*"Proud of the past...committed to the future"
is a slogan which accurately reflects Pioneer's heritage and its future.*

Pioneer was founded in 1946 by the late Herman A. Shields, who owned a successful automotive parts manufacturer's representative firm in his hometown of Meridian, Mississippi. He formed the company to service the needs of his clutch remanufacturer customers. His goal was simple: Supply the needed, hard-to-find parts for these businesses.

Little did he know that the company he founded would become a leading supplier of high quality components to the automotive parts aftermarket. For over 30 years under the guidance of the Shields family, Pioneer growth was based upon the twin cornerstones of customer service and reputation of the "Source for hard-to-find parts."

In 1979, Pioneer was purchased by The Barnes Group (Bristol, Connecticut) and the company became known as Pioneer/Barnes. During the Barnes Group's ownership, Pioneer purchased a 10-acre parcel in the G.V. (Sonny) Montgomery Industrial Park and built an 86,000 sq. ft. corporate head-quarters and distribution center on the site.

The product line expanded dramatically during the Barnes years, adding operating cables, flywheels, ring gears, shop supplies and performance parts to the company's mix, while further expanding the clutch, engine parts and water pump lines. Additionally, Pioneer added regional warehouses in Mt. Laurel, New Jersey and Cerritos, California to provide improved delivery service to its East and West Coast customers.

Additionally, Pioneer has made major commitments to its total quality assurance programs. These quality performance processes have been adapted to order taking and filling, distribution and inventory controls, further improving fill rates and on-time delivery.

The distribution facilities have also undergone modernization. In 1995, the Meridian facility's distribution center was expanded, bringing the warehousing space to over 200,000 sq. ft.

In May, 2000, Pioneer bought the new clutch business of L&S and through this acquisition have added New Clutch Kits to form a "5 Star" line-up which includes Powertrain, Transmission Parts, Engine and Transmission Mounts, and Harmonic Balancers...giving Pioneer a strong and competitive package of Driveline related products.

In August of 2010, Pioneer was acquired by the LODI Group with a continued focus on product line expansion and making major investments in product tooling.

For over 60 years, the Pioneer story has been unique. Pioneer's growth has been based upon the philosophy of Herman Shields that success must be based upon customer service and satisfaction. Pioneer's Mission Statement reflects that philosophy:

"We are committed to the success of our customers. Our mission will be to provide customers with quality product and superior service. We believe the dedication of our employees and business partners is our most valued resource."

While the philosophy may seem passé in today's business environment, it has served Pioneer well through over six decades.

It contains Liquid Wax Esters and their derivatives, Base oils and conventional additives.

LUBEGARD® is designed to raise the thermal and oxidative stability level of automatic transmission fluid, so when it operates at elevated temperatures, it does not thin out and pyrolyze/burn or react with oxygen and form deposits.

LUBEGARD® ATF SUPPLEMENT benefits are:

- Transmissions perform more efficiently at lower operating temperatures.
- Anti-chatter in clutch packs (allow overnight penetration for maximum benefit).
- Anti-shudder with converter clutches (allow overnight penetration for maximum benefit).
- Prevents overheating.
- Assists in freeing hung up governors.
- Keeps valves free. Frees stuck valves in valve bodies.
- Provides for smoother shifting and reduced drive train power losses.
- Helps modify harsh shifts and makes them quicker in duration.
- Prevents costly comebacks.
- Maintains proper ATF viscosity in the torque converter.
- Inhibits transmission fluid foaming and oxidation, thereby extending fluid life.
- Reduces transmission wear.

The use of LUBEGARD® ATF Supplement will not cause clutch friction upset or slippage.

LUBEGARD® ATF-HFM is designed only for use with Dexron® II/III fluid in transmissions found in Hondas, Toyotas, Chryslers using 7176 Fluid, and other applications requiring highly friction ATF.

LUBEGARD® ATF-HFM formulation is based on the same patented technology found in LUBEGARD® ATF Protectant that has gained worldwide acceptance in the professional after-market transmission repair industry and Original Equipment Manufacturer (OEM) endorsement.

Dr. Tranny™ Assemblee Goo™

PIONEER NUMBER **T-4004**
T-4004-12

Dr. Tranny Assemblee Goo™ is formulated for use as an assembly aid and lubricant for automatic and manual transmissions. To provide lubrication and facilitate the assembly process, apply to: 'O' rings, seals, bearings, gaskets, sealing rings, bushings and thrust washers.

Assemblee Goo™ will not melt at shop temperatures (up to 130°F) and provides "tackiness" required during the assembly process. Yet it dissolves and solubilizes in transmission fluids at operating temperatures so as not to clog filters.

The green color eliminates misdiagnosing leaks. And it is not harmful with prolonged skin contact.

Dr. Tranny™ Assemblee Goo™ Benefits:

- Provides "tackiness" required during assembly process
- Facilitates and provides lubrication during transmission assembly process
- Dyed green to prevent misdiagnosing leaks
- Will not melt at shop temperatures
- Not harmful with prolonged skin contact
- Will not clog filters

SLIP POSI-TRACTION UNITS

PATENT 5,282,989

PIONEER NUMBER **T-4010**

T-4010 LIMITED SLIP SUPPLEMENT is specifically formulated for the clutches in limited slip differentials. Limited slip differentials depend on the operation of pre-loaded clutch packs on each axle shaft. Gear oils made for standard differentials DO NOT contain the additives that make these clutches work. LUBEGARD® Limited Slip Supplement contains LXE (liquid wax esters), a unique advanced friction modifier to eliminate chatter. It contains rust and corrosion inhibitors to protect bearing and gear surfaces. The LXE also acts as an enhanced heat transfer component to pull heat out of the gear box and clutches more quickly for cooler running units. LUBEGARD® Limited Slip Supplement benefits all makes of vehicles with limited slip differentials including GM, Ford and Chrysler.

DIRECTIONS FOR USE:

Put entire contents of the bottle (4 fl. oz.) into the differential. If necessary, remove enough gear oil to maintain proper level with supplement. Allow 20 miles of road operation for complete mixing.

Remember the final step...

Install an In-Line Magnetic Filter!

Magnet traps damaging metal particles.

PIONEER NUMBER **745119** - 5/16"

PIONEER NUMBER **745200** - 3/8"

Contaminated transmission fluid can ruin even the best rebuild – An automatic transmission produces millions of tiny metal particles caused by normal wear and tear, many of which remain in the cooler. Even the best flusher cannot remove all of the metal. When the vehicle returns to the road after the rebuild, this metal comes loose, contaminating the new fluid.

In modern Front Wheel Drive and Electronically Controlled Transmissions, all of the fluid from the cooler does not return directly to the pan. It returns through the lube circuit and from there it can go anywhere in the transmission. Some will return to the pan, some to the valve body and solenoid valves, also to circuits leading to bearings, clutch plates and seals. This unfiltered fluid can now wreck even the best rebuild. Prevention is always your best policy.

HOW MAGNETIC DUAL FILTRATION WORKS FOR YOU:

With the In-Line Magnetic Filter installed, the fluid first passes over a powerful magnet, which extracts metal particles, regardless of size.

It then passes through a fine pleated paper element which filters out dirt, clutch fibers, and alloys. This unique dual filtration system removes all damaging particles. A specially designed safety by-pass valve maintains full flow under all circumstances.

INSTALLATION TIPS:

- Always install using new cooler hose.
- Never over tighten clamps.
- Recommended to flare metal cooler line, for a totally reliable seal.
