; the seat will install in the same applications as our popular Rubicon®. The easy-care, wear-resistant proprietary UV-treated seat cover fabric ensures your seat will last many seasons. Just like all MasterCraft Safety seating, the value-packed Nomad™ has been extensively sled and drop-tested and exceeds Federal Motor Vehicle Safety Standard (FMVSS) requirements so you and your family can have confidence in your equipment on the trail. The MasterCraft Safety Nomad™ works well in the Ford Ranger and Bronco, Jeep® Cherokee as well as other Jeep® models such as the JK, TJ, YJ, and CJ-5 and CJ-7 models. Available in black only.

- True Suspension Off-Road Seat
- Three-Quarter Rise Bolster for Superior Containment
- High Resiliency Foam for Enhanced Energy Attenuation and Comfort

SPORTSMAN™ PREMIUM SUSPENSION SEAT

A favorite seating choice among long-time MasterCraft loyalists, the Sportsman™ cut its teeth pre-running Baja and chasing down racecars in the Nevada desert. Due to its mounting design and seat angle, the Sportsman™ is ideal for early or late model Broncos and it adapts just as easily to the Ford Ranger, Toyota Pickups, and Chevy K5 Blazer and GMC S-Series. The Sportsman™ also fits nicely in the full-size Ford, Chevy and Dodge trucks and is the perfect seat for the everyday commute or the terrain of Baja.

The Sportsman™ offers superior fatigue-fighting comfort and energy-attenuation through the use of MasterCraft's exclusive military grade high-density closed-cell foam. The easy-care Marquesa fabric provides ultra-violet resistance and extreme wear-test durability ensuring your MasterCraft Sportsman™ can withstand the abuses of your desert wanderings. Additional options such as seat heaters and lumbar support offer much needed warmth and comfort during long nights chasing Baja while the optional seat back pockets or Camelbak™ pouch provide compartments to stash essentials or offer much needed hydration. Whether you're out weekend 4-wheeling, pre-running, or trying to get a spare part to a SCORE Trophy Truck® in the middle of Baja, the Sportsman™ is the seat you can trust your body to.

- Race Inspired Off-Road Seat
- Three-Quarter Rise Bolster for Superior Containment
- High Resiliency Foam for Exceptional Energy Attenuation and Comfort
- Precision Crafted Laser Cut Tubular Frame Construction

ORIGINAL™ PREMIUM SUSPENSION SEAT

Just as the name implies, the MasterCraft Original® was designed in 1970 by MasterCraft's founder, Jack Miller, and quickly became the suspension seat of choice for the off-road racing community. While the MasterCraft product line has evolved over the last four decades, the redesigned Original® continues to be a must-have product among the Sand Sport crowd.

The Original® is a low-profile suspension seat designed with four gusseted vertical tabs for mounting. At the request of our family-oriented customers and the Sand Car manufacturers, we were asked to bring back our "Original" suspension seat for recreational sand buggies and sand rails. We agreed, but first this versatile seat had to undergo a few design changes as the sand cars of today are much faster than in 1970 when the first Original® was introduced. In order to provide a seat that can endure the rigors of the extreme sand market, we started by strengthening the four vertical mounting tabs and integrating these key structural components into the seat frame. MasterCraft then modified the seat design to allow more room in the hip area as an extra measure of comfort and during extreme runs in Glamis or Dumont Dunes. With available "creature comfort" options such as seat heaters, lumbar support, seat pockets and Camelbak™ pouches, the MasterCraft Original® provides unparalleled options perfect for sand sports.

- Four Vertical Tab Gusseted Mounting
- Low Profile Suspension Seat
- 5-Point Seat Belt Slots
- Loops to Secure Restraint Harnesses in Place
- Tested and Validated to Comply with Applicable FMVSS
- Hip containment: 7-inches
- Upper torso containment: 5.5-inches

PWR SPORT™ PREMIUM SUSPENSION UTV SEAT

Upgrade the comfort of your side-by-side with MasterCraft's PWRSport™ seat designed to endure the rigors and versatility of the UTV market. Specifically constructed for the Yamaha Rhino® and Kawasaki Teryx®, MasterCraft's PWRSport™ is a direct bolt-in replacement seamlessly adapting to the factory OEM mounts while retaining a full-size seat profile. Offered with options such as seat heaters, lumbar support, seat pockets or Camelbak™ pouch, the PWRSport™ is upholstered with a high-performance UV treated Marquessa fabric making this the ideal interior upgrade for your side by side. Featuring laser-notched tube construction, the PWRSport™ is finished with MasterCraft's military grade energy-attenuating impact foam offering improved comfort and fatigue-fighting lumbar support. The MasterCraft PWRSport™ also includes integrated shoulder harness guide loops and anti-sub and lap belt slots keeping your five-point restraints ideally positioned. The three-quarter-rise bolster offers ease of ingress and egress while the 7-inches of hip containment keep you positioned in your seat during spirited adventures. The MasterCraft PWRSport™ fits both the driver and the passenger position of the Yamaha Rhino® and Kawasaki Teryx® UTVs and requires no special tools or additional mounts for installation. MasterCraft also offers a matching headrest pad cover (sold separately). The PWRSport™ will fit with the Yamaha Rhino® factory seatbelt.

3G™ & 3G-4™ PREMIUM SUSPENSION RACE SEAT

Originally developed to attenuate the high-speed and violent impacts common to short course off-road racing, MasterCraft Safety's 3G™ is the only race-proven suspension seating system constructed from laser-notched 4130 (chromoly) tubing for superior structural integrity. Designed with input from champion racers, the MasterCraft 3G™ offers improved lateral support while the 10-inch deep-sided bolster provides exceptional hip containment, so important in today's competition. The removable bottom cushion allows for speedy seat customization during driver changes, as well as easy cleanup after the race. Borrowing technology from our military line of blast mitigating seats, the MasterCraft 3G™ provides unparalleled attenuating properties, reducing impact energies and lumbar stress by 84% (as shown in independent lab testing required of defense suppliers). Featuring flame resistant foam and upholstery, the materials used in the manufacture of MasterCraft's 3G™ meet and exceed FMVSS 302 and California's TB117 fire safety requirements. Finished with our exclusive Dirt Sport Cover, this popular enhancement reinforces common wear areas of the seat with our carbon fiber patterned vinyl. MasterCraft Safety's 3G™ installs using a reinforced, heavy-duty flat strap mount (four tab mount also available, specify when ordering). Additional upgrades such as seat heaters and lumbar support offer much needed warmth and comfort during long stretches of SCORE Baja racing while optional seat back pockets provide compartments to stash essentials. Looking for a hydration solution for your racecar? Be sure to check out our Camelbak™ pouch option!

- 5-Point Seat Belt Slots
- Flat Strap Mount (Four Tab Mount Available with Our 3G-4, Please Specify)
- Deep-Sided Race Seat with 10-inches of Hip Containment
- Improved Lateral Support with 8-inches of Upper Torso Containment
- Laser Notched 4130 (Chromoly) Tubular Frame Construction
- High Resiliency Foam for Exceptional Energy Attenuation
- Independent Lab Tests Indicate an 84% Reduction in Impact Energy
- Secondary Suspension Straps Provide Unparalleled Support
- Manufactured Using Flame Resistant Foam and Upholstery
- Removable Cushion for Driver Customization and Easy Clean-Up
- Size: 36-Inches Tall x 22-Inches Wide x 28-Inches Deep
- Mounting Area: 15-Inches Front to Back and 13.5-Inches Wide On Center
- Sitting Level Height from Floor: 4-Inches

For applications requiring a four-tab vertical mount, MasterCraft Safety also offers our 3G-4 seat. Offering all the same features and benefits as our standard flat strap 3G™ seat, the 3G-4 provides flexibility in mounting to a roll-cage with the vertical four tab mount. Integrating the mounting tabs into the seat frame allowed MasterCraft to strengthen the overall integrity of these key structural components, ensuring your seat frame can handle all the same abuses as your chassis! Don't settle for inferior construction – only a genuine MasterCraft seat offers this level of craftsmanship!

PROSEAT™ & PRO4™ PREMIUM SUSPENSION RACE SEAT

MasterCraft® Safety's ProSeat™ has been the standard for reliability and comfort in competitive off-road race vehicles and luxury pre-runners for over a decade. Constructed from laser-notched 4130 (chromoly) tubing for superior structural integrity and offering a "flat strap" installation, MasterCraft's ProSeat™ incorporates a higher-rise bolster for more than 9.5-inches of hip containment. Just like our top-of-the-line 3G™, the ProSeat™ features MasterCraft's proprietary energy attenuating high-resiliency foam reducing impact injuries and lumbar stress by more than 84%. Featuring flame resistant foam and upholstery, the materials used in the manufacture of MasterCraft's ProSeat™ meet and exceed FMVSS 302 and California's TB117 fire safety requirements. Additional upgrades are available such as a removable cushion for ease of clean-up and customized fitment during driver changes, while seat heaters and lumbar support offer much needed warmth and comfort during long stretches of SCORE Baja racing. Optional seat back pockets provide compartments to stash essentials or you can opt for the Camelbak™ pouch for a much needed hydration solution for your racecar.

- 5-Point Seat Belt Slots
- Flat Strap Mount (Four Tab Mount Available with Our Pro-4, Please Specify)
- Deep-Sided Race Seat with 9.5-inches of Hip Containment
- Laser Notched 4130 (Chromoly) Tubular Frame Construction
- High Resiliency Foam for Exceptional Energy Attenuation
- Independent Lab Tests Indicate an 84% Reduction in Impact Energy
- Secondary Suspension Straps Provide Unparalleled Support
- Manufactured Using Flame Resistant Foam and Upholstery
- Available with a Removable Cushion for Driver Customization and Easy Clean-Up
- Size: 35-Inches Tall x 22-Inches Wide x 28-Inches Deep
- Mounting Area: 15-Inches Front to Back and 13-Inches Wide On Center
- Sitting Level Height from Floor: 5-Inches

WALKER EVANS' ALUMICRAFT-BUILT CLASS 1 CAR WITH PRO4 SEATS.

For applications requiring a four-tab vertical mount, MasterCraft Safety also offers our Pro4™ seat. Offering all the same features and benefits as our standard flat strap ProSeat™ seat, the Pro4™ provides flexibility in mounting to a roll-cage with the vertical four tab mount. Integrating the mounting tabs into the seat frame allowed MasterCraft to strengthen the overall integrity of these key structural components, ensuring your seat frame can handle all the same abuses as your chassis! Don't settle for inferior construction – only a genuine MasterCraft seat offers this level of craftsmanship!

HS-1 by **IMPACT** HARDSHELL RACE SEAT

Impact's HS-1 is a top-of-the-line performance seat purposely engineered to withstand torsional stress and abuses common to off-road competition. Constructed from 100% epoxy-reinforced infused carbon fiber, the Impact HS-1 features an embedded single-piece laser cut and drilled mounting bracket providing continuously connected support, strength, and rigidity. Precision alignment of the restraint and mount openings is achieved through 5-axis CNC trimming. This extraordinary level of craftsmanship ensures uniformity throughout the seat resulting in the repeatable accuracy chassis builders and prep crews value. The HS-1's lightweight ergonomic design is a product of CAD engineering coupled with real world input from renowned chassis builders and racers. Finished with fire retardant high resiliency foam for superior energy attenuation, the Impact HS-1 offers improved comfort and support over competitive seats on the market. Upholstered with a non-slip and heavy-duty 300,000 double-rub abrasion and fire resistant fabric specially engineered to endure the extreme abuses of Baja, the HS-1 is the ideal balance of rugged and refined. Black only, replacement seat covers and cushions are readily available.

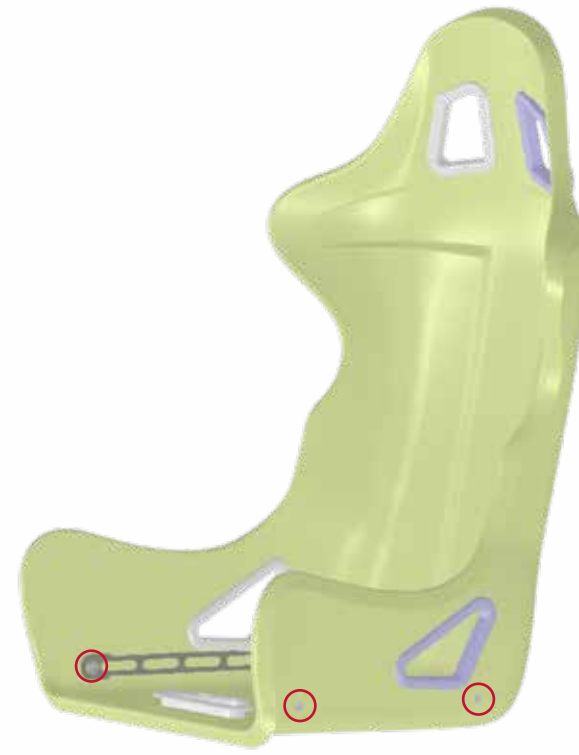

- Infused Carbon Fiber with Epoxy Reinforcement
- 5-Axis CNC Trimmed for Precision Restraint and Mount Alignment
- Single-Piece Laser-Cut and Drilled Mounting Bracket
- Fire Retardant, High Resiliency Foam for Enhanced Energy Attenuation
- Non-Slip, Abrasion Resistant and Fire Retardant Upholstery
- Includes Anti-Sub and Lap Seat Belt Slots
- Hip Containment: 14-inches

The seat mount openings for the HS-1 are precisely drilled on a 5-axis CNC providing for a consistently patterned installation for accurate mounting. The single-piece laser cut and drilled mounting bracket is fully integrated and bonded with the seat resulting in improved torsional strength as well as mount holes and weld nuts that maintain a continuous tolerance and do not wallow out over time.

ORIGINAL BENCH SEAT

PREMIUM SUSPENSION REAR BENCH

The MasterCraft Original Bench suspension seat is the ideal addition for recreational sand cars, buggies, and off-road vehicles. Designed so the rest of your gang can ride along in safety, the Original Bench features four gusseted vertical tabs for mounting and is three inches shorter front to back to allow more legroom for the rear passengers. Featuring 7-inches of hip containment, the Original Bench also offers the lap belt slots as well as anti-sub slots and shoulder harness loops for use with five-point belts. The MasterCraft Original Bench seat is available in standard 40-inch width.

- Lap & Anti-Sub Seat Belt Slots (with additional seatbelt loops to secure harnesses in place)
- Precision Crafted Laser Cut Tubular Frame Construction
- High Resiliency Foam for Superior Energy Attenuation & Comfort
- Durable UV-Treated Marquesa Fabric Designed to Match Front MasterCraft Seats
- Many Available Options such as Seat Heaters, Seat Pockets and More
- Federal Motor Vehicle Safety Standard Tested & Approved
- Size: 23-inches tall x 40-inches wide x 24-inches deep
- Mounting Area: 15-Inches Front to Back & 32-Inches Wide On Center
- Sitting Level Height from Floor: 4-Inches

RUBICON BENCH SEATS

PREMIUM SUSPENSION REAR BENCH

Tired of hearing "Are we there yet?!" coming from the backseat? Now the entire family can enjoy the comfort of MasterCraft's suspension technology with our exclusive Rubicon Bench. Constructed with the same comfort and durability that made MasterCraft suspension seats a mainstay in the recreational off-road market, the MasterCraft Rubicon Bench was developed to bolt right into popular Jeep models such as the CJ7, YJ and TJ series without special tools or drilling required. Looking to replace the uncomfortable OE rear bench in your 4-door Jeep JK? The 46-inch MasterCraft Rubicon will bolt right in with the purchase of our JK rear mounting kit (part no. 624407). If you prefer a bucket seating solution for more containment, the same rear mount kit will also adapt to accept two Baja RS, Sahara, Rubicon or Nomad seats. The Rubicon Bench seats two people comfortably and also features slots for the lap belts as well as anti-sub slots and shoulder harness loops if five point belts are utilized. The MasterCraft Rubicon Bench also works well in the Jeep CJ5s, early Broncos (1966-1977) as well as the Land Cruisers, Land Rovers and the International Scout with some drilling required. The MasterCraft Rubicon Bench varies in width from 36-inch to 46-inch depending on application.

SEAT ADD-ON OPTIONS TO CUSTOMIZE OUR SEATS TO YOUR EXACT NEEDS

Whether it is commuting during the week or running errands on the weekend, we spend a lot of time in our vehicles. Match your seats to your lifestyle and add comfort and convenience with custom options such as seat heaters, lumbar support and seat pockets! **Add-on Seat Options are not available on Nomad or Sahara seats.**

ADJUSTABLE LUMBAR SUPPORT

This patented lumbar support system adjusts up to 3-inches in the lower lumbar area for improved support and even pressure distribution. The advanced design of the Schukra® system allows the unit to hold its form, even during the most rigorous trail or racing adventures. The Schukra Lumbar System can be installed into any MasterCraft seat at the time of assembly and is available with a left or right side adjustment handle.

ELECTRONIC SEAT HEATER

Ideal for cold weather or used year-round to relieve tension or stress in the lower back, Seat Heaters are pre-installed during the seat's assembly so be sure to include this option when ordering your new MasterCraft seat. The Seat Heaters are 12-volt, made in the U.S.A units and meet all FMVSS 302 flammability requirements. The included electrical harness is complete with switch and features an indexed GXL 18 wire to simplify installation. Available on any MasterCraft® seats or benches. Note: these Seat Heaters are not compatible with the factory JK seat heater switches.

ADJUSTABLE HEADREST

Three-position Adjustable Headrest is integrated into the steel seat frame and is available as an option only on the MasterCraft Baja RS®. This upgrade cannot be installed after the seat is made, so be sure to order when you order your seat. **Only available on the BAJA RS and RUBICON BENCHES for 4-door JKs.**

REAR SEAT POCKET

Add a durable and roomy pocket to the back of your MasterCraft seat to conveniently store all your essentials and keep your items safely contained during spirited trail rides or while conquering the Baja desert. The Rear Seat Pocket measures about 8-inch x 11-inch and features a ruggedized molded plastic No. 10 zipper closure for maximum durability and strength. The Rear Seat Pocket is available as an option at the time of order on any MasterCraft® Safety seat.

CAMELBAK™ POCKET or POCKET w/SET

Looking for a hydration solution for your racecar or trail vehicle? Designed to fit Camelbak's Omega 3 Water Beast reservoir, MasterCraft can add a Camelbak™ pouch to your seat back ensuring you have the needed hydration for any situation. The Omega 3 Water Beast offers a Big Bite valve with rugged construction and Hydro-Guard anti-microbial technology ensuring delivery of safe and clean water during extreme operational conditions.

SEAT SAVER PROTECT YOUR SEATS

New and improved! Not only does the MasterCraft Seat Saver protect your MasterCraft seats from the weather and elements, it now also allows you to sit in the seat with the Seat Saver on (an important feature if you've had a rough day on the trail and are covered in muck)! Constructed from heavy-duty moisture-repellant Cordura® with easy-to-use hook-and-loop latches on the front and sides, this durable seat accessory is a must-have item to keep your MasterCraft seats protected from the environment and occasional mishaps. To use the seat with the Seat Saver on, simply pull up the hook-and-loop latches and the flap pushes in so you can sit in the seat without the need to remove the Seat Saver. Available in black and in sizes to fit most MasterCraft® Safety seats.

GRAB HANDLES

Do your passengers need something to hold onto while conquering the Rubicon Trail or Moab? These easy-to-install grab handles adapt to your Jeep or off-road vehicle in just a matter of minutes with the hook and loop system and offer the often-needed "Oh No!" handle. Manufactured from 1.5-inch nylon webbing for strength and durability, the 5-inch Thermo-Press handle is ergonomically shaped and does not collapse in your hand. MasterCraft also added a third mounting strap for added support when you really need it. Available in Black for 2-inch or 3-inch diameter tubing.

*Not recommended for support during ingress and egress of the vehicle.

VINYL TOOL TOTES

Available in three standard sizes, these water repellant totes feature interior padding on the bottom to protect your tools. The diagonal zipper allows the bag to open wide, providing easy access inside - even with gloves on. To hold the bag in place, we have included bag straps that screw or pop rivet to the floor and wrap around the bag with buckle closure for keeping your tools safely and securely stowed during transport or during the most spirited off-road adventures.

SMALL - RED (12" x 6" x 2 1/2" w/1 Bag Strap)	640101	
SMALL - BLACK (12" x 6" x 2 1/2" w/1 Bag Strap)	640103	
REGULAR - RED (17" x 6" x 2 1/2" w/2 Bag Straps)	640105	
REGULAR - BLACK (17" x 6" x 2 1/2" w/2 Bag Straps)	640107	
LARGE - RED (17" x 8" x 3 1/2" w/2 Bag Straps)	640109	
LARGE - BLACK (17" x 8" x 3 1/2" w/2 Bag Straps)	640111	

VINYL DOOR BAGS

Created for first-aid supplies, the vinylized bag features a hook-and-loop closure allowing fast and easy access in emergencies. Attaches to nearly any door or panel and will also hold towels, goggles, tools, batteries or anything else!

Available in red or black.

RED (8" x 8")	640121	
BLACK (8" x 8")	640123	

VINYL JIMCO BAGS

As the namesake states, these triangular shaped bags were first used by the winningest off-road chassis builder in SCORE's history. Designed to fit perfectly in the odd shapes between the roll cage tubes, the Jimco bags work great to store extra gloves, maps, and other racing essentials. Attached with durable hook-and-loop closure. Available in red and black.

LARGE - RED	640117	
LARGE - BLACK	640119	

PADDED WALKER GEAR BAGS

This handy bag was created especially for Walker Evans. Our 10-inch x 20-inch bag with zipper closure is made of tough, waterproof and tear-resistant material, padded for durability and includes two carry handles.

RED (10" x 20")	640126	
BLACK (10" x 20")	640128	

IMPACT GUN HOLSTER

Choose from two sizes to accommodate 12-volt to 36-volt Impact Guns. Super rugged vinylized material keeps the impact gun from moving about, and buckle closure secures the gun. Other pockets hold lug nuts, socket and spare battery. Attaches with hook and loop panel and straps. Available in Black only.

SMALL - TYPICALLY HOLDS UP TO 18v (16" x 12" L-Shape)	640130	
LARGE - TYPICALLY HOLDS UP TO 24v (20" x 16" L-Shape)	640131	

CANVAS TOOL BAG

The MCS Canvas Tool Bag is made from a heavy-duty cotton-duck canvas material and is equipped with two convenient carrying handles and a bag strap for mounting to a door bar or chassis of an off-road truck if desired. Great for storing tools, jumper cables, tow-ropes, and wrench roll-ups, this durable tool bag features a reinforced construction ensuring years of use.

BLACK (17" x 8" x 6" w/1 Bag Strap)	640142

SFI COMPLIANT
SPEC 16.1

BOLT-IN MOUNTING	111134
SNAP-IN MOUNTING	111234

QSR - QUICK SAFETY RELEASE

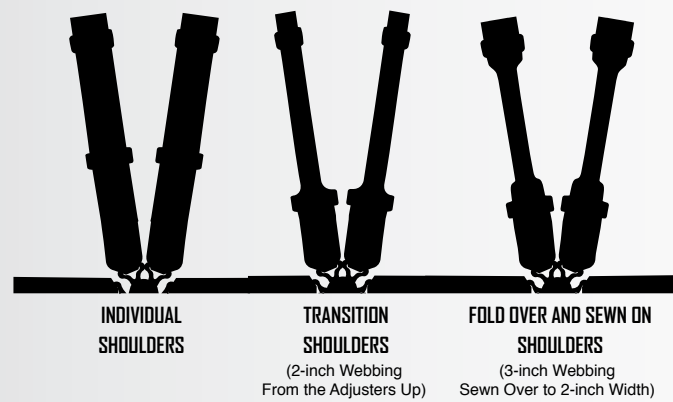

Offering ease of adjustment, the QSR hardware adjusts by simply flipping up the lever and pulling down on the shoulder harness end. QSR hardware is not available on the lap belts.

RATCHET ADJUSTER

Available as an option on any of the MasterCraft three-inch 16.1 SFI rated lap belts, MasterCraft's Ratchet adjuster is manufactured from a heat-treated chromoly steel and features a double locking mechanism for added safety. The ratcheting mechanism can be specified for either left or right side use and features a bolt-in installation on the mechanism side while the opposing side features the standard three-bar wrap or bolt-in option (available with clip-in installation as well). The ratcheting mechanism can replace one of the standard lap adjusters (left or right, depending on your preference) allowing the belt to be quickly and easily tightened without the need for outside crew assistance. MasterCraft's ratchet style adjuster is only available with the purchase of a complete set of restraints. The ratcheting system will not be sold individually or with the purchase of a lap belt only. The mechanism uses a 1/4-inch drive ratchet (not included).

* Sewn-In Harness Pads on custom restraint orders only. Sewn in Harness pads are not recommended with use of Frontal Head Restraints.

DRIVER WINDOW NETS

The MCS Driver's Net is designed for use in off-road chassis' and is a mandated safety item in several classes in the Lucas Oil Off Road Racing Series. The MCS net is constructed from three individual straps of 1-inch webbing for maximum coverage and improved lateral support. Available as a left or right side installation, each driver's net is adjustable for the ideal fit to your chassis. Features three bar for chassis tube attachments, ratchet strap for adjustability, and quick release connector closure.

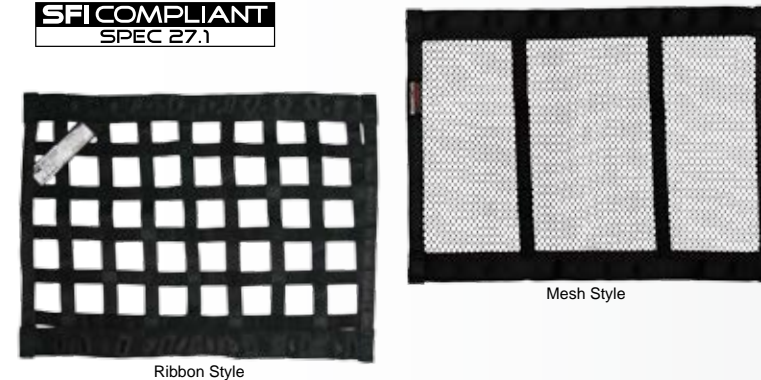

SFI COMPLIANT
SPEC 27.1

DRIVER'S NET - LEFT SIDE	652001
DRIVER'S NET - RIGHT SIDE	652002

WINDOW NETS

Available in our standard 1-inch ribbon style or in our exclusive mesh with 1-inch polyester binding, MasterCraft can custom handcraft window nets from a supplied pattern and to your exacting standards. Simply send us your pattern cut from cardboard or heavy paper (we can also accept most CAD files as well) and note the top, bottom, front and rear of the chassis in addition to the method of attachment.

SFI COMPLIANT
SPEC 27.1

CLEVIS PIN

MasterCraft's adjustable clevis is domestically manufactured from 4130 chromoly and plated to resist corrosion. The bushings for the retaining bolt (not included) are made of stainless steel.

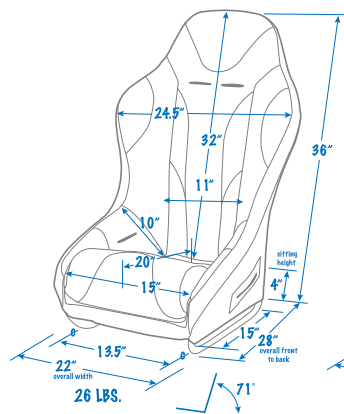

600100

LIMIT STRAPS

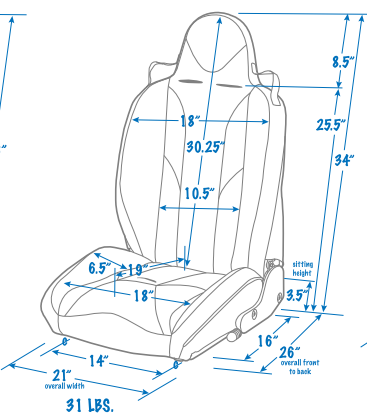

Any length, custom made-to-order. MasterCraft's limit straps are made from 7000-lb, Mil-Spec rated webbing material - strongest in the business! Simply measure your required eye-to-eye distance and provide us with the dimensions. Double (2-layer), Triple (3-layer), Quad (4-layer). Available in lengths starting at 8-inches in Black only.
