2,500,000 Rechargeable Spotlight

Model No.: PKC02MB

Owner’s Manual
and Warranty Information
All safety messages that follow have NOTICE level hazards. Failure to comply could result in personal property damage.

- Always turn the Spotlight off when not in use.
- Do not disassemble the Spotlight or remove any parts. This Spotlight contains no serviceable or replaceable parts.
- Clean the Spotlight and charging accessories regularly.

INTRODUCTION

Read and understand this Instruction Manual before using the Spotlight. Recharge and operate the Spotlight only as described in this Instruction Manual.

FEATURES

Legend
1. LED Accessory Light
2. 110/120-volt AC Charging Adapter
3. ON/OFF Button
This Spotlight is shipped in a partially charged state. BEFORE first use, charge the Spotlight battery using the 110/120-volt AC charging adapter for 24 hours. Failure to follow this procedure may permanently damage the battery.

**Charger Features**

A standard two-prong 110/120-volt AC adapter is located on the back of the Spotlight behind the protective cover for connection of an AC extension cord. The 110/120-volt AC charging adapter allows charging from a household wall outlet (110/120-volt AC).

**Charging Guidelines and Precautions**

Only use the charging adapter that is built in to this Spotlight. Use of any other chargers or adapters may void any warranty, cause Spotlight damage, increase risk of fire and/or result in personal injury.

**110/120-Volt AC Charging**

1. Make sure the power switch is in the OFF position.
2. Open the 110/120-volt AC charging adapter protective cover and connect the extension cord to the 110/120-volt AC charging adapter.
3. Plug the extension cord into an approved outlet.

**Charging Tips**

- Recharge the Spotlight as soon as possible once the Spotlight starts to dim and after each use.
- Disconnect the charger cord and wait 5 minutes before use once charging is complete.
- Never leave the battery discharged or completely discharge the battery, as this will decrease battery life. Recharge every 2 months in periods of non-use. Frequent charging will improve the performance of the battery.
- Disconnect the power from the charging adapters and Spotlight when not in use.

**SPOTLIGHT OPERATION**

- Be sure the Spotlight battery is completely charged. See SPOTLIGHT CHARGING on page 4.
- Before operating the Spotlight, disconnect the charging adapters. Disconnect the extension cord from the power supply before disconnecting the extension cord from the Spotlight.
1. Press the ON/OFF button. Depending on which light was last used, the LED light or the spotlight, one of the lights will turn on.
2. Pressing the ON/OFF button again will turn off that light.
3. Pressing the ON/OFF button again will turn on the other light, either the LED or the spotlight.
4. Pressing the ON/OFF button again will turn off that light.
Due to inherent self-discharge, lead-acid batteries should be charged at least every 2 months, especially in a warm environment. Leaving a battery in a discharged state, or if not recharged every 2 months, may result in permanent battery damage.

- Read CHARGING GUIDELINES AND PRECAUTIONS on page 4 and CHARGING TIPS on page 4.
- Charge the Spotlight battery using the 110/120-volt AC charging adapter after every use.
- Charge the Spotlight every 2 months during periods of non-use.
- Unplug the unit and allow to cool before attempting to clean.
- Only use a soft cloth moistened with a mild solution of water and detergent on the outer surface of the Spotlight when cleaning.
FREQUENTLY ASKED QUESTIONS

How long will the Spotlight work after a full charge?
The Spotlight will function up to 25 minutes on a full charge.

Why doesn’t the Spotlight work when the charger is being used?
Due to circuit design, charger capacity and product safety, the Spotlight will not illuminate while it is being charged.

Are replacement parts available?
No, the light bulb and battery are not designed to be interchanged or replaced. There are no authorized service or parts providers available.

The Spotlight did not come with a separate AC or DC charger. How do you charge the Spotlight?
Separate AC and/or DC chargers do not come with the unit. Every Spotlight is equipped with an internal AC charger. The Spotlight can be charged by plugging an extension cord into the two-prong plug in the back of the Spotlight case.

How long of a time period should the Spotlight be charged?
Follow the instructions within the manual for this unit. Typical charging periods are between 18 and 20 hours. Do not charge the Spotlight for more than 24 hours when recharging. In addition, we recommend charging the unit at least every 2 months if it is not used. Periodically charging the Spotlight will help prevent battery failure.

How does the Spotlight operate?
Each “click” of the trigger switch should provide some type of Spotlight function. The first time you press the trigger switch, you activate the halogen bulb. The second time you press the trigger switch, you deactivate the halogen bulb. The third time you press the trigger switch, you activate the LED work light and when you press the trigger switch a fourth time, you deactivate the LED work light.

DO NOT EXPOSE ANY PEAK ELECTRONIC DEVICES TO MOISTURE DURING STORAGE OR OPERATION. USE PEAK ELECTRONIC DEVICES IN WELL-VENTILATED AREAS. IF YOUR QUESTION IS NOT ADDRESSED OR ANSWERED, PLEASE CONTACT PEAK AUTOMOTIVE TECHNICAL SERVICES AT 1-800-477-5847 OR EMAIL TO: owitech@oldworldind.com. THANK YOU FOR YOUR INQUIRY.
