

HEL METS FOR LIFE

HELMETS FOR LIFE

At NEXX, we do not just engineer helmets, we tech emotions.

We believe in the heat of passion — parts of life getting new blood.

HELMETS FOR LIFE is our motto, beyond the protection, past excellence, that any motorcyclist regardless of age or style lives the moment they wear NEXX.

AWARDS

W

Differentiable, unmistakable, unique.

A NEXX is immediately recognizable. The "wow" factor is our drive and what makes us different from others.

Fueled by this obsession and energy, we transform our design and development skills into magic-filled products, ready to solve our customers' challenges, no matter how big or small they are.

Our ranges are the combination of hard work, dedication and passion with state-of-the-art and high-tech components that guarantee uncompromised safety and quality.

NEXX - in over 60 nations throughout the world - embraces the dreams of different styles of Motorcyclists, with class-leading motorcycle helmets.

U THE WOW FACTOR

THE WOW FACTOR

W

Today, clients demand flexibility, expertise and speed. They expect their orders to be delivered yesterday - and with expert quality.

Stepping through the doors of the current trend of automation and data exchange in manufacturing technologies the company has created what has been called a "smart factory": significant reduction of time to market, massively improved flexibility, increasing quality, and all with reduced energy and resource consumption.

Process improvement, inventory optimization, quality-first and other "game changers" have become standard.

Our "Made in Europe" is not only high class head protection - it also means that social and environmental issues are respected.

TECHNOLOGY

X.WED 2

1
NEW PEAK
New aerodynamic design developed to provide additional direct air intake and reduce buffeting and vibration at high speed. Includes a new adjustable Multi-Position system (incline / decline) up to 10 mm

2
NEW EMERGENCY STRAP V2
Built into each cheek Pad, the new Emergency Strap system V2 was re-designed to allow easier and gentle access to an injured rider's head for the trained medical personnel

3
NEW TOP VENTILATION
Three position upper vent for optimal air intake; glove friendly

4
PEAK EXTENSOR
For Highway or Off-road use, adjustable in movement and no tools required

5
X-BLOCK
Quick release visor system, extremely simple and light, with strong safety lock

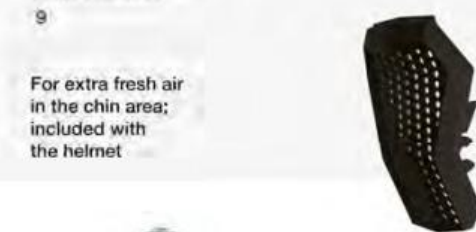

6
SUN VISOR
With Ergonomic button mechanism; glove friendly

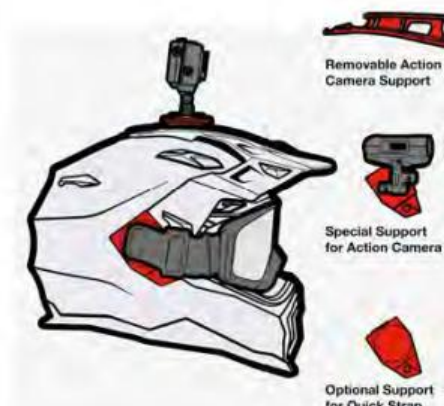

7
NEW CHIN VENTILATION v2
The new angle draws more fresh air into the mouth area and decreases water intrusion

8
VISOR
Super lock and Anti-fog position; prepared for Pinlock Fog-free lens

9
For extra fresh air in the chin area; included with the helmet

10 **X-COM MOTORCYCLE COMMUNICATION SYSTEM**
X.WED 2 is by default equipped to accommodate the NEXX Helmets X-COM Bluetooth Communication System

11
ACTION CAMERA & QUICK STRAP SUPPORTS
A removable support can be easily inserted in the top of the peak; also on both sides of the helmet there are action camera lateral supports; X.WED 2 is also prepared for Quick Strap System

13
NEW CHIN WIND STOPPER
Redesigned to reduce wind noise, drafts and provide a better snug fit around the neck and lower facial area

LIGHT OUTER - SHELL
Made of X-Matrix (multiaxial fiberglass, 3D organic fibers, special aramid fibers and carbon reinforcement) or carbon fiber (Carbon versions) combines the lightweight and comfort advantages with an extremely high impact-resistant shell construction

12 **SPECIAL CHIN SHAPE**
To reduce chest injury risk from frontal impacts

ANCESTRAL FABRIC PURE VIRGIN WOOL

Burel is an ancient woven fabric made of 100% Sheep Wool, probably brought to Portugal by monks in the 11th century, and used by the Mountain shepherds since then.

Burel is made from a unique process of washing the wool, spinning the wool and weaving it into fabric. It then gets pounded and scalded with very hot water. The result is an easy-care fabric, wear-resistant, natural, and that is also water-repellent and fire retardant, without losing its flexibility.

RIOT X.G. Face Mask Riot

Outshell in Burel fabric:
100% wool; water resistant;
thermal insulation; abrasion resistance;
tough; flexible; natural; agro-product

SHELL CONSTRUCTION

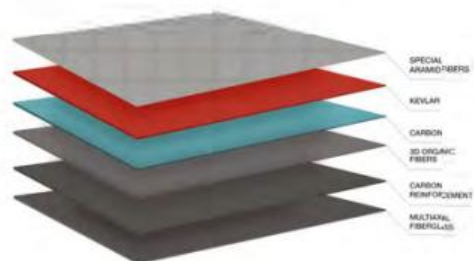

X-ZERO

Developed by NEXX R&D engineers over 3 years X-ZERO technology combines existing techniques with new techniques used in Aeronautical Engineering and top level sport. This innovative process has several advantages over traditional methods. Firstly, it allows a shell with higher technical characteristics with gains in terms of reduced weight and impact resistance. On the other hand, the best balance between carbon and major technical characteristics of the epoxy resin provides a smoother and rounder surface. Obtaining a more perfect surface finish, there is no need for so many coats of varnish. The result: an outstanding good looking, light and strong helmet, with more efficient use of materials and environmental sustainability.

X-MATRIX

X-MATRIX technology, a process that combines multiaxial fiberglass, 3D organic fibers and kevlar, special aramid fibers and carbon reinforcement. The result is a super strong and lightweight shell, 35% stronger for extension and bending resistance than normal fiberglass.

MULTI-DENSITY EPS LINER

5 EPS zones with different densities for maximum impact protection in key areas around the rider's head.

NEXX TECHNOLOGY

INTELLIGENT SHELL DESIGN

NEXX shells are all about intelligent design where aerodynamics comes into play, specially set for the riding posture of motorcyclists on different type of motorcycles. For these reasons, we perform regular tests in wind tunnel ambience and intensive test rides to improve shell designs and reduce drag, turbulence and buffeting. Whether on a country road, the motorway or a racetrack, you can expect from our helmets first-class aerodynamic values.

LARGE AMOUNT OF SEPARATION

SMOOTH

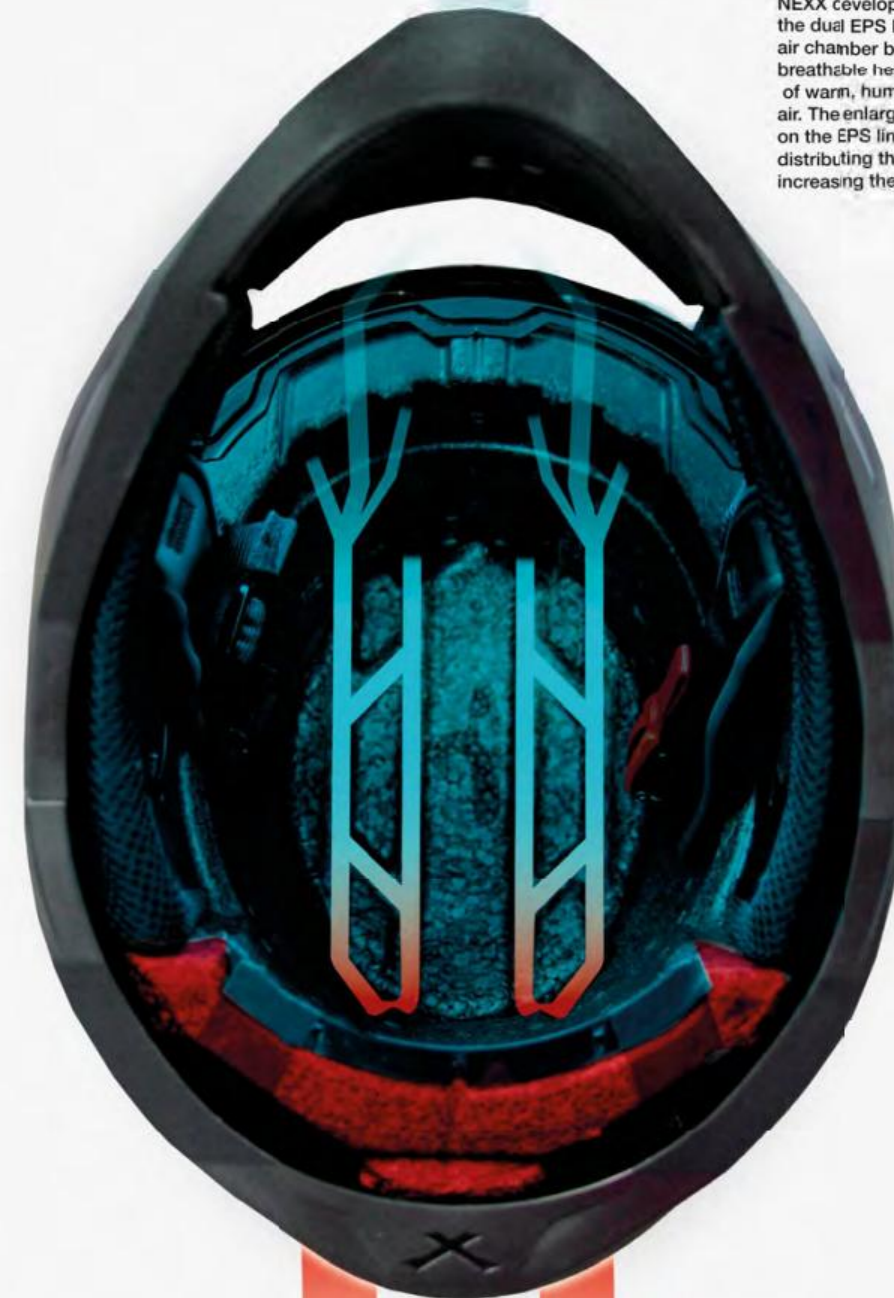

FITTING & COMFORT

VENTILATION

NEXX develops complex ventilation systems: the dual EPS Liner contemplates an innovative air chamber between them: this allows a truly breathable helmet, with optimum exchange of warm, humid air with incoming cold, fresh air. The enlarged Easy Flow channels introduced on the EPS liner potentiate the fresh airflow distributing the cool air into the interior while increasing the exhaust of hot air.

EASY FLOW CHANNELS

ERGO PADDING SYSTEM

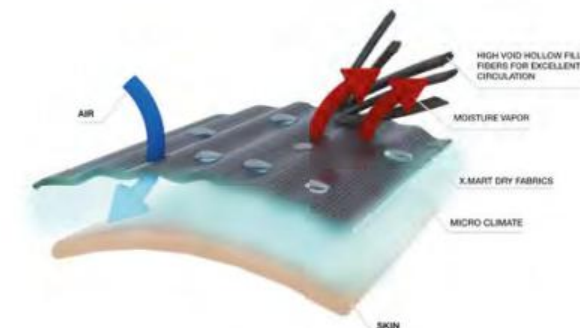

The Ergo Padding System is a foam replacement kit that allows the rider to personalize helmet fit according to his head shape.

- set of 2mm adhesive foam (1 rear + 1 side pair)
- set of 4mm adhesive foam (1 rear + 1 side pair)

X.MART DRY

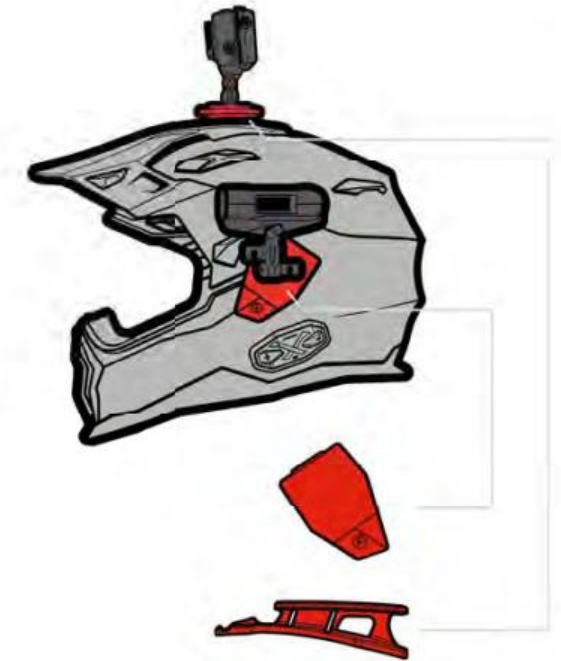

X.MART DRY drying rate is twice faster than cotton; high void hollow filling fibers allow excellent air circulation; the stored heat is released to the body as needed: the result is a constant microclimate that keeps the wearer cool and dry on hot days, while fiber structures in the fabric provide insulation on colder days.

COMMUNICATION MADE EASY

CAMERA SUPPORTS

The Action Camera supports were developed for a stable carrying method. These innovative and modular pieces allow the action cameras recording at great angles and restrict them from swinging awkwardly.

X-COM

The X-COM is a Bluetooth 3.0 stereo headset with long-range Bluetooth intercom designed specifically for motorcycle riders who prefer smaller form factor for maximizing their riding performance, yet maintaining rich features of Bluetooth intercom. With the X-COM, you can call hands free on your Bluetooth mobile phone, listen to stereo music or voice instructions of GPS navigations by Bluetooth wirelessly, and have intercom conversations in full duplex with other riders.

Compatible with:
X.WED 2, X.WST2, and SX.100

FEATURES

SX-COM 2

SX-COM is a very complete system with bluetooth 3.0, voice commands, stereo music streaming upgradeable firmware etc, but with a very affordable price and extremely easy installation. The SX-COM is especially easy to install in the SWITX SX.10 and SX.60 since its inner lining and interior were designed so that the user does not have to modify anything; all components of the device can be installed by simply manipulating velcros and using the special inner cavities made for the SX-COM. The SX-COM Motorcycle Communication system can be applied, however, in any helmet brand!

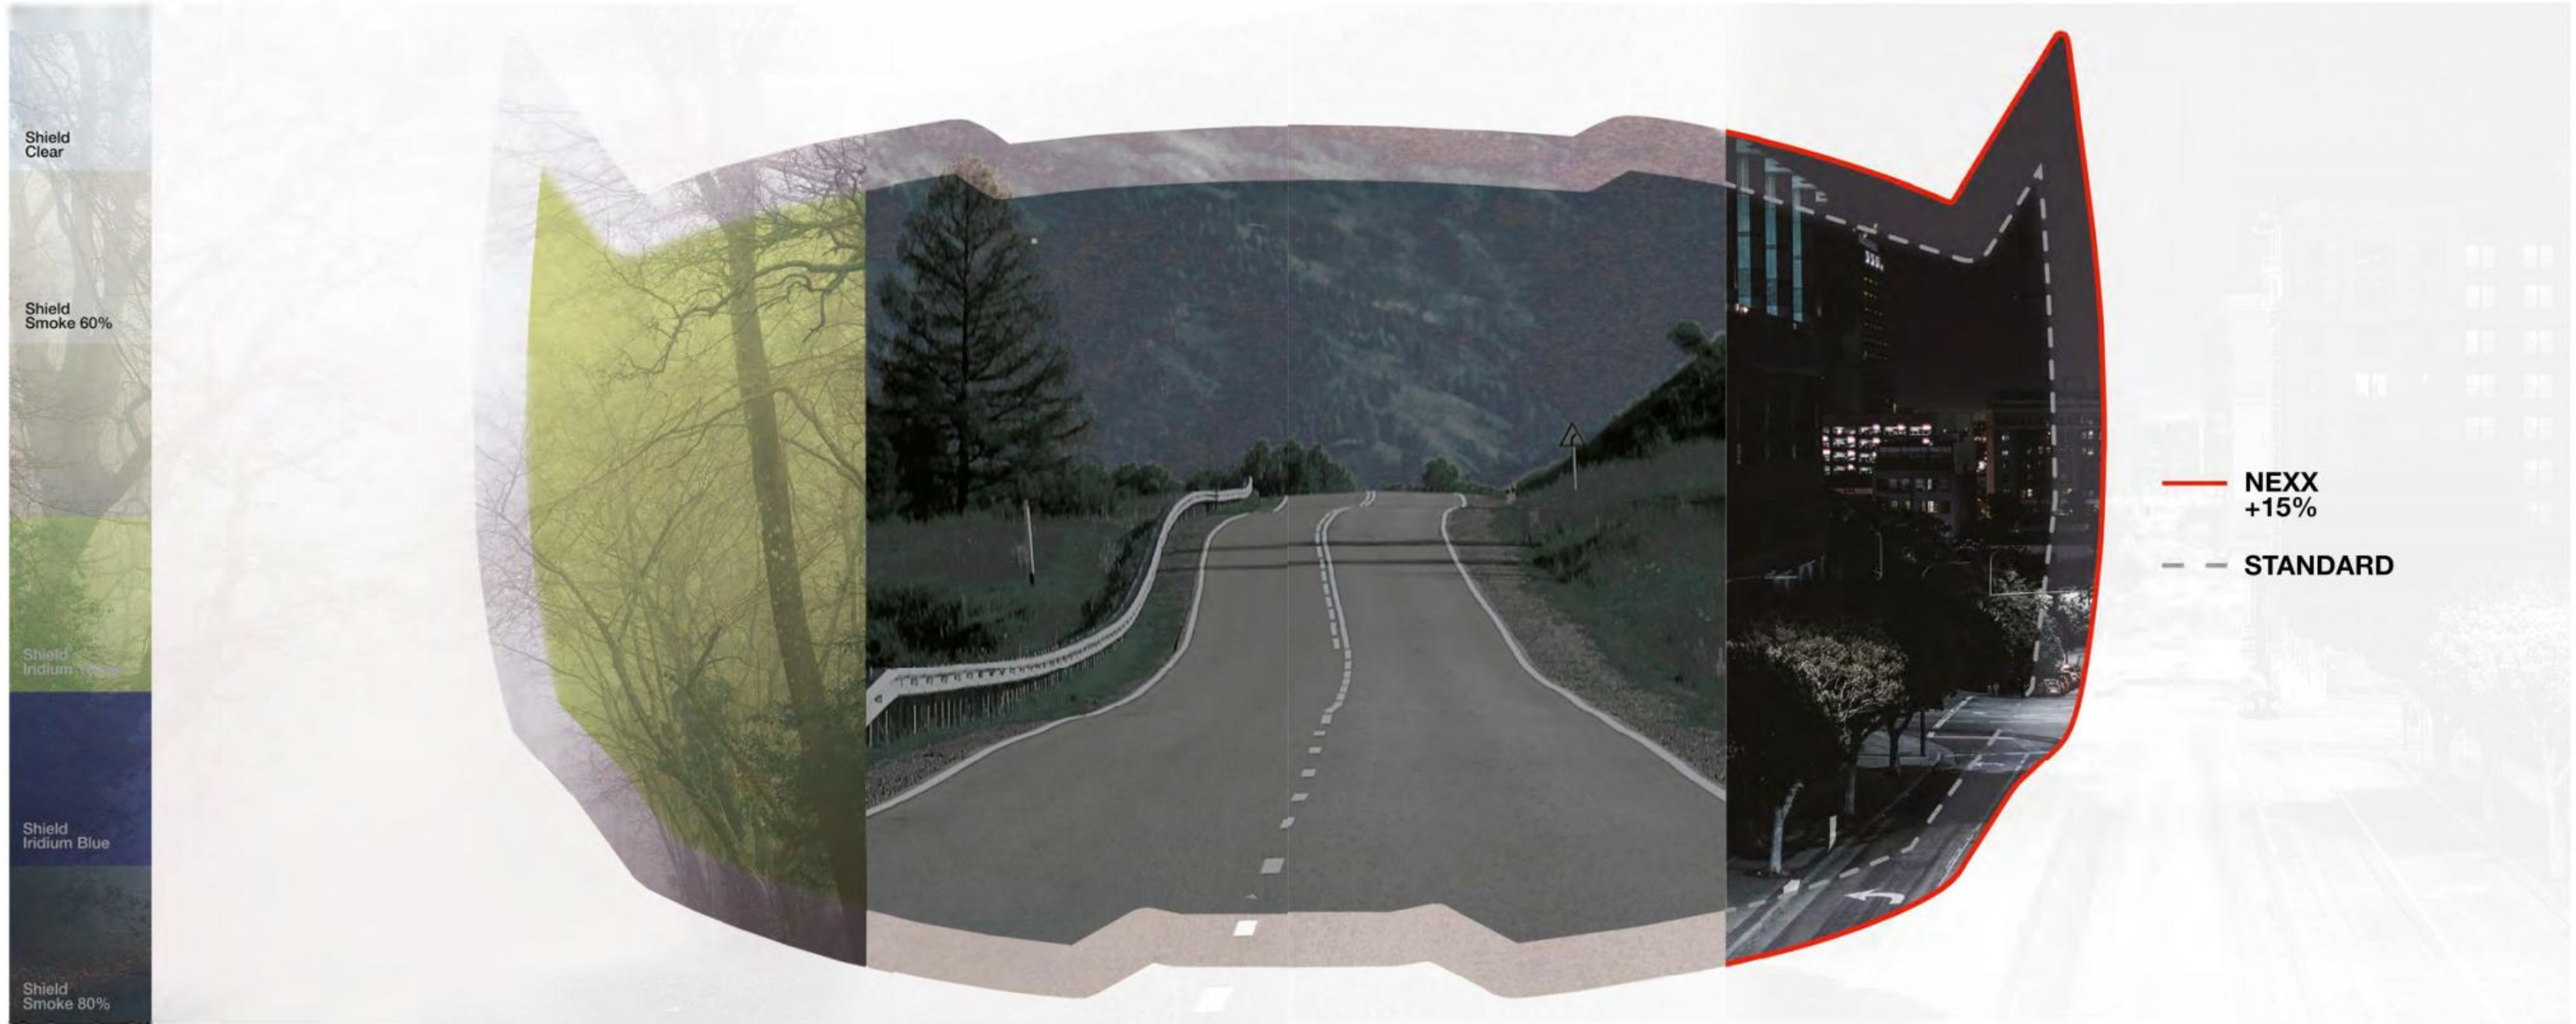

Compatible with:
X.40 (Jet Version), X.70, SX.60 and SX.10

FEATURES

VISION FOR ALL

PANORAMIC VISION

NEXX Helmets offer the widest peripheral vision in the business, a key factor, either you're in daily traffic or striving for the faster lap times on track. A wider eye port reduces rider's risk of crashing by detecting the presence of vehicles and objects and by decreasing the head rotations. At the same time, much better peripheral vision offers an increased feeling of openness inside the helmet, a sense of freedom. By reducing the blind spots, our ultimate vision fields are well above the standard values.

X-SWIFT

The X-SWIFT Quick release visor mechanism makes changing visors extremely quick and simple (change in less than 8 seconds) without the need of any tool.

SX.100

RECOIL VISOR SYSTEM

The Recoil Visor System with its spring-loaded base plates auto-adjusts and pull the shield back against the dual-lip window beading.
