**DEAR CUSTOMER,**

If you've ever owned a Pelican Protector™ case, you are already familiar with our legendary toughness and quality.

In my role at Pelican I've listened with great pride to many amazing stories of our cases in action - withstanding shifting glaciers, IED explosions and Silverback gorillas. These stories and associated pictures are just too good not to share, so we've featured the best in this catalog.

On the new product front, we've been very busy and are excited to share our latest innovations including extreme coolers, luggage and iPad®/iPhone®-specific cases, just to name a few.

And finally, Pelican couldn't have become the global company that it is today without the loyalty of our customers (soldiers, firefighters, police officers, photographers and sportsmen), as well as our many other new customers (consumers and outdoor enthusiasts) who depend on our products every day. Please know that we will continue to honor that trust by developing the toughest and most dependable cases on the market.

Again, thank you for placing your trust in Pelican for your equipment protection needs.

## + PELICAN™ AIR: THE LIGHTEST PROTECTOR CASES ON THE PLANET.

At up to 40% lighter than other polymer cases, Pelican™ Air cases will lighten the loads of the dedicated pros across the world who have set out to change the game.

Pelican™ Air cases are the first in a series of remarkable innovations engineered by Pelican, the pioneers of protective cases.

For over 40 years Pelican has manufactured the most influential protective cases in the world, and we're just getting started.

With the launch of the Pelican™ Air line of cases, we're redefining the future of protection with a remarkable union of light and tough.

### THE SCIENCE BEHIND LIGHTNESS

- Honeycomb structural elements that are actually stronger than solid polymer material
- Molded from the next generation of Pelican's lightweight HPX™ resin, a proprietary formula that rebounds without breaking

### UP TO THE TEST

- Submerged for 30 minutes at a depth of one meter
- Drop-tested on concrete (with loads from six feet) on all sides and corners
- Wheels are roll tested over 1,000 yards with loads at 5 mph
- 28 lb. steel dart dropped on all sides from 3 feet

## WATERTIGHT

The secret is the tongue-and-groove fit with a Polymer o-ring acting as a waterproof seal. Also, our Automatic Pressure Equalization Valve releases built-up air pressure while keeping water molecules out, resulting in a watertight case that is easy to open.

# LARGE CASES

Designed for extreme protection during transport and storage. Customizable interiors allow for extra protection and inventory control. Select models feature retractable handles, extra wide grips and sturdy casters for efficient mobility.

PELICAN LARGE CASES

## STRONGER BY DESIGN

The Pelican Protector™ Case uses an open cell core and solid wall construction, which is actually stronger and lighter than a solid core wall. Travel light with heavy protection. And you know it's a Pelican™ Case by the distinctive dual band top surface. Stainless steel pins are used for hinges and handles. The Double-Throw latches are smarter and easier to open: it's the classic 'C' clamp design with a secondary movement that works like a pry bar to start the release and offers plenty of leverage to open with a light pull.

# SURVIVOR + STORIES

## SUPERSTORM PROOF

The plane hit with such force that it sheared the left wing and float right off and, as the plane rapidly sunk, everyone was able to escape out the exits. For over nine hours, the plane was submerged some 6-8 feet under water, loosely held to the right pontoon! When we were finally allowed to recover our gear, I was planning for the worst, because the water damage on impact had destroyed just about everyone's gear. But when I opened the lid on my Pelican™ 1650 case, I was astonished to find that there was very little water inside and everything was intact!

Tim Cothren

## CRUSHED ICE OPTIONAL

We chose the best gear that we could get our hands on, including Pelican™ boxes to safeguard our camera gear, radios and satellite telephone. At 81° North latitude, one of our plastic kayaks, with a Pelican™ box mounted on deck, became caught in the current-driven ice pack and was thoroughly steamrolled. Many items loaded inside the kayak were crushed, but the Pelican™ deck box emerged through it all unscathed.

Steve Smith, Adventurer

## PELICAN CAT-SNACK

On a recent trip through Zimbabwe the 1150 Pelican™ case became the prey of a member of the carnivore family. Shumba, less than a year old, pounced on the case and subjected it to its inch long canines. The Pelican™ case withstood its brush with the jaws of death and also the rock-bashing hike into the Zambezi valley and all the whitewater I encountered in the following weeks.

Ross O'Donoghue

## THE HORSE HAS A LOT TO SAY...

During a long trekking expedition in Zanskar and Ladakh (in Northern India) we had all our stuff on horseback. About half way through the trip one of the horses overbalanced and fell from the track into the water. The horse was unhurt beyond a couple of scratches, but the case had been dragged underwater, banged on rocks for a good while and dragged out again. I opened the case and discovered that my Hasselblad®, my spare Nikon® body, several lenses, dozens of films and a DAT recorder and tapes for my audio work were all completely unharmed and dry!

## TUNISIA RUINS SAVED

At remote ancient Roman ruins working on time-lapse astrophotography, packing the car at 04:00 am. A little later on a winding country road I notice that the rear trunk door is open and my Pelican™ Storm Case™ iM2370 is gone! OMG.

Driving back, swearing, looking left and right off the road to see the case (with all the production data and equipment worth 15K Euro). Soon after the gate lays the Pelican™ Storm Case™ iM2370, flat on the dirt road. Scratched and dusty, but it's a Pelican case. Nothing damaged inside, of course.

We are the happiest guys, now having an eye on the trunk door from then on. The production is safe again, with 3 TB of irreplaceable data, stored inside that Pelican™ Storm Case™ iM2370. My Pelican cases are always there for me, and this situation is exactly when they pay off!

## INTACT AFTER MASSIVE EXPLOSION

My team and I were first responders to a terrorist attack on a hotel in Islamabad, Pakistan. As part of our recovery effort at the blast site, we 'repatriated' one of our armored vehicles. Inside the vehicle, which was in the immediate impact zone of the SVBIED, we discovered an unscathed 'Model 1640 Pelican™ Transport Case. I've enclosed photos of the Pelican Case taken the day that we recovered it from the demolished vehicle. The case stood up against a massive explosion and flying shrapnel.

We gave the case back to its rightful owner, who thankfully was not in the vehicle at the time of the attack. Seeing how well this product withstood this type of abuse, I can say that you have found yourself several new lifetime customers!

**PELICAN**<sup>™</sup>  
**STORM CASE**<sup>™</sup>

You've got equipment to protect, and a Pelican<sup>™</sup> Storm Case<sup>™</sup> has been engineered to do just that. How? It's all about the resin: our proprietary HPX<sup>®</sup> polymer is proven to resist impacts even in low-temperature laboratory testing. But the real proof is in the bragging rights that come with survival. Because to a Pelican<sup>™</sup> Storm Case<sup>™</sup>, falling from a helicopter, crashing down class V rapids or taking a hit in the center lane of the New Jersey turnpike is all in a day's work.

## PELICAN<sup>™</sup> STORM SMALL CASES

Perfect for small gear and instruments with all the features found in larger cases: strong HPX<sup>™</sup> resin construction, Vortex<sup>™</sup> valve, and Press & Pull<sup>™</sup> latches.

### PRESS & PULL<sup>™</sup> LATCHES

These smooth-opening, patented latches hold tight under pressure and impact with easy-opening performance. Tested to over 400lbs., yet open with a simple release button.

### MOLDED-IN LOCKABLE HASPS

Twin mating hasp holes on the rim of the case allow attachment of padlocks to keep your gear in and thieves out. And check out Pelican's TSA approved cable padlock. Now you can check your baggage with confidence while flying in the USA. The Travel Security Agency has the key, and you have the combination.

### RUGGED IN-LINE WHEELS

Shielded from dust, dirt and other contaminants – ball bearing wheels provide low-friction, low-drag rolling with retractable handles for easy movement of heavy loads.

# PELICAN™ STORM LARGE CASES

In the lab or out in the field, a large Pelican™ Storm Case™ with HPX™ resin construction stores and protects valuable and sensitive equipment from the elements. Pick N Pluck™ foam adds extra protection from shock during transport.

### DOUBLE-LAYER, SOFT-GRIP HANDLES

When the weather goes south you'll find a secure grip that won't slip. An in-tool vulcanizing process over-molds the grips to the polymer handle for a lifetime of dependable performance.

### VORTEX® PRESSURE RELEASE VALVE

The built-in technology of Pelican Storm Cases automatic pressure equalization valve is also a patented feature. During air travel it prevents vacuum lock to make opening the case natural, even after extreme altitude changes. At the same time, the microscopic filter blocks water molecules and dust particles so your gear stays clean in the Gobi Desert and dry on the Nile River.

## PELICAN™ CASE STANDARD PROTECTION

Most Pelican™ and Pelican™ Storm Cases are available empty, with foam or Padded Dividers. These configurations are available across our full line of injection molded cases and offer off-the-shelf protection solutions.

1670 case shown

### + PICK N PLUCK™ FOAM

An easy, do-it-yourself system for the interior of the case. Layers of foam are pre-scored in 1/2" or 1" cubes. Simply lay your equipment on the foam, tape or chalk to mark the foam, and pluck away. Always allow at least one inch of foam between your equipment and the case wall.

### + PADDED DIVIDERS

An alternative to Pelican™ foam is our optional Padded Divider Sets. These durable nylon and foam dividers are extremely versatile. The compartments are connected with Velcro® so you can easily change the configuration according to your needs.

### + LID ORGANIZERS

Made of simulated leather or ballistic nylon with nylon zippers. A wide variety of pocket sizes protect and keep your gear organized. They install easily with Velcro® strips (included).

Solid foam (which can be cut with an electric knife or coping saw) is preferred for oversize items such as long guns. The following cases ship with solid foam instead of Pick N Pluck™ Foam:

### + PANEL FRAME AND BEZEL KITS

Many Pelican™ cases can be adapted for use with electronic interface panels by using a Panel Frame (Pelican™ Case) or Bezel Kit (Pelican™ Storm Case™) accessory. Mount most interface panels (customer supplied) flush with the rim of the Pelican™ Case or desired area in a Pelican™ Storm Case™, and your technology is ready to go.

A polymer o-ring seals the panel so the base of the case remains watertight, even with the lid open. The mounting bracket, fasteners and o-ring are included in the Panel Frame Kit.

### + PELI™ QUICK MOUNTS

An alternative to panel frames, Peli™ QuickMounts attach to the inside case wall using special adhesives. The interface panel can then be mounted on top of the Peli™ Quick Mounts and secured with screws (for Pelican Protector™ Case only).

### + ELECTRONIC INSTALLATIONS

Both the Pelican™ Case and Pelican™ Storm Case™ allows customization for electronics. Injection molding provides a reliable, durable, ready-to-ship enclosure with consistent dimensions. The copolymer material can be machined, drilled and sanded smooth.

These properties make the Pelican™ Case and Pelican™ Storm Case™ suitable for use with bulkhead connectors. Attaching equipment to the interior is equally simple using common hardware such as bolts and rivets. The hardware can be made watertight by use of o-rings, rubber gaskets or silicone.

Mounting the entire case to a wall or post is a simple way to create a waterproof control box for field use.

### + CUSTOM LOGO SERVICES

Personalize the outside of the case with your company logo or have your name engraved on the nameplate (Pelican™ Case). Logos can be applied in multiple colors as a Mylar® decal (250 piece minimum) or as a vibrant fade-resistant, scratch-resistant hot-stamped ink.

# ADVANCED CASE SOLUTIONS

While every Pelican™ case is built tough on the outside, we provide custom services to protect delicate items on the inside. Custom foam and extreme solutions such as deck mount suspension systems and certified laboratory testing will keep your equipment organized, intact and protected through the most volatile conditions.

## LOW COMPLEXITY

Custom Foam Solutions

EXAMPLES

- Custom Labels
- Humidity Indicators
- Customizable Cushions such as Polyethylene and Polyurethane in Multiple Densities, as well as other specialty foams

## MEDIUM COMPLEXITY

Interior/Exterior Solutions

EXAMPLES

- Shock Mount Metal Decks
- Custom Metal Work
- Cut and Weld
- Custom Bezel Solutions
- Forklift Risers

## EXTREME COMPLEXITY

Interior/Exterior Solutions with Testing Requirements

EXAMPLES

- Shock Testing
- Vibration Testing
- Drop Testing
- Salt/Fog Testing
- Pressure Testing

## + CUSTOM FOAM MADE SPECIFICALLY FOR YOUR EQUIPMENT

Pelican Products provides expert packaging for both of our case lines, and we work with partners who have been in the packaging industry for over 50 years. Save time and cost by purchasing a fast and complete turnkey solution from Pelican!

Our Pelican Case Centers have the most advanced foam cutting tools, and our engineers have the latest software applications so they are able to create a design that is precise and determines the most cost effective method of manufacture.

Water Jet Technology

Die Cut Technology

CNC Router Technology

## PELICAN ENGINEERS TAKE EVERYTHING INTO CONSIDERATION WHEN DESIGNING YOUR CUSTOM CUSHION:

- Unit Dimensions
- Accessories and other items
- Fragility
- Military Specifications
- UV Resistance
- Commercial Spec
- Anti Static Grounding
- Weight (and weight distribution)
- Size Restrictions
- Ship method and how often (ground, air or "around the town")
- Option requirements
- ...and more!

*All of this information allows us to choose the right Pelican case and foam type for your application!*

## + NOT ALL FOAM IS EQUAL

With over 50 years of professional packaging experience, Pelican engineers utilize sophisticated engineering technology to provide a foam solution that not only serves to protect, but also creates a professional presentation

that you will be proud to display. From simple to very complex cushion designs, we know how to provide protection that will get your gear or mission critical items safely to their destination.

## + CUSHIONING MATERIAL:

**POLYURETHANE:** Commonly used, polyurethane is a softer, open cell foam. Best for lighter weight sensitive equipment such as cameras, smartphones and laptops. Available in a variety of densities.

**ANTI-STATIC POLYURETHANE:** This special foam inhibits the build up of static electricity and helps dissipate any stray static charge. It is an open cell foam that is used for lightweight items such as sensitive electronic equipment, e.g. circuit boards, computer chips, etc.

**POLYETHYLENE:** Polyethylene foam is a strong, non-abrasive, water-resistant and resilient closed cell foam. Due to its excellent vibration dampening and insulation properties, it is often used for packaging fragile goods such as communications equipment, power supplies, etc. Available in a variety of densities.

**ANTI-STATIC POLYETHYLENE:** Commonly used for shipping electronic parts, circuit boards and computer chips, anti-static polyethylene foam is a strong, non-abrasive, water-resistant and resilient closed cell foam. The properties of the foam slowly dissipate electrostatic charges given off by other components. Used for shock absorption, it is often used for packaging fragile goods due to its excellent vibration dampening and insulation properties.

**CROSS-LINK:** Is a non-porous, non-particulate closed cell foam that is often used in a clean room environment (reduces foreign object debris – FOD). It is aesthetically pleasing and resistant to grease, dirt and water. Available in a variety of densities.

**OTHER FOAM TYPES AVAILABLE:** FLAME-RETARDANT, CONDUCTIVE, EXPANDED FOAMS...

### CUSTOM FOAM APPLICATION EXAMPLES:

- Consumer Products
- Firearms
- Computers
- Calibrated Optics
- Tools
- Video Equipment
- Bottles
- Paintings
- Music Instruments
- Collectibles
- Any Item That You Value and Need To Protect

## + BEYOND FOAM

When foam is not appropriate, Pelican® specializes in custom metal work to help keep your equipment secure and stable, to arrive without a scratch.

## + LAB TESTING

Military and OEM customers may need to certify the case will perform to specific requirements. Under precise control conditions we subject our cases to a battery of rigorous lab tests including drop, vibration, leak, heat and dust tests.

BEYOND FOAM

## + DECK MOUNT SUSPENSION SYSTEM

While foam is generally the first choice for protection, heavy or extremely fragile equipment sometimes requires fabrication of custom deck mount suspension systems to secure equipment. Cradle mounts are also the choice when the equipment can only be supported in precise locations. Pelican's machine shop is world-class, with plasma cutters, certified welders and finishing services demanded by the aerospace, defense and medical industries.

## + VIBRATION CONTROL

Small but constant vibration during transport is very destructive to the equipment inside a case. Pelican uses elastomer shock mounts, cable shock isolators, hard mounts, and foam that isolate the payload from case walls. Specialized foams can also mitigate vibration; our engineers understand the properties of foam to specify the type that is right for your requirements.

### VIBRATION TEST

- L.A.B. servo hydraulic vibration system; 0 – 300 Hz.
- Sinusoidal with pre programmed profiles for:
  - ISTA Integrity test procedures 11800, 14200, 1A, 1B, 1E, 1C, 1D, 2A AND 2B.
  - FED-STD-101C; 5019-1
  - 3 – 50 Hz sweep with 1G constant input
  - 1-inch dwell for loose cargo bounce
  - Mil-Std-648C; 5.3.2
- Random Vibration with pre-programmed profiles for:
  - ASTM D 4169 Air levels 1, 2, and 3
  - ASTM D 4169 Truck levels 1, 2, and 3
  - ASTM D 4169 Rail levels 1, 2, and 3
  - ISTA Integrity Test Procedures 1E, 1H, 1C, 1D, 1F, 3C, 3D, and 3E.

### DROP TESTING

- Six foot cube reaction mass of reinforced concrete. A hoist capable of lifting 1 ton, and a quick release mechanism with a load capacity of ½ ton.

### IMPACT TEST

- Falling dart – 84" drop height with darts weighing between 5 and 15 lbs.
- Penetration test for category 1 containers - ATA 300 paragraph B-2-5

### THERMAL TEST

- Walk in environmental chamber 6-foot wide by 8 foot high and 8 feet deep with a thermal range of -100°F to 200°F.

### IMMERSION TEST

- Internal dimension of the chamber is 54" x 30 x 36"H. Able to simulate immersions up to 2 meters.
- Small immersion tank capable of immersions up to 1 meter on small IM cases.
- 80-inch deep large immersion tank

### RAIN TEST

- Small rain chamber capable of up to 4 inches per hour.

### PNEUMATIC PRESSURE TESTING

- 100" and 80" water manometers
- 100" mercury manometer.
- Digital manometer – 10 psi max.

### MITUTOYO HARDNESS TESTER

- Metal evaluation of product used in cases.

### COMPRESSION AND TENSILE TESTING

- Instron compression tester, model 3367.
- Load range of 6600 lbs on small items.

### LEAK TEST

- Immersion: 54" x 30" x 36" high chamber. Able to simulate immersions up to 2 meters.
- Rain: Small rain chamber capable of up to 4 in. per hour.
- Pneumatic Pressure: 100" and 80" water manometers. 100"mercury manometer.
- Digital manometer - 10 psi max.

### **DEAR CUSTOMER,**

Lighting tools – they're a core element of every toolbox. They have a straightforward and simple purpose. Yet, when you're in a situation that requires a lighting tool, you want to make sure you have the right one. Pelican understands the critical importance of this tool. We provide a wide range of advanced lighting systems to support professionals, outdoor enthusiasts and everyday do-it-yourself hobbyists. Regardless of the purpose, our lighting tools and remote area lighting systems enable you to accomplish your tasks in a safer and more efficient manner.

With this perspective, Pelican relentlessly pursues innovation for new lighting tool products and manufacturing processes. We have adopted the ANSI FL-1 flashlight standards (see page 2) and continue to increase the number of industry leading safety certificates for specific models.

Our new lighting catalog features multiple technology advances. These include state of the art LED performance upgrades, new electronic features, upgraded safety certificates and enhanced packaging. We are committed to environmentally responsible manufacturing, in fact most of our lights use LED bulbs that help protect our planet. LEDs are long lasting, promote extended battery life and allow for the latest technological advancements.

From basic models to the high-performance 9410L LED Lantern (our brightest handheld flashlight to date) and the 9470 Remote Area Lighting System (which delivers 12,000 lumens), we are ready to provide world-class support for our dealers and end users across the globe. And, all of this comes with Pelican's industry-leading guarantee of excellence.

We invite you to look through our new catalog and discover the ideal lighting tools for your specific needs.

## STANDARDS AND RATINGS

(Applicable to flashlights only)

### LIGHT OUTPUT

Light Output is the total luminous flux. It is the total quantity of emitted overall light energy as measured by integrating the entire angular output of the portable light source. Light output in this standard is expressed in units of lumens.

### RUN TIME

Run Time is defined as the duration of time from the initial light output value – defined as 30 seconds after the point the device is first turned on – using fresh batteries, until the light output reaches 10% of the initial value.

### BEAM DISTANCE

Beam Distance is defined as the distance from the device at which the light beam is 0.25 lux (0.25 lux is approximately the equivalent of the light emitted from the full moon “on a clear night in an open field”).

### WATER RESISTANT

Water Resistant – IPX4 Water splashed against the device from any direction shall have no harmful effects.

### WATERPROOF/SUBMERSIBLE

**Water Proof // IPX7** – Ingress of water in quantities causing harmful effects shall not be possible when the enclosure is temporarily immersed in water under standardized conditions of pressure and time. **Submersible // IPX8** – Ingress of water in quantities causing harmful effects shall not be possible when the enclosure is continuously immersed in water under conditions which shall be stated by manufacturer, but which are more severe than for IPX7.

### PEAK BEAM INTENSITY

Peak Beam Intensity is the maximum luminous intensity typically along the central axis of a cone of light. The value is reported in candela and does not change with distance.

## NEW DEEP MOUNT LED TECHNOLOGY

Our engineering team has designed a new high performance LED lamp module (Deep Mount LED Module). These lights are now brighter, with close to 100% increase in lumens and a 2.5 times increase in lux value over previous versions (as well as offering a more robust design).

- A New deep dish reflector provides up to 2.5 times lux increase, and 100% lumen increase
- B Robust, over-molded polycarbonate lens won't yellow
- C Opti-mechanical design gathers and focuses 100% of the light
- D LED is mounted directly to the PCB board, creating a strong and efficient design solution

## ANSI STANDARDS (AMERICAN NATIONAL STANDARDS INSTITUTE)

Why create standards? While Pelican was one of the first manufacturers to use quantifiable test procedures, the need was recognized to develop a common language that customers could use to select the right flashlight for their specific needs. As a result, the American National Standards Institute (ANSI), with input from the flashlight industry, developed

performance standards and symbols to effectively communicate a flashlight's features and benefits.

The Resulting ANSI/NEMA FL 1 Standards include the following six criteria.

## GLOSSARY OF TERMS

**Candela** A unit of measurement of the intensity of light that is emitted by a light source in a particular direction.

**Lux** The unit of luminous flux in the International System, equal to the amount of light given out through a solid angle by a source of one candela intensity radiating equally in all directions.

**Lumen** A unit of measurement of the amount of brightness that comes from a light source. Lumens define “luminous flux,” which is energy within the range of frequencies we perceive as light.

**Integrating Sphere** An integrating sphere is a measurement device with an entrance port that can accept all the directional light output of the device under test, or can totally enclose the device itself. The walls of the sphere should be highly diffuse with high reflectivity (>80%) and the spectroradiometer should be shielded from direct view of the device under test by a baffle system.

**IP** (Ingress Protection) – These ratings specify the environmental protection the enclosure provides. The IP rating normally has two numbers (IPXX).

The first number represents protection from solid objects or materials (dust) whereas the second number represents protection from liquids (water). With the IP rating IP 54, 5 describes the level of protection from solid objects and 4 describes the level of protection from liquids as described by the IP Rating System (Solids vary from 0-6 IP rating, Liquids vary from 0-8 IP rating).

**Rechargeable** Denotes a flashlight which contains rechargeable batteries and charging station. These models are shown with the rechargeable icon.

# SAFETY.

## YOUR PASSPORT THROUGH HAZARDOUS LOCATIONS

Whether working in a **Class I** Oil Refinery or in the silo of a **Class III** Textile Mill, safety is always a concern and your lighting tool shouldn't add to your worries. Pelican builds lighting tools approved for any work environment. In fact we make more safety approved lights certified for **Class I II III Div. 1** and groups **ABCDEFG** than anyone else.

### HAZARDOUS AREA ELECTRICAL GUIDELINES

CLASSIFICATIONS	SUBSTANCE	TYPICAL ENVIRONMENTS
CLASS I DIVISION 1 DIVISION 2	Flammable Gases, Vapors, or Liquids	Oil Refinery, Paint Warehouse Spray Booth, Offshore Oil Rig
CLASS II DIVISION 1 DIVISION 2	Combustible Dusts	Coal Mine, Munitions Factory, Grain Silo, Hay Storage Facility
CLASS III DIVISION 1 DIVISION 2	Ignitable Fibers & Flyings	Paper Mill, Woodworking Facility, Textile Mill, Cotton Gin

**Division 1 (hazard likely):** Where volatile substances can exist all of the time or some of the time under normal operating conditions.  
**Division 2 (hazard not likely):** Where volatile substances are not likely to exist under normal operating conditions.

# RIGHT ANGLE LIGHTS

Firefighters put everything on the line and the correct lighting tools are critical. Right angle (90°) flashlights often worn on turnout coats offer hands-free performance. With extreme peak beam intensity and smoke-cutting penetration, these lights will get you in and out of tough situations safely.

# CUSTOM LABELS

Pelican Products offers the ultimate in private labeling. You can put your company name and logo or a special statement on many Pelican lights. Our in-house private label molding and production department has complete short and long run capabilities for a variety of custom applications and custom colors. We have the latest hot stamping equipment, utilizing the world's most durable inks and foils in our screening, hot tipping, embossing, and molding programs.

CUSTOM LABELS

## GRAPHIC DESIGN STUDIO

Our in-house graphics studio will take your logo and size it appropriately to the flashlight of your choice.

## HOT STAMPING

Our hot stamping department is equipped with the latest technology in custom imprinting. Minimum quantities apply.

## 100% ACCURACY

Pelican's strict QA inspection team will check for quality of print and 100% accuracy in color and placement.

On the ground in Haiti: The Los Angeles USAR team responds.

## THE WIDEST SELECTION OF CASES IN THE WORLD.

In the beginning, a wooden crate fell apart. And then a corrugated box got wet. To make things worse, overweight metal cases showed up with sheared-off handles. That's when Pelican-Hardigg Cases arrived, manufactured from polyethylene.

Durable and waterproof, with recessed handles and integrated stacking ribs. The year was 1969, and we've been adding new sizes and perfecting Pelican-Hardigg Cases ever since.

### Why Rotational Molding?

The advantages of rotational mold manufacturing are significant. Following are a few prime reasons:

#### More material in the corners.

A Pelican-Hardigg Single Lid Case begins as resin powder that is measured and loaded into a mold attached to a biaxial arm. As the mold rotates, it is heated and 15%-20% more resin accumulates in the corners and edges. When the case is dropped (and it will be) it has extra strength where it is needed.

**Recessed hardware, columnar ribs.** Recessed handles, latches and hinges prevents them from being sheared off during transport. Ribs are molded in to create incredibly strong forms from lightweight material. Cases of like sizes have matching top and bottom ribs, so they won't shift when stacked.

**Watertight tongue and groove seal.** Keep your gear dry and dust-free in the harshest environments.

**Anti Shear locks.** Molded, interlocking blocks are matched around the rim of the case. When the case takes an impact, the lid stays aligned to the base.

**Bells and whistles.** With accessories and custom services from our Advanced Case Centers, a Pelican-Hardigg Case can be a lot more than a box. Next we'll share some important options.

#### Selecting case hardware-it's all about you.

Getting your equipment safely from point A to point B is paramount. To move your case around you might need wheels, or if the load is extreme we can install forklift spacers and a bash-plate. We can also help you with technical choices, such as standard or mil-spec purge valves (prevents vacuum lock in the event of altitude change). The list goes on: from handles and latches to desiccant chambers for removing humidity from the case.

Planned protection: custom foam awaits fragile equipment.

### Hard protection systems.

When foam is not appropriate, Pelican specializes in custom metal work. Cradles or frames hold sensitive parts away from the walls of the case. The area between the frame and the case is the "sway space", and dampeners are used to isolate the part from shock and vibration. Dampeners can be mounted foam bumpers, or elastomeric shock mounts that can mitigate impacts up to 15 G forces.

### Testing... 1-2-3.

The time to find out if your equipment is going to arrive intact is before it ships. That's why we have a full service test lab to verify survivability. As a matter of fact, Pelican operates one of the few certified test labs in the country. Drop tests, immersion, temperature extremes, G-force and vibration: we do it all to prove our cases perform to your specifications

### We've got you covered.

Whether you need one empty case or a run of engineered cases for an extreme application, Pelican has the right size and the right team to get it done. In addition to our primary manufacturing facilities in the USA and Europe, there's a regional Advanced Case Center near you ready to help.

Shake it up: Rubber shock mounts keep equipment stable.

Extreme case work: Engineered cradles for secure transport.
