

CARiD ADVANTAGE

WHY BUY FROM US?

Buying custom wheels is NOT as easy as 1-2-3. You need to understand the different types, what will fit and what will not, realize the issues of getting wheels without tires, as well as other details. But most importantly you need to be confident that it is a real professional who is advising you throughout this expensive purchase as well as a reputable company who will always be there for you afterwards. It is very rare to get this kind of service from a small local shop.

IN-HOUSE EXPERTS

Our dedicated Wheel & Tire Team will support you at any time with individual solutions, customization options, tell you which wheels fit your vehicle perfectly, recommend the size and type of tire to match, and give you professional advice.

STATE-OF-THE-ART EQUIPMENT

Our brand new wheel & tire facility has the latest state-of-the-art equipment. From drilling and shaving to "scratchless" mounting and "road force" balancing, we can properly handle any size wheel and tire that most local shops cannot. Every single wheel that we ship goes through a very thorough Quality Assurance (QA) process.

GUARANTEED FITMENT

No fitment issues when you order from us! We have created the most accurate wheel & tire fitment database in the industry. We guarantee that the wheels we offer will fit your vehicle with the right diameter, offset, backspacing, and bolt pattern.

CUSTOMIZATION OPTION

There is no compromise when it comes to the design. We can fully customize any set of rims in our in-house paint facility: whether it's custom paint, powder-coating, textures, engraving, and even rhinestones. Color-match your ride, or choose multiple shades on different facets of the wheel. Use our wheel customizer to create and preview that one-of-a-kind look you want.

WHEEL & TIRE PACKAGES

Why deal with the hassle of getting your tires and TPMS sensors separately? Save time and money by buying a complete set. Simply take off your factory wheels and install the new ones yourself. Conveniently receive a fully functional and assembled wheel & tire package without having to do any extra work or incur further costs. Always have an extra set. Enjoy the convenience of quickly switching between your factory and custom wheels for snow or racing.

TPMS SENSORS

Sensors are available for purchase and are installed for free. We recommend new sensors for your new wheels because the last thing you want to do is transfer the original sensors from your factory wheels. There is a high risk of damage and you lose the convenience of quickly switching between your factory and custom wheels.

FREE MOUNTING & BALANCING

State-of-the-art Hunter Auto 34 Touchless tire mounting and balancing on Hunter Road Force® GSP9700 machines with SmartWeight™ balancing technology will ensure a vibration-free ride with fewer wheel weights. There are very few companies who have this equipment. We also use Hoffman® wheel weights - the most advanced wheel weights in the world.

FREE NITROGEN INFLATION

Want to get extended tire life and increased fuel economy? Nitrogen is the answer. It helps your tires remain properly inflated much longer and maintains a more consistent tire pressure whether it is summer or winter. We use the advanced Branick Model 500 inflation system to create pure and dry nitrogen.

WORRY-FREE SHIPPING

Your order is shipped and insured in packaging certified by UPS from our dedicated wheel and tire facility, so there's absolutely no need to worry about shipping damage. Your wheels and/or tires will arrive in perfect condition, ready to install!

DEDICATED CUSTOMER SERVICE

We know how important your wheel and tire purchase is to you. If you have any issues or concerns with your order, don't hesitate to contact our dedicated wheel & tire team by phone, email, or live chat. We are always here to help!

CUSTOM WHEELS

IT'S ALL ABOUT STYLE AND PERFORMANCE

Let us be your wheel and tire specialist! We carry 200 different brands of wheels, in wheel diameters from 13" to 32". Our wheel fitments range from 1950's American classics to the newest European supercars. Tires are available from 30 different manufacturers, in section widths up to 445 mm, and aspect ratios down to 20. Tire tread patterns include summer, winter, all-season, high-performance, and off-road varieties.
