#### COOLING COVER TECH

The Cooling Cover Tech is one of the most advanced ventilation systems ever designed for an open face helmet, a cover that incorporates two intake vents and three exhaust vents, all easily closed or opened by one single hand movement.

## DUAL FUNCTIONALITY WITH DOUBLE VISOR

Equipped with a Long PC Lexan Clear visor and a 80% Tint Inner Sun visor.

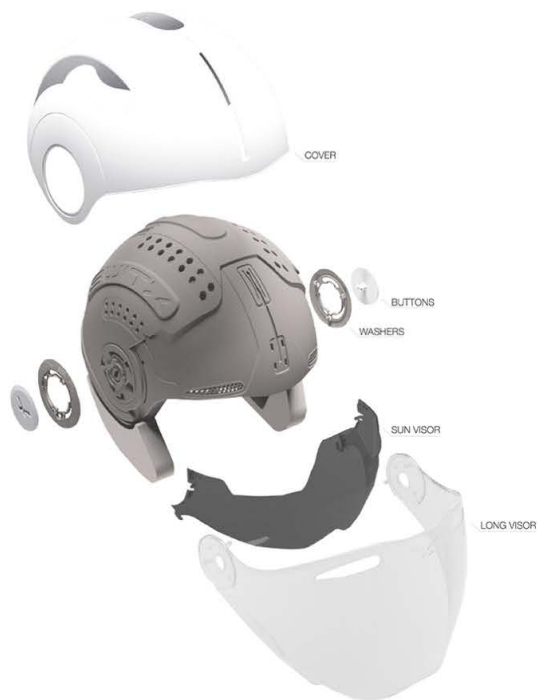

## COMPACT AND PORTABLE

SX.10 has yet another very special attribute: as all of the engineering is below 250 mm width, all mechanisms are so compressed that allows to get a super small helmet – SWITX SX.10 is the first half Jet helmet to fit in most pannier – the icing on the cake.

## SX-COM2

SX.10 is by default equipped to accommodate the NEXX Helmets SX-COM 2 System developed in cooperation with the renowned Bluetooth specialist SENA. Available as an optional extra, SX-COM 2 is a very complete system with Bluetooth 3.0, voice commands, stereo music streaming, upgradeable firmware etc also with a very affordable price and extremely easy installation.

## SWITX YOURSELF

SWITX SX.10 gives you countless ways to make your helmet one of a kind: the pieces of customization, such as the cover, the screws, the washers, the long visors and sun visors are available as accessories in a very wide variety of fashionable colors that provide an almost inexhaustible range of combinations!
