Automotive Industries LLC

*"Proud of the past...committed to the future"
is a slogan which accurately reflects Pioneer's heritage and its future.*

Pioneer was founded in 1946 by the late Herman A. Shields, who owned a successful automotive parts manufacturer's representative firm in his hometown of Meridian, Mississippi. He formed the company to service the needs of his clutch remanufacturer customers. His goal was simple: Supply the needed, hard-to-find parts for these businesses.

Little did he know that the company he founded would become a leading supplier of high quality components to the automotive parts aftermarket. For over 30 years under the guidance of the Shields family, Pioneer growth was based upon the twin cornerstones of customer service and reputation of the "Source for hard-to-find parts."

In 1979, Pioneer was purchased by The Barnes Group (Bristol, Connecticut) and the company became known as Pioneer/Barnes. During the Barnes Group's ownership, Pioneer purchased a 10-acre parcel in the G.V. (Sonny) Montgomery Industrial Park and built an 86,000 sq. ft. corporate head-quarters and distribution center on the site.

The product line expanded dramatically during the Barnes years, adding operating cables, flywheels, ring gears, shop supplies and performance parts to the company's mix, while further expanding the clutch, engine parts and water pump lines. Additionally, Pioneer added regional warehouses in Mt. Laurel, New Jersey and Cerritos, California to provide improved delivery service to its East and West Coast customers.

Additionally, Pioneer has made major commitments to its total quality assurance programs. These quality performance processes have been adapted to order taking and filling, distribution and inventory controls, further improving fill rates and on-time delivery.

The distribution facilities have also undergone modernization. In 1995, the Meridian facility's distribution center was expanded, bringing the warehousing space to over 200,000 sq. ft.

In May, 2000, Pioneer bought the new clutch business of L&S and through this acquisition have added New Clutch Kits to form a "5 Star" line-up which includes Powertrain, Transmission Parts, Engine and Transmission Mounts, and Harmonic Balancers...giving Pioneer a strong and competitive package of Driveline related products.

In August of 2010, Pioneer was acquired by the LODI Group with a continued focus on product line expansion and making major investments in product tooling.

For over 60 years, the Pioneer story has been unique. Pioneer's growth has been based upon the philosophy of Herman Shields that success must be based upon customer service and satisfaction. Pioneer's Mission Statement reflects that philosophy:

"We are committed to the success of our customers. Our mission will be to provide customers with quality product and superior service. We believe the dedication of our employees and business partners is our most valued resource."

While the philosophy may seem passé in today's business environment, it has served Pioneer well through over six decades.

GUARANTEE

All parts are guaranteed against defects in material and workmanship for a period of one year from the date of the original consumer purchase.

"Our obligation under this guarantee is limited to replacement of the defective part or, at our option, repayment of the purchase price, conditioned in either case upon the return of the part to us with an explanation of the circumstances and conditions under which failure occurred. We neither assume nor authorize any other person to assume for us any other liability. IN NO EVENT WILL PIONEER BE LIABLE FOR ANY CONSEQUENTIAL OR INCIDENTAL DAMAGES, including claims for labor charges, transportation, or loss of revenue."

The information listed herein is correct to the best of our knowledge and belief, having been compiled from reliable and official sources of information. However, WE CANNOT ASSUME ANY RESPONSIBILITY FOR POSSIBLE ERROR.

Clutch Bolt Kits

Clutch Bolts are heat treated to insure consistently high tensile strength. Strict thread and shoulder tolerances assure perfect assembly.

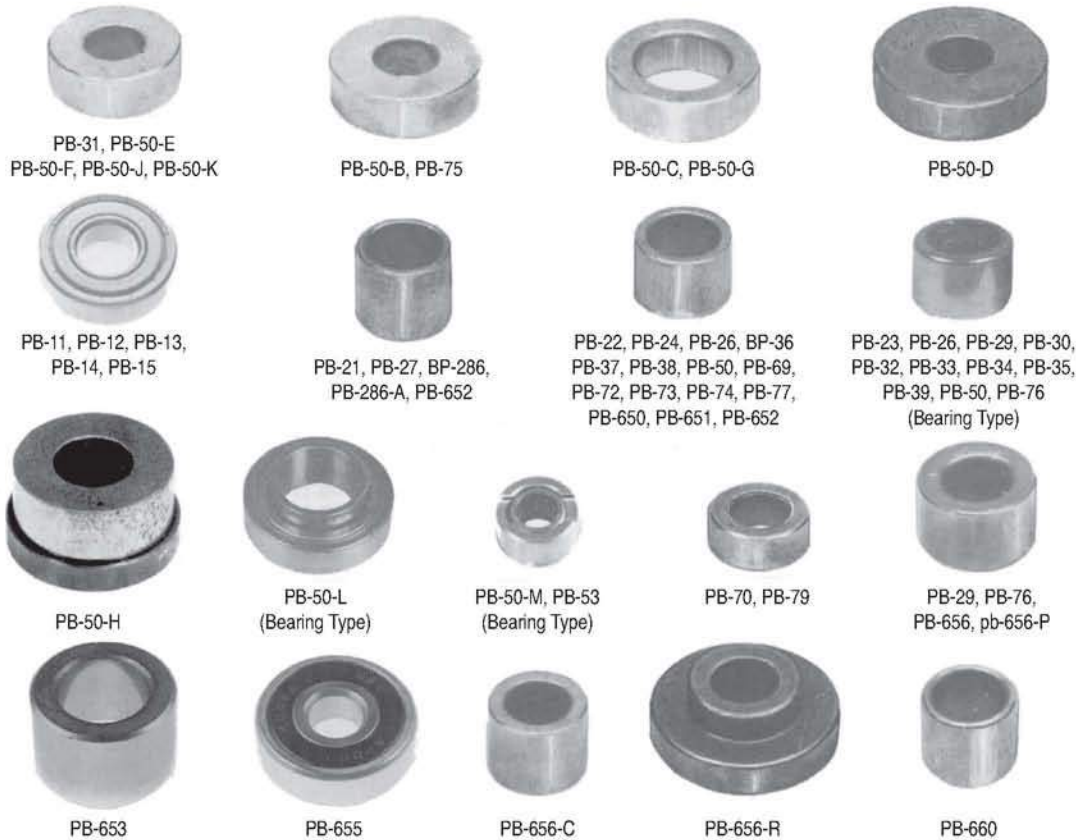

PIONEER NO.	DESCRIPTION
S-1120	Chevy - Pressure Plate Bolts Borg & Beck, 3/8" x 1" (Packaged 6/Card)
S-1121	Ford - Pressure Plate Bolts Long Style Clutch, 5/16" x 3/4" (Packaged 6/Card)
S-1120-F	Ford - Pressure Plate Bolts 3/8" x 1" (Packaged 6/Card)

Clutch Pilot Bushings (See our Clutch Catalog for a complete listing of Clutch Components)

Pioneer Clutch Pilot Bushings are manufactured of 60% Bronze / 40% Cast Iron and meet O.E. Specification of size and physical properties, ASTM-B-612. Each bushing is oil-impregnated for long life.

Cylinder Head Bolts – SPECIFICATIONS

Pioneer has the most complete coverage of early and late model cylinder head bolt kits. Our head bolts are manufactured to meet or exceed OEM specifications. Torque-to-yield bolts must be replaced to avoid premature head gasket failure. OEM installation procedures MUST be followed when replacing head bolts.

Expansion Plug Kits - **Carded & Poly-Bagged**

PIONEER SHORT BLOCK EXPANSION PLUG KITS are designed by Engine Rebuilders for Engine Rebuilders. We have the most extensive coverage and highest quality in the Automotive Aftermarket. Since our customer's needs vary in material and packaging configuration, we offer several different types of kits:

SKIN PACKED CARD

(12 Kits / Master Pack)

- **No Suffix** - Zinc-Plated Block Plug
(i.e. PE-100 – Small Block Chevy)
- **“-B” Suffix** - Brass Block Plug
(i.e. PE-100-B – Small Block Chevy)

POLY-BAGGED REBUILDER KITS

(25 Kits / Master Pack)

- **“-R” Suffix** - Zinc-Plated Block Plug
(i.e. PE-100-R – Small Block Chevy)
- **“-BR” Suffix** - Brass Block Plug
(i.e. PE-100-BR – Small Block Chevy)

“DEEP PLUGS” Expansion Plug Kits

For your most popular V8 applications, we have created a series of “Deep” Plug Kits with Deep Block Plugs.

Rocker Arm Parts (High Performance)

SCREW-IN STUDS

Pioneer Screw-In Studs are made of Maxalloy Steel. No jam nuts required. Double heat treated, but not brittle. Rolled threads and Class 3 tolerances. These studs are a must for Hi-Performance Engines to prevent stud pull-out.

16/SET

PIONEER NUMBER	APPLICATION
S-1000	Chevy - All w/3/8" Studs, 265-400 C.I. Engine Ford - All w/3/8" Studs, 221, 260, 289, 302, 351 AMX - Rambler 390 C.I.D.
S-1001	Chevy - w/7/16" Studs, 396, 427, 454 Engine

ROCKER ARM ADJUSTERS

Pioneer Rocker Arm Adjusters are heat treated for extra long life. Tapped individually as a second operation to insure perfect threads. Bottoms counter-bored to work with any stud. Double heat treated Set Screws and Allen Wrench included with each set.

Valve Bronze-Liner

BRONZE-LINERS... The PIONEER CROSS-HATCH with Speed-Lead

CROSS-HATCH: Pioneer now offers a cross-hatch pattern on the inside of our Bronze-Liners, which offers better lubrication retention, thus reducing wear.

Speed-Lead: Pioneer Bronze-Liners now have a speed-lead. This rounded nose design makes installation easier and faster by eliminating the need to chamfer the guide boss. PLUS, to make it easier to identify the speed-lead end, we have added a strip to the outside of the Bronze-Liner.

Valve Keepers

The **PIONEER “PLUS/MINUS KEEPERS”** is a specially designed valve lock for the needs of today’s engine rebuilder. The “PLUS/MINUS KEEPER” is manufactured of the best quality material and heat-treated to insure maximum service life. The most important difference is that the “PLUS/MINUS KEEPER” is designed to lower the spring retainers installed height, thus eliminating the need to install valve spring shims to correct valve spring pressure.

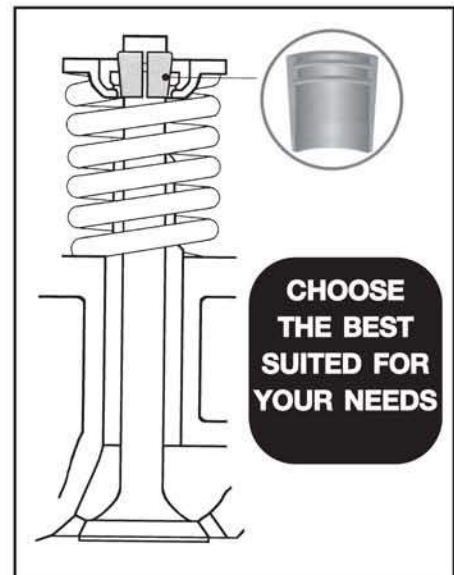

“PLUS/MINUS KEEPERS” are available with three variations from the Standard O.E.M. Valve Lock Design

- The “PLUS 30”** .030” (thirty-thousandths) valve lock repositions the spring retainer .030” below standard O.E.M. locks and are recommended on remanufactured cylinder heads with new valve springs.
- The “PLUS 60”** .060” (sixth-thousandths) valve lock repositions the spring retainer .060” below standard O.E.M. locks and are recommended on remanufactured cylinder heads where the valve springs are to be re-used.
- The “MINUS 50”** .050” (fifty-thousandths) Valve lock repositions the spring retainer .050” above standard O.E.M. locks and are used in hi-performance applications, where a longer valve or spring is desired.

- The “bead” location has been moved, which provides additional spring compression.
- Automatically provides more valve tip protrusion above the retainer, therefore minimizing the possibility of rocker arm-to-retainer interference.
- All “PLUS/MINUS KEEPERS” are heat-treated to maximize service life, and color coded for quick identification.

“MINUS 50” KEEPER
For High-Performance

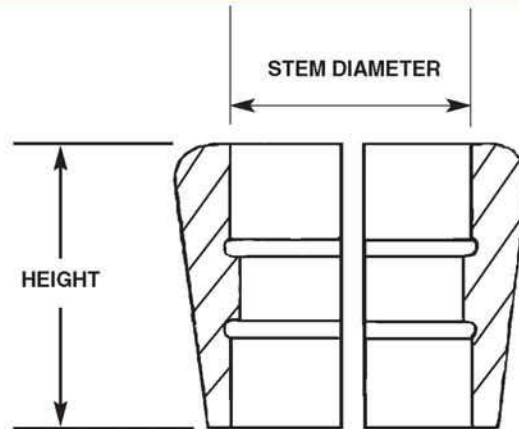

“MINUS 50” PIONEER KEEPERS have the bead relocated to relax the spring by -.050” over O.E. type locks

All “MINUS 50” PIONEER KEEPERS are heat-treated to increase durability for high performance engines.

Valve Keys

Pioneer's Valve Keys

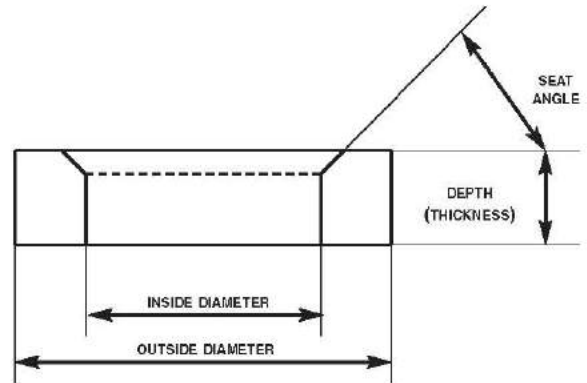

are manufactured to meet or exceed O.E.M. Specifications. Our premium materials are stamped or machined to exacting tolerances to insure your valve train stays rock solid.

-X Suffix denotes spring with damper.

Valve Springs - Chrome Vanadium - High Performance

Chrome Vanadium Valve Springs help eliminate valve float, and when used with high performance camshafts help increase rpm's. Chrome Vanadium Springs also help eliminate fatigue and tension loss.

1. TO CHECK GUIDE HEIGHT:
 - A. INSTALL RETAINER ON VALVE.
 - B. MEASURE FROM TOP OF WEAR PATTERN TO BOTTOM OF RETAINER (OR VARIATION OF STEM DIA.) IF THIS IS LESS THAN 3/16 THE GUIDE HEIGHT MUST BE REDUCED THE NECESSARY AMOUNT TO PROVIDE 3/16 CLEARANCE.
2. TO CHECK OUTSIDE DIAMETER OF VALVE GUIDE:
 - A. MEASURE VALVE GUIDE O.D. IF GREATER THAN SPECIFIED BELOW, GUIDE MUST BE MACHINED.
 - B. SPECIFIED O.D. MUST EXTEND AT LEAST 3/8 BELOW TOP OF GUIDE. IF LESS, MACHINE UNTIL TOOL CONTACTS TOP OF GUIDE.
 - C. FLAT ON TOP OF GUIDE MUST BE AT LEAST 1/16. IF LESS, MACHINE TO PRODUCE FLAT.
 - D. GUIDE MUST BE MACHINED IF ECCENTRICITY EXCEEDS .010" EXCEPT WHEN USING THE ALL RUBBER 2-RING VALVE SEAL.

MACHINING INSTRUCTIONS:

1. Remove cylinder heads and valve assemblies.
2. Insert machining tool in chuck of 1/2" electric drill (Speed should not exceed 450 RPM)
3. Oil tool pilot and insert it into a valve guide.
4. Apply heavy pressure to cutting tool. Machine valve guide to specifications. Do not bounce tool on Guide.
5. Machine remaining guides as specified. Wipe and lubricate tool pilot after machining each guide.
6. Thoroughly clean cylinder head and guides.
7. Remove any burrs from valve stems with a fine stone or crocus cloth.
8. Insert valve into guides. Lubricate lightly

Valve Stem Oil Seal Installation Aids

Designed to protect the Valve Stem Oil Seal during installation. Simply slip the installation aid over the valve tip. The installation aid will cover the valve groove area to prevent destruction of the sealing surface of the seal. The use of this protective device is essential when installing positive type seals. We highly recommend the use of the oil seal installation aid when installing Nitrile, Teflon, and Polyacrylic Seals.

Oil Seal Installation Aids are made of MYLAR for use with installation lubricants.

DESIGN SPECIFICATIONS

ILLUST. TYPE NO.	DESCRIPTION	ACCEPTABLE FOR USE W/OVERSIZE VALVE STEMS	DESCRIPTION
1	O-Ring	Yes	Helps slow oil flow on valve stem. Best when used with umbrella style seal.
2	Umbrella (Rubber)	Yes	Inexpensive seal used with older applications. Best when used with tight stem-to-guide clearances.
2	Umbrella (Nylon)	No	Inexpensive seal used with older applications. Best when used with tight stem-to-guide clearances.
3,4,5,6	Positive	Yes	Positive seal attaches to the guide. Grooves meter the flow of oil to the guide. Rings, bands and/or springs help maintain proper form and tension.
7	Metal Jacket	No	Late-Model O.E.M. design providing excellent durability and oil-control.
8	Teflon and Rubber	No	Excellent for high-temp applications requiring a versatile rubber base for various guide O.D.'s.
9	All Teflon	No	High Temperature, durable material for use with machined guides.

MATERIAL SPECIFICATIONS

MATERIAL	MAXIMUM CONTINUOUS OPERATING TEMPERATURE		RECOMMENDED USAGES
	FAHRENHEIT	CELSIUS	
Nitrile	250	121	Low-to-Medium Duty Applications prior to 1975. Excellent resistance to engine oils. Moderate resistance to oil additives.
Nylon	375	191	Medium-Heavy Duty Applications up to the present. Excellent resistance to engine oils and oil additives.
Polyacrylic	350	177	Low-to-Medium Duty Applications prior to 1985. Excellent resistance to engine oils. Moderate resistance to oil additives.
Viton	500	260	Medium-Heavy Duty and Performance Applications up to the present. Excellent resistance to engine oils and oil additives.
Teflon	450	232	Medium-Heavy Duty Applications up to the present. Excellent resistance to engine oils and oil additives.
Teflon and Zinc Chloride	450	232	Medium-Heavy Duty and Performance Applications up to the present. Excellent resistance to engine oils and oil additives.

Valve Train Kits

Pioneer, the innovator of Expansion Plug Kits and a leader in Valve Train Components, brings you the newest concept in kits.

Valve Train Kits are designed to complement your engine part, engine kit and/or rebuilt engine sales.

In the competitive environment which exists today, many engine rebuilders have excluded valve train components from rebuilds - either due to the salvaging of these components or simply to hold

the cost down. Pioneer Valve Train Kits offer the consumer the assurance of new components in a single part number at one low cost.

Complete your engine rebuild or short block installation with quality Valve Train Kits featuring Pioneer Components. Pioneer components are matched for optimum performance and are manufactured to meet or exceed O.E. specifications.

APPLICATION SECTION

This section is arranged as follows:

- 1ST** By Vehicle Manufacturer
- 2ND** By Engine Displacement
- 3RD** Individual Components are alphabetically arranged.

Additional Information:

- Pioneer Performance Part Numbers have been fully integrated into this edition. For the latest applications and specifications, see our Pioneer Performance Product Catalog.
- All numbers listed are **base** numbers. See our latest Engine Parts Price Sheet for Standard Package Quantities.
- Quantity Per Engine is for reference only.

CLUTCH COMPONENTS

- **BROADEST COVERAGE ON COMPONENTS:**
Passenger Car; Light, Medium, and Heavy Duty Truck; Import
- CLUTCH BRAKES
- CLUTCH RELEASE BEARINGS
- COVER ASSEMBLY KITS
- NON-ASBESTOS CLUTCH FACINGS
- PILOT BEARINGS AND BUSHINGS
- UNLINED CLUTCH DISCS

ENGINE COMPONENTS

- EXPANSION PLUGS & KITS
- SPECIALITY ENGINE PARTS
 - Fasteners
 - Pipe Plugs
 - Oil System Components
 - Pilot Bushings
 - Harmonic Balancer Repair Sleeves
- OIL PUMPS & COMPONENTS
- VALVE TRAIN COMPONENTS
 - Valve Guides
 - Rocker Arm & Related Items
 - Valve Keys
 - Valve Seals
 - Valve Retainers
 - Valve Springs
 - Push Rods
 - Lifters

HIGH PERFORMANCE

- **CYLINDER HEAD COMPONENTS:**
Complete Valve Train Parts
- **SHORT BLOCK COMPONENTS:**
Expansion Plugs, Fasteners, Oil Pumps, Pilot Bushings, Miscellaneous Components
- **FASTENERS:**
12 Point & Miscellaneous, Rod Bolts & Nuts, Head Studs & Bolts, Main Studs & Bolts
- **MISCELLANEOUS:**
Spring Inserts, Repair Sleeves, Flywheel Assemblies, Tools

SHOP SUPPLIES

- **ABRASIVES:**
Bonded - Grinding Wheels, Stones, Segments, Honers, Diamond Tools
Coated - Sanding, Polishing, Chamfering
- **CUTTERS:**
Carbide, Boring Bar, Files, Rotary, Blade, Box
- **BRUSHES:**
Wheel, End, Cup, Loop, Scratch, Gallery, Cleaning, Brooms
- **CHEMICALS:**
Paint, Adhesives, Aerosols, Cleaners, Solvents, Oils, Sealants, Silicone, Leak Detection
- **FASTENERS:**
Grade 5, Grade 8, Metric, Specialty, Assortments, Thread Repair
- **TOOLS & ACCESSORIES:**
Valve Equipment, Pullers, Crack Repair, Measuring Instruments, Brake Tools, Safety Equip. & Access.
